Kansas City dealers are not pushing linseed meal, as they find it easier to substitute cottonseed meal at the existing discount. While Minneapolis mills are holding their product firmly, at \$42.50 per ton, it is possible to buy from resellers at \$41.50. The price of carlots here is \$46.80, the same as a week ago.

Trade in tankage during the last half of May was better than early in the month, yet not active. Prices were unchanged, with carlots at \$50 a ton and ton lots \$5 more. Demand for meat scrap is fair. The quotations are \$55 for carlots and \$60 for tons.

THE VAN DUSEN HARRINGTON WEEKLY CROP REPORT.

There is a great difference of ideas as to the Northwest crop prospects, as shown by the numerous reports being circulated. The unusual cold weather, with freezing temperatures, probably has some effect on the small grain crops, but nothing serious, providing there is sufficient moisture. Fortunately, there have been rains throughout the Northwest, varying from light showers to good, steady downpours. A considerable

improvement is shown in the condition of fields over a week ago.

There is a lack of subsoil moisture and rains will be necessary from time to time. South Dakota, southern Minnesota and local districts in North Dakota and Montana have been most affected by the dry weather. The rains of the last 24 hours will be wonderfully beneficial. While the cold weather has held back the growth of the grain, it is still one or two weeks further advanced than this time last year.

Our reports from the heavier wheat-raising sections indicate a prospect about the same as last year. In the southern half of the territory covered by our reports, the prospects for oats and barley are somewhat below that of last year. It is possible, however, with good rains, to improve this condition.

The rye crop is uncertain. In Minnesota a considerable portion is headed, but the fields show a great variation. Some of it is very short and thin, while occasional fields are much better. In the principal rye counties of North Dakota the rye is beginning to joint.

In South Dakota and the southern half of Minnesota about 80 per cent of the corn is planted, while in North Dakota and northern Minnesota only a small percentage has been accomplished.

In many places farmers have stopped seeding flax because of the dry weather, but the recent rains have improved the soil conditions and seeding will now be resumed. We see no reason why the acreage contemplated some time ago will not materialize. We have reports from a number of points, advising that some flax was undoubtedly injured by frost and some ground will have to be reseeded.

We believe that under favorable conditions from now on the prospects at present on wheat are fully up to those of a year ago. Barley, oats and rye are not quite as good, and flax about the same.—*The Van Dusen Harrington Co., by W. G. Hudson, May 27.*

FEEED MARKETS.
MILWAUKEE.
Milwaukee, May 29.—Demand for mill-feed failed in the Milwaukee market last week and prices for middlings and several other items declined slightly. Interest in future offerings was also small, although several June shipment orders were booked at about \$2 off prompt quotations. Linseed oil meal also declined slightly as a result of no export demand and insufficient domestic request. Current quotations per ton are: Winter bran, \$30.50@31.50; spring bran, \$29.50@30.50; standard middlings, \$31.50@32.50; flour middlings, \$34@35; red dog, \$42.50@43.50; rye feed, \$29.50@30.50; linseed oil meal, \$43.50@44; cottonseed meal, \$42.50@46; hominy feed, \$39.50@40.50; oat feed, \$6.50@7.50; gluten feed, nominal, \$32.80; all in 100-lb. sacks, carlots, f. o. b. Milwaukee.
BALTIMORE.
May 29.—The spot wheat feed situation continues firm under light offerings in near positions, coupled with encouraging advices from primary points of feed production, and a fair demand here. Middlings are commanding an attractive premium over bran. Hominy feed is firmer and in fair demand. Gluten feed not selling very freely. Alfalfa meal unchanged. Dried beet pulp nominal. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$34.50@35; western middlings, per ton, 100-lb. sacks, \$36.50@37; hominy feed, per ton, \$44@45; gluten feed, per ton, \$39@40; alfalfa meal, per ton, \$31@32; dried beet pulp, per ton, \$37.50@38.
BOSTON.
Boston, May 29.—Prompt shipment, per ton: Spring bran, \$36@37; middlings, \$37@

38; mixed feed, \$37.75@44.50; red dog, \$50; hominy feed, \$45; stock feed, \$44.50; oat hulls, reground, \$14; cottonseed meal, \$44.50@51; linseed meal, \$49.25@49.75.
Oatmeal—Per 100-lb. sack, rolled, \$3.05; cut and ground, \$3.35.
Oats—All rail, fancy, 40 lbs., 65@66c; fancy, 38 lbs., 63@64c; regular, 38 lbs., 62@63c; regular, 35 lbs., 61@62c; regular, 34 lbs., 60@61c; lake and rail, fancy, 40 lbs., 62@63c; fancy, 38 lbs., 61@62c; regular, 38 lbs., 60@61c; regular, 36 lbs., 59@60c.

LOS ANGELES.
Los Angeles, May 29.—The ground feed arrivals for the week amounted to 35 cars, the demand very good and prices firm. Utah-Idaho mill run selling at \$40; Kansas bran, \$38; alfalfa meal, medium ground, \$29; molasses alfalfa mixed, \$27; cottonseed meal, \$40; beet pulp, \$41; rolled barley, \$39; copra meal, \$30; linseed meal, \$41.

MEMPHIS.
Memphis, May 30.—Millfeed has been slightly lower for several days than at the present peak, but buyers still are taking very little. Mills are not offering much and some are not offering any. Quotations at the week's close for wheat bran was \$31.50@32 for next week shipment and \$38.50@39 for gray shorts, but first half June shipment offered about \$1 under. Cottonseed meal holds steady, but is no higher, offerings being just about enough to fill the moderate buying requirements. June shipment 41 per cent is quoted at \$38.50 and 43 per cent at \$40.50, with 25c added for July. Alfalfa meal is steady and quiet at \$28@28.50 for medium one. Mills are buying very little.

DULUTH.
Duluth, May 29.—Market in feeds was slow during the last week, with the trade confining their orders to an immediate requirements basis. Further accumulations of stock were reported by millers. Prices in millfeeds are unchanged, but ground feeds were advanced from 50@75c. Closing prices per ton follow: Bran, \$27.50; shorts, \$31; Boston mixed, \$31; red dog, \$43; flour middlings, \$34; ground oats, \$30; No. 1 ground feed, \$39.25; No. 2 ground feed, \$37; No. 3 ground feed, \$34.50; cracked corn, \$43.75; coarse corn meal, \$43.75.

PHILADELPHIA.
Philadelphia, May 29.—Demand for feed-stuffs is moderate, but supplies are very small and prices rule firm. Quotations represent carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$38@39; winter middlings, \$38@44; spring bran, \$36@37; standard wheat middlings, \$38@39; flour middlings, \$41.50@45; red dog, \$49@50; rye middlings, \$36@38; reground oats feed, \$12@13; fine yellow hominy, \$44.50@45; fine white hominy, \$44.50@45; low grade flour, \$50@56; cottonseed meal, 36% protein, \$47@49; cottonseed meal, 41% protein, \$50@51.

MINNEAPOLIS.
Minneapolis, May 29.—The situation here changed somewhat during the past week in that there was considerable drying up in the demand even for the nearby stuff, which has been the dominant feature of the advance and strength which has been maintained for the past two or three weeks.

Local mills are apparently still far behind on their agreements and this fact alone probably was the one thing which offset the lack of real demand.

The trade here are very much up in the air regarding the future trend of events. With bran at \$27 and shorts \$3 higher, it does not look reasonable to expect any further advance and as a matter of fact if present levels hold, many would be well satisfied. Green grass is here and unless the hot sun and winds burn it up, we cannot logically expect a very heavy demand from feeding sources.

Some of the mills expect a fairly heavy flour run to develop and if it does it naturally follows that old contracts will soon be wiped off the books and the mills will be looking for some place to put their surplus mill offal. Those who look for such a contingency to become an actuality say that \$20 bran could easily be seen before the end of June.

Based on today's asking prices, bran was worth \$27; pure bran, \$27.50; shorts, \$30; red dog, \$41@42; flour midds., \$33.50@34.

Weekly shipments of feed total 7,679 tons, vs. 9,792 last week and 10,014 a year ago. Season shipments, since Jan. 1st, were 239,685 vs. 296,074 a year ago; since Sept. 1st, 486,358 vs. 567,478 a year ago.

SHOULD BE IN ALL MASH FEED

Feed manufacturers who study the reports from Agricultural Colleges and Poultry Experimental Feeding Stations are quick to realize the important role that Dried Buttermilk is playing in poultry feeding. It is a fact that Dried Buttermilk is now practically accepted as an indispensable and most necessary adjunct to all mash feeds by poultry raisers and poultry experts.

BULLETIN 258

Indiana State Experiment Station

Form of Buttermilk	Eggs Laid	Cost per Dozen
Dried.....	189.4	16 Cents
Liquid.....	164.7	16 Cents
None.....	56.6	33 Cents

You can't ignore this

If you are a manufacturer of mash feed for growing and developing baby chicks, egg production in hens and pullets, or fattening fowls for market, you must consider the "handwriting on the wall," viz: public demand for Collis Process Pure Dried Buttermilk in all mash feeds. Collis Process Pure Dried Buttermilk is manufactured under our patented process which retains all feeding elements and lactic acid found in freshly churned pasteurized buttermilk. Write for further data, authentic feeding reports, cost figures and prices.

SAN FRANCISCO.

San Francisco, May 28.—Barley, ground, \$38@40; oats, rolled feed, \$42@43; mill run, \$41@44; linseed meal, \$50@54; alfalfa meal, \$26@29; Egyptian corn, \$55@60; beet pulp, \$38@40; scratch feed, \$62@64; molasses alfalfa meal, \$29@30; barley, rolled, \$38@40; bran, \$40@43; middlings, \$53@56; cocomeal, \$35@36; milo maize, \$48@50; cottonseed meal, \$55@58; cracked corn, \$56@58; feed corn meal, \$29@30.

ST. LOUIS.

St. Louis, May 28.—About steady, with hard bran quoted nominal at \$30.50 and gray shorts at \$35@36 for immediate shipment. Sales: 5 cars mixed feed at \$33.75 and 2 cars do at \$34, prompt shipment; also, direct sales by mills—1 car bran (next week's shipment) at \$31.40, 500 sks. do at \$32, 1 split car bran at \$32 and white middlings at \$40. Oat feed firmer: 100 tons sold at \$8.50 and 1 car at \$8.40 to go out and 1 car (immediate shipment) at \$8.25 local. White hominy feed (sacked) quoted at \$41.

Alfalfa meal—No. 2 in s. h. sks. offered to arrive at \$21, No. 1 in s. h. sks. at \$26 and choice at \$27.50 in s. h. and \$28 in new sks. and No. 2 quoted otherwise at \$22 in s. h. and \$22.50 in new sks.

NEW YORK.

New York, June 1.—Western feed was reduced a trifle at the end of the week, this being for prompt shipment offerings, but otherwise the general market situation was unchanged. City feed held well, with nothing worth while offering for either prompt or nearby shipment.

Quotations were as follows: City bran, \$36; middlings, \$38.50, in 100-lb. sacks; red dog, \$50.50, nominal, in 100-lb. sacks; western spring bran, prompt shipment, \$35.10; standard middlings, \$37.50; flour middlings, \$43.50@44; red dog, spot, \$50@51, all in 100-lb. sacks, all-rail and lake-and-rail shipments; rye middlings, \$36; white hominy feed, \$45, all in 100-lb. sacks; cottonseed meal, 36 per cent protein, \$44.50; linseed oil meal, \$49.25, in 100-lb. sacks.

FEEDSTUFF SITUATION.

With the closing out of May, mill-feeds apparently are a little easier. More sellers' interest than buyers. Buyers are only interested in immediate quick prompt unless substantial discounts can be obtained for future shipments, which is not apparent at this writing. With protracted dry weather, an increased demand for dairy feed might develop very shortly.

MINNEAPOLIS.—Bran, \$27; standard middlings, \$30.50; flour middlings, \$32; red dog, \$41.

CHICAGO.—Bran, \$29.60; standard middlings, \$33.10; flour middlings, \$34.60; red dog, \$43.60.

KANSAS CITY.—Bran, \$26.50; gray shorts, \$32.50.

ST. LOUIS.—Bran, \$28.90; gray shorts, \$34.90.

ALFALFA MEAL.—Demand sufficient to take care of any offering. Nominally quoted new bag basis, choice \$30; No. 1 \$28; No. 2 \$22. Fine ground grades \$3 a ton premium.

REGROUND OAT FEED.—Supply and demand limited with prices unchanged and buying featureless. Reground oat feed, \$6 to \$7; unground oat hulls, \$7 to \$8.

HOMINY FEED.—The demand slightly in excess of the supply for good quality, and high fat content. Nominally quoted white, \$42 to \$43; yellow, \$40 to \$41. In bulk where available \$1 to \$1.50 a ton less.

LINSEED OIL MEAL.—Marking time with little more sellers' interest on the part of jobbers, with mills holding firm and no anxiety for new business. Nominally quoted Chicago, \$43 to \$44 sack; \$1.50 to \$2 a ton less in bulk.

DRIED BUTTERMILK.—Demand is very strong and practically no cars are available. No quotations at this time are therefore being made.

COTTONSEED MEAL.—The market is firm and demand fair. Today's quotation for 43 per cent protein, Chicago basis, is \$45.50.

PACKERS' PRODUCTS.—There is a good demand for packers' products and prices are quite firm. Today's quotations are as follows: Meat scraps in carlots f. o. b. Chicago, \$55 per ton; 60 per cent protein digester tankage, \$50, with raw bone meal unchanged at \$50.

GLUTEN FEED.—In bulk \$30 a ton, sacked \$32.80. Gluten meal of 40 per cent protein \$42.80 in sacks and \$40 in bulk.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

Eleven states showed export totals amounting to over \$100,000,000 for the year 1924. They were Texas, with figures of \$737,218,927; New York, \$731,593,502; Pennsylvania, \$293,299,153; Illinois, \$239,314,270; California, \$234,684,210; New Jersey, \$223,921,264; Louisiana, \$22,847,224; Michigan, \$177,876,654; Virginia, \$150,198,225; Ohio, \$133,559,362, and Massachusetts, with merchandise valuations or \$114,418,430. Minnesota, with shipments valued at \$99,880,490, was just outside of the first eleven, while Nevada, with exports amounting to but \$233,413, brought up the rear of the entire list.

DIAMOND HULLER CHICAGO OFFICE.

Julius A. Gerwen is now covering Chicago territory with headquarters at 9 S. Clinton St., where he recently opened an office for the Diamond Huller Co. of Winona, Minn. Everyone knows Mr. Gerwen, who has been at all close to the feed milling trade in recent years. He is a practical engineer and carries a pleasing personality into all of his business transactions. THE PRICE CURRENT-GRAIN REPORTER is glad to welcome him to Chicago and to join his many friends in wishing him immediate success in his work. This will include territory in several states where mixed feed production and custom grinding has become so general, and for which the equipment manufactured by the company is well adapted.

FEEDER MOVEMENT.

The following tables show the movement of stocker and feeder cattle and sheep from the markets named during April and the first four months of 1925, with comparisons for the corresponding periods of 1924. Compiled by John Clay & Company:

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

Promptness is the "Punch" That Promotes Sales—

Or, as one advertiser "dubbed" us, we are the P-rompt C-oming Grain Reporter,

Alfaifa Department

No Alfaifa Grown.

Price Current-Grain Reporter: Practically no alfalfa grown in S. W. Virginia. We sell probably 25 bushels per year to our local trade. Are therefore not informed as to this crop.—*Tate, Eller & Co., Inc., Chilhowie, Va.*

Now Marketing New Alfaifa.

Price Current-Grain Reporter: First-cutting alfalfa is arriving on our market from Imperial Valley and San Joaquin Valley points and the quality runs from very good to very poor. Late rains in the San Joaquin Valley damaged some hay that was down. Therefore, there has been much off-grade hay shipped and the low prices it has been bringing have affected all grades. The market for No. 1 alfalfa is approximately \$21.00 f. o. b. cars Los Angeles.

Regarding the grain hay situation, the farmers are now beginning to harvest their grain hay crop throughout the state and we anticipate bumper crops this season. Late rains throughout the state have guaranteed good crops, the outlook for which two months ago was very discouraging. No. 1 oat hay is now quoted at \$21.00 to \$22.00 per ton f. o. b. cars Los Angeles, and barley hay at \$20.00 per ton. We do not look for higher prices but think that prices will be considerably lower in the next thirty to sixty days.—*Nicholls Grain & Milling Co., A. M. Thayer, Purchasing Department, Los Angeles, Calif., May 21.*

When you have something on your mind—a query or news or a suggestion of interest to the grain trade, write it out and send it to THE PRICE CURRENT.

ALFALFA MEAL MARKET.

KANSAS CITY, May 29.—Although a few cars of new hay were taken this week by a local manufacturer of alfalfa meal, the purchase was for special use. Commercial millers do not expect to grind new hay generally before July or August. Present demand for meal is limited, though better than some time ago. Mills are showing fair operations on old and new orders. Buying is scattered. As old hay is the basis, no price changes in meal were announced. The market for carlots is quoted, per ton, as follows: Choice, \$26.50@27.50; No. 1, \$24@25; No. 2, \$19@20; No. 3, \$18@19.

Dry grain and grain-molasses feeds exhibited a broader trade interest this week, though poultry and equine mixtures kept the lead, as for some time back. Manufacturers were in a more cheerful mood. Prospective relief from local switching charges was one source of comfort. Scratch poultry feeds were marked up \$1 a ton, but there were no other price changes. The market on the various products is quoted as follows, basis of carlots, per ton: Dairy feeds, \$35@46; cattle, \$39@44; hog, \$45@51; pig, \$68; horse and mule, \$33@43; alfalfa-molasses, \$26@32; scratch poultry, \$49.50@56; mash poultry, \$49@76.

ARBITRATION AWARDS.

Arbitration Committee No. 3 of the Grain Dealers' National Association has made the following awards:

Rogers Grain Co., Chicago, vs. Globe Elevator Co., Buffalo, the question at issue being the quality of two cars of oats, sold by the complainant to the defend-

ant and the former was awarded a verdict of \$346.56, the cost of the arbitration also being assessed against the defendant.

D. A. Stickel & Sons, Hagerstown, Md., vs. John Wickenhiser & Co., Toledo, the controversy arising from an error in a code word used in a telegram offering No. 3 white oats. In this case, damages amounting to \$56.25 and arbitration costs were assessed against the defendants.

OHIO MILLERS OPENS EASTERN DEPARTMENT.

The Ohio Millers Mutual Fire Insurance Company has opened an eastern department in New York City at 123 William street, under the direction of W. H. Adderly from the executive office of the company at Chicago and is now soliciting business in the Metropolitan territory. The Ohio Millers Mutual has been in business nearly forty years. For a long time it specialized on mill and grain risks, but is now writing a general business. While its legal home office is at Canton, Ohio, its head executive office has been at Chicago since J. C. Adderly became its president two or three years ago.

FARM LOAN FORECLOSURES.

The state of North Dakota has acquired 62,110 acres of farm land through foreclosures on land given as security for farm loans negotiated from the farm loan department of the Bank of North Dakota.

The great bulk of this land came to the state as a result of loans made by the Nonpartisan league administration.

The records show that of the total amount of foreclosures, 183 loans, totaling \$875,000, were made up by the Nonpartisan league administration, while seven loans, totaling \$20,700 were made by the Independent administration of the bank.

The department is seeking to sell or rent all of the land in order to gain an income and prevent losses in the settlement of loan accounts.

The farm loan department loaned \$896,200 on the lands which it has been necessary to take by foreclosure, because of nonpayment of interest and principal. The land reverts to the state on foreclosure and becomes exempt from any taxation, a fact which has brought complaint from some counties.

MOLASSES HEATERS

The Ellis-Edwards Molasses Heater has met with exceptional popularity among molasses feed manufacturers because:

It will heat the molasses to any desired degree and automatically maintain the temperature.

If the flow of molasses stops the heating also stops thus preventing overheating with consequent caking on the pipes.

Molasses surrounds the heating pipes and does not pass through them.

The easiest heater ever constructed for cleaning.

Can be operated on high or low pressure steam.

A very complete bulletin descriptive of the Ellis-Edwards Molasses Heater will be mailed on request. Ask for bulletin No. 43.

CHICAGO

Hay Department

Hay in Arizona.

Price Current-Grain Reporter: Late grazing by sheepmen consumed the major part of the first hay crop, but the second crop will be up to normal, while the season's crop will not be up to normal on account of using the reservoir water for large cotton crop.

No. 1 hay is selling at \$15.00 f. o. b. loading points. California and Texas not taking the usual amount of hay. Should we have summer rains the tonnage of alfalfa hay will be greatly augmented.—N. L. Nowell, Gilbert, Ariz., May 16.

MICHIGAN HAY BULLETIN.

In its bulletin No. 6, the Michigan Hay & Grain Association calls particular attention to the organization's 24th annual convention which is to be held in the Hotel Fuller, Detroit, on July 27. Among the speakers will be Prof. Holden, formerly dean of agriculture of Ames College, Iowa, but now with the International Harvester Co., who will talk on "Alfalfa Culture." Professor Rather of the Michigan State College will speak on "The Use of Good Seed."

HAY MARKET REVIEW.

The hay market averaged slightly easier during the week ending May 29, although light receipts at some points caused local firmness, according to the weekly hay market review of the United States Department of Agriculture. The demand was slack with light shipments to coal mines and to the Southern trade and the moderate offerings were ample for current needs. The movement of new alfalfa increased and quotations at several markets were shifted to a new crop basis.

Pastures and meadows were benefited by showers in the upper Ohio valley and the Atlantic coast states, and some improvement was noted in the East gulf districts. Grass lands need rain, however, in most central and eastern portions of the country, and growth was slow in much of the north because of both dryness and low temperatures.

Trade reports from California indicate that recent heavy rains had damaged the first cutting of alfalfa and that much of the grain hay had become so matured that it would have to be cut for grain.

Timothy ruled easier. Receipts were heavier at Boston, although prices were not quotably lower. Stocks at Philadelphia were increasing. The shipping trade was dull at Cincinnati with interior points competing for the Southern business and prices declined about 50 cents. Small offerings held the Chicago market firm with a brisk inquiry for hay grading No. 2 or better. Good hay sold readily at steady quotations at St. Louis, but the demand was very slow at Kansas City.

Alfalfa prices average slightly lower with a small shipping inquiry. Receipts were light at Omaha and the offerings were well cleaned up at unchanged quotations. The market at Kansas City was easier with the mills buying sparingly and the dairy and shipping trade taking only limited amounts. New crop alfalfa was arriving in unusually good condition.

The prairie market was practically unchanged. A few cars of good quality prairie could have been absorbed at Chicago where hay was scarce and the market at St. Louis and Minneapolis and St. Paul held steady. Prairie was firm at Omaha on scanty offerings of top grades and ruled steady at Kansas City with the demand matching the light arrivals.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

V. K. Spellman, secretary of the Kansas City Hay Dealers' Association, is enjoying a vacation of two weeks. His work as inspector of hay is being carried on by F. L. Bruner, assistant inspector.

D. B. Tilson of Dyer & Co. estimates the first-cutting alfalfa crop as follows, compared with last year's yield: Kansas, 50 per cent; Oklahoma, 30 per cent; Nebraska, 40 per cent.

J. M. Hail of J. M. Hail & Co. spent much of his time this week at St. Joseph's hospital on account of an operation to which his wife was subjected.

C. D. Williams of the Southern Hay Co. says this year's first cutting of alfalfa in the Southwest is the best in quality he ever saw. Judging from the movement, he assumes that farmers are satisfied with prices.

Kansas City receipts of hay and straw in May were 1,007 cars, as compared with 1,473 in April. A year ago the May arrivals were 1,321 cars. During May, 1925, the offerings included 546 cars of alfalfa, 330 cars of prairie, 99 cars of timothy, 19 cars of clover mixed, 4 cars of clover and 9 cars of straw.

Live Stock Exchange Kansas City, Mo.

The Ralston-Purina Mills was the first local manufacturer of alfalfa meal to begin using new hay this year. Seven cars of choice No. 2 were taken by the Ralston-Purina people in one day this week. No other local mills bought any new hay. It is not often that new hay is sufficiently dry to be available for grinding in May, but the cars taken were selected.

The Kansas City market for alfalfa hay went on the new crop basis last Monday, owing to predominance of the 1925 product in the offerings. Kansas is furnishing practically all of the receipts, but a little is coming from Nebraska and Oklahoma. This year's crop of first cutting is exceptionally fine, due to the fact that cold weather in early May checked the growth and prevented rankness. Weight was also cut down, as the hay lacks the usual steminess and moisture of the early crop. Reports from the country say the yield is running around three-quarters of a ton per acre, whereas in 1924 it was 1½ tons.

New clover-mixed timothy hay is expected by C. F. Arnold to make its initial appearance in the Kansas City market about June 20. Mr. Arnold's advice regarding the Missouri crops of timothy and clover are not entirely favorable, as drouth has been effective in some of the good growing territory. "However," said Mr. Arnold one day this week, "there probably will be sufficient surplus hay to meet the decreasing demand. The old hay is not all marketed and holders are pressing it for sale."

N. C. Campbell, president of the Kansas City Hay Dealers' Association, was notified this week that the federal grades for alfalfa hay would be promulgated in June. It will be optional with dealers as to whether they desire their hay graded officially or not. Ninety per cent of the alfalfa hay received in Kansas City is shipped and will not require a federal grade. Buyers who want official grading and are willing to accept hay on that specification alone will be accommodated.

Regarding a suggestion that some of the fine new alfalfa hay being marketed in Kansas City could be stored profitably, Lloyd Faris said: "Though this year's crop may be an exception, because of its unusual dryness, I have never regarded the storing of first-cutting alfalfa as advisable. First-cutting hay generally loses its bright green color in store and becomes brown. The later cuttings are saved in hotter weather and are usually more thoroughly cured before baling."

HAY MARKETS.

NEW YORK.

May 28.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

Receipts for week, tons....	1,151	Hay.	Straw
Receipts last week	1,255	14	36
Receipts from Sept. 1.....	45,539	1,002	

Included in the receipts for week, as shown above, are 300 tons for export.

There is practically no change in the level of values as compared to last report, but there seems to be a better feeling prevailing. Moderate receipts with the usual moderate month-end demand has held prices steady to firm at the close, the exception being to some early track offerings, the prices on which were cut to check heavy demurrage charges.

On the whole, offerings show a considerable reduction as compared with one week ago. There is a call for top quality large bale timothy, which class is in light supply and firm.

Common stock is meeting with very slow disposition, the few sales being effected with difficulty.

Rye straw in light supply and more active demand.

New invoices reported light.

Federal grade quotations for large bales are as follows:

Timothy—No. 1, \$25; No. 2, \$22@23; No. 3, \$18@20. Light clover mixed—No. 1, \$22@24; No. 2, \$18@20; No. 3, \$16@17. Medium clover mixed—No. 1, \$18@20; No. 2, \$16@17. Light grass mixed—No. 1, \$22@

24; No. 2, \$18@20; No. 3, \$16@17. Heavy grass mixed—No. 1, \$14@15. Rye straw—No. 1, \$18@19.

KANSAS CITY.

May 29.—The influx of new alfalfa hay accounted for an increase of 60 cars in total hay receipts this week. Other kinds of hay showed lighter runs. Aggregate arrivals for five days were 293 cars, as compared with 233 for a similar period a year ago and 153 a year ago. No market was held on Memorial day.

Owing to the predominance of new crop product in the offerings, market prices were readjusted on Monday to a level reflecting the normal discount under the old crop basis. No material changes occurred thereafter. As a rule, the hay was dry with good color, leafy and free from rank growth. There were very few instances of heating cars. No really fancy hay was received. There was a fair demand for the better qualities of standard and No. 1 shippers were the best buyers. Though one local mill bought some good hay for use in its high grade feeds, other mills ignored the new hay and awaited a cheaper basis on the second or third cutting. The week's receipts were 196 cars, against 97 a week ago and 37 a year ago. Prairie hay moved lightly, only 68 cars showing in the arrivals. While the demand was not large, all sound hay sold readily for shipment and locally. The market was not notably changed as to prices.

More than half of the receipts of timothy, clover mixed and clover came in on Monday. Timothy formed the bulk. Later the offerings of all kinds were very small. There was a fair scattered demand with no price changes. Receipts were 29 cars.

Two cars of straw were numbered in the arrivals, but they were applied on contracts. The market was nominally unchanged.

Carlots of hay and straw are quoted as follows, per ton, f. o. b. Kansas City:

Alfalfa—Choice, \$18.50@20; No. 1, \$17@18; standard, \$14.50@16.50; No. 2, \$12.50@14; No. 3, \$8@12.

Prairie—No. 1, \$10@12; No. 2, \$8@9.50; No. 3, \$5.50@7.50; packing, \$4@5.

Timothy—No. 1, \$14.50@15; standard, \$13@14; No. 2, \$11.50@12.50; No. 3, \$9@11.

Clover mixed—Light, \$14@15; No. 1, \$12.50@13.50; No. 2, \$9@12.

Clover—No. 1, \$9.50@12; No. 2, \$7@9.

Straw—Wheat, \$8@8.50.

BALTIMORE.

May 29.—There is a very quiet tone to the general hay market and what little demand that prevails is centered entirely on the better grades of timothy and choice light clover mixed. Medium and low grade hay in free supply and hard to move at any price. Straw of all descriptions holds its own in price under light spot stocks, moderate receipts from day to day, and a fair jobbing demand. Quotations follow: No. 2 timothy, \$18.50@19; No. 3, \$15.50@17; No. 1 light clover mixed, \$17.50@18; No. 1 clover mixed, \$17@17.50; No. 2, \$15@16. Straw—No. 1 straight rye, \$18.50@19; No. 1 wheat, \$15@15.50; No. 1 oat, \$15.50@16.

DULUTH.

May 30.—Trade in hay was lifeless here during the last week. Buying was curtailed from every quarter and jobbers continued to advise customers to ship in only the best grades of hay as disposition of the lower grades was found difficult. Closing prices are unchanged per ton, as follows: Timothy—No. 1, \$16; No. 2, \$15. Mixed timothy—No. 1, \$15; No. 2, \$10. Prairie—No. 1, \$16; No. 2, \$13; No. 3, \$11. Midland—No. 1, \$10; No. 2, \$8. Straw—Rye, \$9; oat, \$8.

MEMPHIS.

May 30.—Receipts of hay were light for the week, as buyers are taking only requirements. The continued dry spell has damaged pastures, but apparently has had little effect yet on demand for hay. Timothy is firm and slightly higher, quotable at \$23@23.50 for one, \$21@21.50 for two. Old alfalfa is scarce and holds steady, receipts being light, but most of that now being received is new crop, chiefly from southeast Missouri. It is fairly good in quality, but some is heating. It is quotable at \$21 for one, \$20 for standard and \$19 for two.

MILWAUKEE.

May 29.—The hay market continued dull with prices nominal and unchanged at Milwaukee last week. Current quotations per ton f. o. b. Milwaukee are: No. 1 timothy, \$14@15; No. 2 timothy, \$12@13; No. 1 mixed, \$13@15.50; No. 2 clover mixed, \$11@12; sample hay, \$6@8; marsh feeding, \$10; packing, \$9; rye straw, \$9@10; oat straw, \$9@10.

PORTLAND, ORE.

May 28.—Buying prices f. o. b. Portland: Alfalfa, \$19@20 ton; valley timothy, \$20@21; eastern Oregon timothy, \$23@24; clover, \$16.50@17; oats, \$19@20; oats and vetch hay, \$19.50@20.50; straw, \$8@8.50.

LOS ANGELES.

May 28.—The hay receipts for the week amounted to 198 cars, the market firm, and the prices remain unchanged. No. 1 alfalfa hay selling at \$21@22; No. 2, \$19@20; No. 1 barley hay, \$19; No. 1 oat, \$21.

BOSTON.

May 29.—No. 1 timothy, \$25.50@26; No. 2 timothy, \$22@24; No. 3 timothy, \$17@19; eastern, \$16@23; clover mixed, \$21@24. Straw—Rye straw, \$21@22; oat straw, \$13.15.

TOLEDO.

June 1.—Hay needs rain most everywhere and as one dealer expressed it, "It also needs some demand to clean up stocks at terminal markets and on the farms." If this year's crop should run short the ex-

ing stocks will be plentiful for ordinary eeds so the price trend is not likely to be ffectcd. Reports from Canada tell of poor prospects there and rains needed soon to take even a fair crop. The prices last eek were unchanged, with a dull demand and shipments nil.

Prices for last week were the same as e preceding week: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13.50; No. 1 heavy clover mixed, \$12.50; No. 1 red clover, \$11; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$20; sound dry wheat straw, \$8.50; sound dry oats straw, \$8, f. o. b. Toledo.

PHILADELPHIA.

May 29.—The market for hay is quiet and the limited arrivals are ample to supply trade needs. Prices were unchanged. Straw was in small supply and the market was steady, but there is little trading.

Hay, federal grades: Timothy—No. 1, nominal; No. 2, \$18@19; No. 3, \$16@17; ample, \$10@15. Light clover mixed—No. 1, \$17@18; No. 2, \$15@16; No. 3, \$12@14. Medium clover mixed—No. 1, \$15@16; No. 2, \$13@14. Heavy clover mixed—No. 1, \$14@15. Light grass mixed—No. 1, \$17@17.50. Straw—Straight rye, \$15@15.50; wheat, \$15@15.50; oat, \$14@14.50.

OMAHA.

May 29.—Prairie hay: Receipts light. Demand steady to good on better grades. Prices stronger account light receipts. Poor hay slow sale at any price. Alfalfa hay: Receipts fair. Demand good for all grades if sound, but out of condition and grassy hay hard to move. Prices stronger. Prices below are for carload lots: Upland prairie—No. 1, \$11@12; No. 2, \$8.50@10; No. 3, \$7@8. Midland prairie—No. 1, \$10.50@11.50; No. 2, \$8@9.50; No. 3, \$6@7. Lowland prairie—No. 1, \$6.50@7.50; No. 2, \$5@6. Choice alfalfa, \$18; No. 1, \$16@17; standard, \$12@15; No. 2, \$9@11.50; No. 3, \$7@8. Straw—Oat, \$7@8; wheat, \$6@7.

CINCINNATI.

June 1.—Hay receipts were not large during the past week, but were excessive for the present restricted demand, and an easier and lower market resulted. The active buying was largely attributed to the lack of shipping orders—the trade feeling the effects of the direct selling of upstate shippers to the south on a basis difficult to compete with by local interests. The market also evidenced a holding off attitude of buyers who expected a further break in prices following the holidays because of accumulated offerings. No. 1 timothy, \$16@17; No. 2, \$15.50@16; No. 3, \$13@14; threshed, \$8.50@10; no grade, \$8@10; No. 1 heavy clover mixed, \$14@15; No. 1 light clover mixed, \$15@16; No. 1 clover mixed, \$14@15; No. 2, \$12@13.50; no grade, \$10@11; No. 1 clover, \$15@15.50; No. 2, \$12@13; no grade, \$8@9; No. 1 second cutting alfalfa, \$18@19; No. 2 second cutting alfalfa, \$15@16.50; No. 1 first cutting alfalfa, \$16@17; No. 2 first cutting alfalfa, \$12@14; sound sample grassy hay, \$9@10; wheat straw, \$9.50@10.50; oats, \$9@10; rye, \$13@14.

CHICAGO.

June 1.—Offerings were fair and demand good. No. 1 timothy was quotable at \$21@23—outside for choice. No. 2, \$17@19; No. 3, \$13@16. Timothy and clover, light mixed—No. 1, \$19@21; No. 2, \$16@18. Heavy mixed—No. 1, \$14@16; No. 2, \$12@13. Timothy and grass, light mixed—No. 1, \$17@19; No. 2, \$14@16. Heavy mixed—No. 1, \$15@16; No. 2, \$12@13. Clover—No. 1, \$14@15; No. 2, \$11@12. Mixed grass—No. 1, \$13@15; No. 2, \$11@13. Oklahoma, Kansas, Nebraska and South Dakota prairie hay, \$13@16. Marsh hay, feeding, \$11@13. Marsh hay, packing, \$11@13.

Sales were: On track: No. 1 timothy, 1 car at \$23. Timothy and clover, light mixed, No. 2—4 cars at \$16; light mixed No. 3—1 car at \$13; medium mixed No. 2—2 cars at \$15.

Rye straw quotable at \$10@12, oat straw at \$8@10, wheat straw at \$8@10.

ST. LOUIS, MO.

June 1.—The arrivals of hay on both sides of the river were liberal for a Monday, on account of two days' receipts, mainly of medium and low grades. The market continues to be steady on the best qualities of timothy and light clover mixed. Other grades more or less neglected.

Clover—No demand. None arriving. Poor grades unsalable.

Alfalfa—Choice qualities in fair demand. Other grades more or less hard to place.

Prairie—Good qualities selling fairly well. Medium and lower qualities still difficult to place.

Straw steady.

No. 1 timothy, \$21@22; standard, \$19@20; No. 2, \$15@16; No. 3 and sample, \$10@12; No. 1 clover mixed, \$17@18; No. 2, \$13@14; heavy mixed, \$14@16; No. 1 clover, \$16@17; No. 2, \$12@13; threshed hay, \$9@10; choice alfalfa, \$24@26; No. 1, \$22@24; standard, \$16@18; No. 2, \$13@15; No. 1 prairie, \$15@16; No. 2, \$12@14; rye straw, \$9@10; wheat straw, \$8.50@9.50.

CHICAGO HAY NOTES.

Receipts 99 cars. These arrivals are for over the holidays, including Monday, and while apparently heavy are in reality only moderately so, and prices held about steady. We look for a lighter run tomorrow, and it being the first of the month there should be a fair demand, and we hope to clean up the market without much change in prices.—E. W. Bailey & Co., Inc.

There was a good trade out and all

offerings sold, but in some cases at a reduction in prices, especially on the No. 2 timothy and No. 2 light mixed which constituted bulk of the arrivals. The offerings on the market this morning were of course two days' arrivals. We are therefore likely to see much lighter receipts tomorrow. We, however, look for a more liberal movement of hay this month than we had during May.—Albert Miller & Co.

The condition of the new hay crop is disquieting, and if the drought continues the result will be serious. The three days' receipts here were not overheavy, and there was some good buying, caused largely by the poor crop prospect. It looks as though country loading would be markedly less from this on.—Bridge & Leonard.

WAREHOUSE RECEIPTS.

Politics will play no part in the administration of the Federal Warehouse Act, according to officials of the Department of Agriculture, following a conference of all Government men who are charged with carrying out its provisions. The law gives to the farmers a handy vehicle to use in bringing about a more even distribution of their products and its big purpose is to develop a form of warehouse receipt which will be acceptable generally to bankers as security on loans for products in storage.

With the coming of Secretary Jardine into office the banking interests of the country were interested to know his attitude toward the administration of the law. It is declared that the attitude of his predecessors was most favorable and now his statements, contained in an address to the conference indicate that the department's policies will be continued and strengthened.

Close Supervision Necessary.

In order that the law shall be administered on a sound basis and that nothing is left undone to give the farmer who patronizes a Federally licensed warehouse the best form of warehouse receipt obtainable, Secretary Jardine emphasized the necessity for these men to supervise closely and rigorously the licensed warehouses. He pointed out the need for thoroughness in making investigations of warehousemen who apply for licenses under the law and then stressed the need for thorough supervision after warehousemen have been licensed. He referred to the inspections of warehousemen after being licensed as "the backbone of the Warehouse Act" and said that these inspections "are just as important as examinations made by the National Bank examiners under the National Banking Act."

"I cannot overestimate the matter of these subsequent inspections if the integrity of your work is to be maintained at its present high point," he said. "We get an idea of the importance of these inspections from the knowledge that in one of our cotton districts last year approximately 1,650,700 bales of cotton were handled, with a conservative estimated value of \$206,337,500."

Federal Licensed Warehouses Used.

Of the thirteen cotton growers' co-operative associations operating on a state-wide basis, eleven are storing their cotton only in Federally licensed warehouses, and all the big tobacco growers' associations, with one exception, are using these licensed warehouses exclusively, as are the Southwest Wheat Growers, the Kansas Wheat Growers, the Indiana Farm Bureau Wheat Growers and the Pacific Coast Wool Growers.

"Banks are depositories of money," continued Secretary Jardine. "Warehouses under the Federal law are depositories of agricultural products. As far as responsibility in supervision is concerned there is little difference between them."

H. S. Yohe, who is in charge of administering the law, went into details of the plan of the Department of Agriculture for improving the work of the service. While there is a constantly increasing interest on the part of the

growers and of warehousemen in the law, he declared that if the farmers want to obtain its full benefits, if they want to store their products and thus market orderly, they must insist that the warehousemen with whom they store shall give them a warehouse receipt issued under authority of this law. These receipts, he said, will be found to be acceptable by any banker, they will mean ready credit at fair rates of interest.

COTTON NOTES

Cotton in Other Countries.

Cold and windy weather has delayed the growth of cotton in Egypt, according to advices received from the International Institute of Agriculture at Rome. Private reports state that unusually extensive replantings have become necessary. It is now estimated that 2,230,000 acres are planted to cotton.

It is also reported than an increase over last year is likely in the 1925-26 crop of the growing area devoted to cotton near Ciudad Juarez, Mexico. Planting is now under way, and a crop of 8,000 or 9,000 bales is estimated.

Despite excessive rains, it is expected that the Rhodesian cotton crop will be a good one, it is reported here. In Eastern Uganda many plants have been uprooted and food crops substituted because of cold and wet weather during the first half of January.

Standard Cotton Bale Tare.

The action of the conference of cotton shippers and manufacturers of bagging and ties, held at the U. S. Department of Agriculture, paves the way for a standard cotton tare of twenty-one pounds in place of the irregular tare now the case.

In its statement the department predicts that the use of two-pound bagging will be general after this year through the agreement of the bagging manufacturers with the Department of Agriculture not to manufacture other than that standard for stock after 1925.

Inasmuch as it was generally believed that it is preferable for standard bagging to be cut in three or six-yard lengths, there is practically established twelve pounds of bagging as the standard covering of the gin bale.

And inasmuch as the standard agreed upon for ties, including buckles, is forty-five pounds per bundle of thirty, six being the customary number per bale, the added weight will be nine pounds, or a total of twenty-one pounds per bale tare.

The First Bale.

The Price Current-Grain Reporter: Our first bale of cotton this year will most likely be shipped the first week of June and when we say the Valley's first bale, that means also the world's first bale. Corn will begin to move from here next month and what there is planted looks mighty good. Our acreage in the Lower Valley planted to corn is small because we can use our land here to much better advantage. What we do raise of corn, however, we beat the whole United States to the market.—Tex-Mex. Trading Co., Brownsville, Tex.

The Railroad's Value to the Farm.

Elisha Lee, vice-president of the Pennsylvania Railroad System, in a recent address at the American Institute of Steel Construction, in speaking of the effect of the railroads on farming and on farm values made use of the following interesting facts and figures:

"The portion of the United States lying north of the Ohio and Potomac Rivers and east of the Mississippi contains only about 15 per cent of the country's total area, but more than 50 per cent of its people and an overwhelming proportion of its industries. With so vast a population to feed, it might be supposed that farm lands in this region would rise to almost prohibitive values and that a large proportion of those engaged in agriculture would try to crowd within its limits.

"As a matter of fact, only 25 per cent of the farming population lives in this region and the remaining three-quarters are located west of the Mississippi and south of the Ohio and Potomac Rivers. Transportation has made the resources of all those vast areas available to feed and clothe the industrial northeast. At the same time improved farm land in the northeast averages a lower price per acre than in such a dis-

Chicago New York Company

inctively agricultural state as Iowa, despite the latter's distance from the great eastern markets, and the fact that it produces far more than its own population can consume.

"What this all means is that railroad transportation makes it possible to carry on the manufacturing industries where they can be best and most efficiently conducted, and at the same time raise the bulk of the country's crops in the sections where climate, soil and the topography of the land give the greatest yield in products for a day's labor by man or beast, and for the capital invested in farm improvements and machinery."

CORN FLOUR IN CHINA.

Corn flour is the principal article of diet of the South Manchurian Chinese, the daily per capita consumption being 2½ to 3 lbs. Next to the soya bean, the corn crop is the most important in the Antung district. There is no way of estimating the annual yield of corn, but it is sufficient to provide about 2,000,000 Chinese with their main source of sustenance and allow a surplus of nearly 500,000 bus. for export from Antung to other Chinese ports. The grinding and marketing of corn flour has so far been in the hands of small grain retailers who crush small quantities of flour in their shops to meet the daily demand.

Spraying from Airplanes.

The eradication of the cotton boll weevil by means of sprays from airplanes flying over the fields may soon become a commercial project developed on a large scale if plans reported to the War Department are successful.

The plan of spraying death-dealing liquid or chemicals over weevil-infested areas by airplane was developed some time ago, but has never been undertaken on an extensive scale, either privately or by the Government.

Under this plan private concerns are being organized with the purpose of contracting to rid cotton fields of the weevil and a stipulated price per acre, one company, it is understood, being planned to operate at a charge of about \$7 per acre.

CANADIAN VISIBLE.

Canadian visible supply of wheat decreased 910,000 bus. and oats 1,146,000 bus. last week. These statistics represent terminal stocks only:

	May 30, 1925.	May 23, 1925.	May 31, 1924.
Wheat	31,362,000	31,453,000	20,646,000
Oats	8,788,000	9,934,000	7,902,000
Barley	3,153,000	2,187,000	1,347,000
Rye		3,726,000	2,057,000

Provisions, Etc.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at the seven leading western markets and thirteen other points for the week with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
*Past wk.	219,000	625,000	154,000	998,000
Prev. wk.	234,000	581,000	229,000	1,044,000
1924	255,000	693,000	170,000	1,118,000
1923	246,000	793,000	240,000	1,279,000
1922	204,000	680,000	233,000	1,117,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	All kinds.
1925..	5,042,000	15,985,000	5,628,000	26,655,000
1924..	5,098,000	19,263,000	5,227,000	29,588,000
1923..	5,103,000	18,577,000	5,620,000	29,300,000
1922..	4,758,000	14,187,000	5,193,000	24,138,000
*Saturday, May 30, 1925, holiday—Memorial day.				

CHICAGO PROVISION REVIEW.

CHICAGO, June 1.—The provision trade is a little more active in meats and lard on domestic account but export business remains small with no immediate prospects of improvement. Little packers are buying considerable product, possibly against sales made at higher prices, while speculators and large packers are sellers on bulges. Trading in lard is mainly in the way of changing from July to September with a good many million pounds switched over by a leading packer. The demand from consumers in general will have to be materially increased according to the rules of the trade to absorb the large supplies of lard within the next few months.

Speculative trading remains of about the same volume as of late. Hog supplies, although not heavy, are equal to consumptive requirements and values covered with a wide range throughout the week. The situation on the whole

does not present especially attractive features to the outside trade and it is largely professional.

Deliveries on May contracts of lard were 23,200,000 lbs. They were sent out largely by the Anglo American Co., and paid for by other packers, Swift taking a large percentage of the total. Deliveries of short ribs, 1,350,000 lbs., and of bellies 400,000 lbs.

Closing prices were the highest of the week with lard up 37½ to 42½c, short ribs 32½ to 47½c, and bellies 42c, as compared with a week ago. Prices for the week follow:

Security from Lightning Losses

The Mutual Fire Prevention Bureau names lightning as
one of the two chief causes of elevator fires during 1924.

Take heed and protect yourself now. Insist on Under-
writers' Laboratories Master Label installation. Small in cost in proportion to fixed
investment, it assures your insurance reduction.

Fire protection is not available to most grain elevators. Stop this greatest of fire
menaces. Saving on insurance pays for a Security System in a few years.

We are manufacturers and installers of Underwriters' Laboratories approved lightning
conductor systems for grain elevators, warehouses, factories,
smoke stacks and other large structures. Write for specifica-
tions and information on how to prevent lightning losses.

BUSINESS AND TRADE CONDITIONS

THE business fabric of the nation seems now fully awakened to the fact that the course of events is not all in sympathy with a business boom. In fact, our progress during the past several weeks is mainly seen in the lifting of the mantle of gloom, expressed by some business interests who were counting on said boom and were willing to chance its hazards and consequences. As we have commented on this situation from time to time it appears that the upshot of a trend of affairs which is not meteoric is far more likely to be of lasting benefit than otherwise. Among the advantages of such a course, and probably the most important, is the avoidance of the sickening thud which would follow the toboggan slide that would follow after the peak of boom times had passed. Then there is the large number of unemployed who follow in the wake of an ill-timed period of expansion, hitting bottom after they have become accustomed to high wages and short hours, silk shirts and automobiles bought on the time payment plan—these things will not be experienced.

Listed with the possible disadvantages is the definite attention which must be given the necessity of hard work with large volume and small profits. But, after all, is not the latter condition far more to be desired than the former? We believe it is, the consuming public gratifying all of their needs and most of their luxuries, taking merchandise and farm products in normal volume through regular channels.

In any great nation both in the numbers of its peoples and the invested capital in industry, we doubt if there shall ever be a time when the need of tariff, taxation or trade treaty assurances will be less than they are today. There are, of course, certain instances where the shoe pinches in specific trades, but, broadly speaking, there is unquestionably less friction internally and in the relationship of the United States with foreign nations than for many decades. It has been salutary to bring to the surface such international aspirations, greed and avarice as had developed in Germany under monarchical rule. It seems to us far better to see these things for what they are rather than to drift along as we were doing prior to 1914, with the seething hotbed fomenting in the breasts of certain foreign nations.

Now that we are returning to the "rule of reason" and with a president at the helm who is giving every evidence of sensible, far-sighted business and diplomatic ability, may we so conduct our individual business that it shall be a proper unit in the whole.

Taxation.

As a part of the ever-present discussion of income taxation, we are now reading about someone's plan to restrict the tax of this sort to a small group of persons receiving large incomes. It should appear self-evident that a plan of this description would simply bottle up funds, withdrawing them from the commercial circles and very considerably restricting the earning powers of the millions of people dependent upon capital. A detail of the above suggested plan is to exempt from income taxation all receiving less than \$5,000 per annum. Such earners pay about one-thirtieth of the total revenue secured in this manner, but the contention that this percentage is so small and therefore would be little missed is not at all sound. Although there may be inequality in the present tax law, it has become "standard gospel" to admit the fairness of taxation all along the line, with favors to none and a just part in governmental expenses among all.

France is now considering the feasibility of legislation which will permit conscripting wealth in the event of war. This subject has been widely in the public eye throughout the United States for months, and is a sensible, practical application of the same rule which grants favors to none and equality of privileges and burdens to all. A measure of this sort is calculated to stabilize peace because moneyed interests, financing our great industries, will think long and carefully before they countenance the return of war conditions if the same will conscript their per-

CENTRAL STATES DRY, 'AMPLE RAINS ELSEWHERE.

LATE reports from Ohio, Indiana and Illinois indicate comparatively small damage was done to corn by the recent frost and that where severe damage did occur, replanting has been completed and that there is now urgent need for soaking rains.

There have been occasional showers in many sections of Missouri, Iowa, Kansas, Oklahoma and Nebraska, but these states also lack in moisture and heavy rains are needed to make the corn and revive the pastures.

By way of contrast, prospects in the Northwest, including Idaho, Oregon, Montana, Washington, the Dakotas and Minnesota are generally reported as unusually good, with comparatively no damage from frost and with ample moisture, and Vice President Kenney of the Great Northern Railway says crop prospects in that road's territory are the best in six years.

sonal wealth just as it does the sons of the common people.

Cheap Money.

There is probably no more interesting subject before mankind than money, the quantity being the controlling factor.

We had during the war, however, a most convincing lesson of the fact that the quantity of money is not always a true line on its purchasing power, because it is most unstable.

Students of monetary matters are rather of the opinion that we are to have an even cheaper money market this summer than for the past many months. With such prospects in view, those who employ money in exchange operations, real estate, and for similar large requirements are of the opinion that the very ease of the market will lead toward a bullish campaign in the commodity traded in.

In speculation of this description, it is a fact that many securities are far below the recent levels and apparently offer most attractive purchases. As world ledgers are opened to gaze, we find that during the past year a large volume of American money has been invested in European enterprises some of which are of doubtful character. Likewise, at home, the grain market proved to be the graveyard for unskilled speculators in unfortunately large numbers.

Those who feel that easy money was a lure to such

operations are now anticipating with considerable uneasiness the next turn of affairs under similar market conditions and even easier money. If the public comes into the several new railroad issues in a big way they must do so with full recognition of the recent debacle in Milwaukee railroad issues. It is a severe indictment of governmental activities to consider the unfavorable effect upon Milwaukee notes and stock through governmental control and later supervision of the many angles of railroad operation.

In conclusion, contemplating the unleashing of man's natural speculative tendencies, let him be governed during his summer campaign by the following sensible advice. It is an axiom in business that "tips" and "melons" are even more uncertain than a thoroughbred racehorse, which may win the Derby today and be valueless thereafter. Speculators with limited means must beware of margin accounts. Speculators of any class whatsoever when inclined to "take a chance" should at least seek some definite basis of verified facts concerning the choice of their heart.

The very fact that funds for investment may be available at somewhat lower rates is no excuse at all to place such funds in a haphazard, careless manner. The investor or speculator should recognize the fact that when the repayment of his loans comes about, money may not be cheap and yet the same amount must be returned that was originally borrowed.

With today's gradual improvement in the world's business outlook, excellent investments are offered and the possibility of an ill-timed boom, partially based upon cheap money can be avoided if the public will consult their banker or the heads of the stock and bond house through which they deal (not a clerk seeking business) and watch their step during the summer months.

"COST PLUS" IN FARMING

ONE part of the program formulated at the meeting of farm organizations in Des Moines on May 12 provided for the "creation of an export corporation, by Congress, to be managed by a board of farmers nominated by the recognized farm organizations and to insure the farmer cost of production plus a profit of not less than five per cent."

In the paid advertisement of one of the members of one of the organizations represented at that meeting, the statement is made that the proposal had the approval of the 500,000 members of the organizations that had representatives present.

In considering the "cost plus" plan some figures carried in a recent bulletin of the South Dakota Department of Agriculture give much food for thought.

This bulletin shows the results of a study of a group of farms in Kingsbury County for the years 1922, 1923 and 1924.

In 1922 the average investment, including land, buildings, machinery, live stock, feed and supplies, amounted to \$43,831; in 1923 it was \$44,495, and in 1924 it was \$44,111.

There was a wide range in all of the three years in the net cash income on different farms in the group. In 1922 the lowest net cash income was a minus \$4,532 and the highest was \$5,461. In 1923 the lowest was \$532 and the highest was \$4,728. In 1924 the lowest was \$412 and the highest \$6,617. For the three-year average the lowest farm had a net cash income of minus \$980 and the highest a plus income of \$5,436.

The range in farm income—and by farm income is

meant the net cash income, plus the increase in inventory or minus the decrease in inventory as the case may be—was wide for all of the three years. The lowest farm income in 1922 was \$214, the highest \$4,807. In 1923 the lowest was \$527, the highest \$4,886. In 1924 the lowest was \$254, and the highest \$7,791.

Another way of figuring returns is to figure interest on the investment and consider the amount remaining over expenses and interest as the payment for the labor and management of the farmer. This is known as Labor Income, and is what the farmer receives for his year's work on the farm after deducting all expenses, including interest on investment. In 1922 the lowest labor income was a minus \$2,070 and the highest a plus \$597. The lowest in 1923 was a minus \$4,001 and the highest a plus \$953. In 1924 the lowest was a minus \$2,976 and the highest a plus \$3,679.

If the cost plus plan is to apply to individual farmers, would prices for 1922 be based on the minus \$4,532 farmer or on the one showing a profit of \$5,461?

If upon the former, would not some sort of a recapture clause be necessary in order to take from the latter some of his unconscionable profit, and if upon the latter, would prices be reduced because he, in that year made a return of about 12½ per cent?

If costs were to be determined by groups, what would constitute a given group—a township, a county, a state, or all of the farmers producing a given crop, and who would determine what were legitimate costs, and when would the figures be compiled, and who would pay for that work, and when would a farm cease to be a farm and become a "truck patch," and who would keep books for the farmer who could not or would not do it himself, and would that be compulsory and would it apply to all farmers or only those belonging to recognized farm organizations?

Would the plan only apply to wheat or would it include corn, oats, rye, barley and all of the other grains having an exportable surplus as well as live stock, fruits, nuts, vegetables, etc., etc., and if not, why not? Is the wheat farmer any more entitled to this sort of federal aid than is the farmer who raises cotton or tobacco or peanuts?

These are but a few of the many questions that suggest themselves, all pointing to the unworkableness of the plan, but all indicating that a trial of it would make a huge lot of nice fat jobs, thus adding an additional tax burden, either direct or indirect, not only upon the farmer, but also upon every other person in the country.

That, however, is something in which a good many of the so-called leaders would not be greatly interested as they would expect to land in some of the nice berths thus provided.

That an attempt will be made to have Congress pass the necessary legislation is a foregone conclusion, and the time, therefore, to get busy is right now.

If enough voters present to enough congressmen enough facts to prove the fallacy of the plan it will be killed.

TOO MANY OF US?

IN an editorial in our May 27 number, under the caption "Too Many of Us?" we stated that there was one farmer to each 18 or 19 persons in this country, and if they and their families were deducted, the number upon which each farmer must depend for the sale of his surplus products was reduced to perhaps 13 or 14.

One of our readers, without attempting to show that these figures are wrong, takes exception to them, and, as what is in one man's mind may be in the minds of many, our method of arriving at the figures seems to be in order.

The population of the United States is, at this time, about 120,000,000, and if, as the department of

agriculture says, there are 7,000,000 farmers, that means one to seventeen.

A very well-known farm paper, in a recent estimate, figures the farm population at 28,000,000 people, farm families each averaging 4 persons, and that estimate checks up pretty closely with the census figures.

We did not want to make the picture too drab, however, so we arbitrarily estimated the farm family at 3, thus making the total on the farms 21,000,000, and, deducting that number from our total population, leaves 99,000,000 for the 7,000,000 farmers to feed his surplus to, and that, of course, means fourteen to each one.

The point we really wanted to make, in our previous editorial, although we did not specifically state it, was the evident necessity of maintaining foreign markets for the surplus products of our farmers.

There are too many farmers if this country is to go exclusively to a domestic basis of consumption, a thing now being advocated by some governmental officials, and the solution of the problem if we are to continue in the world's markets, is, it seems to us, increased production per acre.

GRAIN ELEVATOR MANAGEMENT

THE first short course in grain elevator management will be given at the College of Agriculture, University of Illinois, on June 16th to 20th. The principal subjects to be taken up in this course will be grain elevator accounting and grading of wheat, corn and oats. The object of the course is to give managers of country elevators an opportunity to become acquainted not only with improved methods of account keeping but also with practices which country elevators have found profitable in their business relations with farmers and other grain dealers both in country and terminal markets. It is to be hoped that such a short course will be of much value. It is certainly a move in the right direction and fundamentals in any line of business when thoroughly understood makes it easier for men to carry on their business in a practical way and should result in greater service to patrons and more profit for the business.

GROCERIES AS A SIDELINE

WORD comes to us from North Dakota that numerous elevator men, throughout that state, are acquiring small grocery stores, which are to be run on the "cash and carry" plan, the idea being that continuity of occupation and a more or less steady income may thus be made possible.

As the bulk of the grain in North Dakota is handled within a period of four months, the plan appeals to us as being a good one, if the "cash and carry" plan is strictly adhered to and if, during the four grain shipping months, either the grain business or the grocery business, is not so neglected, as to ruin it.

Neither of them can reasonably be expected to run without proper supervision, and, while there is in the grocery business a good deal of small detail, a thing with which the average elevator man has not been familiar, that is a handicap which can be overcome, and the right kind of a grocery store rightly managed can be made a steady source of income every day in the year.

THE BURDEN OF TAXATION

THE U. S. Bureau of Census has recently made public some exceedingly interesting figures on the subject of state taxes and state debts.

In comparing the years 1919 and 1923, it is shown that the state government cost has increased in every one of the states, the increase in New York, for example, being from 63½ millions to 108 millions of dollars, while West Virginia increased from \$4,600,-

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

000 to \$16,800,000 and Iowa increased from \$10,900,000 to \$40,500,000.

The same report gives a comparison between state debts in each state in 1919 and 1923. The only state which has decreased its debt is Massachusetts. The largest increases in state debt recorded were in the states of Oregon and South Dakota. South Dakota holds the record as to per capita debt. In 1923 it had a debt of \$90 per capita. In Iowa the state debt increased from 25c to \$6 per capita.

The grand total of all the state debts in the United States increased in this period from 744 to 1,419 million dollars, while the annual cost of state government increased from 542 to 933 million dollars.

It seems to us the time has come to take stock of this situation and to call a halt.

Many thousands of farmers are already in distress because of the amount of their taxes. So also are the most of the railroads as well as large numbers of this country's other institutions and about the only ones who apparently are indifferent are the members of the various state legislatures and those for whom state jobs are thus made.

The government at Washington is setting a pretty good example through President Coolidge and Director of the Budget Lord, and, while we are hopeful that this good example will prove contagious, there does not seem to be very much ground for that hope.

We believe therefore that the time has come, as we have already said, to call a halt.

We are looking for a Moses to lead us out of bondage.

The Price Current-Grain Reporter

Consolidation of The National Hay & Grain Reporter Cincinnati Price Current Grain Man's Guide Western Crop Improvement Advocate and Crop Reporter

Published every Wednesday by the Price Current - Grain Reporter, 309 So. La Salle St., Chicago, Ill.

J. CARVER STRONG, H. A. SHEPARD, Manager Advertising Manager E. C. VAN ARSDEL, GEO. A. WELLS, Editor Contributing Editor

THREE DOLLARS a year in the United States and Mexico; \$4.00 a year for Canada, \$5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 15 cents.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, JUNE 10, 1925.

GRAIN TRADE REVIEW

CONFIRMATION of recent claims of heavy damage to the winter wheat crop by the frost and freeze late in May, combined with private estimates suggesting one of the smallest winter wheat crops in many years, scarcely sufficient for domestic requirements and with the future of the spring grain still greatly in doubt, was instrumental in bringing in heavy buying and an advance in prices to a new high for the season, on the September and December, while the July sold at a new high on the present upturn. The realization that the United States was the closest to being on a domestic basis in a long time, was rather slow to come to the trade, which accounted to some extent for the sharp break which followed the issuance of the private crop reports suggesting on an average 423,000,000 bu. winter and 241,000,000 bu. spring wheat with a total for the country of 664,000,000 bu. or 209,000,000 bu. less than harvested last year. Based on the average domestic disappearance of the past three years of around 650,000,000 bu., the reports suggested practically nothing for export. These figures did not include any allowance for damage done by the recent frost, and the losses from that will hardly be known until harvest. One of the leading experts predicts that the final winter wheat outturn will be below 400,000,000 bu. The spring wheat has still all its grief ahead of it, and there is a noticeable lack of subsoil moisture over the greater part of the Northwest which is likely to come to the fore as a market factor at any time, especially if hot weather continues. With the United States on practically a domestic basis, it is not surprising that the indifference of foreigners to the buying side of cash grain had no effect on sentiment, and cables from abroad indicated that foreigners were disposed to the idea that damage reports were greatly exaggerated. While this may be true in some sections, taken as a whole there is a belief that the damage is underestimated, especially in Illinois, Indiana and other states where freezing weather prevailed, and samples of growing wheat show that there is nothing in the heads. Plowing up of wheat is already under way in some localities. There is a decided tendency shown to lower estimates on the Kansas crop which a short while ago was variously figured at 85,000,000 to 90,000,000 bu. with latest guesses running from 75,-

000,000 to 80,000,000 bu., some showing below the inside figure.

Exportable Surplus Small.

Whether the United States has any exportable surplus of wheat cannot be definitely determined for several months, but at best the total will be small, even though the spring wheat yield equals that of last year. Under normal conditions this country has the world's export trade practically to itself during the months of July, August and September. So far foreigners have practically no new crop winters bought for deferred shipment, and while by scraping the bins they might be able to get along without the United States, this is very doubtful. Should a foreign demand of consequence develop it would not be surprising to see a material upturn in the market which would carry the price high. In fact, predictions of \$2 wheat are being made in some quarters, but taken as a rule a majority of operators are very conservative in their views as wheat is now selling at a price materially above the average for this season. Farmers are not selling wheat for July-August shipment in volume, being afraid to contract on account of the uncertainty as to the yield. The foreign crop outlook is generally very favorable, that is according to some authorities, but private cables of late have suggested that everything is not as rosy as pictured by the public cables. Frost visited parts of the Canadian Northwest again the past week when this country was sweetering under a hot wave, but as far as known no damage was done. Good rains are needed in parts of the three provinces due to a lack of subsoil moisture. It is much too early to make estimates on the Canadian crop, although one hears talk of 350,000,000 bu. or more. The outlook now is more favorable than in 1924 when the windup was one of the worst in many years.

Coarse Grains.

Corn and oats have developed more activity and advanced rather sharply after a rapid break early in the week. The dry weather which persists over a good part of the belt has attracted attention to the precarious position of the short in the December delivery, and while the price seems high to many there has seldom been a year when stocks of old corn on farms were as light as they are at the present time, or when pastures were burnt out so early in the season. This would seem to indicate that consumption of the new crop, regardless of its size, would start unusually early, and with a lack of subsoil moisture and hot weather there was considerable doubt as to the final returns for this season. Damage reports have been coming forward on oats in increasing numbers due to the dry weather and high temperatures, and rains and cooler are badly needed in many sections. Under the most favorable conditions the oats crop is hardly likely to equal that of last year when 1,542,000,000 bu. were secured. The private reports the past week suggested 1,357,000,000 bu., with a substantial increase in the acreage. If the shortage of hay this year is as bad as indicated the consumption of both corn and oats on farms is expected to be very liberal.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	June 6, 1925.	May 29, 1925.	June 7, 1924.
Wheat	4,859,000	5,353,000	5,550,000
Corn	5,937,000	4,440,000	5,750,000
Oats	3,617,000	3,097,000	3,410,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week	13,913,000	14,710,000
Preceding week	12,910,000	9,258,000
Since July 1	989,177,000	945,486,000

Wheat values were on the upgrade the past week, and while the finish was somewhat under the best prices, net gains were 4 7/8 @ 5 1/4 c, with September

leading. The continued hot weather, with drought, cut down the crop prospect the past week, and there was a material increase in the outside buying which was instrumental in carrying the September and the December to a new high on the crop, while the July was within 2 3/4 of the best figure of the season. Immense profit taking was in evidence on the extreme bulge, as many felt that the upturn of 13 1/2 c from the low point on the July during the week was sufficient for the time being, and there was also a belief that the hot wave would not continue much longer. The spring wheat territory received highly beneficial rains.

While December corn sold at a new high on the crop, during the past week, the best figures were not maintained due to profit taking and at the last net losses were 2 1/4 c. The old crop deliveries acted a little heavy and closed 1 3/4 @ 1 7/8 c lower, the latter on July, which went around 1/2 c under the September at the last. The failure of the corn market to respond better to the dry and hot weather was due in part to the belief that it was too early in the season to start a bull movement. Cash demand was fair and local stocks are being cut down again, while the after planting movement is rapidly letting up.

A material increase in activity was noted in oats as the result of the continued hot weather, which was regarded as having done a great deal of damage over a wide area in the leading producing section. Stop loss orders were uncovered on the way up, and at the last net gains were 4 5/8 @ 5 1/2 c for the week, with September leading. Rye gained 2 3/4 @ 6 1/2 c, the latter on December with the frost having apparently damaged this grain to a greater extent than wheat, but speculative interest on the whole was not large. Range of prices the past week follows:

	High.	Low.	June 6, 1925.	May 29, 1925.	June 7, 1924.
Wheat—					
July	\$1.70 3/4	\$1.57 1/2	\$1.69	\$1.63 3/4	\$1.04 3/4
Sept.	1.67 1/2	1.55 1/2	1.66	1.60 1/4	1.06 1/4
Dec.	1.70	1.58 3/4	1.57 1/2	1.62 3/4	1.08 3/4
Corn—					
July	1.19	1.12 3/4	1.16 1/4	1.18 3/4	.78 3/4
Sept.	1.19 1/4	1.13	1.16 3/4	1.18 1/4	.78 1/4
Dec.	1.02 1/2	.93	.98 3/4	1.01	.71 1/4
Oats—					
July	.54	.47	.53 1/2	.48 3/4	.46 1/4
Sept.	.55 1/2	.47 3/4	.54 3/4	.48 3/4	.40 3/4
Dec.	.57 1/2	.50	.56 1/2	.51	.42
Rye—					
July	1.20 1/2	1.10 1/4	1.19 3/4	1.17 3/4	.68
Sept.	1.22	1.10 1/4	1.21 1/4	1.16 1/4	.69 3/4
Dec.	1.25 1/2	1.13 1/2	1.25	1.18	.71 1/2

WHEAT STOCKS AND CONSUMPTION.

Statement of the movement of wheat and consumption in 14 primary markets, compared for three years:

	1924-25.	1923-24.	1922-23.
Stocks at July 1	30,500,000	23,278,000	10,789,000
Receipts to June 6	494,490,000	332,796,000	419,950,000
Shipments to June 6	374,057,000	189,710,000	263,241,000

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	June 6, 1925.	May 30, 1925.	June 7, 1924.
American	6,585,000	6,483,000	9,401,000
Argentine	2,682,000	1,799,000	5,081,000
Australian	1,816,000	2,568,000	1,576,000
Indian	608,000	264,000	1,040,000
Russian			208,000
Others			160,000

Total 11,691,000 11,114,000 17,466,000
Of the above total wheat from America there cleared in the form of flour 1,417,000.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	382,688,000	392,384,000	396,486,000
Argentine	112,684,000	146,571,000	120,202,000
Australian	109,440,000	70,482,000	42,728,000
Indian	30,504,000	7,240,000	13,948,000
Russian	328,000	28,256,000	
Others	2,736,000	16,044,000	6,403,000
Total	638,380,000	660,977,000	579,870,000
Season		753,195,000	662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared, with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	June 6, 1925.	May 30, 1925.	June 7, 1924.
American	66,000	26,000	116,000
Argentine	3,916,000	2,304,000	7,560,000
African			40,000

SITUATION IN ENGLAND

Flour Imports Small—Good Demand for Maize—Rhodesian Exports of Maize May Be Larger.

By JACK BROOKS.

LONDON, May 30.—The total crop of red wheat, according to cables here from America is 15,340,000 hundredweights less than last year. Last year's export surplus was given as more than 34,000,000 hundredweights. It is now thought Indian shipments of new crop will not exceed 60 per cent of what they have been. No red winter is as yet offered this side. The statistical position is better for holders of spot grain. The London arrivals of wheat the other week totaled 740,000 hundredweights, a figure higher than the average. The 5,700,000 hundredweights sent out by exporting countries, however, was decidedly below average. On the statistical position this side the situation is thus firmer. Current wheat prices (imported) are six cents dearer per hundredweight. London prices for best Canadian are \$3.90; Argentine, \$3.70; Australian, \$3.55. Wheat arrived but not landed is being quoted per 496 pounds at \$17; best Canadian, \$16.32, Duluth. Liverpool prices are \$3.20 per cental No. 2 red winter spot, \$3.25; Rosafe, \$3.20 Australian. New Indian crop is being shipped at \$15.48 per 480 pounds (white Punjabi) direct to London, c. i. f. English wheat is averaging \$3.20 per hundredweight at most markets here. This is six cents dearer than at the beginning of May.

Flour shipments from exporting countries have been small lately. Prices are slightly against the buyer. The advance here in flour since May-June, 1924, works out at around \$1.70 per bag of 140 pounds. The biscuit making industry here is a large one and English flour is the sort best adapted for the production of the British biscuit which is an altogether different type of product to the American "biscuit." The shortage of English wheat has resulted in a scarcity of this biscuit making flour and a substantial price advance on this type of flour is not surprising. London straight run flour has not been selling so well as has some of the imported kinds.

There is a good demand for maize, particularly the Australian description, and the latter has been selling well. Argentine at \$2.65 per hundredweight continues to represent quite 80 per cent of all maize sales. South Africa promises a fuller supply by August. Maize meal at \$2.90 is in demand in London. Common South African is worth \$2.65, and gluten feed the same. English oats are six cents per hundredweight dearer on the week, the price in London now being \$2.70. Barley is down and prices here are 50 cents below average.

It is estimated that Rhodesian maize exports will be considerably in excess of last year's output, the current figures being placed at 50,000 tons. The granting of special facilities and the removal of import taxes in countries of continental Europe indicate to some extent the need of breadstuffs there. Spain, Portugal, the Central states, and even France, are all potential grain buyers. Considerable shipments of wheat are being received by Italy these days, and these shipments are being absorbed by her without difficulty. There is reported to be an improved European demand for American wheat and since the figures of this crop are put at a rather low level the wheat markets here are decidedly firmer.

EXPORT DUTIES CHANGED.

The following changes have been made in the Argentine export duty schedule for June, according to a cablegram received on June 3, by the Commerce Department, the old and new rates being in gold pesos, per metric ton:

Oats 1.04, now 1.07; corn 1.77, now 1.78; linseed 3.75, now 3.23; barley 2.32, now 1.84; wheat 2.39, now 2.35; sheepskins 35.95, now 32.25; entire rios wool

37.40, now 17.61; Southern wool 27.05, now 12.68; Cordoba wool 36.05, now 20.69; Western wool 32.40, now 26.00; quebracho log .71, now .69; quebracho extract .92, now 1.01.

The duties on other commodities subject to Argentine export duties remain unchanged.

NEW U. S. OATS GRADES.

The Secretary of Agriculture under date of May 27, issued an order, fixing, effective on September first, the following standards for mixed feed oats and for feed oats.

Mixed Feed Oats.

Sec. 1.—Mixed feed oats shall be any grain which consists of less than 30 per cent of cultivated oats but not less than 65 per cent of cultivated and wild oats combined; may contain not more than 25 per cent of other grains; and may contain not more than 10 per cent of foreign material which 10 per cent may include not more than 5 per cent of fine seeds.

Basis of Determination.

Sec. 2.—All determinations shall be upon the basis of the lot of grain as a whole, including foreign material, other grains, and wild oats.

Percentages.

Sec. 3.—Percentages, except in the case of moisture, shall be percentages ascertained by weight.

Percentage of Moisture.

Sec. 4.—Percentage of moisture in mixed feed oats shall be ascertained by the moisture tester and the method of use thereof described in Circular No. 72, and supplement thereto, issued by the U. S. Department of Agriculture, Bureau of Plant Industry, except that the graduated measuring cylinder used shall be that described in Department of Agriculture Bulletin No. 56, or such percentage shall be ascertained by any device and method giving equivalent results.

Test Weight per Bushel.

Sec. 5.—Test weight per bushel shall be the test weight per Winchester bushel as determined by the testing apparatus and the method of use thereof described in Bulletin No. 472, dated October 30, 1915, issued by the U. S. Department of Agriculture, or as determined by any device and method giving equivalent results.

Note.—Under regulations pursuant to the United States grain standards Act, licensed inspectors are required to state under "Remarks" in all certificates issued by them for mixed feed oats, unless issued for an export shipment, the test weight per bushel in terms of whole and half pounds. For this purpose a fraction of a pound when equal to or greater than half shall be treated as a half, and when less than a half shall be disregarded.

Foreign Material.

Sec. 6.—Foreign material shall be all matter other than grains and pieces of grains of cultivated oats, except other grains and wild oats, and shall include oat clippings.

Other Grains.

Sec. 7.—Other grains shall include wheat, corn, rye, barley, emmer, spelt, einkorn, grain sorghums, and cultivated buckwheat.

Heat Damaged Grains.

Sec. 8.—Heat-damaged grains shall be grains and pieces of grains of cultivated oats, wild oats, or other grains, which have been distinctly discolored or damaged by external heat or as a result of heating caused by fermentation.

Bleached Mixed Feed Oats.

Sec. 9.—Bleached mixed feed oats shall be mixed feed oats which in whole or in part have been treated by the use of sulphurous acid or other bleaching chemicals. Bleached mixed feed oats shall be graded and designated according to the grade requirements of the standards applicable to such mixed feed oats if they were not bleached, and there shall be added to, and made part of, the grade designation the word "bleached."

Weevily Mixed Feed Oats.

Sec. 10.—Weevily mixed feed oats shall be all mixed feed oats which are infested with live weevils or other insects injurious to stored grain. Weevily mixed feed oats shall be graded and designated according to the grade requirements of the standards applicable to such mixed feed oats if they were not weevily, and there shall be added to, and made part of, the grade designation the word "weevily."

Grades.

Sec. 11.—All mixed feed oats shall be graded and designated as No. 1, No. 2, No. 3, or sample grade, mixed feed oats, as the case may be, according to the respective requirements thereof as specified in this section.

No. 1 Mixed Feed Oats. (a) shall be cool, sweet, and commercially sound, and may be slightly stained;

(b) shall have a test weight per bushel of at least thirty-two pounds;

(c) may contain not more than five per cent of foreign material of which not more than two per cent may be fine seeds;

(d) may contain not more than two per cent of heat-damaged grains; and

(e) may contain not more than 14½ per cent of moisture.

No. 2 Mixed Feed Oats. (a) shall be cool, sweet, and commercially sound, and may be stained;

(b) shall have a test weight per bushel of at least 29 pounds;

(c) may contain not more than seven per cent of foreign material of which not more than three per cent may be fine seeds;

(d) may contain not more than four per cent of heat-damaged grains; and

(e) may contain not more than 14½ per cent of moisture.

No. 3 Mixed Feed Oats. (a) shall be cool, sweet, and commercially sound, and may be badly stained or weathered;

(b) shall have a test weight per bushel of at least 26 pounds;

(c) may contain not more than 10 per cent of foreign material of which not more than 4 per cent may be fine weeds;

(d) may contain not more than 6 per cent of heat-damaged grains; and

(e) may contain not more than 14½ per cent of moisture.

Sample Grade mixed feed oats shall be mixed feed oats which do not come within the requirements of any of the grades from No. 1 to No. 3, inclusive, or which have any commercially objectionable foreign odor or are musty, sour, heating, hot, or are otherwise of distinctly low quality.

Feed Oats.

Sec. 1.—Feed oats shall be any grain which consists of 30 per cent or more but not less than 80 per cent of cultivated oats; may contain not more than 25 per cent of other grains; and may contain not more than 10 per cent of foreign material, which 10 per cent may include not more than 5 per cent of fine seeds. Feed oats shall consist of not less than 65 per cent of oats which may include wild oats.

Basis of Determinations.

Sec. 2.—All determinations shall be upon the basis of the lot of grain as a whole, including foreign material, other grains, and wild oats.

Percentages.

Sec. 3.—Percentages, except in the case of moisture, shall be percentages ascertained by weight.

Percentage of Moisture.

Sec. 4.—Percentage of moisture in feed oats shall be ascertained by the moisture tester and the method of use thereof described in Circular No. 72, and supplement thereto, issued by the U. S. Department of Agriculture, Bureau of Plant Industry, except that the graduated measuring cylinder used shall be that described in Department of Agriculture Bulletin No. 56; or such percentage shall be ascertained by any device and method giving equivalent results.

Test Weight per Bushel.

Sec. 5.—Test weight per bushel shall be the test weight per Winchester bushel as determined by the testing apparatus and the method of use thereof described in Bulletin No. 472, dated October 30, 1915, issued by the U. S. Department of Agriculture, or as determined by any device and method giving equivalent results.

Note.—Under regulations pursuant to the United States grain standards Act, licensed inspectors are required to state under "Remarks" in all certificates issued by them for feed oats, unless issued for export shipment, the test weight per bushel in terms of whole and half pounds. For this purpose a fraction of a pound when equal to or greater than a half shall be treated as a half, and when less than a half shall be disregarded.

Foreign Material.

Sec. 6.—Foreign material shall be all matter other than grains and pieces of grains of cultivated oats, except other grains and wild oats, and shall include oat clippings.

Other Grains.

Sec. 7.—Other grains shall include wheat, corn, rye, barley, emmer, spelt, einkorn, grain sorghums, and cultivated buckwheat.

Heat Damaged Grains.

Sec. 8.—Heat damaged grains shall be grains and pieces of grains of cultivated oats, wild oats, or other grains, which have been distinctly discolored or damaged by external heat or as a result of heating caused by fermentation.

Bleached Feed Oats.

Sec. 9.—Bleached feed oats shall be feed oats which in whole or in part have been treated by the use of sulphurous acid or other bleaching chemicals. Bleached feed oats shall be graded and designated according to the grade requirements of the standards applicable to such feed oats if they were not bleached, and there shall be added to, and made a part of, the grade designation the word "bleached."

Weevily Feed Oats.

Sec. 10.—Weevily feed oats shall be all feed oats which are infested with live weevils or other insects injurious to stored grain. Weevily feed oats shall be graded and designated according to the grade requirements of the standards applicable to such feed oats if they were not weevily, and there shall be added to, and made a part of, the grade designation the word "weevily."

Grades.

Sec. 11.—All feed oats shall be graded and designated as No. 1, No. 2, No. 3, or sample grade, feed oats, as the case may be, according to the respective requirements thereof as specified in this section.

No. 1 Feed Oats. (a) shall be cool, sweet, and commercially sound, and may be slightly stained;

(b) shall have a test weight per bushel of at least 32 pounds;

(c) shall contain not less than 60 per cent of cultivated oats;

(d) may contain not more than 3 per cent of foreign material of which not more than 2 per cent may be fine seeds;

(e) may contain not more than 2 per cent of heat-damaged grains; and

(f) may contain not more than 14½ per cent of moisture.

No. 2 Feed Oats. (a) shall be cool, sweet, and commercially sound, and may be stained;

(b) shall have a test weight per bushel of at least 29 pounds;

(c) shall contain not less than 45 per cent of cultivated oats;

(d) may contain not more than 4 per cent of foreign material of which not more than 3 per cent may be fine seeds;

(e) may contain not more than 4 per cent of heat-damaged grains; and

(f) may contain not more than 14½ per cent of moisture.

No. 3 Feed Oats. (a) shall be cool, sweet, and commercially sound, and may be badly stained or weathered;

- (b) shall have a test weight per bushel of at least 26 pounds;
- (c) shall contain not less than 30 per cent of cultivated oats;
- (d) may contain not more than 6 per cent of foreign material of which not more than 4 per cent may be fine seeds;
- (e) may contain not more than 6 per cent of heat-damaged grains; and
- (f) may contain not more than 14 1/2 per cent of moisture.

Sample Grade feed oats shall be feed oats which do not come within the requirements of any of the grades from No. 1 to No. 3, inclusive, or which have any commercially objectionable foreign odor, or are musty, sour, heating, hot, or are otherwise of distinctly low quality.

Changes and Eliminations.

Amend Section One to read as follows: "Oats shall be any grain which consists of 80 per cent or more of cultivated oats and not more than 10 per cent of foreign material."

Strike out Section 11 and Section 14.

ELEVATOR SHORT COURSE TO COVER MANY SUBJECTS.

Country elevator problems covering a range that extends from money matters to machinery will be discussed during the first short course in elevator management which the College of Agriculture, University of Illinois will hold June 16 to 20. Financial problems of grain elevators will be discussed by Geo. R. Wicker, manager of the Illinois Agricultural Co-operative Association, Chicago, while power problems of grain elevators will be dealt with by R. I. Shawl of the college farm mechanics department.

Included in this range of subjects will be a dozen or more that are of special interest just now to elevator managers and others who are interested in this business. In addition, three of the leading grain specialists of the middle west will be here to give grain grading demonstrations and also there will be sessions on elevator accounting. Inspection trips to points of interest about the university campus and a banquet will round out the program for the course, which will be open to all interested persons.

Some of the leading problems of grain elevators will be outlined by Vernon Vaniman, assistant state leader of farm advisers at the college, who is on leave now to do work with the Illinois Agricultural Association; trends in grain prices will be sketched by L. J. Norton, a specialist in economics at the university; the details in forecasting crop yields will be told by W. F. Callender, in charge of the division of crop and live stock estimates in the federal bureau of agricultural economics, and federal and state grain inspection will be described by Philip Rothrock, supervisor of federal grain inspection on the St. Louis, Mo., market.

Other subjects will deal with world trade in Illinois grain and grain products, problems in hedging and speculation, the economic meaning of marketing, an Illinois wheat production program, the United States Grain Futures Administration, grain mixing and conditioning, farm storage of grain and the bread making qualities of Illinois wheat. The speakers on these subjects will be secured from governmental agencies and the college staff.

The specialists in grain grading who will be brought here for the course are Philip Rothrock, in charge of federal grain inspection on the St. Louis, Mo., market; Fred G. Smith, in charge of inspection at the field headquarters of the federal grain inspection work in Chicago, and H. A. Rhoads, in charge of federal grain inspection on the Indianapolis, Ind., market.

The elevator accounting work which will be offered during the course will be given by C. F. Schlatter, assistant professor of accountancy in the College of Commerce and Business Administration at the university.

The Letter Box

Crop Prospects Never Better.

Price Current-Grain Reporter: Everything looking fine here now. All fruit trees in full bloom; everybody planting garden.

We had a wonderful trade on seeds; nearly cleaned up on everything.

The recent rains have been a Godsend to this country, as forest fires were raging everywhere. Crop prospects were never better here than right now.—H. Blemhuber & Son, Marquette, Mich., June 1.

Bone Dry Law Operative.

Price Current-Grain Reporter: Continued dry weather affecting all crops. Wheat now shooting heads, thin on the ground. Oats materially damaged by the frost and dry weather, very short and need rain. Corn doing fairly good. Good stand, the corn frozen some time ago seems to be growing o. k., but we must have rain soon. Hay will not make one-half a crop. Hay and oats hurt the most by the heavy frost had some time ago and the continued hot and dry weather.

This section of Indiana is complying with the recent enacted law and is bone dry.—Burk Elevator Co.

Corn Looks Good.

Price Current-Grain Reporter: These "Molly Make Believe" pictures that you see on the screen for a small fee do not produce the thrills or true value that Nature shows in her great crop and food producing drama enacted at this season of the year on our broad, fertile fields. We started out early here with a great promise for wheat, corn and oats, but as one traveled about from week to week, the picture shifted to one of vegetation in distress generally from frosts, drought, insect pests and most other ills that grain plants are heir to.

Our wheat fields today look like they would be ready to harvest the last week in June instead of the usual first week in July; of course it's still problematical just what the yield will be, but the best judges believe that the frost of May 25 has not shown its full effects yet and that heads that now look green will later turn brown and shrivelled for lack of any further sustenance getting by the second joint that was frozen in so many instances. Our guess is that an average yield of ten bushels per acre in this vicinity would be a liberal estimate.

A more cheerful story may be told of the growing corn crop. The soil generally was worked into a firm seed bed, the plants which froze down to the ground are now coming again nicely, mostly without replanting. Much of the corn acreage was cultivated during the past week and now presents a pleasing appearance and generally free from weeds.—H. I. Baldwin & Co., Decatur, Ill.

Beans in California.

Price Current-Grain Reporter: The planting of lima and baby beans in California will this season average two or three weeks later than usual. Quite a large acreage yet remains to be planted.

Our preliminary checking indicates that there will be a small increase in total acreage planted both to limas and baby limas this season as compared with last year, but on regular limas, this year's acreage will be away below normal and there is apparently no chance that total production can exceed half a normal crop, even though somewhat greater than the previous year.

The total rainfall over southern California this season to date, has been spotted and irregular, but nowhere much more than half average annual rainfall. The southern counties, particularly Orange and San Diego counties received less than a total of 7 inches of rainfall, and many thousands of acres of bean lands in those districts cannot be

planted because of inadequate moisture.

Spot stocks of both limas and baby limas on the coast will be almost exhausted when planting has been completed.—California Lima Bean Growers' Association, R. L. Churchill, Oxnard, Cal., June 2.

Opens Branch Office.

Price Current-Grain Reporter: Kay, Richards & Co., of Pittsburgh announce the opening of a branch office at Uniontown, Pa. This is in addition to their branch offices at New Castle, Warren, Butler and Erie, Pa., all of which are connected with the Pittsburgh office by private wires. This firm is a member of the New York Stock Exchange, Pittsburgh Stock Exchange, Chicago Board of Trade and Pittsburgh Grain Exchange. They opened a cash grain and feed department about one year ago and are the only exclusively commission grain and feed firm in Pittsburgh.—Kay, Richards & Co., per O. A. Rector.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending May 30, 1925 (000 omitted):

Articles and countries.	Week ending May 30, 1925.	May 31, 1924.	July 1, 1924, to May 30, 1925.
Barley	291	133	19,898
Corn	106	58	7,286
Oats	405	58	8,080
Rye	703	1,193	47,100
Wheat	*1,949	562	185,872
To Italy	213	131	25,289
United Kingdom	159	27	38,860
Other Europe	1,560	90	63,171
Canada	49,351
Other countries	17	314	9,201
Total U. S.	3,454	2,454	268,236
Canadian in transit:			
Barley	166	49	13,014
Oats	380	468	14,121
Rye	71	34	4,177
Wheat	1,363	2,900	59,525
Total Canadian	1,980	3,451	90,837
*Including via Pacific ports this week:			
Flour, 82,500 bbls.			

CORN IN PRIMARY MARKETS.

Receipts of corn last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Nov. 1 to June 6 (final 000 omitted):

	June 6, 1925.	June 7, 1924.	June 6, 1924.	June 7, 1923-24.
Chicago	2,758	2,479	57,291	66,280

TO REGULATE NO. DAKOTA ELEVATORS.

With the opinion of Attorney General George F. Shafer of North Dakota that the board of railroad commissioners has "ample authority to regulate and license grain elevators operating as warehouses,

supervise the bonding of such warehouses for the storage of grain, and supervise elevator and warehouse accounting in general," the commission at once laid plans to put the grain division in operation.

CASH CONTRACT OATS.

Following is the monthly range of cash contract oats (No. 2 white and better) at Chicago for a series of years:

	1925.	1924.	1923.	1922.	1921.	1920.

Crop Reports

Compiled by GEO. A. WELLS

CROP REPORTS.

The continued drouth condition has materially reduced the crop promise of production of oats and winter wheat in the States of Ohio, Indiana, Illinois, Iowa, Kansas, Oklahoma and Texas.

Corn has made a favorable start and on account of the dry weather is free from weeds and the stand is generally good. The damage by frost is not serious.

GROWTH CONDITION: Basing the government term normal at 100, the percentage comparison of the growth condition of the winter wheat crop on acreage that has not been abandoned is reported on the average for each state as follows: Ohio 51, Indiana 69, Illinois 70, Missouri 83, Iowa 74, Nebraska 72, Kansas 70 and Oklahoma 48.

OF SPRING WHEAT: Minnesota 94, North Dakota 100, Montana 90, South Dakota 77.

OF OATS: Ohio 77, Indiana 62, Illinois 71, Missouri 90, Iowa 82, Minnesota 91, North Dakota 86, Montana 86, South Dakota 67, Nebraska 87, Kansas 72 and Oklahoma 70.

OF CORN: Ohio 81, Indiana 85, Illinois 83, Missouri 87, Iowa 94, Minnesota 95, North Dakota 86, South Dakota 87, Nebraska 92, Kansas 84, and Oklahoma 83.

PIG CROP: Basing the spring pig crop of last year at 100, the estimate of the percentage comparison of the spring pig crop this year is as follows: Ohio 95, Indiana 85, Illinois 86, Missouri 72, Iowa 90, Minnesota 99, North Dakota 93, Montana 85, South Dakota 101, Nebraska 81, Kansas 80, and Oklahoma 90.

General Reports.

The general reports given below are self explanatory as to the growth condition of wheat, corn and oats:

OHIO.

Greenville, O. (1): Soon need rain. Wheat damaged by freeze. Do not believe corn and oats damaged.

Blanchester, O. (6): No wheat to speak of in this locality. Oats looking good but need rain now.

Circleville, Ohio: Frost hurt some corn but not very material. Wheat needs rain. As whole corn looks about average.

Lima, O. (1): Wheat, oats, corn, etc., suffering much from want of rain. Not very much damage done to corn and oats.

Bucyrus, Ohio: Corn was damaged approximately 30%. All growing crops have been damaged more or less by drouth and frost.

Camden, O. (2): Frost retarded the growth of corn. Oats have lost 25 points during the past week on account heat and drouth. Smallest wheat crop in five years.

Sidney, O. (2): But little permanent damage has been done to corn by the frost. The same is true of wheat and oats. Pastures and meadows have been effected more by lack of rainfall than the grain crops. Indications are now favorable.

INDIANA.

Winamac, Ind. (1): Corn hurt some by frost. Small grain badly hurt by frost and drouth.

Marion, Ind. (5): All corn above ground badly damaged. Most all of it has been replanted.

Lawrenceburg, Ind. (9): Frost damaged corn some. Drought condition has injured crops of all kinds.

Decatur, Ind. (7): Early corn materially damaged by frost. Late corn not materially affected. Lot of replanting.

Winchester, Ind. (1): Some frost damage; 10% replanted. Corn not molested but coming along fair. Oats poor.

Frankfort, Ind. (2): No material damage to corn by frost. Drought has damaged oats and wheat very materially.

Tipton, Ind. (5): Forty per cent corn replanted. Drought condition is cutting oats very short. Frost also damaged oats.

Monticello, Ind. (1): Frost did not materially injure wheat and corn, but oats were some injured by frost, but mostly by extreme drouth.

Jasper, Ind. (3): No damage done by freeze on corn. Drought has kept growth back on pastures and meadows. Wheat has not suffered much.

Wabash, Ind. (4): Corn damaged some by frost. No heavy oats damage. Considerable wheat damage by freeze. Wheat and oats going back rapidly.

Rushville, Ind. (8): Some damage to corn by freezing but principally in making it late by a week to ten days. Drought to oats has been rather severe. Wheat in very bad condition.

Angola, Ind. (7): Corn not materially damaged as only about 40% was above ground when frost came. Considerable frost damage to barley. About 30% of the onion acreage killed by frost or blown out by the high winds. Oats, barley, wheat and grass are actually suffering because of the dry, hot weather.

Rensselaer, Ind. (1): Fifty per cent of the corn badly frosted; 30% of that replanted and not sprouting on account too dry. Oats should be heading in few days now and average height is 6 to 8 inches. The color, however, is fairly good but heavy rains badly needed. Wheat short but fair color and looks like might yield 80% of crop.

Crawfordsville, Ind.: I think our corn is safe so far, but unless we have rain very soon, great damage is bound to be done. I think our oats crop is going to be a total failure. We have had no rain of consequence for weeks and this lack of moisture has caused great damage to both oats and wheat. I cannot believe that much, if any, benefit, could come to oats by rains now. Many of them are beginning to head out at six to eight inches high and many of the fields are brown.

ILLINOIS.

Nashville, Ill. (3): Frost did very little damage.

Eureka, Ill. (1): Little frost damage to corn. Oats look well yet.

Wenona, Ill. (4): Drought and frost have greatly depreciated the oats.

Sidell, Ill. (8): If we do not have rain soon we will have nothing here.

Ashton, Ill. (4): Little if any damage to corn by frost. Small grains and meadows need rain.

Paris, Ill. (8): Corn is in very good condition for this time of the year. Too dry for oats to grow.

Mt. Carroll, Ill. (4): Corn fast receiving damage from frost. Small grain and grass needing rain. Shower last night helpful.

Freeport, Ill. (4): Frost damaged corn slightly. If we get good rains from now on oats are likely to make good crop.

Highland, Ill. (6): Frost chicked corn but did not kill it. Drought has hurt oats and all vegetation. Fly has cut wheat crop almost in half.

Lexington, Ill. (5): Very dry here. Lot of corn not sprouted in dry ground. All corn that was up froze off but most of it coming up again.

Belleville, Ill. (3): About 5% damage to corn by frost. Dry weather makes oats short growth and light weight. Wheat fair stand; 5% damage by frost.

Mt. Pulaski, Ill. (5): Corn received severe setback from frost. Wheat and oats suffered from lack of moisture. Conditions serious and getting more so.

MISSOURI.

Bethany, Mo. (1): No frost damage. Has been raining for two days.

Sedalia, Mo.: 20% of our wheat will be too poor to cut. Balance about half crop.

Higginsville, Mo. (2): Very little corn damaged by frost on account of late planting.

Springfield, Mo. (3): No damage from frost that is noticeable. Corn is small but clean and healthy.

Salisbury, Mo. (4): Frost set corn back. Some replanted, although the general effect was not serious.

Chillicothe, Mo.: No damage done to corn by frost. Corn and oats crops in good condition. Fair wheat crop.

Authorized in States of Iowa, South Dakota, Nebraska, Kansas, Illinois, Ohio and Pennsylvania

ORGANIZED 1907

Western Grain Dealers Mutual Fire Insurance Company

Hubbell Building

Des Moines, Iowa

CARELESSNESS

Accumulations of dust and dirt in pit, workfloor and cupola of elevator, neglect to lubricate motors and bearings, untidiness and bad housekeeping inside and about the premises, are the causes of most of the fires recorded as "Unknown," and the result of CARELESSNESS. It is obvious that the burden of reducing the cost of insurance rests upon the policyholders and the habit of CARELESSNESS should be corrected.

Marionville, Mo. (3): Damage to corn 15%. Wheat shows damage by fly. Early sown oats all O. K. Late oats damaged.

Lamar, Mo. (3): Damage to corn is light. Oats suffered some from dry weather. Wheat has made good growth. Some damage of fly. Corn generally in good condition.

IOWA.

Clemons, Ia. (5): Meadows and pastures very short and oats are dying for want of rain.

Gilbert, Ia. (5): Some corn in low places damaged by frost. Drought is hurting corn on spring plowing.

Onawa, Ia. (2): Do not think the freeze hurt the corn to speak of and the same applies to the oats.

Henderson, Ia. (3): No damage has been done to corn by frost. Production of oats has been depreciated by drought. Too dry for all crops.

Jefferson, Ia. (5): Pastures all gone and oats very badly damaged from drought.

Tama, Ia. (5): Oats and corn are away above the average. Subsoil lacks moisture and may hurt later.

Belmond, Ia. (4): Dry weather and frost have damaged oats 20 to 25%. Many oats being killed in low places.

Wall Lake, Ia. (2): Do not think frost hurt corn. Do not think crops have been damaged much. Need rain.

Corydon, Ia. (6): No crops damaged beyond repair on account of drought. No crops, only grass, suffering by lack of rain.

Oscola, Ia. (6): Very little damage by frost. Dry weather making grain conditions serious, especially timothy, meadows and pastures.

Ackley, Ia. (4): Very little damage to corn by frost. Oats have suffered from drought. Crop will be very light if it does not rain soon.

Indianola, Ia. (6): Frosted corn not killed but set back week or ten days. Oats, meadows and pastures greatly damaged on account of dry weather.

Hamlin, Ia. (2): Lots of the corn has been damaged so they had to replant. We need rain very bad; if we don't get it soon we will not raise much.

Whitten, Ia. (4): Don't think frost has hurt grains. Drought has hurt pastures and hay badly. Rain will yet make good oats. Corn not suffering much yet.

Randolph, Ia. (3): Past experience says small damage by frost, probably 5%. Worms are hurting corn now. All small grain and grass cut by dry weather.

Guthrie Center, Ia. (2): Frost set the corn crop back a few days, however the crop was early by several days. The dry weather has cut the oats, also the spring wheat crop. Corn is holding well.

New Hampton, Ia.: Corn has not been damaged from any source. It shows a very good stand and is generally clean. Oats are very good now since the late rains and barring unusually dry weather in the future should make a good crop.

Lowden, Ia. (8): Frost has set corn back but do not think it has been badly damaged. Oats have not had sufficient rain to make a good crop. Chance for improvement. Taking grain as a whole, things look pretty good; rain will do wonders.

MINNESOTA.

Donnelly, Minn. (2): The condition of all grain is fair.

Hutchinson, Minn.: No damage done by frost or drouth here. All O. K. but hay.

Warren, Minn. (1): No corn up. Some damage to oats and barley from continued frosts.

London, Minn. (6): The frost did no damage to corn. There is no depreciation on crops by drought. Wheat, corn and oats doing fine. Nice rain today.

NORTH DAKOTA.

Shenney, N. Dak.: Very little frost damage.

St. Thomas, N. D. (7): Wheat and oats crops in good condition.

Carrington, N. D. (5): Corn was not hurt by frost. Drought held back a little. Wheat on fall plowing good. Spring plowing for all grain not so good. Too early to say anything about corn.

MONTANA.

Billings, Mont.: All crops in good condition.

Glendive, Mont. The general condition of corn, wheat and oats is very favorable. There has been no material damage by frost.

Valer, Mont.: Frost has not injured any grain crops. Late seedings will not germinate until we get rain. Early seedings up and growing. Intermediate seedings about 50% sprouted, which will result in a poor grade of wheat, the too late wheat containing green kernels. If we get moisture in next week and more later will raise a good crop here.

SOUTH DAKOTA.

Brookings, S. D. (8): Very little damage to corn. Oats damaged considerably.

Brentford, S. D. (7): No material damage to corn by frost. The drought condition has depreciated the crop production of oats 5%.

Miller, S. D. (5): No damage has been done to corn by frosts. The drought has materially reduced the prospect for the small grain crops.

Bridgewater, S. D. (8): Corn not hurt much yet but in this locality all other grains badly damaged. No harvest in sight unless rain comes soon.

KANSAS.

Plainville, Kans. (4): No frost damage apparent. Too dry for oats. Wheat and corn improved since May 1.

Madison, Kans. (9): Weather fine for crops of all kinds.

Logan, Kans. (4): We are simply too dry for everything.

Waldo, Kans. (5): Crops in general suffering from lack of moisture.

Wellington, Kans. (6): Corn slow and late but last cool spell did not hurt it.

Sedan, Kans.: Corn not damaged by anything. Wheat about 12 bu. estimated; oats good.

Mahaska, Kans.: Freezing weather has not hurt the crops here, but the cut worms have taken some corn.

Lyons, Kans. (5): Little or no frost damage to corn. Oats generally good to date. Wheat prospects below average.

Uniontown, Kans. (9): Corn is very small on account cold weather. Fly has damaged wheat. Oats look good.

Greensburg, Kans. (6): No frost damage to corn. Continued dry weather has ruined the oats and barley. Wheat 6 to 8 bu.

Pittsburg, Kans. (9): Wheat is spotted; oats only fair in this territory. Plenty of moisture. Corn looks well. Wheat estimate about 70%.

Hillsboro, Kans. (5): No damage has been done to corn by frost as far as we know. Oats and corn crop are promising a fair yield under favorable weather conditions from now on.

THE RECORDS PROVE IT!

On May 29th and on June 1st, we predicted July Wheat would sell at 158, Sept. 155½, and Dec. 158½. July Oats 47, Sept. 47 ¾, and Dec. 50, when all should be bought.

The records show these limits were reached and you all know what followed.

This is the sort of service everyone wishes.

MARKET CHART

O. D. WEAVER, Manager

309 So. LaSalle St.

Chicago, Ill.

HENRY RANG & CO.

Established 1862

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

Neodesha, Kans. (9): No damage to corn by frost. Plenty of moisture. Oats and corn fine; same damage by Hessian fly in some fields of wheat.

McKeeney, Kans.: No damage by frost. Will be no oats on account very dry spring. Will be very little wheat unless it rains in very few days.

Ashland, Kans.: No damage from frost. The drought has cut oats fully 50%. Wheat crop has gone back great deal last 30 days. Corn is standing still.

Wichita, Kans. (6): No frost damage in this immediate territory. Dry weather causing crops to be backward and some wheat fields ripening prematurely, making light wheat.

Belleville, Kans.: The wheat acreage in this vicinity was all abandoned and we are not expecting much of the oats crop. The oats just seem to be drying up. We need rain badly or the corn will be hurt before long.

NEBRASKA.

Neligh, Nebr. (7): Fine rains here have put all crops, hay and pastures in good condition.

Belden, Nebr. (7): Too early to determine damage to corn and oats by dry weather and frost.

Superior, Nebr. (9): No damage this territory by frost. Everything in good condition now.

Roseland, Nebr. (9): Wheat much in need of rain. Oats and barley can stand more than wheat to make a crop.

Winnetoon, Nebr. (7): No injury to corn by frost. Oats do not appear to be hurt much but have not grown any for 10 days.

Superior, Nebr. (9): Condition corn and oats good. No wheat. Been plenty moisture but still no reserve. No damage by frost here.

Beatrice, Nebr. (9): Very little damage by frost in this locality to grain crops. General condition fair. Wheat and oats heading good but short.

McCook, Nebr. (6): No damage to corn from frost. Our wheat deteriorated, we believe, on account of too many sudden changes in temperature.

Nebraska City, Nebr. (9): Corn was frozen badly and has lost all its early start. Oats also still show effects of the cold weather. Wheat needs rain badly.

Fremont, Nebr.: The ground around here is in good shape for the corn and the corn looks excellent. Corn around here is from 5 to 6 inches high and the stand is very good. Wheat looks good also. There is not enough oats raised close by to judge the condition of an oat crop.

Luverne, Minn.: We have had two or three good rains and conditions are a great deal better in this territory. I notice there are some early oats heading out about five or six inches high. I do not believe they will amount to much. I believe the late oats will be a good crop and the corn is coming along fine. I am afraid we will have a poor stand as some of the corn did not sprout and grow on account of the dry weather.

Ashland, Nebr.: With reference to crop conditions in the vicinity of say thirty miles around the town of Ashland, I will say that 40% of the wheat acreage has been abandoned or planted to other grains, such as oats, barley and corn, the balance of the wheat acreage left I would estimate to be about 50% of a crop. Wheat is heading out and the best fields are standing about eighteen inches high and short heads. It has been very dry until the last few days, in which several local showers fell which helped the wheat, also the replanted corn, which might not have sprouted without the rain. There are very few oats raised in this vicinity. I would call corn a 100%, fields clean and first planting of corn being cultivated the second time. Good stand and color.

OKLAHOMA.

Kingfisher, Okla. (.): Harvest is almost ready to cut.

El Reno, Okla. (5): No frost damage to corn. Wheat hurt from drought. Oats very good.

Marshall, Okla. (5): No damage to corn here by frost. Oats damaged by drought 10%. Wheat 35%.

Enid, Okla. (4): No damage by frost. Drought damage to oats severe, 50%. Wheat light yield and corn O. K.

Enid, Okla. (4): No frost damage to corn. Drought has hurt the oats. We are in bad shape with our wheat and oats. Corn may yet recover.

Geary, Okla.: No frost damage. Wheat and oat crops damaged severely by drought. Row crops holding but must have rain at once.

Kingfisher, Okla. (4): The three hot days week before last reduced our wheat materially, 30% or so. Will not have more than a third of a crop.

VAN DUSEN HARRINGTON CROP REPORT.

The information contained in our crop reports is obtained each week from our many correspondents located throughout the Northwest. We endeavor to cover the situation in a general way and do not attempt to forecast, but give conditions as they are reported from week to week.

Unseasonable weather has been general throughout the Northwest since our letter of a week ago. Very severe storms have caused heavy property damage. High winds, together with ex-

treme heat, have dried the soil in places.

At present the Northern half of Minnesota and all of North Dakota, barring a few spots in the Western and Southern parts, have excellent prospects for small grain crops, with the exception of rye. In the Northern territory there is sufficient moisture and the grain has a good stand and color. There are a few local areas where the fields were thinned to some extent by the heavy frosts.

The Southern half of Minnesota and Eastern South Dakota need moisture very badly. During the past few days there have been showers over this territory, but the soil was so dry that continued rains are required to prevent further damage. Under the best conditions in the future, small grain in the dry sections will be lighter than last year. In South Dakota, west of the Huron and tributary to the Missouri river, there have been fine rains and the grain is excellent.

In Central Montana there has been sufficient moisture and the conditions are good. In the Southern and Eastern districts the ground is dry and crops are very spotted. Unless they receive moisture from time to time, there will be further decrease. Considering the

weather and lack of moisture in Southern Minnesota and South Dakota, the crops have stood up remarkably well. The pastures and meadows are dry and brown and there is a heavy shortage of summer feed for stock.

The rye crop generally throughout the Northwest is the poorest in a number of years. In South Dakota and Southern Minnesota some of it is being plowed up and fields resown to feed grains. Conditions in North Dakota and Northern Minnesota are better than in the South.

Corn planting is practically completed, except a few spots. In the earlier districts it has a good stand. There have been cut worms in a number of places and some corn has been replanted.

Flax, as a rule, shows a good condition, except in the dry territory,

where some of it has not as yet germinated. In Eastern South Dakota it is only fair. Owing to the dry weather some of the contemplated flax acreage may be abandoned altogether. If so, the total may show a slight decrease under the earlier estimates.

In summary, we believe that at present the Northwest prospects for wheat and small grain are under those of a month ago. This is due principally to drought in South Dakota, Southern Minnesota and parts of Montana. In North Dakota and the Northern half of Minnesota, conditions as a whole measure up well to those of last year.—The Van Dusen Harrington Co., by W. G. Hudson. June 3.

2774 Greenview Ave., Chicago. Also in New York, Boston, Toronto and 31 other principal cities. See your telephone directory.

FRONT
Above is the front view of a "Duplex" Window Sign as seen by people entering or passing store

FOR SALESMEN'S AUTOS, WAGONS, TRUCKS, ETC.

Decalcomania transfers give you a quick, easy, inexpensive method of "trademarking" all your vehicles. Powerful publicity at small cost.

**WE
THANK
YOU
PLEASE CALL
AGAIN**

BACK
Above is shown the back, or reverse, side of the same "Duplex" Window Sign carrying the dealer's good-will message to all departing customers.

MEYERCORD "Duplex" Transfer WINDOW SIGNS

**read from
BOTH SIDES**

Get them "coming and going" with Meyercord "Duplex" Transfer Window Signs.

Your advertisement on the front and the dealer's good-will message on the back. Or, if desired, the same advertisement on both sides.

Double duty from a single sign, right at the point of purchase.

Dealers Want These Signs

Because they combine their personal message with that of the manufacturer. This feature instantly wins the dealers' favor and insures the signs a prominent place on the doors or windows. Thousands will see them daily as they pass, enter, or leave your dealers' stores.

Anyone can put them up. They are applied as one sign just as easily and as quickly as the regular single-faced transfer signs. Once applied, they remain permanently for a long time.

Beautiful, Non-Fading Oil Colors

We reproduce any trademark, design, or lettering on the front and any desired message on the back. Brilliant, non-fading oil colors are used—any color, or combination of colors, including gold. There is no limit as to size.

Our Service Department and staff of artists will originate new designs, or assist in carrying out your ideas.

Send for samples, sketches and prices without any obligation on your part.

Terminal Markets

FORT WORTH, TEX.

G. E. Blewett, Correspondent.

Weather.

Weather over the entire state the past two weeks has been clear with rather high temperatures and prolonged drought, and general complaints are heard from all sections needing rains for the forcing of all crops. Temperatures here, however, have not been as high as those showing in the North or Central West. No rain has fallen in the state for the past three weeks or more and moisture is needed badly for cotton as well as corn and late oats and wheat.

New Crop Wheat and Oats.

Harvesting of oats and wheat is beginning as far north as Wichita Falls and Sherman and will be general over this section next week. While no new crop wheat or oats have been received here as yet, still reports have been received of a car of new crop wheat threshed in Collin county which tested 62 lbs. and yielded over 29 bus. to the acre. Some new crop oats were also threshed in that county which graded No. 2 red, testing 29 lbs., and yielded 42 bus. to the acre.

Business.

Business the past week has been of a steady volume with fair demand although premiums on all grain are somewhat lower. Mills report daylight run which is about normal for this season. Mixed car dealers report draggy demand for feeds.

Wheat.

Wheat receipts have been rather slow but slightly over last week and last year, while offers for shipment from the country have been rather steady. Demand has been slow with premiums sharply lower and with nearness of new crop it is believed these premiums will show further declines. So far there has been no general bids made for new crop wheat either from mills or exporters but some little trading has been put through this week with new crop No. 1 hard wheat selling at 7c over Chicago July delivered Group 3 or common points for July shipment.

Stocks of wheat have shown further reductions here and only one concern has any wheat to speak of on hand which they are holding at a high premium over the options.

Mills have been active buyers of dark hard and hard wheat the past week. The recent advance has about stopped this demand as they are not inclined to stock up any further at the advance. Premiums have not followed the options up and prices now are not so very much higher than when July wheat sold at 10c per bu. less.

Conservative estimates of Texas wheat yield for this crop now run from six to seven million bus. as the condition of the growing crop has shown some improvement the past two weeks.

Today's values here on wheat (June 6) are as follows, basis delivered Texas Group 3 or common points: No. 1 dark hard, \$1.90; No. 1 hard wheat, \$1.85; No. 1 mixed, 75 per cent soft, \$1.84.

Corn.

Receipts of corn have been heavy the past two weeks with increased offerings from the country shippers and demand has been very slow, resulting in a further decline in premiums which has been very disappointing to dealers here who accumulated stocks of corn on hedge which proved rather disastrous in this case. Demand for white corn while fair has been far below normal and mixed corn is very draggy with full stocks here. Today's (June 6) values, basis Group 1: No. 2 white corn, en route, \$1.25; L. H. June, \$1.25; July, \$1.26; August, \$1.28. No. 2 yellow corn, en route \$1.26; L. H. June, \$1.25; July, \$1.26; August, \$1.28. No. 2 mixed corn, en route, \$1.20; L. H. June, \$1.19; July, \$1.21; August, \$1.22.

Oats.

Receipts of oats have been very liberal with heavy offers but demand has also been very good and premiums have held firm, but the recent sharp advance has discouraged any further accumulating of supplies and resellers here have been inclined to discount northern prices to un-

load their holdings on this advance and wait for breaks before again buying.

It is now apparent that Texas will make more oats than formerly estimated while Oklahoma also has a good crop, even better than last year, and these facts have tended to cool the demand here, especially for deferred oats on the high options. The movement of new crop oats will be under full blast next week and it is believed there will be a preference shown for these new oats especially as they will doubtless go at a discount under the old crop white oats. Some trading is being done in these red oats as well as white oats for deferred shipment.

White oats values here today (June 6), basis Group 1: No. 3 white oats, en route or quick, 63½c; F. H. July, 62c; August, 60c; September, 58c; October, 55c. Red oats premium has shown a heavy decline and these are now selling at close to white oats prices while some few weeks ago they sold as high as 10c over white oats. Red oats values here today (June 6), basis Group 1: No. 3 red oats, bulk, prompt, 62c; June, 61c; July, 60c.

Milo and Kafir.

Receipts and offers of these have been rather light the past week and as drought continues, the promise of the growing crop is not any too good, consequently farmers are inclined to hold back their surplus until further promise is made of coming crop. Demand has been steady and this week quite a large amount was worked to California buyers at very satisfactory prices which has caused a better demand here with some advance in values. Stocks here in elevators, however, are rather liberal and sufficient to last.

Today's values, basis delivered Texas common or Group 3, as follows: No. 3 or better yellow milo, en route or prompt, \$2.25; No. 3 or better white kafir, en route or prompt, \$2.02.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Stocks of barley on June 1, 1925, were 44,623 bus.

Exports of grain for the week ending June 6 were: Wheat, 279,574 bus.

The Girard Grain Co., Inc., with offices in the Bourse building, has closed its doors and gone out of business.

Stock of rye on June 1, 1925 was 43,529 bus. compared with 78,955 bus. May 1, 1925, and 76,280 bus. on June 1, 1924.

Stocks of oats on June 1, 1925, were 390,090 bus. compared with 501,060 bus. May 1, 1925, and 93,637 bus. June 1, 1924.

Stocks of corn on June 1, 1925, were 140,702 bus. compared with 208,673 bus. May 1, 1925, and 4,871 bus. on June 1, 1924.

Stocks of wheat on June 1, 1925, were 1,971,649 bus., compared with 2,150,583 bus. May 1, 1925, and 1,016,560 bus. on June 1, 1924.

At 29th street elevator: Oats, 23 cars; corn, 4 cars; mixed grains, 2 cars; barley, 2 cars; peas, 1 car; buckwheat, 1 car. Total, 33 cars.

Those unloaded at Port Richmond during the same time were: Oats, 425 cars; wheat, 324 cars; barley, 264 cars; rye, 156 cars. Total, 1,169 cars.

Receipts: Flour, 40,932 bbls.; wheat, 566,920 bus.; corn, 7,025 bus.; oats, 138,963 bus.; rye, 1,088 bus.; barley, 4,481 bus., and 128 tons of feed.

Stocks in Philadelphia public warehouses on June 1, 1925, were: Flour, 120,702 bbls., compared with 105,874 bbls. May 1, 1925, and 122,007 bbls. June 1, 1924.

The following cars of grain were unloaded at the Girard Point elevator during the month of May, 1925: Wheat, 1,334 cars; corn, 4 cars; rye, 35 cars; oats, 290 cars. Total 1,663 cars.

Philadelphia Flour Market.

Philadelphia, June 6.—The flour market is quiet but steady. Receipts for the week just ended were 40,932 bbls. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$8.50@9; soft winter straight, nearby, \$8.50@8.75; hard winter straight, \$8.75@9; hard winter soft patent, \$9@9.50; spring first clear, \$7.75@8.25; spring patent, \$8.75@9.25; spring short

patent, \$9.50@10; fancy spring and city mills patent family brands, \$10.25@11. Rye flour, \$7@7.25 per bbl. in sacks, as to quality.

DENVER, COLO.

F. R. Houlton, Correspondent.

Receipts of grain at Denver the past week were 123 cars.

R. H. Campbell, president of J. A. Campbell Co., flour merchants of Portland, Ore., was recently in Denver on business.

John Hays of the John Hays Grain Co. of Wichita, Kans., was recently in Denver in connection with a suit against one of the local banks.

W. Carey Cook, manager of the Longmont Farmers Milling & Elevator Co. at Fort Collins, was a visitor in Denver the last of this week.

MEMPHIS.

George Williamson, Correspondent.

E. F. Belden, Nashville representative of the Red Star Milling Co., visited the local office during the week.

F. M. Carter, flour and feed broker, Nashville, Tenn., was among the week's visitors to the local trade.

T. D. Jackson, grain and feed merchant of Tampa, Fla., was a visitor on the Merchants Exchange floor Saturday.

The Mississippi Valley Grain Co., John M. Trenholm, president, is the style of a new company just launched here to succeed the Mississippi Elevator Co. The latter company, which has been operated for several years, is being liquidated. Incorporators of the new concern are: John M. Trenholm, Ceylon B. Frazer, George J. Coleman, W. L. Owen and Walter Chandler. W. P. Battle, who was president of the old concern, will confine his activities to cottonseed products.

Receipts of corn for the week were only 80 cars but there is no scarcity as buying is not large, oats getting the preference. Cash quotations Saturday were \$1.24 for 3 white or 3 yellow and \$1.17 for 3 mixed. Oats receipts were 204 cars, the largest for any week of the season, and dealers feel good over the fact that at current selling prices all show profits. Buying is not for large amounts, but orders are received frequently and for immediate shipments. Quotations for cash were 57½@58c Saturday, but higher to come in after the speculative market took its upturn. Continued drought all over this territory is hurting corn and other feed crops and late cotton is also suffering some.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

T. C. Miller of the Custer Milling Co., Custer City, and E. J. Miller of Perry were among recent Grain Exchange visitors.

Fred Jones has sold his interest in a feed business at Madril and will join the staff of the Durant Milling Co. at Durant.

An elevator and a warehouse at Britton belonging to the Eagle Mill & Elevator Co. at Emond were burned recently. The loss was reported to be about \$15,000.

J. J. Gibson, grain traffic manager of the American Maid Flour Mills at Houston, was in Oklahoma last week. He is making a tour of the grain areas of Oklahoma, Texas and Kansas.

Fred Graves, elevator owner of Foss, who was here recently, said he did not expect to handle over five cars of wheat grown in his vicinity this year. Last season he handled forty cars.

B. C. Underhill, representing the Kansas Milling Co., made a tour recently of western Oklahoma and the Texas panhandle. He says that in some sections of the panhandle the wheat crop is a total failure and fields are being grazed.

Northeastern Oklahoma has an exceptionally good oats crop and prospects for a bumper corn crop, says Abe Richert of the Scannell Grain Co., who is back from a trip into that territory. Cotton prospects are excellent, he says. The territory grows very little wheat.

Wheat cutting began in the vicinity of Minco and Pocasset on June 1, according to Robert Davidson of the Pocasset Grain & Elevator Co., a recent visitor here. Cutting became general over central and west central Oklahoma during the first week of June. No estimates of yields have been received where combination machines are being used.

J. R. Thomas of Carnegie, a director of the Oklahoma Grain Dealers Ass'n, is installing cotton gins at Carnegie and Lindsay and expects to be active in the cotton business along with the grain business this year. He says the wheat yield in the Carnegie area this year promises to be only about 40 per cent of normal. An increase of 60 per cent over last year in cotton acreage is estimated. Cotton prospects are excellent. Threshing, he says, will begin June 10 in that territory.

The highest honor granted this year by the A. & M. College at Stillwater went to Miss Vera Vandenburg, daughter of Jesse Vandenburg of the Oklahoma City Grain Exchange. She received a loving cup for being the best all around student among 2,500 attending there, the reward being based on moral and spiritual life, scholarship, leadership, democracy, loyalty and co-operation. She received her degree of B. S. in teacher training in the home economics department and will teach next term at De Noya, Okla.

At a recent meeting in Oklahoma City of the board of directors of the Oklahoma Grain Dealers Ass'n a program of group meetings was arranged for, beginning June 15 at El Reno. Evening meetings are to be held at each place and attended by L. O. Street and C. F. Prouty, president and secretary respectively of the association. Other members of the board also will attend part of the meetings. It was an enthusiastic session of the board and members pledged themselves to give Secretary Prouty the utmost co-operation during the year. The second meeting will be at Hobart, June 16. Others follow: Clinton, June 17; Woodward, June 18; Alva, June 19, and Enid, June 20. After this series Secretary Prouty will arrange to hold group meetings of members in the north-eastern part of the state. The board meeting was attended by President Street, Secretary Prouty, J. R. Thomas of Carnegie, C. H. Cox of Enid, and J. J. Stinnett of Oklahoma City. Members M. E. Humphrey of Chickasha and R. E. Nelson of Clinton were absent on account of being out of the state.

BALTIMORE.

Robert C. Neu, Correspondent.

A. A. Cunningham, of Sneath & Cunningham Co., grain dealers of Tiffin, Ohio, was a visitor on the floor of the Baltimore Chamber of Commerce last week.

The "committee on hay and straw quotations" of the Baltimore Chamber of Commerce for the month of June consists of Messrs. Robert D. Sinton, C. Wilmer Watkins and Marion C. Dinsmore.

The regular monthly meeting of the Board of Directors of the Baltimore Chamber of Commerce will be held on June 8, at which the various grade committees to serve during the ensuing year will be elected.

Michael J. Gehring, for many years assistant superintendent of the Pennsylvania Railroad export grain elevator at this port, a man who was beloved by all who came in contact with him in a business way, died on May 28 and was buried on June 1. He was 64 years old.

Exports from the port of Baltimore during the month of May, 1925, with comparisons for the same month last year follow:

	May, 1925.	May, 1924.
Flour, bbls.	21,823	19,189
Wheat, bus.	851,427	2,494,033
Corn, bus.	159,155
Oats, bus.	225,871	89,761
Rye, bus.	1,337,952	120,087
Barley, bus.	188,501	21,934

The 7th annual convention of the National Federated Flour Clubs, an organization of wholesale handlers and distributors of flour, with branch clubs in ten of the leading cities of the United States, was held in this city on June 5 and 6, with a good attendance. Headquarters were at the Southern hotel, where an informal banquet was tendered the visitors on the evening of June 5 by the Baltimore Flour Club. Invited guests included the mayor of Baltimore; Hon. Sydney Anderson.

president of the Millers' National Federation; A. S. Goldsborough, executive secretary of the Baltimore Association of Commerce, and Jas. E. Hessong, secretary of the Baltimore Chamber of Commerce. One of the enjoyable features of the meeting was a boat trip on the steamer "Dreamland" to Annapolis, the state capital, where an inspection was made of the United States Naval Academy, the historic old state house and other places of interest. A buffet luncheon was served on the steamer and a jazz band furnished the music for dancing.

The domestic demand for flour appears to lack confidence, and the buying is mainly to piece out, or keep up assortments. Under these conditions there is no volume to the trading. Export business has fallen off also, and the weekly clearances from the port are light. Rye flour is dull. Quotations follow: Spring patent, \$9.25@9.50; spring straight, \$9@9.25; hard winter patent, \$9@9.25; hard winter straight, \$8.75@9; winter patent, \$8.75@9; winter straight, \$8.25@8.50; rye flour, dark to light, \$6@7.25.

NEW YORK.

J. M. Nugent, Correspondent.

The annual election was held recently and the entire ticket was re-elected. J. Barstow Smull remains as president; B. H. Wunder, vice-president, and Walter B. Pollock, treasurer.

The export demand for wheat during the past week was rather quiet. There was a scattered business in Manitobas and a little durums and spring wheat but the total in the aggregate did not exceed two million bushels in all.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: S. P. Arnot of Chicago, C. S. Stevenson of Minneapolis, O. Pyle of Wilmington, Del., Gene Dreyer of St. Louis, J. P. Dold of Buffalo, Sidney Smith of Winnipeg, W. M. Kirkpatrick of Montreal, and J. L. Hackett of Baltimore.

Flour Situation.

New York, June 6.—In flour a somewhat better demand developed for both spring and winter wheat qualities but this buying was not considered to be in the way of making replacements for future needs. In other words, the demand was simply to take care of unusual low stocks.

Prices were strong, advancing with wheat. Despite the fact that Europe has been out of this market in a general way for a long time, there was no interest on the part of foreign buyers. Even clearances were unusually light.

Spring patents were quoted at \$8.75@9.25; soft winter straights, \$8.50@9, and hard winter straights, \$8.60@9 per 196 lbs.

SALT LAKE CITY, UTAH.

Fred L. W. Bennett, Correspondent.

John H. Crane of the Sperry Flour Mills, this city and Ogden, is the proud possessor of a fine new Oldsmobile car.

The winter wheat crop in Utah this year is expected to exceed that harvested last year by nearly 1,000,000 bushels. The prospects are that the state will harvest 2,501,000 bushels, compared with 1,778,000 in 1924.

It is probable that in the near future a movement will be started to increase the grain warehouse facilities in Ogden. It is declared that they are far from what they ought to be for a city of Ogden's importance from a grain standpoint.

The Federated Seed Service, affiliated with the American Farm Bureau, is organizing an excursion to visit various alfalfa seed producing sections of the country, and it is expected they will include Utah, during the first week of August.

Nephi Thomas of the Granite Grain and Seed Co., Sugar House, is quoted in a recent issue of the East Salt Lake Times regarding the removal of the State Prison from its present location. Mr. Thomas says it should be taken right away from the residential district.

The Pacific Seed House has added eight new country buying stations in Utah and Idaho, equipped with cleaning machines. The company now has 34 stations in these two states, according to its popular manager, Paul V. Kelly. Mr. Kelly says business has been very satisfactory.

The grain business in Ogden is reported to be poor by some of the retailers, but the seed business has been good this spring, they say. Prices are fairly steady, but money is none too plentiful. Retail prices are reported to be: Hay, best lucern, \$17; timothy, \$20; grain, oats, \$2.40; wheat, \$3; barley, whole, \$2.40; corn, \$2.75; cracked, \$2.85.

The rains of the past week or ten days have been so heavy that it would take a mighty good pessimist to believe Utah will not have a bumper crop of everything this year. Even as these lines are being written another big storm has arisen, causing the rain to beat against the window pane in a vigorous manner. The grains are in excellent condition, as are all the crops.

Jos. M. Parker, manager of the Sperry Flour Mills of Ogden, has a letter from a German baker who asks assistance in placing a German boy in an American bakery so that he may gain the benefit of American experience. It is proposed that an American boy be sent to Germany to take his place and learn the German system. The suggestion was received through an official of the American Embassy in Germany.

Suit for \$7,750 has been filed in Ogden against the Farmers' Grain and Milling Co. of Cache Junction, the plaintiff being the parent and guardian of an 8-year-old boy who was killed in a one-man elevator in use at the company's place of business. It appears that father and child went to the plant on business and the child was killed in the elevator through defective equipment, the father claims in his suit.

Louis S. Beckett of the Louis S. Beckett Co. says wholesale business improved considerably in the past 30 days. There is a good demand for milling wheat, principally turkey, dark hard variety. Supplies very limited, supplies almost depleted on this grade. Prospects are for a bumper crop of all grains in Utah and Idaho and with an anticipated short crop in the country compared with last year, the farmers should get good prices and grain interests should enjoy a splendid business.

The State Board of Agriculture has adopted rules and regulations for the certification of grain for seed. Shipments for certification must show that the grain was grown on land previously cultivated and kept free from weeds and under no circumstances may it be planted on land that was in small grain or old sod the season immediately preceding. Varieties eligible to certification are Dicklow, Turkey Red, Federation Kofford, in wheat; Swedish Select, in oats, and Trebel Blue Club in barley.

The Supreme Court of the state has ruled that the appeal of the Oregon Pacific Grain Co. of Portland, Ore., in the Intermountain Milling Co. case was without grounds. The Oregon concern sued the receiver of the Intermountain company for \$47,051.10, representing 40 per cent of the loss incurred on 39 cars of wheat purchased in the Intermountain Milling Co.'s name and held too long on a falling market in the fall of 1920. The courts took the stand that there was sufficient evidence to show that the Pacific company was in practically complete control of the defunct Utah company.

TOLEDO.

S. M. Bender, Correspondent.

Toledo flour stocks June 1 were 31,000 bbls. compared with 40,000 bbls. May 1 and 38,000 bbls. on June 1 last year.

Toledo grain inspections last week were as follows: 31 cars of wheat, 49 cars of corn, 47 cars of oats, 1 car of rye and 2 cars of barley. Total 130 cars.

The hay crop in southern Michigan and most of Ohio will be short and rains now will not help much. Corn needs rain very badly to make it come out right.

Flour production of Toledo mills last week was 31,350 bbls., equal to 65 per cent of capacity. The week before it was 29,600 bbls., and a year ago last week was 29,800 bbls.

The Kieser Milling Co. has been organized here to take over the plant formerly known as the Kasco Mills, Inc. Toledo capital has been interested and the business will go on as usual with the same organization with the exception of the officers.

Message from Ottawa, O., last week said: "The extreme heat is seriously damaging wheat, oats and hay. I have never seen the hay as short before. Some farmers are turning their cattle in wheat and oats as pastures are all dried up. Some wheat and oats will be cut for hay."

Inspections in this market for last month were 122 cars of wheat, by lake steamer Northwind, 113,000 bus., and steamer Thos. Mayham, 125,000 bus.; 133 cars of corn, 181 cars of oats by lake steamer Coolidge, 284,000 bus., steamer J. J. Boland, 481,000 bus., 14 cars of rye and 1 car of barley. Total cars, 451.

Continued hot and dry weather has resulted in better prices for cash grains and the demand has also shown some improvement. Consignments are on the increase as the upward trend makes an excellent market for this very thing. Mills are running on better than half schedule and the feed trade is active. Flour sales were larger last week.

Ohio millers report some wheat looking good and other fields looking like a total failure. Heavy frosts lately did much damage to corn and wheat but most of the loss has been due to dry weather just as government reports show. Much replanting of corn is going on and the corn crop may be the farmers' money crop this year. Wheat movement is slow and farmers mostly inclined to hold.

Members of the Flea Club have gone on their annual pilgrimage to Harry Devore's cottage at Long Lake, Mich. Those comprising the party this year were George Woodman, manager of the Grain Marketing Elevator, Dick Spangler of Defiance, O., Charles Keilholtz of Southworth & Co., Robert Devore and the host. They will be gone about ten days or two weeks, depending on the fishing and weather.

The new Commerce Club was opened this week in the new Richardson building. The writer was taken through from cellar to attic the other day and though it is all on one floor it is certainly the last word in public clubs. From the modern offices to the dining room, lounge and kitchen it is complete and sumptuous to the last degree. It is here that the Ohio Grain Dealers will meet the 23rd and 24th of this month. Those who attend will be well entertained and find the program very instructive.

Purchase of the Ann Arbor railroad by the Wabash railway, announced officially the past week, again brings Toledo into

the spotlight as the hub of another great railroad system. The Ann Arbor was originally built largely through the promotion of Toledo capitalists of the early days and it was incorporated back in 1895 in Michigan as a reorganization of the old Toledo, Ann Arbor & North Michigan railroad. This new arrangement, if approved by the Interstate Commerce Commission, will give Toledo four different connections with the completed system.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

Miss Nora Creamers, formerly of Strauss & Co., has accepted a position with the M. W. Muller company as bookkeeper and stenographer.

Chester Silcox, chief grain inspector of the Los Angeles Grain Exchange, departed last week for a month's vacation in the east. Mr. Silcox will visit St. Louis, his old home city, and return by way of Chicago and Salt Lake City.

Walter Peters, manager of the grain department of Tarr & McComb, Inc., left this week on his annual vacation. Mr. Peters expects to be absent from the office for several weeks and it is understood that he will spend his vacation at Big Bear Lake fishing and hunting.

J. Carver Strong, manager of The Price Current-Grain Reporter, who has been attending the Texas Grain Dealers' annual convention at Fort Worth, Tex., stopped off in Los Angeles several days last week and while in the city was a visitor on the floor of the exchange.

G. A. Collier, marketing expert of the Department of Agriculture, Washington, D. C., stopped off in Los Angeles for several days this week. Mr. Collier is returning to Washington by way of San Francisco after attending the Texas Grain Dealers' annual convention at Fort Worth, Tex.

Cash Markets.

The grain market at this terminal has remained very good. The demand for all kinds of grain has been increased, creating a market for all arrivals during the week and leaving empty railroad tracks at the close of the week.

No. 2 yellow corn, spot, is selling at \$2.46 No. 2 yellow corn for prompt shipment selling at \$2.45; No. 1 yellow corn is being offered at \$2.49 with a bid of \$2.45; No. 2 yellow corn, board terms, selling at \$2.46. The barley market remains firm with No. 2 feed barley for 10-day shipment being offered at \$1.95.

The ground feed arrivals for the week amounted to 24 cars, the demand good with the prices a little lower over a week ago. Utah-Idaho millrun selling at \$40; Kansas bran, \$37; alfalfa meal, medium ground, \$29; molasses alfalfa mixed, \$27; cottonseed meal, \$40; beet pulp, \$41; rolled barley, \$41; copra meal, \$30; linseed meal, \$43.

The hay arrivals for this week were 133 cars; market is dull. No. 1 alfalfa selling at \$20@21; No. 1 barley hay, \$19; No. 1 oat hay, \$21. At the end of the week there are a considerable number of cars left on track.

CINCINNATI.

George Mosbacher, Correspondent.

Interest in oats was limited but the market showed considerable strength because of the very light receipts and prices were higher.

W. A. Van Horn, popular member of the local hay trade, who has built up a large and satisfactory hay shipping business, has returned from a two weeks' visit to his customers in the principal cities of the South.

Cash wheat prices responded to the option advances during the week and prices passed the \$2 level, or 3c higher than a week ago. Spot buying was more active than for some time, and shipments to southern and nearby mills liberally increased. The demand, though, was only

for immediate milling wheat of light moisture and damage and more neglectful of low grades, which had to be sold at wider discounts.

Herman Riesenbergs, who has worked faithfully in the interests of the Grain and Hay Exchange as its auditor and book-keeper, and who is particularly deserving of a vacation, will spend the next two weeks visiting relatives in various Ohio and Kentucky cities.

"Jack" Dorsel of the Dorsel Grain Co., who has been undergoing treatment for physical disorders at Asheville, N. C., the past year, was recalled this week to attend the funeral of his two-year-old baby boy whose death occurred from spinal meningitis last Thursday. Condolences of the entire trade are extended to poor Jack and his family.

The Grain and Hay Exchange ball team added another game to its string of victories over various local trade organization nines when it defeated the Chamber of Commerce at the Gym Athletic grounds last Friday by a score of 2 to 1. The batting of Walter O'Connell featured the game. Ambrose Bender was manager for the grain boys and Gus Wissor for the C. of C.

There was no special activity in corn but a moderate improvement was noted in the demand, especially for eastern mill shipment, and the market ruled firm and prices about in line with last week's close. The

present high values have apparently curtailed consumption to some extent and concessions were necessary in many instances to stimulate outside buying. White was less actively sought than recently and premiums were lost. Receipts were fairly liberal.

Stocks of grain held in Cincinnati elevators for last week and previous weeks were as follows:

	June 5, 1925	May 29, 1925
Wheat, bus.....	111,199	98,830
Corn, bus.....	133,274	144,183
Oats, bus.....	57,897	59,370
Rye, bus.....	8,474	4,000

Law Unfair.

That grain shippers of Cincinnati and other cities are planning a movement to try to obtain repeal or amendment of the Standard Grain Act, requiring inspection of grains shipped in interstate commerce, it was disclosed in United States District Court, Friday, when H. E. Richter, head of the grain company bearing his name, pleaded guilty to violating the act.

Richter explained that the law is unfair, in that it is not of uniform operation and places grain men of Cincinnati, Toledo and other cities, having grain inspection, at a great financial disadvantage in competition with places that have no inspection. He said the inspectors are not government officials, but are employed and paid by grain exchanges. The inspection fee is \$1 a carload for incoming grain and 50 cents for

outgoing grain. He said that shippers in Covington, Cleves, Lockland or other nearby places, which have no inspection service, can ship grain without inspection.

He admitted shipping grain to various points in the South. Judge Hickenlooper said that he could not pass on the fairness or unfairness of the law. He imposed the minimum fine of \$100.

MILWAUKEE.

J. F. Foley, Correspondent.

John Thauer, veteran member of the Milwaukee exchange, is the new doorkeeper at the exchange. He is handling his position in an able manner.

Receipts last week were 150 cars barley, 246 corn, 178 oats, 36 wheat, 8 rye, 0 flax, 7 miscellaneous; total 625 cars, against 359 the week before, 278 a year ago and 387 in 1923.

Shipments last week were 340,650 bus. oats, 64,189 corn, 20,220 barley, 27,325 wheat, 11,870 rye; total 464,254 bus., against 418,011 the preceding week and 489,938 a year ago.

The stocks of flour in Milwaukee on June 1 were 16,213 bbls. compared with 17,515 bbls. on May 1; that of 16,645 bbls. on June 1, 1924; that of 53,359 bbls. on June 1, 1923; and that of 21,418 bbls. on June 1, 1922.

The regular quarterly meeting of the Mid-West Regional Advisory Board will be held in Milwaukee July 14-15. J. L. Bowlus, manager of traffic of the Chamber of Commerce here, is the alternate general chairman.

A new addition has been built on the elevator of the McKercher-Rossier Milling Co. of Wisconsin Rapids, Wis., which will increase its capacity by 5,000 bus. with a total of 20,000 bus. The additional space also gives 400 feet more of mill space.

The Chas. A. Keller Co. has been formed to carry on the business formerly conducted by Chas. A. Keller at 1729 Vliet street, Milwaukee, until the time of his death. The incorporators are Rose Keller, Otto F. Duecker and Christian T. Duecker, and have incorporated for doing business in grain, flour and feed.

Milwaukee milling output last week was 7,000 bbls. of wheat flour as compared with 3,650 bbls. the previous week and 4,000 bbls. last year. Flour receipts at Milwaukee last week were 56,210 bbls. as compared with 41,810 last year, and shipments were 2,770 last week as compared with 18,290 in the same week of 1924.

Rye is coming along fair throughout Wisconsin although in some places it is heading short. The small grains have a good color now but need moisture. Oats, barley and spring wheat have advanced some but are mostly a short stand. Rain is needed in all sections because of the drought which has prevailed for the last month.

Larger movement of barley and coarse grains noted, but active markets prevailed and prices are 3/4c better for oats for the week, barley is up 1/2c, while corn is 1/2c lower with premiums for wheat better for durums and winter grades. Rye is also 2/3c up on some export business. Rains and higher temperatures have improved corn prospects in particular.

At the annual meeting of the Milwaukee Chamber of Commerce Clearing Ass'n the following directors were elected for the ensuing year: F. J. Phelan, W. A. Hottensen, A. L. Flanagan, H. H. Peterson, B. J. Aston, J. A. Campbell, Joseph Lers. The directors whose officers who are: F. J. Phelan, president; A. L. Flanagan, vice-president; Joseph Lers, secretary; W. A. Hottensen, treasurer; and J. A. Campbell, assistant secretary.

The largest cargo of rye ever shipped out of Milwaukee was that taken out by the steamer William H. Wolf and consigned to Port Colborne, Ont., Canada. She loaded 144,026 bushels at the Rialto elevator and 207,038 bushels at the Kinnickinnic elevator, making a total of 351,164 bushels. The market price for No. 2 rye was \$1.17 per bushel, making the value of the cargo \$410,745. This cargo reduced Milwaukee rye stocks to about 3,000 bushels on June 1.

DULUTH.

S. J. Schulte, Correspondent.

H. R. Reno, member Logan & Bryan, was a visitor on the Duluth market during the last week. He expressed himself as optimistic regarding the outlook in the grain trade on this market during the coming fall season, if the spring wheat and other crops turn out according to their present promise. He looks for market operations in all grains to attain good volume with the probability of foreigners being again liberal in view of the improving purchasing ability of the European countries.

Trading in durum in fair volume during the last ten days on this market but it was spasmodic. The Barnes-Ames Co. was prominent on the buying end of the market in that grain absorbing the great bulk of the offerings at times. Shipments of durum for the eastern markets have been light for some time. Less than 2,500,000 bushels of durum now remain in the elevators here and it is expected that a large proportion of it will be shipped east under July contracts. Some boat space has been booked for nearby shipment.

W. D. Jones, manager of the Hallett & Carey Co.'s Duluth office, has returned from an extended inspection trip over a wide area of the best producing territory of North Dakota. He said that he was unable to find that any real damage had been sustained by the wheat crop through

the recent frosts. The heavy rains of last week, he found, had supplied sufficient moisture to take care of all the growing crops for some time ahead. As far as he was able to discover, farmers over North Dakota have become distinctly optimistic over the season's outlook for all crops and they are disposed to make their plans on the supposition that outturns will be fully normal with better than the average looked for in some districts. As far as he could ascertain, much larger areas have been seeded to flax this season than had been counted upon originally, the breaking of new land and plowing of old for the crop having been aided by fine weather conditions.

Members of the Duluth Board of Trade have adopted the following delivery basis on spring wheat grades for the new season: No. 1 hard spring, 2c above the contract price; No. 1 dark northern spring, 1c above the contract price; No. 2 dark northern spring, 2c under the contract price, and No. 2 northern spring, 3c under the contract price.

Under the present rule, No. 1 hard spring is deliverable at 4c over, No. 1 dark northern at 2c over, and No. 2 dark northern at 1c under. No. 3 dark northern and No. 3 northern, now deliverable at 18c and 20c under, are eliminated in the change.

Movement of grain to the Duluth and Superior terminals is in the heaviest volume at present in several years. Grain has been flowing in from the country freely lately as a result of farmers having completed their spring seeding and being anxious to dispose of their remaining grain holdings. Receipts of all grains here during May aggregated 7,513,781 bushels against 4,766,965 bushels last year. Shipments were 17,482,790 bushels against 12,794,012 bushels last year. Comparative statement of receipts and shipments of grain at this market during the month follows:

	1925	1924
Receipts		
Shipments		
Wheat, domestic.....	4,874,611	8,219,385
Bonded wheat.....	52,821	378,241

MINNEAPOLIS.

H. A. Paul, Correspondent.

C. Kurth, Jr., of Milwaukee was a Minneapolis visitor last Thursday.

T. J. Cassidy of the C. E. Lewis & Co. is spending a few days at Osakis, Minn.

F. M. Crosby of the Washburn-Crosby Co. has just returned from a tour of Europe.

Harry Murphy of the Continental Grain Co. is back after a trip through the western country.

Harry Miller of the Atwood-Larson Co. returned from a visit to his old home in Iowa this week.

V. G. Pickett, sales manager for the Everett-Aughenbaugh Co., was a Minneapolis visitor this week.

Leonard Brisley and E. W. Dittes of the W. C. Mitchell Co. have completed a tour over the Northwest, calling on their trade in the four states.

The Everett-Aughenbaugh Co., millers of Waseca, have moved their executive offices from that city to Minneapolis. They are occupying a suite in the Security building.

Elevator "K," owned and operated by the Sheffield Elevator Co., Flour Exchange, sustained a bad fire Saturday morning. The loss is estimated at as high as \$40,000.

Among the visitors on 'Change during the week were the following: A. S. Reed, Aberdeen, S. D.; L. O. Wampler, Sioux City, Ia.; A. B. Treadway, Los Angeles; W. P. Tanner, New York City; C. R. Davis and E. J. Kramer of Cleveland, Ohio; B. Lynch of Salina, Kans.; Ben G. Hetland of Milwaukee; A. K. Godfrey of Winnipeg; L. Aubert of Montreal; J. Vilooden of Winnipeg; R. C. Davidson of Hutchinson, Kan.; Richard Swartz of New Ulm, Minn., and H. Laufman of Chicago.

Cash Markets.

Wheat—The local cash market was a rather difficult proposition to line up on a number of days during the past week. Mills were in and out of the market in a spasmodic manner and shipping sales ran up and down the scale in good shape. Local stocks did not show any great decrease during the week, being 6,494,026 bushels vs. 6,674,960 a week ago and 9,902,149 a year ago. This is only three million bushels less than the same time in 1924 but with the character of the crop reports coming in, mills may be glad before the new wheat begins to roll in, that the total is no less.

DANNEN HAY & GRAINCOMPANY
Shippers of Choice Quality Grain & Hay

Write or Wire us for Delivered Prices
St. Joseph, Mo.

Flour business generally has shown some improvement during the past week and while nothing exceptional, at least it is better than it has been. Interior mills bought heavily in this market during the week, taking around 150,000 bushels one day alone.

The first of the week, there being a three-day accumulation of receipts to peddle, the market was easier and was around 1@2c lower before the session was very far advanced, with No. 1 hard spring quoted at 4@28c over the July. Today the market was about 2c higher on the top of the range. Low protein wheat was slow sale through the week but anything testing around 13 per cent moved in fair shape.

Based on today's range of sales, No. 1 hard spring sold at 4@30c over the July; No. 1 dark northern, 2@28c over, and No. 1 northern, 1@26c over.

Durum, unless of high protein, was in very poor request from milling sources all through the week until Saturday, when a little strength was in evidence. Today's range shows No. 1 amber quoted at Duluth July price @ 10c over; No. 1 mixed, 7c under @ 8c over; No. 1 durum, 5c under @ 8c over.

Corn—The first five days of the week showed a remarkably steady increase in the demand and consequent premiums and decrease in discounts for good quality yellow and high colored mixed corn. Low colored, however, were inclined to be slow sale. Offerings generally were small here and not heavy enough to take care of the demand. Today, however, there was a slackening in the demand for all kinds and especially for that carrying high percentages of moisture. Local stocks for the week total 320,230 bushels vs. 260,957 a week ago and 174,964 a year ago.

Today's range of sales shows the following: Yellow, No. 3, 4@5c under Chicago July; No. 4, 6@8c under; No. 5, 10@12c under, and the mixed corn as follows: No. 3, 6@10c under Chicago July; No. 4, 10@13c under, and No. 5, 14@15c under.

Oats—Early in the week offerings of this grain were fairly moderate and there was a good demand for what came in on the tables. Shippers were fair buyers but the aggregate total for week was not in any way imposing. Today, when the futures market skyrocketed some 3c or better, the cash followed right along and holders were getting July price @ 1/2c over for No. 3 whites and 1/2@2c less for the No. 4 whites. Local stocks showed a very moderate decrease of some 400,000 bushels, being 13-, 210,871 vs. 13,615,444 last week, and 692,066 a year ago. This looks like a lot of oats as compared with the same time a year ago but if the news regarding the oats crop in the central states turns out to run close to current advices, we may be glad of the reserve stocks before we get through the season.

ST. JOSEPH, MO.
N. K. Thomas, Correspondent.

A letter from Minden, Nebr., stated weather very dry, windy and dusty Friday and Saturday; all grain in need of rain, especially wheat, which is heading on short straw; thin stand. Good rain would do a world of good.

Ross G. Wheaton was elected to membership in the St. Joseph Grain Exchange June 4th on transfer from membership formerly in the name of E. C. Roberts. Mr. Wheaton is manager of the St. Joseph office of Farnum-Winter & Co., 1407 Corby building, and will represent that firm on the St. Joseph Grain Exchange.

Visitors on the St. Joseph Grain Exchange during the week ending June 6th included: J. L. Allen, Highland, Kans.; L. M. Graven, Clearfield, Iowa; J. Hamilton, Stewartville, Mo.; E. Smith, Gower, Mo.; J. H. Payne, Maysville, Mo.; W. M. Cramer, Osborn, Mo.; K. E. Puckett, Gower, Mo.; L. S. Chapman, Chicago; W. Kurtz, Amazonia, Mo.; H. F. Walker, Grand Rapids, Mich.; W. H. Swim, Severance, Kans.

Arrivals of all grains showed heavier the first week in June than the May average, and despite the nearness of the new wheat, the interest is picking up on offerings at all suitable for milling quality. Values have been advancing, and mills are taking clean wheat. Soft wheat has advanced materially, being quoted today around \$1.85 for No. 2 grade. Corn demand has been good, probably as a result of the hot weather. Oats offerings light and demand good.

J. C. Moats, who has been manager of Jackson Bros. & Co., stock and grain brokers, has bought the interests of the Shannon Commission Co., which is retiring from business, and has organized a new firm which will operate under the name of J. C. Moats & Co. The new firm will have its quarters in Grain Exchange hall on the fourteenth floor of the Corby building, now occupied by Jackson Bros. & Co.

J. C. Moats, who has been manager of Jackson Bros. & Co., stock and grain brokers, has bought the interests of the Shannon Commission Co., which is retiring from business, and has organized a new firm which will operate under the name of J. C. Moats & Co.

The new firm will have its quarters in Grain Exchange hall on the fourteenth floor of the Corby building, now occupied

by Jackson Bros. & Co., and Mr. Moats will continue as St. Joseph correspondent of the Jackson firm.

Farnum, Winter & Co., stock and grain brokers, have taken a lease on the quarters occupied by the Shannon company and purchased a membership in the St. Joseph Grain Exchange in the name of Ross G. Wheaton, manager.

Both changes will become effective June 1.

KANSAS CITY.
T. J. Tanner, Correspondent.

Edward Nathan of New Orleans, a broker, said in Kansas City Wednesday that supplies of wheat at the port were ample to take care of the current export demand.

Edmund M. Marshall, son of W. H. Marshall of the Marshall Commission Co., was elected a member of the Board of Trade Tuesday. He is only 22 years old and is the youngest member of the exchange.

Among the week's visitors at the Board of Trade were: Cecil Lamont, Winnipeg, Ont.; John Sanford, New Orleans, La.; E. J. Ismert, Oakland, Calif.; H. C. Shrangli, E. Shiller and J. Sheets, Denver, Colo.; L. Chapman, Great Bend, Kan., and C. D. Jennings, Hutchinson, Kan.

Harvesting of wheat began in several counties along the southern border of Kansas Friday, June 5. It had been going on in Oklahoma and Texas since Tuesday. In view of very hot weather this week, it is expected that cutting will spread to the center of Kansas by June 15, at which time special railroad rates for harvesters will become effective.

James N. Russell of the Russell Grain Co., who recently covered Kansas and estimated the wheat crop at 85,000,000 to 86,000,000 bus., has printed his report in a four-page folder, with a map showing the route he followed through central, southern, western, northwestern and eastern Kansas. The map also shows points in Colorado visited by Mr. Russell.

C. M. Hardenbergh, manager of the Southwestern Milling Co. of Kansas City, returned Thursday from a tour of the wheat districts of Kansas. He was accompanied by E. G. Broenniman, vice-president of the Standard Milling Co., New York, and others. Mr. Hardenbergh said the average of estimates by the party on the crop of Kansas was 75,000,000 bus., which was below expectations.

Owing to the resignation of Harry G. Stevenson as floor salesman, the Equity Union Grain Co. has engaged C. E. Fisher to fill that position. Mr. Fisher will become a member of the Board of Trade, having bought the certificate of C. F. McCord of the McCord-Logan Grain Co. Harry G. Stevenson has not announced his plans for the future. The McCord-Logan Grain Co. will be liquidated and Mr. McCord will become assistant manager of the Kansas City office of Lamson Bros. & Co., Chicago.

Payment of the final dividend of 10 1/2 per cent to investors in the Central Seed Wheat Association, in the fall of 1923, is announced by Harry Sharp of Topeka, Kan., secretary of the association. In raising a fund to buy seed wheat for unfortunate farmers in 13 Southwestern Kansas counties, the association, composed of millers, gainmen and bankers, received subscriptions of \$133,189, but this proved excessive and \$39,956 was returned. On the money used there was a profit of \$93,767, based on a return from farmers of one-fifth of the 1924 crop. On every dollar invested there was a profit of \$1.00 1/2. The total cost of handling the fund was \$12,046. Steps will be taken to disband the association.

Cash Grain Markets.

Wheat.—Receipts for the week, 543 cars, against 552 a week ago and 435 a year ago. The big end of the movement was on Monday, representing an accumulation over the holiday and Sunday. Buyers seized the opportunity to depress prices, and on a sharp decline very active buying developed. The market started up when offerings diminished and ruled strong, but exhibited a slightly weaker tone on the final day. Millers, both local and outside, were the main buyers and protein premiums increased. Smutty and low grades went to elevators. At the close hard and dark wheat showed net gains of 2@10c, with No. 1 at \$1.65@1.88, No. 2 at \$1.64@1.88, No. 3 at \$1.62@1.87 and No. 4 at \$1.59@1.86. Country advices indicated that the recent enlarged marketings, which were of a pre-harvest character, had begun to wane and that light arrivals might be expected during the remainder of the month. Soft wheat receipts were moderate, including few cars of choice grain. There was a good demand for milling grades. After an initial decline prices recovered and the final quotations were 3@5c higher, as follows: No. 1, \$1.76@1.80; No. 2, \$1.74@1.80; No. 3, \$1.68@1.77; No. 4, \$1.60@1.73. New wheat from Southern Kansas and Oklahoma is likely to appear in the market within the next few days, as harvest in those regions has begun, but no big volume is expected before the latter part of June or early in July. It is not believed that farmers will be in a hurry to sell their surplus grain this year, as they are in a better financial position than a year ago and there is confidence that

looking after the Buffalo office of the company since last August, has returned to the main office at Kansas City. He will be succeeded here by J. E. Musgrave, secretary of the company, who will arrive about June 15. Russell Ward continues as local manager of sales.

WINNIPEG.
Geo. H. Meacham, Correspondent.

The week closed with a further upturn in prices. Wheat lagged at the opening and showed a reactionary tendency, but in the last hour a report emanating from Snow that the winter wheat country had sustained very serious damage from the dry, hot winds of the last few days caused shorts to cover and brought in some further investment buying in October. Wheat carried all the other commodities with it and they closed mostly at the high points for the day.

News dispatches from the capital state that the Board of Grain Commissioners will move their head office from Fort William to Winnipeg. Matthew Snow has been the Winnipeg resident member of the board for some time. As the grain trade of Canada is centered in Winnipeg it would seem but logical that those entrusted with the administration of the Canada Grain Act should be resident here. It is probable that a Fort William office of the commission will be maintained.

Splendid rains over the prairie provinces gave prices a setback at the beginning of the week, but the trade realizes that it is a long way from spring wheat harvest and the early June prospect is rarely maintained. Granting Canada a bumper crop this year the rosy picture is offset by the pessimistic reports of the world's most important wheat crop, that of the U. S. winter wheat belt.

The private reports issued early in the week were bullish in tenor, but since their publication the weather over the winter wheat belt and much of the spring wheat country in the United States has been very adverse. The end of the week witnessed very high temperatures and scorching winds. There is no longer any doubt here but what the United States is out of the export wheat trade for the next twelve months.

Naturally October wheat has gained ground, but it is the hedging month and has been by no means keeping pace with July. Winnipeg July is today the dearest wheat in the world and almost impossible

The Animal Feed Co., whose product is mainly in hog feeds, with the mill at La-Salle and Root Sts., has given up their charter and discontinued the business.

James A. Patten accompanied Vice President Dawes, J. E. Gorman, president, Rock Island R. R., and others to Marietta, Ohio, last week to attend the commencement exercises of Marietta college.

Disbursement of the \$2,650,000 fund for tornado relief in Illinois, Indiana and Missouri has at present reached \$727,234. Of this amount the largest item was for building and repair work, which accounted for \$322,060. Medical aid amounted to \$31,409; clothing, \$45,413; household goods, \$133,000; live stock for farmers, \$19,638; farm implements, \$19,806; burial expenses, \$52,485; cash grants, \$2,726.

Trade Opinion.

In the spring wheat area copious rains since the first of the month have relieved droughty conditions which were causing apprehension. The spring wheat crop, therefore, is now progressing favorably, and is slightly above average condition. For the time being, however, the decline in winter wheat is the dominating factor in the market. Sentiment seems to be increasing that the United States will be on a domestic basis during the coming season. We always export some wheat in the form of flour to Cuba and Central America, and will do so this year whatever be the outcome of the crop. Crop reports from Canada are favorable, and from Europe moderately favorable.—Clement, Curtis & Co.

Importers are not only skeptical of the reports of crop conditions, but they are also influenced by the belief that Europe's yield of all bread stuffs will be about 400 million greater than last year; they also expect Canada to raise 50 to 100 million in excess of a year ago; because of their attitude, export trade is particularly slow. This condition is ignored in the light of our own crop prospects, many beginning to believe that we will have no surplus for export, and this certainly will be the case unless there is a goodly yield of spring wheat. The average of the private estimates was 671 millions; adding to this carryover from the previous crop of 50 millions, we have 720 millions available for all purposes the coming year. Recently the Department of Agriculture estimated consumption at home for all purposes, 1924-1925, was 678 millions.—Thomson & McKinnon.

The foreign grain markets are slow to respond to the American crop situation,

to buy as shorts are discovering to their discomfort. Winnipeg October is, on the other hand, the cheapest and when the spread between is and Chicago September and December are taken into consideration it should gain in the evening up process that must eventually take place.

BOSTON.

Clarence Case, president New England Flour Co., was in Buffalo last week.

Vern McCarthy of the McCarthy Bros. Co., Minneapolis, is in the city on business.

Henry Knighton of Samuel Knighton & Sons is on an extended trip through the grain belt of the west.

William Mackie of the H. S. Leviston Company has been visiting in Kansas City and other points in the west.

and foreign statisticians seek to justify this attitude by reasoning that falls far short of being convincing. Two points have been stressed: 1st, that Europe promises larger home crops this year. 2nd, that this larger home crop will be drawn upon during the early part of the coming season, thus obviating dependence upon the U. S. and tiding over to the new crops of the southern hemisphere. Europe may produce more wheat than last year, though the acreage in the principal countries shows no increase, but the yield is still a matter of the future. Regardless of her crop, however, records show that Europe's grain trade is so adjusted that she takes from abroad for a series of years practically the same amount of wheat in each four months' period of the year. This means that from July to October, inclusive, Europe ordinarily takes as much wheat from abroad as during any other four months' period, despite the fact that her own crop is then fresh harvested, and in that period the United States is called upon to furnish 54 per cent of the supply. The balance comes from the tailings of Canada and the southern hemisphere.—Bartlett-Frazier Co.

An easier feeling was present in the wheat market this morning due to unofficial predictions of rains for the main portion of the wheat belt. This weakness, however, quickly passed and investment buying of September and December wheat came into the market and prices reacted, closing at the high point of the day. As we have noted before, unless generous rains are present with cooler weather over the winter wheat belt, we expect prices to maintain a strong undertone until after the Government report. A little business for export was reported in durums, but no figures given; 160,000 bus. of wheat were chartered to go to Buffalo. Indications are for an increase of wheat on passage in figures which will be issued Monday. We maintain a conservative friendly attitude towards the new crop futures.—J. J. Badenoeh Co.

Unusual efforts have been put forward to interest the general public on the bull side, but they come slowly. It must be conceded that current prices discount much damage and large losses. It is doubtful if conditions in North America at this time justify a further important upward price movement. Favorable reports are numerous; most of them are pigeon-holed. There isn't much in the advices from the corn belt east of the Mississippi River now to indicate unfavorable crop progress. The crop losses of oats and hay, also the poor

pastures in the very dry area east of the Mississippi River, encouraged the more general speculative support; the price relationship to corn makes the "going easy" for the bulls.—Pope & Eckhardt Co.

The wheat crop this year has certainly suffered from freak weather and general lack of moisture. Reports from Ohio, Indiana and Illinois bordered on the sensational and serious crop losses are in sight. Any market that advances fast is entitled to reactions, but on this crop we cannot expect any cheap wheat or rye. You must realize that figuring wheat at \$1.70 a bushel and the purchasing power of money the producer receives only around \$1.07 for his wheat at the country stations. Corn prices held fairly steady, but outside interest in this grain is only moderate. The advancing wheat market is attracting the great share of attention. The weather conditions are very favorable for forcing the new crop along and reports from Indiana and Ohio say the farmers are looking forward to a good corn crop to make up for the disaster that has overtaken the wheat and oats. With other crops approaching a failure, it is expected the producer will be a careful seller of his corn crop this year.—Farnum, Winter & Co.

The seaboard reported a continued indifference on the part of foreign buyers, which would seem to confirm the apathy on the part of consumers on the other side. Advices from the spring wheat belt are fairly optimistic, but most of them state that frequent June rains will be needed to make up for the deficiency in sub-soil moisture. Cutting of wheat has started in the extreme southern part of Kansas, the wheat ripening prematurely as a result of forcing weather. It is too early to get any line on threshing returns. The government weekly forecast is for a break in the weather, with scattered showers in most localities. Broomhall had a cable from Russia giving an official forecast of the harvest of all grains at 50 million tons, against 41 million tons in 1924. The trade, however, are inclined to discredit Russian advices, as they have been found to be very unreliable for some time.—Cross, Roy, Eberhardt & Harris.

PEORIA, ILL.
L. L. Eckard, Correspondent.

Damage reports continue to come from Tazewell, Peoria and surrounding counties and many state that a half crop of wheat is as much as can be expected in the spring lake district where several hundred acres are raised the wheat is very irregular and many acres have been plowed up and planted in corn. Rain is badly needed and the oats begin to show the effect of the dry weather. Scattered rains were reported Sunday morning but none where mostly needed.

Webster Bldg. CHICAGO, ILL.

The frost which recently visited many fields in this section did not injure as many fields as was at first expected. Close examinations showed that it was more destructive in some fields than in others and part of some fields were seriously damaged while others were only slightly injured. Some stalks show a shoot of green in the center which indicates a new growth. Many fields were replanted, the farmers believing that it was still early enough for corn to mature which is planted now. Difficulty in getting good seed corn caused others to take a chance on the feeble shoots developing into good stalks.

Cash corn prices remained steady Saturday with 27 cars. Only a few sales were made, the greater part of the receipts were held over.

No. 3 yellow, \$1.14 1/2; sample corn, \$1.08. Oats receipts were only 5 cars with a good demand and prices were 1 1/2 @ 2 1/2 c higher. No. 3 white, 50 to 51 cents, and No. 4 white, 50 cents.

Grain receipts and shipments at Peoria for week ending June 6th as compared with same week last year as reported by Secretary Peoria Board of Trade as follows:

	1925.	1924.
Receipts—		
Wheat	10,800	13,200

recover \$4,799.70 he claims is due him because of alleged fraudulent stock and grain manipulations of his money and margins by the defendant company.

Charter of a steamer to carry new crop grain to the United Kingdom or continent was reported yesterday, September loading, at 34 shillings. The Bunge Western Grain Corp. was credited with the fixture. The same interests have the British steamer

Benmohr listed for new crop grain. September loading, at 35 shillings. The vessel was taken for wheat from a north Pacific port, with the option of barley from San Francisco.

An equity suit has been brought in the federal district court by the Morgan Grain Co. against H. W. Collins, in which the plaintiff seeks to recover \$20,000. The [Concluded on page 24.]

News of the Country Grain Trade

CALIFORNIA.

Oakland, Cal.—The Nicholls Grain & Milling Co. of Los Angeles will open a branch office in Oakland.

CANADA.

Winnipeg, Man.—The Canadian Co-operative Wheat Producers, Ltd. is the new name for the Alberta Co-operative Wheat Producers, Ltd.

Winnipeg, Man.—C. H. Sparks, formerly with the New York office of the Bunge North American Grain Corp., is now with the local branch of that company.

ILLINOIS.

Forreston, Ill.—The Erdmeier Feed Mill was purchased by Ernest Ranz.

Mt. Auburn, Ill.—J. C. Hight will be succeeded as manager of the Hight & Cline grain elevator by his brother, Wm. Hight.

Ogden, Ill.—The elevator formerly owned by J. S. Coon is now owned and operated by Frank Supple of Bloomington.

Macon, Ill.—The Macon Grain Co. recently remodeled its office and repainted the exterior and interior of their building.

Litchfield, Ill.—C. D. Whitlock will manage the local branch of the Valier Spies Mlg. Co. They also operate an elevator here.

Foosland, Ill.—A grain elevator located at McNulta was purchased by the Foosland Grain Co. from Alton DeLong for the consideration of \$4,600.

Galesburg, Ill.—The Illinois Agricultural Co-op. Ass'n is arranging a meeting to discuss the problems of Knox County farmer elevators sometime before harvest time.

Springfield, Ill.—The Wabash Railroad has consented to establish grain transit privileges by means of which grain in transit from country stations to eastern points may be stopped here for storage, cleaning and other processing without extra charge for this service.

Divernon, Ill.—Improvements costing several thousand dollars will be made on the local grain elevator, consisting of a ten foot addition being made to the height of the elevator, new car cleaner, passenger elevator, new car loader, and covering the exterior with heavy gauge galvanized iron. Noah C. Twist is improving the plant.

Decatur, Ill.—The A. & O. Grain Co. has incorporated with capital of \$100,000 and officers as follows: J. F. Evans, pres.; H. L. Legrand, vice pres.; M. C. Cooper, sec'y; H. C. Luckenbill, ass't sec'y; T. R. Carroll, treas. The new company purchased the grain elevator properties of the Argenta Grain Co. at Argenta and of the Oreana Grain Co. at Oreana and Green Switch, and took possession June 1. M. C. Cooper will continue to operate the Oreana and Green Switch property while H. C. Lukebill will operate the Argenta elevator under the new corporation.

INDIANA.

Lebanon, Ind.—A 10 ton scale has been installed by the Boone Grain & Supply Co.

Lowell, Ind.—George Etzel of Ferguson, Ia. has been named manager of the Farmers Elevator.

Malden (Valparaiso, p. o.) Ind.—M. C. Clark, formerly manager of the Scircleville Grain Co., has been named manager of the Morgan Township Co-op.

Elevator Co., following the resignation of E. A. La Count.

Lakeville, Ind.—The Lakeville Elevator is now owned by Wolfe & Shaffer, succeeding Wolff & Miller.

Wheatland, Ind.—The elevator of the Farmers Elevator Co. was damaged recently by fire caused by hot ashes.

Corunna, Ind.—J. H. Knauer has leased his elevator to Frank Bard and has, for the present, retired from the grain business.

Scircleville, Ind.—The controlling interest in Scircleville Grain Co. has been acquired by C. Cunningham who will manage the plant.

Scottsburg, Ind.—The Eberts Grain Co. has leased ground from the Pennsylvania R. R. Co. and will soon erect a building for a feed exchange.

IOWA.

Royal, Ia.—Dow, Hale, Lerigo, Inc., have taken over the business of Geo. Schissel.

Moneta, Ia.—The Independent Grain Co. is succeeded by Dow, Hale, Lerigo, Inc., with headquarters at Davenport.

Mt. Ayr, Ia.—Wilson Grain Co. have taken over the business of the Iowa & Missouri Grain Co. at Mt. Ayr and Redding.

Shannon City, Ia.—The Farmers Co-op. Co. is building an addition to its storage room and will handle agricultural instruments.

Chickasaw, Ia.—Sloat & Fallgatter Milling Co. has been incorporated with capital of \$10,000. Incorporators: W. A. Dorris, C. K. Fallgatter, Kermit Fallgatter.

Lamoni, Ia.—Rauch Bros. with headquarters here succeed to the business of the Iowa & Missouri Grain Co. (headquarters, Mt. Ayr) at Davis City and Lamoni.

Boone, Ia.—Fire, starting in the office of the Consumers Coal Co., swept almost a whole city block, destroying among other buildings, the Williams elevator, valued at \$20,000 and insured for \$6,500, which was the only building insured. The total loss was estimated at \$30,000.

Irrington, Ia.—Work on the buildings of the Farmers Co-op. Ass'n is now under way. McMurray Bros. of Algona have the contract. A new automatic wagon or truck dump which is capable of handling a load of 8,000 pounds has arrived. Grain is being handled by the improvised portable elevator which has been installed for patrons in this territory.

KANSAS.

Caldwell, Kans.—The Doster Elevator Co. has been incorporated with \$10,000 capital.

Chase, Kans.—A combination wagon and truck dump will be installed by the Farmers Elevator Co.

Peabody, Kans.—The Peabody Mill has shut down until the new wheat crop is on the market.

Ransom, Kans.—The K. B. R. Mlg. Co. of Marquette has purchased the elevator of the Geneseo Grain Co.

Edna, Kans.—Machinery will soon be installed in the Wildgrub elevator of the Edna Grain Co., which is being rebuilt.

Lawrence, Kans.—A Globe dump and lightning rods will be installed for the Derby Grain Co. by the Federal Engineering Co.

PITTSBURGH, - - - PA.

Fayette, Mo.—The Fayette Mill & Merc. Co. has sold its holdings to the coöperative people but still operate the business at New Franklin.

Springfield, Mo.—The concrete and steel head house of 50,000 bus. capacity for the Lipscomb Grain & Seed Co. has been completed and the work on the tanks will be started shortly. The company plans to add another 100,000 bus. capacity elevator in the future.

MONTANA.

Helena, Mont.—On June 12-13, the Northwestern Grain Dealers Ass'n will hold their convention at the Broadwater Hotel.

Buffalo, Mont.—Albert Lewis has purchased the Farmers Elevator for \$7,000. Mr. Lewis has been manager of the plant.

NEBRASKA.

Hastings, Neb.—The Farmers Grain & Supply Co. has installed a scale.

Huntley, Neb.—A Fairbanks 10 ton Truck Scale has been installed by the Huntley Equity Exchange.

Beatrice, Neb.—Mr. and Mrs. Leeper recently purchased the Menke Feed Store and have taken charge.

Elsie, Neb.—The Elsie Equity Merc. Exchange plans on installing a dust eliminator and may also install a man lift.

Polk, Neb.—An elevator will be operated by the farmers by organizing a new company or continuing as they are now.

Yanka (Brainard, p. o.) Neb.—C. J. Kinsler, former manager of the Farmers Grain Co. at Garland, now manages the company here.

Elsie, Neb.—W. C. Bailey & Son have the contract for the erection of the O. M. Kellogg Grain Co.'s elevator of about 40,000 bus. capacity.

Oshkosh, Neb.—The Lexington Mill & Elevator Co. purchased the property of the Farmers Elevator Co. and will make some extensive improvements.

Lexington, Neb.—D. P. Rankin and associates have purchased the interests of A. C. Leflang in the Kearney Flour Mills and chain of ten elevators. Mr. Rankin will remain as manager of the mill.

NEW YORK.

Fulton, N. Y.—The Gilbert & Nichol Co. grain plant has been purchased by F. G. Luddington of Mexico, N. Y., who will be associated with his sons Homer and George. The plant has a capacity of 40,000 bus.

Buffalo, N. Y.—Seventy thousand bus. of Manitoba No. 5 wheat, damaged by

fire and water, will be reconditioned at the Superior Elevator. The underwriters are represented by Holmes-Browning Co., marine adjusters.

NORTH DAKOTA.

Warwick, N. D.—A cleaner will be installed by the Equity Elevator & Trading Co.

Spring Brook, N. D.—The Farmers Coöper. Elevator Co. expects to build a 35,000 bus. elevator replacing the one burned.

Grand Forks, N. D.—Fire destroyed the Farmers Elevator and the coal sheds of the Larimore Lbr. & Fuel Co., causing an estimated damage to the elevator of \$10,000.

Harvey, N. D.—A new scale and air dump are being installed by the Farmers Elevator Co. The elevator which was owned by the Harvey Merc. Co. is operated by H. T. Kemps.

New Rockford, N. D.—The elevator properties here and at Divide (this post-office) sold by the Equity Coöper. Exchange have been bid in by J. C. Smith, who is renovating and repairing both elevators.

Bloom (Jamestown, p. o.) N. D.—The Bloom Farmers Elevator Co., managed by Vincent Matejcek, will install a second leg, a 10-ton Fairbanks Scale and an air truck lift; also other improvements will be made.

OHIO.

Mowrystown, O.—Edmund Handman has sold the Mowrystown flouring mills to Walter E. Rhoades of Buford.

Fort Recovery, O.—J. M. Bell has the contract for installing a Bauer 19 inch Belt Driven Mill in the flour mill.

Kipton, O.—J. M. Bell was awarded the contract for installing new equipment in the elevator of S. J. Davidson, the storage capacity of which has been doubled.

Prouts Station (Sandusky, p. o.) O.—H. P. Ford has resigned as manager of the Central Erie Elevator & Supply Co. The new manager is L. J. Stautzenberger, formerly a manager of the Central Erie Co.

Monroeville, O.—The grinding room of the Monroeville Coöper. Grain Co. is being remodeled and a late model Bauer motor driven attrition mill is being installed by J. M. Bell. Extensive improvements will be made.

OKLAHOMA.

Arapaho, Okla.—The Farmers Union Coöper. Ass'n has generally overhauled, repaired and repainted its plant.

Ardmore, Okla.—John Bush has established a small mill and is manufacturing feeds, meal and whole wheat flour.

Wagoner, Okla.—The Gilbert Grain Co. is replacing its old elevator with a new hollow tile modern elevator. Ed Coady is the contractor.

Elk City, Okla.—The Davis Mill & Grain Co. has chartered with \$15,000 capital by B. O. Davis, Henryetta Davis and Mrs. N. C. Miller all of Elk City.

ESTABLISHED 1916

Douglas Chemical & Supply Company

Manufacturers and Direct Distributors

829 and 831 Southwest Boulevard

KANSAS CITY, MO.

Alva, Okla.—The Kansas Flour Mills will enlarge its plant increasing its storage capacity 250,000 bus. The Southwestern Eng. Co. has the contract.

Cordell, Okla.—Three elevators at this place have installed Kewanee auto truck dumps and one a Globe Combination dump. The Cordell Mill & Grain Co. will discontinue business.

Enid, Okla.—Effective June 1st, the Cox-Henry Grain Co. was dissolved. Mr. Henry will operate as the John Henry Grain Co. at Quilan, Rosston, Beaver, Willow, Brinkman and Balie, with headquarters at Enid. Mr. Cox will operate at Isabelle, Orienta and Augusta with headquarters at Enid.

Nowata, Okla.—The Star Engr. Co. has the contract for the construction of a 10,000 bu. studded iron clad elevator and an 80 foot warehouse for Frank Spencer. The elevator will be equipped with 1 leg, a feed leg and a 2 pair high feed mill. A 10-ton Howe Truck Scale and a 15 h.p. American Electric Enclosed Motor will be installed.

OREGON.

Portland, Ore.—Alloway & Georg Construction Co. has just completed the erection of a fire proof elevator for the Terminal Flour Mills Co.

Baker, Ore.—More than a hundred of the stockholders of the Tri-State Terminal Co. have signed a resolution which it is believed will be effective in the company resuming operation. The main office is located at Seattle. The company has a capital stock of \$500,000 with mills and elevators at various points of the state.

PENNSYLVANIA.

Denver, Pa.—Gehman Bros., operating a flour mill, contemplate the erection of a wheat elevator to accommodate several thousand bushels of grain.

Highspire, Pa.—M. A. Long Co. of Baltimore has the contract for the construction of concrete storage bins and working house of 105,000 bus. capacity for the Highspire Flour Mills costing \$65,000.

Lewistown, Pa.—Fire recently destroyed the main building, grain elevator and storage houses of the Mt. Rock Flouring Mills. Loss is estimated at \$75,000, covered by insurance. The property was in the hands of the receiver, E. McClain Waters of Philadelphia.

SOUTH DAKOTA.

Cresbard, S. D.—The plant of the Cresbard Grain Co. will be generally repaired.

Kampeska, S. D.—A new air dump is being installed by the Farmers Elevator Co. who are making general repairs.

Brandt, S. D.—The Farmers Elevator Co. plan the erecting of a new elevator, replacing the one burned two years ago.

Hazel, S. D.—Lightning rods have been installed by the Farmers Elevator Co. who will also install ventilated enclosed electric motors.

Eureka, S. D.—The Jacob Strobel Elevator has been purchased by Frank Veter and John Wolff who will dismantle the plant and build a new one.

Pierre, S. D.—Frank Pettijohn has purchased the old grain house formerly used by the Pierre Hay & Grain Co.,

which will be wrecked and a modern elevator erected for this year's crop.

Aberdeen, S. D.—Spontaneous combustion is believed to have caused the fire which destroyed the grain elevator and contents of hay and grain, belonging to Otto Traver, 10 miles east of here.

TENNESSEE.

Nashville, Tenn.—The Napier Brokerage Co. has changed its firm name to the Kirkpatrick Brokerage Co., of which the principals are J. S. Kirkpatrick and E. L. Kirkpatrick.

TEXAS.

Plainview, Tex.—An iron clad 30,000 bus. elevator has been built by the Farmers Elevator Co., replacing the one lost through fire.

Tulia, Tex.—The Farmers Grain Co. has completed its \$18,000 elevator, warehouse and office. The elevator capacity is 28,000 bushels.

Cuero, Tex.—Fire, believed to have been started from incendiarism recently destroyed the feed barn and storehouse belonging to E. A. Tully with a loss estimated at \$6,000.

Lubbock, Tex.—Work has been started on a 20,000 plant for the Economy Mills Co., owned by J. B. Hancock, who is in charge of the company's business here. Claud Tatum of Lockney and E. H. Winningham of Tulsa, Okla.

UTAH.

Provo, Utah—A modern 1 story building will be erected by the Wabash Produce Co.

WASHINGTON.

Tacoma, Wash.—Increased rates on grain and grain products from Northern Idaho to Tacoma and other Northwestern ports were granted the railways by a decision handed down by the Interstate Commerce Commission.

Creston, Wash.—The warehouse and bulk grain elevator of the Sperry Flour Co. has been leased by the Washington Grain & Milling Co. of Reardan, Wash., who will operate them for the coming season. The company has also leased all of the Sperry and Pacific Coast warehouses along the Central Washington Ry. from Hite to Hartline. Roy Anyan, who has managed the elevator and warehouse for the Sperry Co., will represent the new company.

WINTER FREEZING CUTS CROP.

COUNCIL BLUFFS.—A very large per cent of alfalfa has been winter killed in this section. Some lay the blame to freezing out, while others claim it was due to smothering because of a heavy sleet that covered the fields during the winter. This is going to cut the hay crop very short and we feel there should be an unusual demand for alfalfa seed for late summer and fall seeding. This will depend, however, on the amount of moisture we will have when the seeding time arrives.—*Younkerman Seed Co.*

ST. LOUIS SEED MARKET.

Timothy strong, with good country run old seed quotable at \$6.75 to \$7.25 and bright clean seed probably worth more. Other seeds nominal, appended quotations based on latest reported sales: German millet at \$4 to \$4.25; common millet at \$3 to \$3.10; hog millet (sacked) at \$2.55.

Sorghum Cane Seed—Quote black amber at \$1.40 bulk on basis of last sale.

Stock Peas—Quote whippoorwill at \$4 to \$4.25; new era, \$3.75; mixed at \$3.50 per bu.

Sunflower Seed—Quote sound seed nominal.

TOLEDO SEED PRICES.

The following table shows the range of prices for seed on the Toledo market for cash and the futures for clover, alsike and timothy for the week ending June 6:

June 6.

	Range for wk.	Close	Close	
	High.	Low.	June 6.	May 29.
Clover—				
Cash	\$17.15	\$16.00	\$17.15	\$16.00
Oct.	15.50	14.25	15.50	14.25
Dec.	15.05	13.90	15.05	13.80
Alsike—				
Aug.	13.25	12.50	13.25	12.50
Timothy—				
Cash	3.80	3.55	3.75	3.50
Sept.	4.20	4.00	4.20	3.95

TOLEDO SEED MARKET.

TOLEDO, O., June 8.—The continued dry weather has been very unfavorable for clover and the cash and future options were higher again this week. October easily climbed above the fifteen-dollar mark and the buying was steady. Damage reports are being heard on every side and these induce fresh buying when profit-taking weakens the mar-

We buy and sell all standard varieties of grass, clover and farm seeds. Correspondence solicited.
WM. A. WARD SEED COMPANY
Sacramento, Calif.

ket. The weather during the months of July and August will make or break the seed crop and seedsmen will watch conditions closely. December clover is still at forty-five cents discount under the October as the foreign clover is deliverable on December contracts.

Alsike was also higher and the general trend is being affected by reports of the red clover crop. The trade is light but may increase at any time.

Timothy has been one of the climbers and it looks like there might be a much smaller crop of this seed this year. More attention is being centered on this seed than for several months as stocks in the carryover are small and new seed may be quickly sought when it is ready for market.

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending June 6, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.
Week..	160	70	6	1	196	77
Prev. wk.	171	102	...	30	40	83
1924 ...	90	119	1	107	3	164
1924-25	37,003	27,147	10,632	5,441	16,881	16,215
1923-24	31,353	21,566	10,754	8,344	24,019	15,034
1922-23	31,781	31,070	10,873	8,808	23,630	7,234

Timothy—Prices remain unchanged. Common country run about \$6.60@6.65 per 100 lbs., fair country run \$6.70@6.85, good seed \$6.95@7, high grades \$7.25@7.35, extra choice and fancy higher, possibly \$7.50@8.

Clover Seed—Firm. Country lots \$19.25@22 for 100 lbs., good \$22.75@23.75, choice \$24.25@25.25, fancy \$26.25@27.25 and Mammoth \$22.25@27.25, according to quality. Red Top \$17.25@18.25. Fancy Kentucky Blue Grass quotably \$30.25@32.75.

Alsike—Firm. Fair country lots \$16.25@18.75 per 100 lbs. Good seed \$19.25@20.75; choice, \$21.75@22.75.

Alfalfa Seed—Firm. Recleaned \$22.50@23.50 per 100 lbs.

Flax Seed—¼c lower to ¾c higher. No. 1 Northwestern closed at \$2.80½@2.84½ per bu. of 56 lbs.

ALFALFA SEED.

RICHMOND, VA.—Referring to your recent communication regarding alfalfa, the demand here in the Southeast for alfalfa seed was not as heavy this season as it was last, and there is probably a little more seed carried over this year than last season.

The seed is mostly of American origin—Kansas, Utah, etc. Comparatively small quantities of alfalfa have been imported during the last 12 months. In Argentine alfalfa the qualities and prices of 1924 crop were not particularly attractive, and the new 1925 crop now

Field and Grass Seeds

being offered is still of unattractive quality, and prices are excessively high, ranging from 23c to 25c per pound, duty included.

Speculators are offering new French alfalfa for Dec. 15 delivery at 15c per pound, duty extra of 4c per pound, making the seed cost 19c. This, however, is a speculative price entirely. The crop may or may not make seed.

The East is not greatly interested in Arizona alfalfa, as Arizona alfalfa does not stand our winters as well as that of other localities.

There should undoubtedly be a good fall demand for alfalfa. The short hay crops this season and the general unsatisfactory results now being obtained from red clover would tend to make farmers sow decidedly more alfalfa, our own experience on our own farm being that we have practically eliminated all other hay crops except alfalfa from our fields during the past three or four years. Our farms are situated in the Piedmont and Tidewater sections of Virginia.—*T. W. Wood & Sons.*

WEEKLY LINSEED REVIEW.

NEW YORK, June 6.—*United Kingdom:* There continues a moderate demand for flax by crushers in the United Kingdom and prices are generally very steady. Prospective supplies are improved, due to the larger crop in India.

The oil demand is inactive with consumers taking the nearby supplies without exception.

Cottonseed oil rules steady with a fair trade passing in Egyptian sorts.

Copra F. M. Straits May-July shipment quoted in London at 30/3 per cwt.

India: The official estimate of 21,640,000 or an increase of over three million bushels for the new Indian crop has assured liberal supplies for the future. Shipments this week amount to only 248,000 against 476,000 a week ago. Since the first of April India has cleared 3,796,000 against 3,024,000 at this time in 1924.

United States: There is a little better demand for linseed from American crushers lately but only for the nearby seed. There is no interest for distant seed or oil.

The weather in the linseed belt has not been so favorable as might be desired but much replanting has been done and conditions are now ideal.

Argentina: Movement of seed in the Argentine has materially increased. Prices keep steady to firm. Shipments to the Continent are much larger and stocks at the ports have increased to the large amount of 4,800,000 against 2,400,000 last year and 2,400,000 two years ago.

Shipments since January 1 have been 14,732,000, leaving a balance of only 24,600,000. Last year at this time shipments had amounted to 35,700,000, and the balance was only 17,800,000 bu.

DULUTH FLAXSEED MARKET.

DULUTH, MINN., June 6.—Flaxseed market continued on the draggy order during the last week with weakness especially apparent in the new crop futures. Spot and July flax closed 1 cent off hand and September and October from 5¼ to 7½ cents off.

A bearish influence was supplied in more liberal receipts and the apparent willingness of growers to dispose of their remaining holdings at the present price levels with the completion of their seeding operations. Receipts during the six days aggregated 29,351 bushels, and stocks in the elevators were reported at 232,000 bushels.

Specialists in the flaxseed market had advised to the effect that the growing plant over the principal producing districts of the Northwest looks healthy, and that damage to the crop through

frost was negligible. Statements agree that the acreage seeded to flax this season will be well up to the most optimistic predictions. Farmers are expected to make an effort to market any flax seed they have on hand almost immediately as the great majority of growers are said to be satisfied with the present level of prices. An increasing disposition is being shown on the part of growers to sell new-crop futures and so protect themselves to the extent of at least a portion of their prospective season's crops. That selling was credited with having been in a measure responsible for the recent weakness in those futures.

Crushers committed themselves without just taking the current offerings on the tables at the current level of prices. They refrained from bidding for the reason that present stocks in the elevators taken in conjunction with receipts from the country, are estimated to be sufficient to cover the needs of the linseed oil plants up to the time the new season's crop will be ready to move to the markets.

Closing prices of flaxseed on the Duluth market on Saturday as compared with the previous Saturday, and the same period last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track..	2.77½-79½	2.78½-80½	2.37½-39½
To arrive..	2.77½	2.78½	2.37½
July	2.78½	2.79½	2.37½
Sept.	2.52½	2.58½	2.13½
Oct.	2.47½	2.55	2.10½

KANSAS CITY SEED MARKET.

KANSAS CITY, June 6.—Stripping of the new crop of blue grass seed in Missouri is about to begin. The work will start in the southern counties June 10, and before the end on the coming week it should be general if no rains interfere. Judging from the number of stripping machines ordered from Kansas City houses, farmers intend to save a large amount of seed. One firm reported 250 machines sold. Recent hot weather has been favorable for ripening the crop. Rains early this week were good for filling, but in Northwestern Missouri there was some uneasiness over flood conditions, also in Northeastern Kansas. Seed houses are calling in their traveling men, who have been out selling forage seeds, and sending them into the blue grass regions to buy seed in the rough. It is not possible to say what price will be paid until more is known about the yield and quality.

What is called local distribution of forage seeds has been fair this week with buyers taking small lots of canola millet and Sudan. Considering the complaints from Illinois about hot weather and May frost effects on oats and corn there is hope of calls from that state for forage seed supplies, but thus far no big demand has developed. High water in the Missouri River suggests to seedsmen the possibility of overflows in the bottoms, in case of further rains which would wash out crops and necessitate replacing with forage seeds. Kansas City houses are raising prices of seeds.

Demand for cowpeas and soy beans is fair, with most buyers taking the soy beans on account of cheapness. These are wanted to plant in growing fields of corn.

The harvest of meadow fescue in Eastern Kansas and Western Missouri will be due within the next two or three weeks. Seed houses show a limited interest in the crop, which in former years was important from an export standpoint. Reports as to growth are mostly favorable, but it is not possible to forecast the yield or the prices.

The local market for seeds is quoted in a wholesale way as follows, per cwt. sacked:

Cane—Orange, \$1.80@2; red top, \$1.75@1.85; black and red amber, \$1.80@

FEED DEMAND TO BE BETTER.

ASHEVILLE, N. C.—As a matter of information, insofar as this part of North Carolina is concerned, it seems we are headed for more or less feed troubles account of drought. Pastures are in miserable shape, and while the indications are for rain, unless we do get some relief it will certainly be a very trying situation for the dairy trade. Most of the dairymen are in very good shape, but hardly in shape to satisfactorily pay for roughage, and increase grain feed in the summer months. If this condition exists long over any wide area of territory the demand will be better than usual this summer.—J. D. Earle Feed Co.

COTTON SEED MEAL.

KANSAS CITY, June 6.—An advance of 50c a ton was recorded in cottonseed meal this week. This was due principally to the fact that mills everywhere are practically through with the season's grinding and are determined to hold remaining stocks firmly. Demand continued light and scattered. Oklahoma was the only state offering anything to Kansas City. Mills there asked \$37 a ton. Kansas City dealers bound to raise their selling price to \$42.30 for carlots. Marketing of the first car of new cotton in Texas was suggestive of the coming season, which, feeders and dealers say, promises a big crop.

Freer offerings and a reduction of 50c a ton in the Minneapolis mill price, to \$41.50@42 a ton, contributed to an easier market for linseed meal. The demand continued slim. Kansas City handlers cut off 80c from their selling price, making it \$46.

Only a fair summer business was evident in tankage and meat scrap. Tankage sold at former prices, \$50 a ton for carlots and \$55 for tons. Meat scrap was quoted unchanged, at \$55 and \$60.

NEW YORK OATS MARKET.

Oats receipts, 232,000 bushels bonded, 297,000 bushels domestic. The market has shown independent strength with substantial advances occurring the past few days. This has been due largely to crop reports of a most unfavorable character, indicating a yield materially less than what was previously estimated. Crop news from now until harvest will probably be the determining factor in establishing values. The export demand continues but on a much smaller scale and it is possible that a price level may be reached that will prevent further business of volume. Locally, conditions show but little change, the consumptive demand varying but little. Premiums have varied only fractionally.—L. W. Forbell & Co.

MINNEAPOLIS FLAXSEED MARKET.

MINNEAPOLIS, MINN., June 6.—We quote from the Van Dusen Harrington crop report of June 3:

"Flax, as a rule, shows a good condition, except in the dry territory, where some of it has not as yet germinated. In Eastern South Dakota it is only fair. Owing to the dry weather some of the contemplated flax acreage may be abandoned altogether. If so, the total may show a slight decrease under the earlier

estimates. In summary, we believe that at present the Northwest prospects for wheat and small grain are under those of a month ago. This is due principally to drought in South Dakota, Southern Minnesota and parts of Montana. In North Dakota and the northern half of Minnesota, conditions as a whole measure well up to those of last year."

This confirms our impression that the prospect for an increased acreage this year is not as good as it was thirty days ago. Notwithstanding heavy rain in spots, we have not had a general moderate downfall of moisture to give us a sub-soil supply. There have been slight changes in flaxseed values the past week up and down.—Archer-Daniels-Midland Company.

OIL MEAL MARKET.

Like the wheat feed market, oil meal has also started to come into its own. The export market continues firm and shipment of cake from all points in the country includes Minneapolis, Chicago and Toledo. While the domestic demand for the last couple days has not been quite as good for oil meal as it has been for wheat feeds, there has been, nevertheless, a marked improvement in sales. With general conditions as strong as they are it is not unreasonable to anticipate higher oil meal values.—Bertley Bulletin, Chicago June 6.

PROSPECTS GOOD.

LITTLE ROCK, ARK.—The cottonseed meal is well cleaned up with light inquiries. In my opinion there will continue to be a reasonable demand from the mixed feeders during the balance of the summer season, until the new crop crush opens up the coming fall. The oil mills have about all closed down for the season with few of them well stocked with sufficient meal to supply the demand through the summer.

The price on cottonseed meal ranges about as follows, basis f.o.b. Little Rock: Choice high grade 43% protein cottonseed meal, \$39; choice high-grade 41% protein cottonseed meal, \$37.50; good grade 36% meal, \$34. I do not think there is much chance for any lower prices until the new season's crush opens up, as the stocks are all in strong hands that are amply able to hold them for a good price.

The present crop prospects throughout Arkansas are the best of any season. The government report yesterday shows 85% for Arkansas against 58% for a year ago; in fact, the entire South has good prospects.—S. P. Davis.

FEED MARKETS.

NEW YORK.

New York, June 6.—While city feed was unchanged yesterday, it was intimated that the position was still a decidedly strong one and that practically nothing was offering for nearby shipments. Western feeds ruled slightly easier although values were continued on the basis of the previous report. The only change made in the entire group occurred in linseed oil meal and this was reduced slightly.

Quotations were as follows: City bran, \$36; middlings, \$38.50, in 100-lb. sacks; red dog, \$50.50, nominal, in 100-lb. sacks; western spring bran, prompt shipment, \$34.75; standard middlings, \$36; flour middlings, \$43@43.50; red dog, spot, \$49.50@50, all in 100-lb. sacks, all-rail and lake-and-rail shipments; rye middlings, \$36; white homing feed, \$44.75, all in 100-lb. sacks; cottonseed meal, 36 per cent protein, \$45; linseed oil meal, \$48.80, in 100-lb. sacks.

MILWAUKEE.

Milwaukee, June 6.—There was an improvement last week in the Milwaukee feed market, with a heavier demand bringing a corresponding increase in prices. Wheat feeds offered for prompt shipment were readily absorbed and some July shipment orders were booked at about \$2 off prompt quotations. Current quotations per ton are: Winter bran, \$30@31; spring bran, \$30@30.50; standard middlings, \$32.50@33; flour middlings, \$35@36; red dog,

MENTE AND CO. INC. BAGS NEW ORLEANS AND SAVANNAH

3.50@44.50; rye feed, \$30@31.50; linseed meal, \$44@45; cottonseed meal, \$41.50@42; hominy feed, \$40@41; oat feed, \$46.50@50; gluten feed, nominal, \$34.80; in 110-sacks, carlots, f. o. b. Milwaukee.

SAN FRANCISCO.

San Francisco, June 1.—Barley, ground, \$8@40; oats, rolled feed, \$42@43; mill run, \$1@44; linseed meal, \$50@54; alfalfa meal, \$6@29; Egyptian corn, \$55@60; beet pulp, \$8@40; scratch feed, \$62@64; barley, rolled, \$38@40; bran, \$40@43; middlings, \$3@56; cocomeal, \$35@36; milo maize, \$48.50; cottonseed meal, \$55@58; cracked corn, \$56@58; feed corn meal, \$29@30; mosses alfalfa meal, \$29@30.

BOSTON.

Boston, June 6.—Prompt shipment, per ton: Spring bran, \$35.50@36.50; winter bran, \$36.50@37.50; mixed feed, \$37.50@43; red dog, \$49.50; hominy feed, \$45.50; stock feed, \$44; oat hulls, reground, \$13; cottonseed meal, \$44.50@50.50; linseed meal, \$49.25@49.50.

Oatmeal—Per 90-lb. sacks, rolled, \$3.05; it and ground, \$3.35.

Oats—All rail: fancy, 40 lbs., 65@66c; reg, 38 lbs., 63@64c; regular, 38 lbs., 62@63c; regular, 38 lbs., 61@62c; regular, 34 lbs., 60@61c; lake and rail, fancy, 40 lbs., 63@64c; fancy, 38 lbs., 61@62c; regular, 38 lbs., 60@61c; regular, 36 lbs., 59@60c.

BALTIMORE.

Baltimore, June 5.—There is little change in the general feed situation. For packed spring bran and western middlings there is a fair jobbing demand and first and offerings of wheat feed are not excessive. Hominy feed is firm and sparingly offered in near positions. Gluten feed unchanged. Alfalfa meal holds its own in rice, while for dried beet pulp there is no inquiry. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$34.50@35; western middlings, per ton, 100-lb. sacks, \$36.50@37; hominy feed, per ton, \$45@46; luten feed, per ton, \$40@41; alfalfa meal, per ton, \$31@32; dried beet pulp, per ton, \$8 (nominal).

PHILADELPHIA.

Philadelphia, June 6.—Offerings of feed tuffs are light and with fair demand prices are well sustained and the markets are firm. Quotations are for carlots in 10-lb. sacks: Soft winter bran, \$38@39; winter middlings, \$38@44; spring bran, \$36@37; standard wheat middlings, \$38@39; our middlings, \$41.50@45; red dog, \$49@50; rye middlings, \$36@38; reground oats feed, \$12@13; fine yellow hominy, \$44.50@55; fine white hominy, \$44.50@45; low grade our, \$51@56; cottonseed meal, 36% protein, \$47@49; cottonseed meal, 41% protein, \$50@57.

MEMPHIS.

Memphis, June 6.—Quiet prevailed in the feed market and prices did not show much change. Mixed feed manufacturers report fairly good inquiry for prompt shipment and prices were raised \$1@1.50 a ton following the upturn in raw material prices. Millfeed lightly offered and buying small. Wheat bran quoted \$32@32.50 for spot tuff and \$31@31.50 to arrive. Gray shorts noted as low as \$37 earlier in week, but now \$38 is lowest. Alfalfa meal in limited demand and one medium quotable at \$27.50 per ton or 30 day shipment. Cottonseed meal quiet and steady, strongly held and demand moderate. Spot 36 per cent quoted at \$36; with 41 at \$38.50 and 43 at \$40.50.

ST. LOUIS.

St. Louis, June 6.—Wheat feed stronger and higher, but market very narrow, with very little available for immediate or quick delivery. Car hard bran sold at \$31.50 local for immediate shipment and split car off sold (direct sale by mill) bran at \$31.50 and white middlings at \$39.50; otherwise, gray shorts quoted to arrive at \$35@36, red hard bran (prompt) at \$30.50. Oats feed held at \$9 and white hominy feed sacked) at \$41.50.

Alfalfa meal—No sales. To arrive, in 110-lb. sacks, No. 2 quoted \$20.50, No. 1 at \$25.50 and choice at \$27.50.

DULUTH.

Duluth, June 7.—Trading in feeds was slow par on this market during the last week. Demand from any quarter was contracted and millers complained of accumulating stocks. The market was steady and unchanged. Closing prices per ton follow: Bran, \$27.50; shorts, \$31; Boston mixed, \$31; red dog, \$43; flour middlings, \$34; ground oats, \$30; No. 1 ground feed, \$39.25; No. 2 ground feed, \$37; No. 3 ground feed, \$37; No. 3 ground feed, \$34.50; cracked feed, \$34.50; cracked corn, \$43.75; coarse corn meal, \$43.75.

CINCINNATI.

Cincinnati, June 6.—The mill feed market was firmer in tone under continued light offerings and an active demand, but advances in prices were recorded only for off and hard middlings, which were shown a preference over standards and bran. The demand was mainly for prompt shipments though inquiries for deferred delivery were noted. An increase in orders was expected because of the intensely warm weather. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$34@34.50; hard winter wheat bran, \$33.50@34; standard middlings, \$35.50@36; soft wheat middlings, \$33.50@40; gray hard middlings, \$39.50@40; mixed feed, \$36.50@37; No. 1 alfalfa meal, \$29; hominy feed, \$40@40.50.

NEW YORK.

New York, June 6.—Western feed was reduced about 50c per ton for all qualities and the feature of this position was the fact that mills were offering for shipment from the middle of the month forward. City feed continued in a very tight position,

with sellers not offering for shipment at all during the current month.

Western bran was quoted at \$34.75, standard middlings \$36 and red dog \$49.50, while city bran ruled at \$36, middlings \$38.50 and red dog \$50.50 per ton.

MINNEAPOLIS.

Minneapolis, June 6.—The local situation took a rapid turn for the better at the tail end of the week and this morning most any price could be heard, as the asking figure. The trade here are in a very nervous frame of mind and expect most anything to happen. Just as an illustration, through a misunderstanding this morning the secretary's office was a trifle slow in getting the local flour shipments posted on the board and the morning gathering of local feed jobbers immediately became very concerned over the fact that apparently there had not been one single barrel of flour loaded out in the previous 24 hours. Old heads should know that such a condition is a virtual impossibility, but nevertheless there was much scurrying around until it was ascertained that the absence of flour shipments was merely a clerical oversight and when corrected some semblance of calm was restored.

The late squeeze in May middlings has resulted in great care on the part of the local trade in anticipating a heavier run of flour and consequent heavier production of all kinds of mill offal. The spread which existed just a short time ago as between spot bran and all of June is narrowing up rapidly; a short time ago it was \$3 per ton and today it is around 50c@\$.1. The unexpected bulge in oats undoubtedly had a sympathetic effect on feed prices today and it is natural to expect that if this strength continues to show up in the coarse grain that feed will also reflect a certain amount of this strength as well.

Today's asking prices were as follows: Standard bran, \$28; pure bran, \$28.50; shorts, \$31; flour middlings, \$34; red dog, \$42@43; oil meal, \$42@43.

Feed shipments totaled since Jan. 1, this year, 247,756 vs. 305,683 last year; since Sept. 1, 500,529 tons vs. 577,087 a year ago.

FEED STUFF SITUATION.

With added dry weather and stronger grain markets buyers of all feeds for animal consumption have turned their attention more or less to their requirements for the next sixty to ninety days and with the additional inquiry markets have firmed and show tendencies to advance with any volume of buying developing.

MINNEAPOLIS.—Bran, \$28; standard middlings, \$31; flour middlings, \$35; red dog, \$42.

CHICAGO.—Bran, \$30.60; standard middlings, \$33.60; flour middlings, \$37.60; red dog, \$44.60.

KANSAS CITY.—Bran, \$28; gray shorts, \$33.50.

ST. LOUIS.—Bran, \$30.40; gray shorts, \$35.90.

ALFALFA MEAL.

Demand has fallen off slightly. Prices have declined slightly. Nominally quoted new bag basis, choice, \$30; No. 1, \$28; No. 2, \$21.50. Fine ground grades, \$3 to \$4 a ton premium.

REGROUND OAT FEED.—Demand has increased; production has been curtailed, with which prices have advanced; firmer feeling. More buyers interest and less sellers, based on intrinsic values. Some buyers have turned their attention to this commodity as a safe investment for storage. Reground, \$7 to \$7.50; unground, \$8 to \$9.

HOMINY FEED.—Supply and demand fairly well balanced. Hominy feeds of lower fat contents than seven are slightly in excess of the demand with substantial discounts offered by sellers to buyers. Nominally quoted, white, \$41 to \$42.50; yellow, \$40 to \$41. In bulk where available, \$1 to \$1.50 a ton less.

Linseed Oil Meal.—Slightly better demand. Firmer. Prices. Nominally quoted mills, \$45; resellers, \$44; Chicago. Pea size \$1 a ton more. Minneapolis, fine ground, \$42; pea size, \$43. Oil meal in bulk where available, \$2 per ton less.

DRIED BUTTERMILK.—Demand is very strong and practically no cars are available. No quotations at this time are therefore being made.

COTTONSEED MEAL.—The market is firm, production is light, and demand fair. Today's quotation for 43 per cent protein, Chicago basis, is \$45.50.

PACKERS' PRODUCTS.—There is a good demand for packers' products and prices are quite firm. Today's quotations are as follows: Meat scraps in carlots f. o. b. Chicago, \$55 per ton; 60 per cent

protein digester tankage, \$50, with raw bone meal unchanged at \$50.

GLUTEN FEED.—The market is oversold and there is a demand that cannot now be filled. Prices are nominally as follows: In bulk \$33 a ton, sacked \$35.80. Gluten meal of 40 per cent protein \$45.80 in sacks and \$43 in bulk.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

GRAIN REGIONAL RAINFALL.

The following table gives the total average rainfall in inches, in each state in the grain regions beginning April 16 to June 7, inclusive, and the average fall in inches for each station in the state, as reported by the Weather Bureau for the week ending June 7:

	Sta- tions.	Total season.	Total for previous week.	Total for previous week.
Kentucky	17	4.93	.29	.03
Ohio	15	4.35	.25	.01
W. Virginia.....	1	6.22	.78	.00
Michigan	7	2.89	.18	.08
Indiana	16	2.85	.15	.05
Illinois	19	3.93	.35	.08
Wisconsin	5	4.08	1.08	.17
Minnesota	18	4.39	1.57	.29

Kansas	25	4.49	.74	.36
Oklahoma	11	2.81	.23	.26

BROOM CORN MARKET.

Throughout broom corn areas the past week, temperatures have been higher, with scattered light showers received, the only district reporting rainfall of any consequence being the Carnegie district in southern Oklahoma where 2.45 inches was received. Chickasha reports .77, with other weather bureau reporting stations showing around ¼ to less than ½ an inch. During the week high winds prevailed which has been detrimental from a soil moisture standpoint. Taken as a whole, the entire broom corn area is in need of moisture. Southern and southwestern Oklahoma districts as well as central Oklahoma sections were favored during May with rains of a local nature while the Northwest district which embraces the Oklahoma and Texas Panhandle, south-west Kansas, northwest New Mexico and southeast Colorado did not receive sufficient moisture during the month to be of any material benefit. Advices from this section state that crop conditions and the outlook at the present time are more unfavorable than for a number of years past.

The Lindsay district reports crops being taken from \$70 to \$110 and a shade above. In the dwarf districts, prices paid range from around \$60 to \$100, principally from \$70 upwards. Activity has been more pronounced in the Lindsay district, as farmers' holdings are larger and more concentrated. Holdings in the dwarf districts are scattered with crops not offered in many instances as present crop conditions, especially in the Northwest, are unfavorable.—*Broom Corn Review.*

CHICAGO COTTON INSPECTION BUREAU.

Acting Secretary of Agriculture R. W. Dunlap on June 8 announced a change in the regulations of the cotton futures act, reducing the transfer unit of certified cotton for delivery on futures contract, from 100 to 25 bales.

They were also amended to recognize the establishment of an inspection bureau by the Chicago Board of Trade as well as the establishment of a board of examiners at Houston.

Another change was the elimination of the section requiring that transferred cotton should be delivered to the place of storage at destinations not later than 6 p. m. on the second business day preceding the day set for delivery.

RELIABLE STANDARD INCUBATOR

50 to 1100 Eggs

Both Hot Air and Hot Water Heating Systems Used

Automatic Ventilation, Moisture and Heating Regulation. RELIABLE dealers find the Reliable Incubators most satisfactory and profitable to sell for several reasons: 1: Our complete line of various sizes, both heating systems, to meet every need. 2: Best materials, construction and workmanship. 3: Ease of operation and possessing every convenience of modern incubation. 4: Maintains a positive uniformity of temperature with a constant even circulation of pure, fresh air. 5: Correct heating and hatching temperature and moisture in all climates. 6: Double enclosure heating system utilizes heat from lamp in two ways—an absolute guarantee against sudden chills. 7: Has an abundant nursery space.

FIRST CUTTING LIGHT.

PUEBLO, COLO.—The 1924 crop of alfalfa is pretty well cleaned up and the prospect for new crops is not very good. First cutting is going to be very light on account of the extreme dry weather and the shortage of water in the ditches. The Arkansas River has never been so low in thirty years as it is at the present time and mountain reservoirs contain a little over half as much water as they usually do this time of the year, as snows were very light in the mountains last winter. However, should we have our usual summer rains the second and third crops may be better but the prospect at present is for a shortage of all crops in this territory this year. Those farmers who have any 1924 crop alfalfa left are getting around \$20 per ton delivered at Pueblo.—The A. McClelland M., I. & R. Co., by Tim Barbrick, Sec'y.

ALFALFA MEAL MARKET.

KANSAS CITY, June 6.—Even the most optimistic millers admit continued quietness in the alfalfa meal trade. It is difficult to get an opinion as to when business will revive. Mills are running on short time. Some new hay has been taken by a large concern for use in its own feeds. Whether the commercial mills will shut down or not before the second cutting of hay comes on is hard to say, because some millers talk of a supply of old orders to be filled. Prices have not been changed since May 13. Carlots are quoted, per ton, f. o. b. Kansas City, as follows: Choice, \$26.50@27.50; No. 1, \$24@25; No. 2, \$19@20; No. 3, \$18@19. Some of the smaller mills are shading these figures.

Manufacturers of grain and molasses feeds gave fairly optimistic accounts of their business, though admitting that demand was mainly for poultry and horse and mule feeds. Orders for the latter are all from the cotton states. There was a slight decline in cattle feed prices. Other feeds were unchanged to \$1 per ton higher. Carlots were quoted per ton as follows: Dairy feeds, \$35@46; cattle, \$38.50@44; hog, \$46@52; pig, \$68; horse and mule, \$33.50@43.50; alfalfa-molasses, \$26@32; scratch poultry, \$49@56; mash poultry, \$49@77.

TERMINAL MARKETS.

[Continued from page 17.]

complaint alleges that on Nov. 4, 1920, the defendant contracted to purchase 250 shares in the plaintiff corporation at \$100 a share. Fifty shares were delivered and paid for at the time and on March 1, 1921, when 50 more shares were offered and on Sept. 1, when the additional 150 shares were offered Collins, in accordance with the contract of sale, he refused to accept them or pay for them, it was charged.

Details of an exhaustive study made of wheat washing in connection with activities at the municipal grain elevator at terminal No. 4, as conducted by E. N. Bates, investigator in grain handling of the United States Department of Agriculture, proved interesting to members of the commission of public docks, which maintains the facilities. It was directed that Mr. Bates be formally thanked for his work and members of the commission expressed the hope his studies could be continued during the coming cereal year. Tests before and after washing, comparative weights and grades and the general movement of cereal through the plant were among details thoroughly covered.

Protests of Portland grain merchants against re-establishment of a transit charge of 2½ cents per 100 pounds on carloads of grain shipped by rail and water and milled en route from western Montana through north Pacific ports to destinations in California were overruled by the Interstate Commerce Commission, which decreed the extra charge might become effective from June 1. The commission also permitted the transit charge to be applied to coarse grains shipped from Sioux City and other Missouri river points and major portions of Nebraska, Kansas and Colorado. For both classes the addition applies only where the shipments are milled at intermediate points, not including tidewater mills. The latter were excluded where grain products can be loaded directly from the mills into holds of vessels without employing either railroad power or equipment.

ST. LOUIS.

M. W. Coulson, superintendent for the George P. Plant Milling Co., has resigned, effective July 1.

H. F. Wright, formerly general manager Mount Olive, Ill., Milling Co., has been appointed assistant manager of the Marshall Hall Milling Co.

The membership of William B. Stowers, Oklahoma City, Okla., in the Merchants' Exchange, has been posted for purchase and cancellation.

Among last week's visitors in the city were Donald Amen of Quincy, Ill., J. H. Dougherty and K. S. Crittendon of Nashville, J. G. Brady of Denver and Charles Cummings of Pittsfield, Ill.

TRADE NOTES

Buttermilk for Poultry.

In a handsomely colored poster just put out by the Collis Products Co., of Clinton, Ia., the value of dried buttermilk as a poultry feed, is graphically told of and the necessity of using lactic acid is emphasized.

The H. V. Combination Mixer-Feeder.

A folder which is being mailed out by the J. B. Sedberry Co., of 817 Exchange avenue, Chicago, explains in a detailed way just what the H. V. Combination Mixer-Feeder is, what it does, and why its installation will prove a profitable investment.

The machine is manufactured by the Hocking Valley Mfg. Co., of Lancaster, Ohio, who guarantee it against defects of material and workmanship, for a period of one year from date of purchase.

The following points of superiority are claimed for it:

Delivers to the mill a certain predetermined proportion of any or all feeds to be ground, thus producing a properly proportioned mixture.

Feeds at a uniform rate of flow, eliminating peak loads, which cannot be prevented when the mill is spasmodically and irregularly fed.

Increases the capacity of the mill 50 to 100 per cent, depending upon the degree of fineness, with no additional power.

Hess Grain Driers.

The installation of the Hess Grain Drier for the Northwestern Railroad elevator at Ft. William is being made. Barnett & McQueen are the contractors.

The Santa Fe Railroad at Argentine, Kans., just outside of Kansas City, is now installing a Hess Grain Drier. The Grain Marketing Co. is to operate the house.

Selling Molasses Heaters.

The Ellis Drier Co., of 1223 Talman avenue, Chicago, report a good trade in their molasses heaters. As the value of molasses in mixed feeds becomes better known its use is becoming increasingly

RUSSIAN CORN.

Export grain elevators are under construction at Odessa and Novorossisk, both of which are ports on the Black Sea. Odessa is nearer the entrance to the Mediterranean Sea and Novorossisk is along the north shore near the eastern end of the Black Sea. It is believed that the John S. Metcalfe Co. of London is building the Odessa elevator and possibly both houses. Two units of Hess grain driers will be installed in each plant and a factor in the drier order is the fact that they must be suited to condition corn for seed purposes.

Beyond this, it may be assumed a considerable increased acreage to corn will be planted in Russia.

Barley

RECEIPTS OF BARLEY.

BARLEY MARKET.

MILWAUKEE.—The demand for malting continued good during the last week in the Milwaukee barley market and prices were firm as a result. Quotations closed strong at 1@2c up for the week. Receipts were moderate and all the offerings were absorbed by the market. Choice to fancy, 48 to 50 lb. test, shelled at 93@94c; fair to good, 44 to 46 lb. test, 85@93c; light weight, 40 to 42 lb. test, 82@90c; feed, 70@85c. Iowa shelled 80@94c, as to quality; Wisconsin, 80@95c; Minnesota, 80@94c; Dakota, 80@94c; feed and rejected, 70@85c. MINNEAPOLIS.—The local barley market was a rather quiet affair during the past week. Receipts were light but there did not seem to be much of any persistent demand, with the result that the range of price held about unchanged for the week. Desirable barley of malting or pearling quality could be sold at any time at unchanged figures but the poor stuff was generally slow. Today's range of sales ran from 85c. Minneapolis elevator stocks for the week ending today totalled 645,300 bushels vs. 776,908 a week ago and 482 a year ago.

DULUTH.—Trading in the barley market was on the largest scale of the year during the last week. Receipts aggregated 179 cars and they found a ready market with dealers in line for grain to over shipping contracts. Spot barley sold unchanged within a range of 72c to 87c.

KANSAS CITY.—The six cars of barley received here this week met ready absorption by elevator men and shippers. Prices advanced 2@3c per bushel. No. 3 closed at 85@87c, and No. 4 at 84c. There was some uneasiness regarding the new crop, due to hot weather. Stocks decreased 1,000 bus. to 13,000, against 19,000 a year ago.

FT. WORTH, TEX.—Barley receipts have been steady with indifferent demand

and prices are about unchanged with a weak tone as the value is too high to permit mixing out in oats and demand for grinding is very slow.

CHICAGO.—Unchanged to 1c higher. Offerings light and demand good. Exports, 48,000 bu. and for the week 1,246,000 bu., compared with 601,000 bu. last year. Visible increased 76,000 bu.; last year decreased 170,000 bu.; total, 1,874,000 bu.; last year, 587,000 bu. Local stocks decreased 24,000 bu.; total, 159,000 bu.; last year, 134,000 bu. Malting, 86@93c; feeding and mixing, 76@87c; screenings, 45@75c. Cars, 16.

RYE MARKETS

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending June 6, were:

	Mpls.	Dul.	Chi.	Win.	Mil.
June 1.....	\$1.15	\$1.13	\$1.16	\$1.15	\$1.17
June 2.....	1.12	1.11	1.11	1.12	1.12
June 3.....	1.14	1.12	1.13		
June 4.....	1.17	1.15	1.16	1.15	1.16
June 5.....	1.18	1.16	1.18	1.18	1.18
June 6.....	1.18	1.17	1.19	1.19	1.19

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending June 6 were:

	Mpls.	Dul.	Chi.	Win.	Mil.
June 1.....	26	19	1	1	2
June 2.....	8	20	3	4	
June 3.....	10	6	2		
June 4.....	7	7	2		1
June 5.....	20	6	3	10	
June 6.....	13	3	1	1	2
Total	84	61	12	16	5

CHICAGO RYE FUTURES.

Following is the range for future prices for rye for the week ending June 6:

	June	July	September	December
1.....	1.15 1/4 @ 1.19 1/4	1.14	1.18 1/4	1.19 @ 1.20 1/2
2.....	1.10 1/4 @ 1.15 1/4	1.10 1/4	1.14 1/4	1.13 1/2 @ 1.16
3.....	1.11 1/2 @ 1.15	1.11 1/2	1.15 1/4	1.14 @ 1.18
4.....	1.14 @ 1.17 1/2	1.15	1.19 1/4	1.17 @ 1.21 1/4
5.....	1.18 @ 1.20 1/2	1.19 1/4	1.22	1.22 1/2 @ 1.25
6.....	1.17 1/2 @ 1.20	1.19 1/4	1.22	1.22 1/2 @ 1.25 1/2

Receipts of rye at Chicago for the week of June 6, 1925, were 18,000 bus. vs. 17,000 bus. same week of 1924; shipments were 1,000 bus. vs. 63,000 bus. same week of 1924.

CASH PRICES FOR RYE.

The following is the range of prices paid for spot rye of contract grade at Chicago in the months named:

	1925.	1924.	1923.	1922.	1921.	1920.
Jan.....	1.44 1/4	.71	.86	.77	1.49 1/4	1.66
Feb.....	1.73 1/2	.74	.88 1/4	.86 1/2	1.73	1.85 1/4
Mar.....	1.50	.70 1/4	.83 1/4	.86	1.41	1.44
Apr.....	1.70	.73 1/4	.89 1/2	1.05	1.54	1.68 1/4
May.....	1.10 1/4	.65 1/4	.81	.99	1.39 1/4	1.59 1/2
June.....	1.70 1/4	.71 1/4	.84 1/4	1.06	1.50 1/4	1.83 1/4

		1.51 1/2	.89 1/2	1.11	1.73	2.41

RYE MARKETS.

MILWAUKEE.—Futures remained firm in the Milwaukee rye market last week and there was a good demand by the shippers. Offerings were mostly offgrade with moisture content. Receipts were eight cars and quotations closed 2@3c higher. The market closed at 1.17 1/4 @ 1.18 1/4 for No. 2 inside for Wisconsin, ranging 1@2c under July price depending on billing.

NEW YORK.—Business in rye for export was quiet. Foreign demand has been disappointing for some time. There has been only a small scattered business working.

DULUTH.—Trading in the rye market fell off during the last week. Marked nervousness was shown at stages in line with the course in wheat. Buying was confined to a few specialists, and they claimed to have no substantial inquiry for that grain in hand at the time be-

ing. Spot No. 1 rye closed 1/4c off at \$1.17.

MINNEAPOLIS.—Cash rye came in for a little slump during the past week; the advance in the futures being a little too fast for the trade to digest just as yet. Reports coming in from the country are very pessimistic but with mills inclined to go slow and no shipping demand to speak of, it was natural that the cash article should ease off a bit. Receipts were generally light, which was a good thing, otherwise there might have been further shaving of the premiums. Local stocks showed a slight increase for the week, being 411,547 this week, vs. 397,050 a year ago and 6,744,026 a year ago. Saturday's range of sales showed No. 1 rye bringing 1 1/2 @ 2c over the local July and No. 2 July at 1 1/2c over.

CHICAGO.—Closed 2 1/4c to 3c lower for futures and no sales of carlots reported. Trade was smaller than for several days past and market less active. Offerings larger and demand moderate. Weakness in wheat was quite a factor. No indication of any new export business. Deliveries on June contracts 90,000 bu. Visible supply increased 61,000 bu. to 10,287,000 bu.; year ago, 18,317,000 bu. Local stocks increased 6,000 bu. to 4,094,000 bu. Exports for the past week, 1,101,000 bu.; last year, 1,219,000 bu. Carlots were in fair demand at 1/2c under May for No. 2. Offerings very light. Local inspection, 2 cars. Seaboard clearances, 52,000 bu.

BEANS AND POTATOES.

BEAN ACREAGE LARGE.

MAYVILLE, MICH.—Farmers are planting beans, just nicely under way. We are waiting for rain. No doubt there will be quite a large acreage this year, and the seed used will be of the best quality.—Mayville Milling Co., June 5, 1925.

BEAN PLANTING NORMAL.

REMUS, MICH.—Old beans all out of the farmers' hands here and practically no holdings in the dealers' hands. Planting is going on steadily and this next week will about finish the planting, which will be normal. Weather very dry and rain needed badly to hasten sprouting.—D. Mansfield & Co.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of June 6:

Beans—Chicago—Fair good demand at quotations. Per 100 lbs.—Spot navy beans, Michigan, fancy, \$5.90@6.00; red kidney, fair stock, \$9.75@10; large, dark, extra quality, \$12; brown Swedish, \$5.50@6.00; lima beans, fancy, \$9@10; do, new California, \$14@15; poor, dirty, broken, less.

St. Louis—Quote choice hand-picked Michigan white beans at \$6.10 and prime machine-picked at \$5.85 per 100 lbs. Scotch peas 7 1/4c, green split peas 9c and yellow 7c per lb. California lima beans at \$15.50 per 100 lbs.

San Francisco—Whites, small, 8c; do, large, 7 1/4c; pinks, 9c; limas, 15c; cranberry, 8c; kidney, 12c; Mexican garbanzos, 11 1/2c; lentils, large, 9c; do, small, 8c; black eye, 12c; Mexican reds, 8 1/4c; speckled bayos, 8c; bayos, 8 1/4c. Peas—Split peas, yellow, 7 1/2c; green peas, 8c.

Boston—Car lots, per 100 lbs., N. Y. and Mich.: Choice hand-picked beans, \$6.35@6.50; fair to good, \$6.10@6.25; California small whites, \$8.35@8.50; yel. eye, extra, \$6.75@7; fair to good, \$6.25; red kidneys, choice, \$10.50@10.75; fair to good, \$9.25@9.75; California limas, \$15.25@15.50; native green peas, \$7@7.50; Canada, \$5.25@5.50; split, \$5.50@5.75; jobbing prices, 25 to 50 cents above car lots.

New York—A little better feeling in pea beans Friday with \$6.35 an inside figure and a few lots reached \$6.50. Red kidneys continued to advance, with most business at about \$10.75. Other varieties held about steady and unchanged. Domestic—Marrow, \$9.25@9.50; pea, \$6.35@6.50; red kidney, \$10.75; white kidney, \$8@8.25; lima, Cal., regular, \$14.75@15; baby, \$13.35@13.50. Imported—Marrow, \$8.25@8.75; white kidney, \$7.25@7.50; lima, Mad., 1924-25, \$12.25@12.50; 1923-24, \$11@11.50; 1922-23, \$9@9.50; lima, Europe, large, \$11.25; medium, \$11; small, \$10. Lentils—Chile, \$6.75@7; Russia, giant, \$7.25@7.50; avg., \$6.25@6.50. Peas—Domestic—Black eye, \$11; yel. split, \$6.25@6.50;

gr. split, \$7.50@7.75. Imported—Green, Japan, \$6.50@6.75; Belgium, \$5.25@5.50; yel. split, \$5.50@6; gr. split, \$7.75@8; chick, Mex., imperial, \$11.75; monster, \$11.50; large, \$9.50; small, \$7@7.50.

Potatoes—

Chicago—Arrivals by cars: This week, 381; last week, 219; year ago, 149. Market was 15@25c lower. Trade was again very light and the demand restricted on account of the extreme warm weather now prevailing. The little inquiry was largely local and the better quality was favored. Receipts were 41 cars and cars on track 148. Sales reported today were: Per 100 lbs., Wisconsin, bulk, 1 car at \$1; sacks, 1 car at \$1.25; round white, sacks, Wisconsin, \$1.25; ordinary and poor, \$1. New potatoes—Market dull and 25@50c lower for barrels and sacks. The extreme hot weather prevailing has slowed up the demand and very little business was reported. Buyers were inclined to wait until next week, hoping that the heat wave will be broken or at least moderated. Offerings were liberal for the demand and receivers were obliged to grant concessions in order to effect sales. Receipts were 26 cars and cars on track 138. Sales reported today were: Barrels, California, 1 car at \$4.50, 1 car at \$5, 1 car at \$5.25; sacks, per 100 lbs., cobbles, Arkansas, 1 car at \$3, 1 car at \$3.10, 1 car Oklahoma at \$3.25, 1 car Texas (poor) at \$2.40. Barrels, stave, Carolinas, \$5@5.25; slat barrels, \$4.25@4.50; sacks, Louisiana, triumphs, 100 lbs., \$3@3.25; Alabama, \$3@3.25; Arkansas and Oklahoma, \$3@3.25; No. 2, \$1.75; Louisiana whites, \$2.50@3.00. Sweet potatoes—Arrivals light; fair demand noted. Hammers, Tenn., Nancy Halls, \$3.25; Illinois, white yams, \$1.50.

New York—Potatoes market was in a demoralized condition and values not well defined, with market weak at the close. Old sack potatoes weak and lower, Jersey sweets about steady. Artichokes had scarcely any outlet. Asparagus worked out well. Beans decidedly weak and lower. Virginia beets decidedly weak; Jersey easier. Cabbage in free supply and more in buyers' favor. Southern carrots quiet and easier; state old dull. Virginia cauliflower mostly poor and not wanted. Celery extremely dull. Corn had a better demand. Cucumbers easier under the larger offerings. Fava beans slow sale. Jersey lettuce sold well; California iceberg steady and unchanged. Nearby peas worked out well. Peppers quiet and barely steady. Tomatoes steady to firm. Onions worked out slowly with values not well defined. New potatoes—S. C., bbl., No. 1, \$2@5; No. 2, \$1.50@2.25; N. C., bbl., No. 1, \$4@4.50; No. 2, \$1.50@2; Virginia, bbl., No. 1, \$4.50@5.50; Bermuda, bbl., No. 1, \$7@7.50. Old potatoes—Me., bulk, 180 lbs., \$2.75@3.00; car lots, cwt., \$1.65@1.80; 150-lb. sk., \$2@2.50; state, bulk, 180 lbs., \$2.50@2.75; 150-lb. sk., \$2@2.25; L. I., bulk, 180 lbs., \$3.85@4; 150-lb. sk., \$3.25@3.40. Sweets—Jy., bskt., \$1@3.75. Yams—Del., bskt., \$2.75; Jy., bskt., \$3.25.

MINNEAPOLIS FLAX MARKET.

MINNEAPOLIS, June 6.—Crushers were after the seed of desirable quality this week and with receipts less than anticipated on the board, there was a firming up in the premiums all along the line. Thin, scabby flax did not go so well, of course, as the crushers had no place for this kind. Today they were paying July price at 5c over for spot seed, to unload here and in some cases as high as 6 1/2c over for cars which could run out of town. Arrive seed was quoted at 1c under at 3c over the July. Local stocks for the week total 291,448 bushels vs. 289,747 a week ago and 54,521 a year ago.

BUCKWHEAT MARKETS.

ST. LOUIS.—Quoted at \$2.20 per 100 lbs. nominal.

CHICAGO.—Silver hulled, \$2.15; Jap., \$2.65; dirty seed quotably less.

MILWAUKEE, June 6.—Buckwheat prices in the Milwaukee market continued last week at \$2.10@2.15 per 100 lbs. for silver hull and \$2.20@2.25 for Japanese.

WHEAT AND RYE FROM GALVESTON.

The Grain Inspection Department of the Galveston Board of Trade reports wheat exports from that port in April to have been 1,159,600 bushels against 191,000 for April, 1924, and the total since July 1, 1924, was 32,839,417 bushels compared with 5,296,000 for the same period, the previous season.

Exports of rye for April, 1925, were 68,571 bushels with none exported in April, 1924, and the total for the season shows an increase of 21,857 bushels over the corresponding period a year ago.

Hay Department

HAY ASSOCIATION AT CEDAR POINT.

Secretary Taylor of the National Hay Association announces that Honorable W. L. Harding, ex-governor of Iowa and a member of the executive committee of the Great Lakes St. Lawrence Tide Water Association, will deliver an address and has taken for his subject "Making the St. Lawrence River Navigable for Ocean Going Vessels." The meeting this year promises to be one of the best and all interested are urged to make reservations early for hotel accommodations at Hotel Breakers, Cedar Point, Ohio.

HAY MARKET REVIEW.

The hay market developed a firmer tone during the week ending June 6, according to the weekly hay market review of the U. S. Department of Agriculture. Only a moderate volume of hay was wanted by the markets but farmers in some localities were marketing more sparingly on account of the prospects for a shorter crop and prices ruled firm. Inquiries were chiefly for the better grades of hay.

Local rains were beneficial in the southwest although moisture was still needed over much of that section. Pastures were short generally and growing slowly because of dry weather from the Ohio and Mississippi valleys northward, but conditions were generally favorable in the Atlantic and east gulf valley. More rain was needed in the Minneapolis territory and hay lands and oat fields were being pastured in the upper Mississippi valley, particularly in Iowa. High temperatures increased the need for moisture.

Timothy ruled firmer in the Central West, although seaboard markets held steady. The Boston market continued dull with a slack demand, but prices advanced about 50 cents in spite of fairly liberal offerings. The shipping demand at Cincinnati was more active and receipts were light with farmers less disposed to sell. Dealers' stocks were reported low. The Chicago market was very strong and prices advanced at St. Louis and Memphis.

Alfalfa trading was of small volume but prices were steady to firm. The first cutting of Nebraska alfalfa was of rather poor quality and arrivals at Omaha were not adequate to the increasing shipping demand. Some heating alfalfa was arriving at Kansas City but the offerings of good hay were well absorbed.

Alfalfa held steady in California markets with the trade awaiting crop development.

Prairie was barely steady. A few cars were received at Chicago and sold well but No. 1 prairie at the markets was quoted \$1 lower. The Minneapolis market was dull but prices were unchanged and prairie held steady at St. Louis. Offerings at Omaha were hardly adequate for current needs and the arrivals of good quality hay moved readily at Kansas City.

HAY BUSINESS NOT PROMISING.

NOTTINGHAM, PA.—The crop of clover through this section is going to be large. We have prospects of the heaviest and best crop of clover and clover mixed hay that we have had for several years. This applies to alfalfa as well as red and alsike clover. Of course, as to what the quality is going to be will depend very much upon the weather at harvest time.

The prospects for timothy are not so good, as the cold weather seems to have held back the timothy and allowed the weeds to grow. Of course we cannot tell for sure what we will have in the way of timothy, as warm weather with plenty of rain can increase the timothy conditions very materially in the next two weeks. However, at present it looks as though we will not have nearly so much timothy this year as we had last.

The carryover of 1924 crop is going to be heavy. There is a lot of hay being offered at this time that cannot be sold as there is very little demand at all for any hay and none whatever for the medium or low grades, which grades comprise a large per cent of the carryover.

The hay harvest through this section this year is going to be early. The farmers are now harvesting their first cutting alfalfa under very nice weather conditions and the clover will be ready to cut in another week. The early harvest is bound to take away any possible chance for better price on the old hay during July, as the new hay would be ready to market early if it were needed.

The future of the hay business, as we see it, is not very promising, as there is not the demand for the over production of hay. The only solution to the problem that we can see both to the producer and dealer is to raise less commercial hay and make what hay they do raise for commercial purposes better quality or higher grade. If the production is cut down this will enable the farmer to put more time on the hay that he does produce for market, which will make higher quality hay. This will bring him this higher quality together

North & Company
Receivers—Shippers
Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

with decreased supply, which would bring him a better price per ton for the hay that he has to sell and would make market conditions as a whole much healthier, as there is nothing which makes a more discouraging market than to have an over supply of hay, especially when the quality is medium or poor. We feel that the farmers should be led to consider this point of view for their own welfare, as well as for the good of the trade.—Passmore & Co.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.
 C. M. Funk of the Funk Bros. Hay Co. will start next Monday or Tuesday on a trip of six weeks to the North Pacific coast. In his motor car will be Mrs. Funk and two children. It is the intention of Mr. Funk to first visit the Yellowstone National Park, then to proceed to Portland, Ore.

Bent on a vacation of three or four weeks, E. L. Wilhelm of the Campbell-Wilhelm Hay Co., with his wife, will leave Kansas City early next week for a trip to the mountains of Colorado.

Present slow trade in hay is accounted for by J. M. Hail of J. M. Hail & Co. on the ground that most consuming districts have new hay of their own. Shippers, he says, must have patience and await the normal time for good buying.

A letter from a producer in Kansas, received this week, said he had 100 tons of old timothy hay which he intended to carry into the new crop season because present prices were considered unprofitable.

Asked about the demand for timothy hay, C. F. Arnold said Wednesday that sales were possible only in Mississippi and Louisiana, and that the Southeast was as inaccessible as at any time on the old crop.

F. L. Bruner, inspector for the Kansas City Hay Dealers' Association, said this week that practically all alfalfa hay arriving was from the new crop, with Kansas continuing to furnish the bulk. Owing to much rain lately, some of the hay was arriving wet and heating, which is in contrast to conditions characterizing the early movement. As the rains, storms and floods were booked to cease after Wednesday, an improvement in grading was expected in a few days. "It may be too early to express bullish opinions on this year's alfalfa crop," said D. B. Tilson of Dyer & Co., Wednesday, "but I don't believe Colorado, New Mexico, Eastern Missouri, Illinois and parts of Nebraska will have nearly as much hay as they harvested last year. Letters I receive from Colorado are especially pessimistic on account of the lack of irrigation water. Much irrigating territory is depending on natural moisture. It is the same in New Mexico."

HAY MARKETS.

NEW YORK.

June 4.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

Receipts for week, tons.....	681	20
Receipts last week	1,151	14
Receipts from Sept. 1.....	46,220	1,022

Receipts during the week have been extremely light, but demand was rather quiet, just about sufficient hay arrived to satisfy requirements.

Supplies on hand show a further reduction at this writing and as a result of the light offerings values show a slight improvement over a week ago.

Generally speaking prices at Manhattan points show a somewhat higher level than Brooklyn, the inside of table being more applicable to the latter market.

Stocks consist principally of a low, common quality, timothy No. 1 and No. 2 particularly in large bales, being scarce. These better grades are in active demand, with the common qualities receiving secondary consideration from the buyers.

Straw scarce and in active demand. No. 1 invoices reported light.

Federal grade quotations for large bales are as follows: Timothy—No. 1, \$25@; No. 2, \$22@24; No. 3, \$18@20. Light clover mixed—No. 1, \$22@24; No. 2, \$18@20; No. 3, \$15@17. Medium clover mixed—No. 1, \$18@20; No. 2, \$16@17. Light grass mixed—No. 1, \$22@24; No. 2, \$18@20; No. 3, \$17. Heavy grass mixed—No. 1, \$15@17. Rye straw, \$18@20.

MILWAUKEE.

June 6.—Dull conditions prevailed in Milwaukee hay market last week as prices continued unchanged. Current quotations per ton f. o. b. Milwaukee are: 1. Timothy, \$14@15; No. 2 timothy, \$12@13; No. 1 mixed, \$13@15.50; No. 2 clover mixed, \$11@12; sample hay, \$6@8; marsh feed, \$10; packing, \$9; rye straw, \$9@10; straw, \$9@10.

BALTIMORE.

June 5.—Receipts of baled hay in Baltimore market during the month of May were 1,652 tons, as against 2,471 tons arrived the same month last year. Due to accumulating supplies of hay on spot, brought about by fair receipts and continued indifferent demand, the general hay market is easier and aside from a very limited demand for top grades, there is nothing doing in this line. Low grade hay is hard to move at any price. Straw is all descriptions holds its own in price under moderate stocks and a more or less constant jobbing demand for wheat oat blocks. Quotations follow: No. 2 timothy, \$17.50@18; No. 3, \$14.50@16; No. 1 light clover mixed, \$17@17.50; No. 1 clover mixed, \$16.50@17; No. 2, \$14@15. Straw No. 1 straight rye, \$18.50@19; No. 1 whey, \$15@15.50; No. 1 oat, \$15.50@16.

BOSTON.

June 6.—No. 1 timothy, \$25.50@26; No. 2, \$22@24; No. 3, \$17@19; eastern, \$16@18; clover mixed, \$21@24. Straw—Rye, \$22; oat, \$13@15.

PORTLAND, ORE.

June 4.—Buying prices f. o. b. Portland: Alfalfa, \$19@20 ton; valley timothy, \$21@22; eastern Oregon timothy, \$23@24; clover, \$16.50@17; oats, \$19@20; oats a vetch hay, \$19.50@20.50; straw, \$8@8.50.

PHILADELPHIA.

June 6.—The market for hay is quiet and unchanged, with offerings ample to requirements. Straw is in small supply and steady, but there is little trading. Federal grades: Timothy—No. 1, nominal; No. 2, \$18@19; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$17@18; No. 2, \$15@16; No. 3, \$12@14. Medium clover mixed—No. 1, \$15@16; No. 2, \$13@14. Heavy clover mixed—No. 1, \$14@15. Light grass mixed—No. 1, \$17@17.50. Straw—Straight rye, \$15@15.50; wheat, \$15.50; oat, \$14@14.50.

OMAHA.

June 5.—Prairie hay: Receipts light. Demand good on better grades. Prices steady on account light receipts. Poor hay slow at any price. Alfalfa hay: Receipts light. Demand good for all grades if sound, but out of condition and grassy hay hard to move. Prices strong. Prices below a for carload lots: Upland prairie—No. 1, \$11.50@12; No. 2, \$9@10.50; No. 3, \$7@8. Midland prairie—No. 1, \$11@11.50; No. 2, \$9@10; No. 3, \$6@7. Lowland prairie—No. 1, \$6.50@7.50; No. 2, \$5@6. Alfalfa—Choice, \$18; No. 1, \$16@17; standard, \$12.50@14; No. 2, \$9@12; No. 3, \$8@9. Straw—Oat, \$8; wheat, \$5@7.

MEMPHIS.

June 6.—Receipts for the week were cars, timothy very small part. New alfalfa coming in poorer condition, most of it showing disposition to heat. Quote: O grade \$21, standard \$20 and two at \$19. Timothy firm and local selling prices under replacement cost. One selling at \$21 standard at \$21.50@22 and two at \$20.50@21. Market firm, as section this territory draws from report crop badly hurt by drought.

DULUTH.

June 7.—Trade was limited in the hay market. Dealers complained of small supply in any quarter with good pasturages available in districts where feeding of cattle had been required on account of backward weather conditions. Jobbers continued to advise growers against shipping anything but the best grades of hay in, as there was no market for poor quality stuff. The price trend is slightly easier with closing prices per ton as follows: Timothy—No. 1, \$16; No. 2, \$15. Mixed timothy—No. 1, \$16; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$13; No. 3, \$11. Midland—No. 1, \$10; No. 2, \$8. Straw—Rye, \$9; oat, \$8.

CINCINNATI.

June 8.—The hay market showed little change from the conditions or prices reported a week ago, and though the receipts were smaller the demand failed to equal the moderate supply. Underlying conditions, however, indicated an improvement and toward the close of the week order and inquiries for southern and intermediate shipment were sufficiently increased to warrant these interests to withdraw lower quotations to out-of-town buyers and to quote a stronger spot market and normally higher prices for top grades of timothy, mixed and clover. The small country movement, which has been materially reduced because of the poor prospect for the growing crop and desire on the part of farmers to hold their remaining supply of old hay was also a strengthening factor. Stocks of dealers and feeders are said to be small. Low grades sell slowly. Timothy—No. 1, \$17@18; No. 2, \$16@17; No. 3, \$13@14; threshed, \$8.50@10; grade, \$8@10. Heavy clover mixed—No. 1, \$14@15. Light clover mixed—No. 1, \$14@15.

.50. Clover mixed—No. 1, \$14.50@15.50; No. 2, \$12@14; no grade, \$10@11. Clover—No. 1, \$15@16; No. 2, \$11@13; no grade, \$9. Alfalfa—No. 1 second cutting, \$18@19; No. 2 second cutting, \$15@16.50; No. 1 first cutting, \$16@17; No. 2 first cutting, \$12@14. Sound sample grassy hay, \$9@10. raw—Wheat, \$9.50@10.50; oat, \$9@10; rye, \$13@14.

TOLEDO.
June 8.—The prospects for the hay crop around here and in nearby states are very pessimistic. Rains now will not help much as the crop is injured too greatly. Prices may respond later to these conditions but at present remain steady. Dealers say they do not anticipate any great advance as the low prices this season have caused a large amount to be held on farms. Prices last week were as follows: No. 1 clover, \$14; No. 2 timothy, \$12; No. 1 light over mixed, \$13.50; No. 1 heavy clover mixed, \$12.50; No. 1 red clover, \$11; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$20; sound dry wheat straw, \$5.50; sound dry oat straw, \$8; f. o. b. Toledo.

KANSAS CITY.
June 6.—Liberal gains in the movement of old prairie and new alfalfa swelled the total receipts of hay this week to 403 cars. The total increase was 106 cars. A year ago the arrivals were 140 cars. Alfalfa retained the lead in offerings. The receipts were 234 cars, or 38 more than a week ago. During the corresponding week of 1924 only 35 cars arrived. Rains early in the week and at the end of the preceding week with temporary floods at some points in eastern Kansas and northwestern Missouri caught much first cutting hay in the windrows, and this fact as reflected in wet and heating bales, whereas the shipments had been running fine and dry. Some of the hay also showed poorer stems than at the beginning of harvest. Prices were broken about \$1 a ton on Monday. The demand was slow. Except for sound, dry hay suitable for dairy use. Shipping business was moderate because home grown hay of one kind or another is available at most places where orders usually originate. The arrivals of prairie hay were 141 cars, showing an increase of 73. There was a low demand for the better qualities, while low grades and damaged hay were very raggy. The stockyards interest was the principal buyer, but there were a few shipping sales. No price changes were quoted. Timothy, clover-mixed and clover, taken together, made receipts of 28 cars, or one less than a week ago. There was an unsatisfactory demand for each variety. Prices ruled about the same as those of last week. On the face of the movement, straw arrivals were 4 cars, but all had been bought ahead. No sales were quoted and prices are nominally unchanged. Carlots of hay and straw are quoted as follows, per ton, f. o. b. Kansas City: Alfalfa—Choice, \$17.50@19; No. 1, \$16@17; standard, \$13.50@15.50; No. 2, \$11.50@13; No. 3, \$8@11. Prairie—No. 1, \$10@12; No. 2, \$8@9.50; No. 3, \$5.50@7.50; packing, \$4@5. Timothy—No. 1, \$14.50@15; standard, \$13@14; No. 2, \$11.50@12.50; No. 3, \$9@11. Clover mixed—Light, \$14@15; No. 1, \$12.50@13.50; No. 2, \$9@12. Clover—No. 1, \$9.50@12; No. 2, \$7@9. Straw—Wheat, \$8@8.50.

CHICAGO.
June 8.—The trade here has finally woken up to the fact that the coming hay crop is going to be a light one and that prices of rest of old crop will hold firm and with good prospects of working higher. Buying as on a larger scale here today than for some time. One large wholesaler bought 5 cars and wanted more. Looks like an old time hay market from now on. So keep your hay coming to Chicago. Rye straw wanted badly, selling \$12 to \$13. Arrivals—North, 13 timothy; south, 16 timothy, 1 wh. straw. Timothy—No. 1, \$22@24; No. 2, \$17@19; No. 3, \$14@16. Lt. clover mixed—No. 1, \$20@21; No. 2, \$16@18; No. 3, \$13@15. Med. over mixed—No. 1, \$17@18; No. 2, \$15@17; No. 3, \$12@14. Heavy clover mixed—No. 1, \$15@16; No. 2, \$13@14; No. 3, \$11@13. Lt. grass mixed—No. 1, \$18@20; No. 2, \$16@17; No. 3, \$14@15. Heavy grass mixed—No. 1, \$16@17; No. 2, \$14@15; No. 3, \$11@13. Clover grass mixed—No. 1, \$17@18; No. 2, \$15@16; No. 3, \$10@12. Clover—No. 1, \$15@16; No. 2, \$12@13; No. 3, \$9@11. Alfalfa—No. 1, \$17@19; No. 2, \$14@16; No. 3, \$9@13. Upland prairie, \$12@15; Midland, \$11@14; threshed timothy, \$6@9; sample hay, \$6@10; straw wheat, \$9.50@10; oat, \$10@11; rye, \$12@13; packing hay, \$11@14.

ST. LOUIS, MO.
June 8.—The receipts of hay on both sides of the river were extremely light for Monday. Indications are for a strong and high market for the remainder of the week. Good qualities of choice timothy and light mixed in splendid demand. Advise quick shipments. Clover—None arriving. Demand light; low grades hard to place. Alfalfa—Top grades in fair demand; other qualities more or less difficult to sell. Prairie—High grades wanted at full values. Medium and low grades still hard to place. Straw strong. No. 1 timothy, \$22@23; standard, \$19@21; No. 2, \$15@17; No. 3 and sample, \$10@12; No. 1 clover mixed, \$18@19; No. 2, \$14@16; heavy mixed, \$14@16; No. 1 clover, \$16@17; No. 2, \$12@13; threshed hay, \$10@12; choice alfalfa, \$24@26; No. 1, \$22@24; standard, \$16@18; No. 2, \$13@15; No. 3, \$9@11; prairie, \$15@16; No. 2, \$12@14; rye straw, \$10@11; wheat straw, \$9@10.

CANADIAN GRAIN IN U. S.				
The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:				
	June 6, 1925.	May 30, 1925.	June 7, 1924.	
Wheat	4,875,000	5,916,000	7,257,000	
Oats	836,000	728,000	1,493,000	
Rye	46,000	22,000		
Barley	936,000	1,399,000	272,000	

RECEIPTS, TWENTY MARKETS.				
Combined receipts of cattle, hogs and sheep at the seven leading western markets and thirteen other points for the week with comparisons:				
	Cattle.	Hogs.	Sheep.	All kinds.
Past wk.	221,000	670,000	225,000	1,116,000
Prev. wk.	217,000	635,000	162,000	1,014,000
1924	245,000	817,000	233,000	1,295,000
1923	266,000	898,000	216,000	1,380,000
1922	225,000	703,000	268,000	1,196,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the Drovers' Journal:				
	Cattle.	Hogs.	Sheep.	All kinds.
1925..	5,262,000	16,653,000	5,852,000	27,767,000
1924..	5,343,000	20,080,000	5,460,000	30,883,000
1923..	5,369,000	19,475,000	5,836,000	30,680,000
1922..	4,983,000	14,890,000	5,461,000	25,334,000

WESTERN STOCKS.				
The following table exhibits the aggregate stocks of hog products at Chicago, Milwaukee, Kansas City, St. Louis, East St. Louis, Omaha and St. Joseph on June 1, as compared with one month and one year previous:

CHICAGO HAY NOTES.
The arrivals were equal to demand, and market firm on all grades of sound tame hay. Advices of shipments are light and it looks like a continued firm market. Offerings of prairie light, with extremely light demand. Good soft packing hay wanted. Straw arrivals light and demand good for all kinds.—E. W. Bailey & Co., Inc.
Advices from different sections of the surrounding territory indicate a continued light movement of hay. Such being the case, market here is bound to hold firm with price trend upward. Our advice is to let your loadings come this way for the present. Chicago trade needs hay and will pay the price. Send us anything in the way of sound hay you have to market. There are buyers now for all grades.—Albert Miller & Co.
There was no dullness today. The small offerings were quickly absorbed at firm prices. Country loadings almost

nil. Crop reports mostly discouraging; few satisfactory. Prospects for strong prices. Active demand for marsh hay. Prairie steady. All kinds straw wanted.—Bridge & Leonard.

OPTIMISTIC ON HAY OUTLOOK.
John H. Devlin, of Albert Miller & Co. and president of the Chicago Hay Exchange, is optimistic of the trade outlook. He bases this upon several factors, including the apparent reduced acreage devoted to hay and the consequent outside buying of hay consuming districts. In fact, this latter business is already becoming apparent and in his opinion a good outside demand for hay will develop during the summer and fall. Among recent orders on their books are several carlot purchases of last year's alfalfa crop, bought by those who intend to put such hay away for future consumption.

Hay Crop Short.
Price Current-Grain Reporter: A good many meadows were plowed up last fall and this spring due to the poor stand and a larger per cent on account of the low prices of the various grades of hay. The remaining meadows are not doing as they should due to lack of favorable weather this spring. We need rain at once if we should have 60 per cent of last year's crop, that is counting the meadows that were plowed up. Hay is very short and in most cases poor stand. Our clover through here will be very short due to the clover louse; will have hardly enough for home consumption; do not expect to ship a single car of clover.
Most of the poor hay has been baled and been shipped during the winter. What hay is left is the better grades. We have about the same amount of hay as last spring in our warehouse, perhaps 100 to 110 tons. The same amount is also on the farm or perhaps 10 per cent more than last spring. All our crops need rain or they will be very short.
We have a larger corn and oats acre-

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES
For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

American Steel & Wire Company

Chicago New York

age than usual this spring and they never went into the ground in better shape. Oats are heading out and only six to eight inches high. Corn has not done good for lack of rain and the cold weather all spring. Nothing but timely rains will make an average oats and corn crop through this section. Wheat is only fair.—Paisley Mill & Elevator Co., per C. Zimmer, Witt, Ill., June 3.

TOP PRICES FOR HOGS IN CHICAGO.													
Highest monthly and yearly prices of hogs at Chicago, per 100 pounds, for the terms of years indicated, collated by THE PRICE CURRENT-GRAIN REPORTER from Chicago Daily Drovers' Journal reports:													
	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Year.

CHICAGO PROVISION REVIEW.

CHICAGO, June 8.—Provision prices advanced to new high levels with increased commission house buying in the early part of the week and shorts covering freely. Those who have been bullish and hesitated about buying, entered the market on that side, toward the closing days and loaded up with high priced material only to see values weakened toward the last. Profit taking by packers and speculators who have been long for some time past, carried prices off toward the last and

LIVESTOCK PRICES AT LEADING MARKETS.

Following are livestock prices at five leading Western markets on Monday, June 8, 1925, as reported by THE PRICE CURRENT-GRAIN REPORTER by the Bureau of Agricultural Economics, U. S. Department of Agriculture:

MOVEMENT OF HOGS.

Weekly receipts and shipments of hogs at 9 Western centers the week ending June 6, 1925, and totals with comparisons for corresponding time last year, compiled

WANTED and FOR SALE**MARKET PLACE, CLASSIFIED**

for Buyers and Sellers of Properties and Equipment in Grain, Seeds, Hay, Feed, Flour, Millfeed, Beans, Produce, etc.

25c Per Printed Line Each Insertion

SITUATION WANTED.

GENERAL EXECUTIVE immediately available. Life experience in live stock feed, grain and milling. Thoroughly understands selling, purchasing and manufacturing. K. H. BIXBY, 42 Lockwood Bldg., Buffalo, New York.

ELEVATORS FOR SALE.

FOR SALE—Terminal elevator and Kansas Line. Terms. Bargain. ALLINGRAIN CO., Coffeyville, Kans.

A 36,000 BU. elevator for sale in a good grain territory. No competition, good warehouse, electrically equipped, truck scales, air dump. Land goes with buildings. Fine lake town. A bargain if taken soon. Address C. M. STEWARD, SEC., Lake View, Iowa.

TWO SOUTHERN KANSAS ELEVATORS in best hard wheat section of state. Crops here better than in other parts of state. Also good implement and coal business in connection. A money maker for a hustler with capital to handle. Reasonable terms. Address BOX NO. 278, Kiowa, Kansas.

FOR SALE: 7000 bushel elevator on Santa Fe, N. E. Kansas. Doing good business. Will make good price for cash. C. D. AMEND, Cummings, Kansas.

ENGINES FOR SALE.**DIESEL OIL ENGINES**

For Elevators and Flour Mills.

All Sizes.

ST. MARY'S OIL ENGINE COMPANY, St. Charles, Mo.

SCALES FOR SALE.

RICHARDSON AUTOMATIC GRAIN receiving or shipping latest self compensating type scale. Has only weighed four cars of grain. W. C. BAILEY, 220 Grain Exchange Bldg., Omaha, Nebr.

MACHINES WANTED.

WE ARE in the market for a first class 24-inch plate used attrition feed mill. KINSEY BROS., North Manchester, Indiana.

MACHINERY BARGAINS.

WE OFFER you a select list of elevator and seed equipment, in new and used machinery. Write for our bargain prices. STANDARD MILL SUPPLY CO., 501 Waldheim Bldg., Kansas City, Mo.

FT. WORTH A GOOD MARKET.

It is only a matter of a few days until the new crop grains begin to move. While the crop is short, the price is high and we expect to see the movement start right with the threshers. Very few trades have been made for the new crop grains and new sales will have to be made for the first run stuff. Fort Worth is your natural market and affords you numerous advantages not found elsewhere in the southwest. Geographical location and our twelve trunk rail lines make Fort Worth your natural gateway for most economic distribution.

SOME EXCELLENT OFFERINGS

In new, shop worn, and slightly used equipment for flour, feed, and cereal mills can be had by inquiry to

W. R. LEATHERS

9 S. Clinton St.

Chicago, Ill.

Our elevator storage of over ten million bushels assures you a steady market and precludes the possibility of congestion.

No more efficient inspection department can be found in the entire southwest, than is maintained here. The trade has learned that Fort Worth inspection can be relied upon and both buyers and sellers prefer to settle the matter of "grades" at Fort Worth. Uncle Sam maintains a supervisor's office in the same building with the exchange and inspection department, should any disagreement arise as to grade.

Grain unloaded or loaded out is weighed by the bonded weighers under the direct supervision of the state of Texas. Our weighing department has been the subject of much favorable comment by the railroads, shippers and receivers. Our weights are official and are accepted as such. Short weights constitute one of the biggest drains upon the purse of the grain trade. There are no short weights at Fort Worth.

Fort Worth has an active cash market. When consigned car is sold, the sale must be posted on the board of the exchange floor, within fifteen minutes. Grade, price, delivery basis and price making factors only are posted. This cash market places within your reach accurate market information and has exerted a powerful influence toward stabilizing values. This is the only bona fide cash market south of Kansas City. It is your cash market to the same extent that it is ours.—Federal Commission Co., Ft. Worth, Tex.

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on June 5:

	June 5, 1925.	May 29, 1925.	June 7, 1924.
Wheat	1,400,147	1,424,501	595,440
Oats	477,330	893,683	89,213
Barley	2,128,224	2,575,176	634,489
Corn	895,818	1,009,491	435,709

Total, bus. 4,901,519 5,902,851 1,754,851

AMERICAN GRAIN THROUGH CANADA.

The following total receipts and shipments, water and rail, of American grain to Georgian Bay, including Lower Lake and St. Lawrence ports of Canada, reported for week of June 5:

	Georgian Bay.	Lower Lake.	St. Lawrence.
Receipts—			
Wheat	167,553	1,054,379	
Oats	479,435	1,037,603	
Rye	93,235	899,358	
Corn			
Shipments—			
Wheat	241,707	1,120,921	
Oats	893,302	1,058,089	
Rye	43,300	1,303,009	
Corn	61,211	12,942

Montana	12	3.79	.79	1.06
Nebraska	18	4.88	1.46	.93
Iowa	22	6.00	2.11	1.61
Missouri	24	6.26	1.08	.92
Kansas	25	5.69	1.20	.74
Oklahoma	11	3.75	.94	.23

FOREIGN CROP CONDITIONS.

According to the Foreign Crop Service of the U. S. Department of Agriculture, conditions in Europe continue to be generally favorable. France, according to latest reports, is having good weather for cereals, and in Italy a wheat yield above the average is expected. In Spain the crops are reported to be in good condition, although the farmers in many regions would welcome more rains. In Roumania propitious rains the latter part of May benefited the cereals which are in good condition. Hungary expects the wheat and barley crops to be above average, rye to give a good crop, and oats about an average one. The condition of winter grains in Germany on May first was good and abandonment of acreage had been slight as compared with last year. Later reports mention some lack of rain. In Russia the total sown area is reported to be 4 per cent greater than in 1924. Winter wheat is about average in condition and the spring cereals are generally satisfactory. Poland, the most important rye producer aside from Russia and Germany, has reduced her estimate of rye acreage from 12,214,000 acres to 12,076,000 acres, which is still the largest she has reported in recent years.

No reports have come in as yet on cereal production in North Africa, where harvesting has been going on during the past month. Conditions generally are favorable, although some reports mention drought in Morocco.

The Canadian official crop report just issued shows condition of winter wheat as 97, or the same as last year; spring wheat as 102, against 96 last year and 98 two years ago, when a record crop was raised.

No acreage figures were given, but on the basis of private estimates the government's condition suggests 340,000,000 to 350,000,000 bus. spring wheat for the three western provinces, against

BUSINESS AND TRADE CONDITIONS

LEADING newspapers, the country over, seem to be more generally united in commenting upon the business situation than is usually the case. They admit that there is some hesitancy in trade, but point out the improvement of this year compared with last, and the conservative optimism which stands out in contemplating the last half of 1925.

Business interests who feel distressed because there is not a large number of future orders in sight do not recognize the changing times through which we are going. There are several well defined reasons which have been quite freely presented to the country, but which are not always recognized in their application to one's individual business. It is the new method of hand-to-mouth buying which has become standard in well-nigh all lines of business. Such purchases are not "flagged" in advance, presumably a withholding action on the part of the buyer that does not warn the seller and hence tend to advance the selling price. This new trend of affairs is still so new that there is much difference of opinion relative to its stability. Certain bankers and trade leaders are of the opinion that it is a more modern and scientific basis of buying, and that purchases for immediate needs are preferable to large orders for future deliveries which, when the time rolls around for acceptance, may not be desired.

At any event and without discussing the pro and con of this situation, it is certainly before us as a condition to be coped with.

Sectional Outlook.

New England publications very naturally see their own business problems somewhat magnified due to the difficulties which have been experienced in textiles, wool, shoes and allied lines.

The Middle West seems to be in the healthiest condition, without any notable expansion on one side or recession on the other.

Excepting in certain grain areas where crop misfortunes have been experienced, the farmer is in good shape. Although we are not quite sure of the source of their information, it is quite freely stated by people who are presumably well posted that the farmer will come in for a greater share of the price advance on farm products this year than he enjoyed last year. No doubt this forecast is based upon the assumption that today's short crop outlook in some grains and the price advance already experienced will bring eminently satisfactory values when the winter wheat, being harvested, is sold and for the spring wheat crop as it is cut later on.

Unusually Important Harvest Season.

It is the wise procedure for business in a surplus grain country to give careful consideration to the crop harvests, but this season more than usual interest attends the maturing crops.

Marketing conditions among domestic distributors and foreign exporters, together with the size and quality of the grain crop are extremely important factors this year. Irrespective of a million bushels or so difference one way or the other in the crop forecasts, we are closer to a domestic basis than is ordinarily the case. Conflicting crop reports from foreign countries nevertheless indicate far better yields than last year when through an unfortunate coincidence, practically all surplus foreign producers suffered severe crop losses.

Irrespective of the fact that economists urge the greatest possible production per acre even though we

are usually a great surplus nation, it is an apparent fact that in periods of partial shortage the greatly increased price is an advantage to the producer, who has agricultural products to sell. Official and private crop reports are consistent relative to the serious shortage in the winter wheat crop, part of which is now being harvested, a situation that will carry a considerable price advantage into the spring wheat belt as well. It is fortunate for the producers of our Northwestern states that a substantial increase in the acreage devoted to spring wheat was seeded.

Wheat, Sugar and Tariff Protection.

A significant statement is credited to President Coolidge in the week-end announcement of his refusal

EUROPEAN DEMAND LIGHT

CONTINUED apparent indifference upon the part of foreign buyers to our short wheat crop figures, is rather surprising in view of the fact that reports indicate that the European wheat is nearly a month late and that further supplies must be purchased abroad to fill in until their harvest.

Present indications, however, are for an unusually large wheat crop in Europe this year, and unless there should come a decided reversal of conditions, no more will be imported than will be necessary to meet their very definite need.

It is considered fortunate, by world wheat crop students, that prospects should be so good both in Europe and in Canada, in a year when the United States will have so little to export, rather than in a year in which our exportable surplus would be large.

to reduce the tariff on sugar. The statement refers to wheat production, and is to the effect that one of the reasons back of the President's action is his opinion that it is good policy to keep farmers raising sugar beets rather than to devote an increased acreage to wheat which is already in overproduction. Beyond this single consideration in the matter, we find the President running true to form in his personal and party policies to protect the American farmer and the business man through a reasonably high tariff wall.

The cotton acreage is likewise somewhat larger than last year and a forecasted crop of 14,000,000 to 16,000,000 bales seemed a fair basis on condition reports in late May. Cotton handlers know full well, however, the large losses which can be experienced from the May condition at cotton picking time and in our judgment the above estimate will quite likely be much over the actual out-turn. There seems to be a country-wide lack of moisture which has become so aggravated in many localities that sub-soil moisture is seriously reduced. These are hazardous factors, with which to cope in forecasting crops, and we are entering a harvest season in which the pitfalls are many for the unwise and daring crop reporter.

It is usually conceded that the steel industry is,

like agriculture, a dependable barometer for American business. It is gratifying, therefore, to note the strong outlook in the steel trades, especially in the Middle West, where pig iron has been bought in unusually large tonnages since early in May. Prices are firm and production is increasing with the various iron and steel industries increasing their operating capacity weekly. It is reported among buyers that stocks are light and we no longer find hesitancy in making necessary purchases. A year ago in these important basic trades, the situation was just the opposite.

Our railroads as large consumers of iron and steel products are likewise showing new life in such purchases.

Business and Banking.

The depression of the grain and stock markets has passed and general business, supported as it is by extremely liberal credits and banking accommodations is recovering lost ground.

There is probably no better basis on which to determine the volume of business the country over than to observe bank clearances. The Federal Reserve System has recently issued compilations from Jan. 1st to May 20th, 1925, as compared with the same period a year ago, showing that the aggregate increase for the twelve reserve districts was 14.8%. The largest increase was in the Minneapolis district, where 24.3% shows and the smallest in San Francisco district at 3.8%.

Bankers tell us that there is nothing in sight to indicate a change in the money situation before the fall expansion of business arrives. The demand for money has been light. Gold movements are light, and, in fact, if it were not for the foreign loans that have been placed in the United States we would be importing gold as we were last year. It is quite apparent that our export business, which is quite satisfactory in volume, is being financed by means of these credits.

In spite of almost daily record high prices for good bonds, most experts are now agreed that this high level will be maintained for several months to come. This strong situation in bonds is probably the direct reflection of easy money and slightly declining commodity prices. There has also been a scarcity of new bond offerings which is favorable to the values of present issues. Investors who anticipate declining bond markets in order to make favorable purchases will be disappointed.

With foreign exchange showing a steady undertone and the possibility of a reduced re-discount rate in the Federal Reserve Banks, we have definite assurance of the availability of all the money necessary for commercial interests during the summer and fall.

SECTION 27 KNOCKED OUT

THE DECISION of the Minnesota Supreme Court, in reference to section 27 of the Minnesota Co-operative Marketing Law, holding it to be in violation of the liberty of contract guaranteed by both state and Federal constitutions, takes from the law, the one section which, more perhaps than all of the others, aroused the ire of that state's independent elevator operators.

There is of course no objection to forcing a farmer to live up to any legitimate contracts he may make and providing for reasonable penalties for their violation and the only trouble with that phase of the situation is that he occasionally does not know just

what signing involves, and it sometimes happens that he is forced to sign.

We are not opposed to the principle of co-operation, but we are opposed to a good many of the things that have been and are being done in its name and we can see no reason for so much governmental propaganda which is being paid for, quite as much by legitimate business which would be hurt by its success, as by business which would be benefited.

THE METRIC SYSTEM

SECRETARIES of the grain dealers associations have the interests of their membership at heart and should be ever alert to guard and watch against anything that would be detrimental to the grain trade. We are surprised at the lack of interest that the secretaries of various associations have taken in the Metric System. They do not seem to take this problem seriously. They have been warned that a move is on foot to have the Metric System adopted in this country in the next session of Congress and to make its use compulsory. We thereby advise them to get busy immediately, investigate the Metric system, and find out what it really means and what effect it would have upon country shippers if put into force and the rest of the trade as well. Many grain men have a confused idea in their minds*that the Metric System would mean buying grain by the hundred-weight. This is entirely erroneous. If the Metric System were adopted, there would be no more terms such as pounds, bushels and acres. Every scale in the United States would have to have a new beam, all statistical data would have to be discarded, for it would be utterly impossible for any to either make or take the time to make conversions for comparative purposes.

For land measure, 100 square meters would be called an "ar" which would equal one hectare. Weight would be designated in grams. A bushel of wheat testing 60 pounds would be expressed by 27-3/11 kilograms, while a bushel of oats testing 32 pounds would be expressed by 14-6/11 kilograms. The trade should have this matter thoroughly gone into and the subject should take an important place on the program of the National meeting next October. What is going to be done about it?

A QUESTIONNAIRE

THE officials of the American Farm Bureau Federation announce that they are sending out to their members a questionnaire, to determine what legislation the farmers want.

It is being handled by the various state organizations some of which are making plans to get an expression of the entire state membership while others are working directly through boards of directors of each of the county farm bureaus.

The first question asked is as to whether or not further legislation is needed to assist in developing the cooperative principle in behalf of farmers and their organizations.

Suggesting at least that the answer will be in the affirmative, the next question is as to the method of administering the law, whether by the Department of Agriculture, the Department of Commerce, a combination of the two, or by a federal board distinct from both of them.

Other questions asked are as to the maintenance of a public market, carrying out programs for orderly marketing, including the adjustment of supply to demand, provision for a government export corporation, the operation of Muscle Shoals, revision of postal rates, the establishment of branch national banks, further standardization of containers, adding to the number of primary live stock markets, changes in the income tax law, restricting the issuance of tax exempt securities, providing for a general sales tax, etc., etc.

It will thus be seen that there are a lot of things in the minds of the Federation officials, that they think their members will want changed and some of

them would have a very vital effect upon the business of the independent elevator operators, as well as upon business generally. We shall, therefore, all want to know that the questionnaire is answered only by bona fide farmers who are permitted to express their opinions without promptings, and we shall then want to know something about the analysis of the replies (many of the questions cannot be answered by a yes or no), and finally we shall want to know something about how representative of the entire group of effected farmers the vote upon some of these questions may be.

This is of course upon the assumption that the result of the questionnaire will be presented to Congress as the concrete desire of the farmers as to legislation.

We have no fault to find with this method of determining public or group opinion, for where the questions are thoroughly understood and may be answered by a yes or no, the plan is almost ideal, and, in raising the points outlined, it will be understood that we are not for a moment questioning the honesty of purpose upon the part of the American Farm Bureau Federation executives in this effort to secure a cross section view of the farmer mind, our point being that, because of the importance of the issues involved, complete information as to methods employed, etc., should be given out at the same time that questionnaire results are made public.

FOLLOWING UP JARDINE'S RECOMMENDATIONS

ALTHOUGH Secretary of Agriculture Jardine visited present and past officials of the Chicago Board of Trade behind closed doors, it has become generally known that the conference was extremely friendly. It is doubtless true that the Secretary talked very frankly, to the effect that changes within the Chicago Board of Trade, determined and applied by the Board of Directors, would be preferable to similar action which might originate in the Halls of Congress and be imposed upon the trade as laws. It is to be assumed as self-evident that the Board will make needed changes, including, it is said, some new form of clearing house. Furthermore, we may reasonably expect announcements of a definite character within the next few weeks, intended for the early vote of the membership and immediate application so that by the time Congress convenes next winter, such changes will have been made and the Board present for the critical gaze of members of Congress the same clean slate, as it always is their intention to show.

CONTROLLING GREEK CURRANTS

THE *New York Journal of Commerce* in a recent issue tells about the experience of the government of Greece in its effort, covering a period of 30 years, to regulate the supply of currants to fit the demand, and, while there is of course no analogy between currants and wheat, the problems arising from the effort to balance supply and demand are sure to run in similar channels, and the story, which will be found in another column, is therefore being passed on to our readers.

The difficulties attending such efforts, with such a relatively unimportant crop as currants and in the growth of which such a comparatively few persons are engaged, would be very simple beside those which would follow a nation-wide attempt in this country to so control the production of wheat.

JULY 28th, AN IMPORTANT DATE

ON the 28th of July one year will have passed since the signing of the contract between Gray Silver and his associates to purchase from several of the largest grain elevator companies all of their goods and possessions. Mr. Silver agreed as an initial payment to turn over \$4,000,000 by said date,

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	June 13, 1925.	June 6, 1925.	June 14, 1924.
Wheat—			
Primary receipts	4,833,000	5,748,000	3,554,000

ing, and he still feels at this writing that such payment will be made.

Surmise and conjecture has been rife recently relative to the disposition of the various interests which are at present a component part of the Grain Marketing Co. if Mr. Silver and his farm friends are unable to meet their obligation.

There are probably very few sufficiently close to Mr. Silver to dispute his assurance relative to the payment of \$4,000,000 in coin of the realm, for it is not at all impossible for him to do so. There is sufficient time still left in the contracted period to make it quite apparent that rumors concerning the continued activities of the various officials of the Grain Marketing Co. and the revival of their former corporations with the operation of their elevator facilities are without foundation.

FIRE LOSSES IN MAY

LOSSES by fire in the United States and Canada during May, amounted to \$29,170,800 and during the first five months of the year the amount was nearly \$174,000,000.

That means that for each day in the year more than \$1,152,000 has gone up in smoke, or to put it in another way, the loss is greater than would come through eleven one hundred thousand dollar fires—about one every two hours—and who pays the bill?

CHICAGO, JUNE 17, 1925.

GRAIN TRADE REVIEW

A winter wheat crop somewhat below actual domestic requirements was suggested by the Government June report and after allowing for the damage done after the first of the month by the extremely hot and dry weather, it would not be surprising if the final returns suggested a yield of below 400,000,000 bu., the smallest in many years. The spring wheat crop, however, is still far from harvest and final returns may show a yield considerably in excess of the Government figures, especially as drought is not a factor at the present time. In fact parts of the spring wheat territory have received too much moisture, but any loss from excessive rains in some sections will be more than made up by the gains in other territory that seldom know what it is to be too wet. Harvesting of winter wheat is well under way in the southwest as the crop has ripened prematurely, and the first car of new grain of the season has already been received at Wichita, Kansas. Judging from the first returns the quality of this year's crop is going to be relatively high in protein. There is still a tendency shown to reduce estimates on the Kansas crop, especially as the freeze and dry hot weather caught the plant, in the northern section of the state, in a condition where it could be badly hurt, but this is not likely to show up until harvest. Thresholds in Oklahoma show yields somewhat better than expected and the same is true in Texas. Cutting has started in Illinois and Indiana which also felt the effect of the extremely hot weather. The soft wheat crop promises to be relatively short this year, as well as hard winter and it would not be surprising if winter wheat sold at a substantial premium over the spring wheat. It will be several weeks before the spring wheat crop is far enough advanced to be accurately able to determine about what the yield will be. No more rain is needed in the Red river valley for several weeks.

Market Declines.

The failure of the wheat market to hold its advance in the face of the bullish construction placed on the domestic situation, as given by the Government report was not surprising. For many weeks the trade had been talking of \$1.70 for July wheat and after

the Government report confirmed the private estimates regarding a short yield, an overbought condition was disclosed, and prices declined sharply, as there was little left to the imagination. There has been considerable discussion regarding the United States being on a domestic basis and having little or no wheat available for export. Of course this view was based on the June showing but the final returns are what count. A domestic basis would be most unfortunate for both the consumer and the producer. With no wheat to spare for export and prices above a world's basis, millers would hardly be likely to compete actively for the grain, which would be reflected in a lower price to the producer. On the other hand the consumer would have to pay up to secure flour, as the loss on low grades would have to be made up by a better price secured for patents. The damage to the oats and hay crops, however, might result in a high price for bran which would have considerable influence on the value of flour. The Canadian wheat acreage is privately estimated to show an increase of 3.3 per cent over last year with a condition slightly better than the average of the past 10 years. Much rain has fallen in the Canadian northwest and that section is safe from drought for some time to come. Under normal conditions black rust makes its appearance in the American northwest around July 4, and the extent of the damage depends largely on weather conditions. Inasmuch as much of the crop went in early this season there is an excellent chance of it maturing ahead of the rust this year. Foreign crop reports remain favorable, although a hot wave has prevailed for a week or more, and a little damage has been done in some sections. At the same time indications are for a yield larger than last year which will cut down import requirements to some extent. It remains to be seen, however, whether Europe will be independent of the United States during the months of July, August and September. There is considerable durum wheat that will have to be exported as it is not wanted for consumption in this country.

Coarse Grains.

A soaking rain is needed over the greater part of the corn and oats belt, and unless it comes shortly heavy damage will be shown in corn. The early sown oats have already been severely damaged, the bulk of the crop loss occurring after June 1, as the result of extremely hot weather. The Government report was much too high, but did not reflect the hot weather losses. Late sown oats can still be helped by rain. In Texas, the corn crop has already been hurt by continued dry weather and that state promises to take considerable quantities from the more northern sections. With a short oats and hay crop and poor pasturage a rather serious situation as far as feeding stuffs are concerned, is developing, and a big demand for patent feeds is anticipated in many quarters.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	June 13, 1925.	June 6, 1925.	June 14, 1924.
Wheat	4,939,000	4,859,000	3,588,000
Corn	4,082,000	5,937,000	4,884,000
Oats	3,875,000	3,617,000	3,926,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week	12,896,000	12,398,000
Preceding week	13,913,000	14,710,000
Since July 1	1,002,073,000	957,884,000

Wheat market was decidedly unsettled the past week, advancing early on prospect of a bullish Government crop report, only to break sharply after the report was out of the way and the finish was about the low point with net losses of 9¢@11¢ for the week with the September showing the most decline, while July acted tight and went to around 4¢c over the September. Rains over

the greater part of the winter and spring wheat belts will improve crop prospects, except where winter wheat is too far advanced. There has been a little too much moisture in parts of the spring wheat territory. Export demand was slow throughout the week.

Corn markets showed considerable irregularity the past week, with good buying of September on all the soft spots, while the rains which fell over the belt late in the week, had a depressing effect on the December and it led the decline, closing with a net loss of 4¢c, while the old crop months were off only 1¢@2¢c with July leading. Country offerings to arrive were limited, and the after planting movement is completed, while the visible supply promises to decrease rapidly from now on. The rains remove apprehension of drought for some days to come.

Oats showed more strength than other grains and while reacting sharply from the high points, as the result of the more favorable weather conditions, were off only 1¢@1½¢ for the week, the latter on September. Crop reports were distinctly unfavorable from a wide territory. Rye failed to respond to the early strength in wheat and broke sharply toward the last and closed 9¢@10¢ lower despite unfavorable crop reports. Foreign demand was slow. Range of prices the past week follows:

	High.	Low.	June 13, 1925.	June 6, 1925.	June 14, 1924.
Wheat—					
July	\$1.69½	\$1.58	\$1.59½	\$1.69	\$1.12½
Sept.	1.67	1.54½	1.55	1.66	1.14½

CANNOT PENALIZE BUYER

Supreme Court Declares Clause Violates
Liberty of Contract Clauses of State
and Federal Constitutions.

THE Supreme Court of Minnesota, in the case of the Minnesota Wheat Growers' Co-operative Marketing Association against A. D. Radke, and four other similar cases, which were decided last week, declared unconstitutional, section 27 of the Minnesota Co-operative Marketing law, which provided for the imposition of a penalty upon the purchaser of a commodity which was under contract of sale.

Lower Court Reversed.

The ruling of the higher court, which reverses the Le Sueur county district court in the case of the Minnesota Wheat Growers' Co-operative Marketing Association against A. D. Radke, an independent elevator owner, follows closely on a defeated movement by the State legislature, which adjourned the latter part of April.

At that time leaders of the co-operative movement appeared at numerous hearings in the legislative halls before various committees urging that no repeal action be taken, and as a result the repeal move was lost.

Opponents of Section 27 at that time argued that the law was unconstitutional, while proponents held that the statute was within the scope of the state constitution.

The case originated in the lower court when the Wheat Growers' association sought an injunction against Radke of Le Sueur Center to restrain him from purchasing products from farmers who were members of the Wheat Growers' organization.

Judge C. M. Tift of the lower court granted a temporary injunction from which Mr. Radke appealed. This decision was reversed, with the announcement of the section's unconstitutionality.

Several cases of a similar nature are disposed of by the Supreme court, including one against the Commander Elevator company of Le Sueur Center.

Supreme Court Opinion.

On the same briefs and arguments five appeals were submitted. Two cases were brought by plaintiff. One against A. O. Radke, alleged to operate an independent elevator, for an injunction prohibiting him from purchasing grain from members of plaintiff and for \$500 attorney's fees. The other against the Commander Elevator Co. and its manager for injunction, liquidated damages, and attorney's fees. The defendants answered separately, and to the parts of the answers challenging the constitutionality of the law plaintiff demurred. In each case a temporary injunction was asked. The demurrers were sustained and the temporary injunctions granted. A separate appeal was taken by each defendant from the order sustaining the demurrers. And in each case there was an appeal from the order granting the temporary injunction.

Fairly construed, the complaints herein are based solely upon Section 27 of the act, which reads:

"Any dealer or prospective purchaser or any person, firm or corporation conducting a warehouse, elevator or other receiving station within this state who solicits or persuades or permits any member of any association organized hereunder to breach his marketing contract with the association by accepting or receiving such member's product for sale or for auction or for display for sale, contrary to the terms of any marketing agreement of which such person or dealer or prospective purchaser or any member of the said firm or any active officer or manager of the said corporation has knowledge or notice, shall be liable to the association aggrieved in a civil suit in the penal sum of five hundred (\$500) dollars for each such offense; and such association shall be entitled to an injunction against such dealer or prospective purchaser, or such person, firm or corporation to prevent further breaches of such marketing agreement and to prevent a multiplicity of actions thereon. In addition to other relief said warehouseman or other person, firm or corporation so offending, shall pay to the association a reasonable attorney's fee to be fixed by the court and all costs involved in any such litigation or proceedings at law.

"This section is enacted in order to prevent a recurrence or outbreak of violence and to give marketing associations an adequate remedy in the courts against those who encourage violations of co-operative contracts."

The contention is made that the section can be and should be so construed as ap-

plying to brokers and commission merchants only and not to purchasers of grain, such as these defendants. We think the contention untenable. The plain intent of No. 27 is to reach every one who purchases or aids in disposing of, for others than the association, products knowing that the same are offered for sale or disposal by a member who is under contract to deliver such products to the association. The reason which impels us to hold the section invalid when applied to purchasers is just as cogent when sought to be applied to brokers or commission merchants, viz., an arbitrary restraint of the liberty of contract.

Where parties vountarily become members of an association operating under a statute fixing their rights and duties and providing remedies and penalties for breaches or violations they may be held to have agreed to all the terms of the statute, and are not in a favorable position to complain of infringement of the liberty of contract or that the damage or penalties prescribed in the statute are too drastic. But no consent can be imputed to non-members. No contractual relation exists between them and the association or its members. Of course, it is well settled that a malicious interference by one not a party to a contract to induce its breach is a tort for which redress may be had. *Canello v. Zotalis*, 145 Minn. 292; *Bacon v. St. Paul Union Stockyards Co.*, 201 N. W. 326. But No. 27 does not stop with those who maliciously interfere with existing contracts between third parties. It makes it an actionable wrong for one who has used no effort, or held out no inducement for a member of a co-operative market association to breach his contract with the association, except this, that he is ready at his usual place of business to buy or handle products that such member may voluntarily bring there for sale or disposal, the same as for an outsider.

In other words, the section attempts to prevent all dealings between members of a co-operative marketing association and outsiders in respect to products contracted for by the association, no matter how free from legal malice or devoid of inducements the conduct of the outsiders may have been, provided they knew that the product was under contract. The court in *Sweeney v. Smith*, 167 Fed. 385 (affirmed in 171 Fed. 645), said: "I have, been referred to no decision, and I have found none, in which mere knowledge of an earlier contract was held to be the equivalent of inducement or persuasion or (still less) of fraudulent conduct." On the reargument of *Northern Wisconsin Co-operative Tobacco Pool v. Bekkedal*, 197 N. W. 936, the court modified the injunction so that defendant was permitted to purchase from those members of the plaintiff's association who had voluntarily breached their contract with the plaintiff thus recognizing the constitutional right of liberty of contract. As No. 27 reads, a purchase from a member who has voluntarily breached his contract with the association is within its condemnation. For when such member without inducement from an outsider brings to the latter's place of business for sale or disposal a commodity which is under contract for delivery to his association he has breached his contract with it and must be held to have breached it voluntarily. It seems clear to us that it is beyond the power of the legislature to make it a tort to purchase, in the ordinary course of a legitimate business, from the true owner a wholesome staple commodity upon which there is no lien and which is not under any ban or regulation because of inherent qualities or use. Liberty of contract is assured by both state and federal constitution. *Williams v. Evans*, 139 Minn. 32 and cases therein cited. This liberty of contract as said in *Miller v. Wilson*, 236 U. S. 373, "is freedom from arbitrary restraint—not immunity from reasonable regulation to safeguard the public interest—the question is whether the restrictions of the statute have reasonable relation to a proper purpose." The latest utterance on this subject is *Wolff Packing Co. v. Court of Industrial Relations of Kansas*, opinion filed by U. S. Supreme Court April 13, 1925.

Respondent argues that the marketing of agriculture product is fraught with such public interest as to justify regulation. Conceding that to be so, we are nevertheless convinced that the length to which the section mentioned goes, it is an arbitrary restraint and not a proper regulation. The last paragraph in the section, intended perhaps to express the legislative purpose, is evidently borrowed from the experience of other states relative to crops not raised to any important extent in this state. But even so, we can discover no public interests so affected by the ordinary manner of marketing staple agricultural products that every one except associations formed under this law must be forbidden to purchase or handle the same if offered for sale or disposition, in the usual course of trade, by members of co-operative market associations who have not been solicited so to do by the holding out of questionable inducements.

Entertaining the view that No. 27 clearly invades the freedom of contract guaranteed both by the state and the federal constitution it cannot stand. And since the right of injunction, the damages, and attorney's fees therein provided must necessarily fall with it, there is no necessity to consider whether the remedies are so drastic as, on that account alone, to vitiate the section, and the order in each case must be reversed.

If you are looking for paying results in business, have the confidence to advertise.

THE JUNE CROP REPORT

Frost and Dry Weather Take Heavy Toll
of Winter Wheat, Oats
and Rye.

The Crop Reporting Board of the Department of Agriculture makes the following forecasts and estimates from reports and data furnished by crop correspondents, field statisticians and co-operating state boards (or departments) of agriculture and extension departments for the United States.

Durum Wheat acreage this year in Minnesota, the Dakotas and Montana is estimated at 4,670,000, or 27.3 per cent of the total of 17,093,000 acres of Spring Wheat in the four states. This compares with 4,416,000 acres of Durum, 29.5 per cent of the total Spring Wheat in these states in 1924 and an average of 5,038,000 acres of Durum, or 30.7 per cent of the total Spring Wheat in these states for the five years, 1920-1924.

SUMMARY OF ESTIMATES

Crop—	Per cent of 1924.	Acres*	June 1, 1925.

MAY CANADIAN MOVEMENT

Movement in May Light—Importing Countries Not Purchasing Heavily—Weather Conditions in Western Canada Favorable.

By E. A. URSELL,
Statistician.

F. T. WILLIAM, June 9.—Having regard to the large stocks of wheat held in store in the Fort William-Port Arthur elevators the movement during the month has been very light. A steady advance in price quotations on the Winnipeg market, already much above the Chicago parity, with a poor inquiry from overseas purchasers have undoubtedly had the effect of curtailing export business. For wheat stocks to remain almost stationary for three weeks in succession at this time of the year, shipments being only sufficient to take care of receipts is most unusual, even if not entirely unknown hitherto. The movement from country points to the terminals at the head of the lakes has been light when compared with that for the corresponding month of the last three years, while very small quantities are being routed via Vancouver. Farmers continue to market some 800,000 bushels of wheat every week at country points, but the shipments from country elevators indicate that grain is steadily moving forward to the terminals in anticipation of shipments for export.

From a comparison of weekly world shipments and quantities on passage it would appear that importing countries are not purchasing to any very great extent at the present time, but are confining themselves to purchases of whatever wheat may be offering at favorable prices and the absorption of arrivals of grain on passage; while awaiting developments of the growing crops. There is a feeling that production in Europe will hardly exceed that of last year to the extent of fully counterbalancing the indicated smaller production in the U. S. A., which, if it materializes, will preclude the U. S. from taking a very active part in the export market. Undoubtedly importers are awaiting for an opportunity to purchase the balance of their requirements for the present season at lower prices. All depends on present conditions of growing crops being fully maintained, however, and any adverse weather might mean an immediate resumption of exhaustive purchasing in North American markets.

Up to the present time weather conditions in Western Canada have been extremely favorable at almost every point. Storms during the past ten days accompanied by heavy rains have ensured a plenitude of moisture for the present. Some hot weather has been experienced, but of short duration, so that growth has not been unduly forced. Fortunately growth was not sufficiently far advanced to suffer much damage from the sharp frosts around May 22 and 23, which wrought havoc particularly with the tender crops in the U. S. A.

Lake freights continue steady at 10c per bus. for shipments to Montreal and 1½c per bus. for shipments to Buffalo, both wheat basis. There is much more tonnage available than there are cargos offering and some vessels have been tied up and crews discharged until the fall. The ore movement is much lighter than last year so that with a lighter grain movement there is nothing to provide cargoes. Ocean freights from Vancouver have fallen off considerably in the hope of attracting cargos, berth space being quoted as low as 30/- to 32/- per ton and distress space offered at 25/-, while one cargo was shipped at a rate of 27/6 recently. While this is an unremunerative rate yet it does not compare with those charged on shipments from Australia viz., 30/- for berth parcels, and 35/- to 37/6 for full cargoes, per ton. In view of this it is not difficult to understand why so little grain comparatively, can be moved via Vancouver to European ports. On the Atlantic rates on wheat to U. K. are around 6c per bushel from Montreal and 13c per 100 lbs. to Antwerp, Hamburg and Rotterdam.

L. O. STREET.

ONE of the progressive grain firms of Western Oklahoma is that of L. O. & H. L. Street, of Woodward, who are located in one of the good wheat sections. At the annual convention of the Oklahoma Grain Dealers' Ass'n, Mr. L. O. Street, whose

likeness appears herewith, was elected president of the organization. Since taking office, Mr. Street has shown unusual activity in association affairs and is holding local meetings. He is an active association worker and will give the association a good administration.

The total number of cars inspected during the month totalled 7,679 of all grains, as compared with 10,067 a month ago and 21,030 a year ago. Of these 5,218 were wheat, as compared with 6,595 a month ago and 15,720 a year ago; while 3,172 or 60.8 per cent graded into contract grades, as compared with 3,296 or 50 per cent a month ago and 13,633 or 86.7 per cent a year ago.

The movement of barley continues high but was considerably lower last month than a year ago, 501 cars passing inspection as compared with 929 last year. More flaxseed continues to come forward, however, 433 cars being inspected as compared with 391 a year ago.

Comparative tables showing inspections, receipts, shipments and prices follow.

(1) Number of cars inspected in the Western Grain Inspection Division during May:

	—1925—		—1924—	
	Cars.	Bus.	Cars.	Bus.
Wheat	5,218	6,958,000	15,720	20,695,700
Oats	1,330	2,545,000	3,554	7,272,900
Barley	501	711,500	929	1,364,800
Flaxseed	433	484,150	391	463,900
Rye	154	191,350	399	531,000

(2) Total inspections of 1924 crops to the end of May, as compared with the final estimate of production in the three prairie provinces:

	Estimated crop. Total inspected.	
	Bus.	Bus.
Wheat	235,694,000	197,191,750
Oats	229,046,000	38,979,850
Barley	68,576,000	29,374,100
Flaxseed	9,577,900	7,494,900
Rye	11,588,000	5,238,000

(3) Total receipts at Fort William-Port Arthur elevators during the 10 months ending May:

	1925.	1924.
	Bus.	Bus.
Wheat	146,212,842	263,098,207
Oats	30,632,106	41,508,159
Barley	25,967,689	14,339,538
Flaxseed	6,901,442	4,192,825
Rye	5,118,621	5,929,896

(4) Total shipments from Fort William-Port Arthur elevators during the 10 months ending May:

	1925.	1924.
	Bus.	Bus.
Wheat	135,655,946	253,339,462
Oats	30,419,315	37,012,963
Barley	25,161,108	15,502,851
Flaxseed	5,385,468	4,003,306
Rye	4,968,826	6,647,248

(5) Distribution of lake shipments from Fort William-Port Arthur, May, 1925:

	Canadian ports.	U. S. A. ports.	Total.
	Bus.	Bus.	Bus.
Wheat	5,307,064	4,228,533	9,535,597
Oats	5,415,779	1,182,705	6,598,484
Barley	599,308	1,520,327	2,119,635
Flaxseed	156,298	1,277,877	1,434,175
Rye	247,373		247,373

Season of navigation, to end of May:

Wheat	9,962,158	12,424,056	22,386,208
Oats	9,225,218	5,097,325	14,322,543
Barley	852,864	5,011,484	5,864,348
Flaxseed	215,998	2,493,945	2,709,943
Rye	247,373	43,925	291,298

(6) Total handlings at Vancouver public elevators, 10 months ending May:

	1925.	1924.
Wheat	23,077,864	47,637,927
Oats	318,197	510,973
Barley	477,824	46,286
Rye	37,860	329,386

Shipments—		
Wheat	21,402,365	46,657,228

GREEK GOV'T FOR GENERATIONS HAS BEEN SEEKING TO USE SURPLUS CROP.

(N. Y. Journal of Commerce.)

"The measures adopted by the Greek government the last three years to buy any surplus of currants from the market and sell it for home consumption were merely temporary, intended to help the situation for the time being. Neither the growers nor anybody else expected the government was going to establish permanently such artificial means in order to keep prices up to a point where cultivation expenses would be met satisfactorily," said S. H. Limpert in an interview.

"Since, however, production seems to be much larger than the average consumption and, until effective steps are taken to find markets for the surplus, the Greek government is now seriously contemplating to establish some means where the surpluses be removed from the market, consumed within the producing land and at the same time leave no loss to anyone.

"About thirty years ago the government did not interfere with currant production. The prime minister of those days, the memorable Harilaos Tricoupis, when asked to express an opinion about the currant problem, answered laconically 'the currant problem will be solved by itself.' By that, he meant, that if the grower was not satisfied in raising currants he will raise

something else which will be more remunerative. Probably that would be the best solution of the eternal currant problem.

"Since then other administrations were forced to adopt whatever steps were necessary in order to help solve this vital question which affected directly the resources of the nation. As the first step, the administration established the Currant Bank of Greece, whose main object was to help the grower with loans and pledges at very low rate of interest, thus saving him from the hands of the usurer. The ephemeral duration of this bank was ample evidence of its failure.

"The next step was to establish the system of the retention, which is still in use and, a few years later, the late financier, John Pesmatzoglou, in combination with some other French financiers, established the Privileged Currant Co., whose lease expired and was dissolved last year.

"The system of the retention lasted twenty-five years and the Privileged Currant Co. nineteen years. During all these years prices had been kept up to a reasonable high level, enabling the grower to meet his cultivation expenses, sometimes circumstances helped him to realize from his product much more than that.

"The prime minister now in power, Andreas Michalopoulos, understands the currant situation, not only being brought up within the region of the producing districts, but his family has been raising currants for almost three generations. He believes in looking after the interests of growers and for this purpose has gathered together committees representing all the currant growing districts, with a view of discussing plans for the future welfare of the product.

"The most feasible system to be adopted seems to be the system of the retention, which proved helpful, since it lasted for twenty-five years. A definite plan under consideration seems to be the establishment of a big company, of about the same character as the Privileged Company, but in this case the largest share holders are going to be wine and alcohol manufacturers. They will contribute as a capital their factories and their long experience. The main obligation of this company will be to purchase any quantity of currants offered to it, at a fixed price, based upon the gold value of the drachma.

"The growers' cooperatives do not approve of such a scheme because they are under the impression that they can take up the administration of any thing pertaining to currants themselves. The government, however, firmly opposes such an idea, having no faith in their administrative capacity, for the simple reason that the last two years they undertook the advertisement of their product to foreign lands and their failure was complete. Therefore, the premier justly points out that as long as they failed in such a small matter they cannot be trusted with larger, more important subjects.

"One of the committeemen pointed out the idea of compelling the grower to produce only what is annually consumed, to uproot the balance against compensation from the Government and cultivate something else, the money for compensation to be raised through additional taxation, which will be only for one season. Probably a scheme like that would be the best, but no currant grower ever wanted to listen to uprooting propositions and any government which would ever adopt a similar method knows very well that it will have to face revolts and internal disturbances.

"Probably the original answer made thirty years ago by the Premier Harilaos Tricoupis, 'the currant problem will be solved by itself' was the best of all. Leave the grower alone and, if he finds that raising currants does not pay he will try some other product, and he will have nobody to blame except the consuming market who do not like his product to the extent of consuming the quantities that it pleases him to grow."

ARGUE NEBRASKA CASE.

The validity of the exclusive marketing contract signed by several thousand Nebraska farmers with the Nebraska Wheat Growers' association was argued and submitted in supreme court on June 4, in a test case from York, where Charles Norquest & Sons were the defendant in an action to enforce the penalty of 25 cents for every bushel sold to any other agency.

Two attorneys from Furnas county, who said they represented John Rocha, farmer, intervened in the case. The attorneys for the association directed some pointed remarks in their direction, voicing the suspicion that they actually represent the old-line elevators that have sought to cripple and circumvent the activities of the association, as they put it.

Attorneys for the association cited a recent decision of the federal supreme court in which they said all of the questions raised were decided in favor of the Minnesota Wheat Growers' association. They said that the laws do not apply to marketing groups of producers and sales agencies, but establish the principles of the anti-trust law; that the latter was enacted for the purpose of preventing the public from being made the victim of combinations directly created for the purpose of restraint in trade and price fixing, whereas organizations that have no other object than to procure a steady market for all farmers and a reasonable and profitable price are not inimical to the public welfare, but benefit everybody in business.

The attorneys for the defendants contend that the contract by which the members of the association bind themselves not to sell to any other dealer in grain under a penalty of 25 cents a bushel for all wheat so sold is null and void because in contradiction of the laws of the state.

They say that if the wheat growers' association have a legal right to thus pool, then the old line dealers have a similar right, and that the anti-pooling statute could be made a complete mock of by merely going into another state and incorporating. No foreign corporation, they say, can do business in Nebraska except under the legislative policy in force, and that as the legislature had made pooling an offense, the contracts are unenforceable. The last legislature exempted coöperatives from this anti-pooling law.

VAN DUSEN HARRINGTON CROP REPORT NO. 10.

The crop conditions in the four Northwestern states, Minnesota, North Dakota, South Dakota, and Montana, have been very favorable during the past week. Hot weather for a time was forcing the grain too rapidly and also drying the soil, over a part of this territory. A sudden change, with lower temperatures, have greatly benefited growing conditions. Some of the finest rains in several years have thoroughly soaked the dry districts in Southern Minnesota, South Dakota and Montana and all of the crops there show a decided improvement over a week ago.

Of the small grains, wheat has the best condition. In North Dakota the weather has been cooler and wheat generally is thick and well stooled. In local districts some fields, however, are quite weedy, while in a few others they are somewhat thin, due to heavy frosts and the absence of moisture. In northwestern North Dakota and eastern Montana some late wheat was backward, but this condition is also improving.

Barley and oats have been most affected by the cold and dry weather, but show a considerable improvement since the recent rains. Some of the fields that were brown and thin, have revived and with favorable weather will probably produce average yields together with good quality.

There are but few places where the rye crop is at all good. It came

through the winter in poor condition and many fields have been plowed up and reseeded to feed grains. Under these conditions the final outcome of the rye crop will be considerably under that of last year.

Corn in some places is exceptionally good, especially where there was moisture. In the dryer spots it is somewhat backward. The recent rains will undoubtedly change this condition entirely. Farmers are now busy cultivating where fields are not too wet.—*The Van Dusen Harrington Co., by W. G. Hudson.*

ON TO TOLEDO.

The forty-sixth annual meeting of the Ohio Grain Dealers' Association will be held at Toledo, Ohio, Tuesday and Wednesday, June 23 and 24, 1925. Headquarters, Waldorf Hotel. The sessions will be held in the new Toledo Chamber of Commerce hall, which is located in the Richardson building.

Please be present at the opening, 10:00 a. m., Eastern time, Tuesday.

Fred Mayer, chairman of the Produce Exchange Committee on Entertainment, advises us that his committee will arrange for the entertainment of the ladies.

A fellowship seven o'clock dinner will be held Tuesday evening; Jesse Hurlbut will act as toastmaster. One of the numbers will be a talk by Ed. Kelsey—subject, "The New Note in Business."

Fred Haight and Bill Cummings will look after the music.

Please be with us. Bring a farmer friend with you; your presence will mean much for yourself and your neighbor dealer.—*J. W. McCord, secretary.*

RAILROADS READY FOR CROP MOVEMENT.

In spite of the record carloadings this year to date, the Western lines, in preparation for the grain movement, have in their possession nearly the full number of box cars owned, and a larger ratio of their own cars on their lines than ever before, according to the American Railway Association. The Association has just addressed a letter to the members of the Regional Advisory Boards advising them of these facts, and asking their coöperation in maintaining this satisfactory condition through the months of heaviest traffic.

The car distribution a year ago at this time, the Association says in its letter, was considered exceptionally favorable, and as a direct result one of the largest grain movements in history was handled without car shortage. This year, in spite of heavier business being handled, the location of cars shows a considerable improvement over last year.

The Association summarizes the present situation as follows:

Box cars on Western roads equal to 95.0 percentage of ownership, compared with 92.1 per cent a year ago, an increase of 12,034 cars on line.

Out of every thousand cars owned by Western roads 677 are on home lines, compared with 628 a year ago, and 393 of the same date in 1923.

Eastern and Southern roads had 16,966, or 21.5 per cent fewer Western box cars in their possession as of May 1 than as of the same date last year.

AMERICAN STEEL & WIRE COMPANY CROP REPORT.

Beneficial rains occurred during the past week west of the Mississippi river. The area receiving these showers included Iowa, Minnesota, North Dakota, South Dakota, parts of Nebraska and all of the northwestern states. The far west also received considerable moisture. The earlier portion of the crop reporting week from the great plains eastward extending across the whole country was one of severe heat. At the same time the far west suffered from cold and in some instances frost in the higher altitudes. Extremely dry

weather has prevailed east of the Mississippi river taking in all of the territory to the Atlantic Coast and the gulf, the only exception being parts of the New England States. Rain is badly needed in all of this portion of the great grain belt, as well as in the cotton belt.

Cotton made exceedingly good progress during the week due to high temperatures and at the present time looks about 10% better than last year. This is probably due to the fact that fields have been more thoroughly cultivated and more fertilizer has been used. So far there are no serious reports of insect damage.

Wheat is not as good as it might be, most winter wheat producing states report the crop as from poor to fair. Much of it is heading out short. Spring wheat as a general thing is still in fairly good condition but needs rain in many sections.

Oats in the more southerly portion of the producing belt as well as in parts of the Ohio Valley reported as poor. In the more northerly and westerly sections it is reported as from fair to good.

Corn made fairly good progress in all of the producing states but is suffering from drought conditions in the southeast and south and needs moisture badly in the great grain belt east of the Mississippi river.—*F. Baackes, vice-president and general sales agent. June 13.*

BOARD ADOPTS NEW REGULATION.

The following regulation was adopted by the Board of Directors of the Board of Trade of the city of Chicago at its meeting held June 2, 1925:

"Under the authority of Section 2 of Rule XXIII-A, every member is prohibited, when disseminating market information, from using the names of individuals, firms or corporations, and from stating definite quantities as having been either bought or sold. Information, however, as to deliveries, when based on substantiated facts, may be disseminated and does not come within the meaning of this regulation."

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending June 13 (000 omitted):

BARS SALE OF GRAIN COMPANY STOCKS.

The Indiana securities commission on June 10 denied the request of the Grain Marketing Corporation of Illinois for permission to sell \$1,000,000 worth of stock at \$25 a share in this state.

Financial affairs of the company were held, in an opinion by Frederick E. Schortemier, secretary of state, acting as administrator of the securities law, to be unsound. The decision was based on evidence submitted at a pub-

lic hearing on the company's application before the commission several weeks ago.

E. S. Ballard, attorney for the Grain Marketing Company, said that the action of the Indiana securities commission was based on a technical provision of the law regarding the amounts of different kinds of stock one company may have. The company will appeal.

ESTIMATE OF CROP ACREAGE.

Estimated Canadian acreage under crop season 1925, showing percentage of increase or decrease as compared with last year; figures based on returns made by our country elevator agents in response to inquiries sent out by us. These figures represent returns from 8 per cent of country points in the three provinces.

The Letter Box

Good Rains.
Price Current-Grain Reporter: We had general rains over the state Sunday afternoon, June 7, which were very beneficial but we are very much short of normal rainfall as yet.
I imagine that Kansas must be fairly comfortable economically with the good crops produced last year and the high prices received for the same.—G. A. Vells, secretary.

Notice.
Price Current-Grain Reporter: Effective as date of June 18, the headquarters of this association will be moved to Delavan, Ill., and all mail intended to this organization should be addressed Illinois Grain Dealers' Association, Delavan, Ill. The motive which prompts this change is the desire of the secretary to assume personal charge of our scale department, and to be in a position to visit all our members with the least time and expense.—W. E. Culbertson, Sec'y.

Corn Crop Promising.
Price Current-Grain Reporter: A quiet steady rain of nearly an inch during past twenty-four hours has broken up the great drought in Central Illinois, at least for the month of June. Our weather man predicts good general rains June 15 to 25 and also that the summer's drought spoken of by so many will be severe during months of July and August.

Corn fields present a pleasing appearance; the plants do not stand as sickly in the rows as in some years, but probably as many as the soil will support in a dry season. Present color is good, growth is all that is necessary to enable the farmer to lay it by before July 10, and await what nature does for the crop after that, as his work will then be completed. You seldom see a corn crop so free from weeds as this one.

Late oats will no doubt be benefited by this rain; they were heading out so fast that it was becoming a great question with the grower whether to use a lawn mower or a self binder with which to harvest them. It looks now like most fields will stretch up high enough for the binders to handle.—J. I. Baldwin & Co., Decatur, Ill., June 8.

Conditions Improved.
Price Current-Grain Reporter: For our information, conditions in Texas are somewhat better than we expected. Mr. R. C. Ayers, who is now making a trip through the Panhandle, reports that wheat is looking much better than seemed possible, and that there will be more wheat shipped than anticipated. This is also true of Texas and oats. A few of the Central Texas counties are going to ship more oats than they expected. However, they advise that the quality will be a number one, and in many cases, number four, on account of being light in test.

Another thing that we would like to call your attention to is the absence of this year of speculative trading in new crop wheat and oats. There has never been any trouble in the buying and selling of Texas wheat and oat crop long before it ever moves, speculators beginning to trade in May, for shipment in July. This year no one seems to be interested in buying or selling, and you might say that there has not been any trading at all in the new crop up to the present time. We believe this is a good thing for all concerned, believing that it is best to handle new wheat and oats after they are ready to move.

Texas has a very large acreage in cotton, and for this reason will be one of the largest consuming states in the nation this year on grain and feedstuffs. Service Grain & Commission Co., Harlingen, Ft. Worth, Tex.

The Metric System.
Price Current-Grain Reporter: In your issue of the 3rd inst. we notice the discussion of the metric system, and note that the grain dealers generally are against it, but that our friend Gilman at Neligh, Nebraska, favors it.
In talking this over with dealers, we find that very few of them understand just what the metric system is. Mr. Gilman seems to think that the scale at present in use could be used under the metric system, while others do not. We think it would be a good thing to publish a statement of just what the metric system is and how it compares to our pound and hundredweight now in use.
Personally, we favor discarding the bushel as the unit of weight, and the adoption of the one hundred pound unit now generally in use from Colorado west. The middle west and eastern grain dealers waste a lot of time changing pounds to bushels and bushels back into pounds, and we would be glad to see the bushel discarded. We might favor the metric system but would like to know more about it before we express our opinion.—Bossemeyer Bros., by E. Bossemeyer, Jr., Superior, Neb.

Conditions in Nebraska.
Price Current-Grain Reporter: I was very much surprised today (June 3rd) at the condition of the wheat crop through the South Platte country from Lincoln west.

The acreage this year is very much less than usual due to the fact that so many fields winter killed and the land has been plowed up and sown to oats. The wheat that is left is very thin and ragged, looking like a mighty poor crop for the eastern end of the South Platte. The western part of the state, I have been told, has much better wheat.

There is a much larger acreage of oats than usual due to the wheat freezing out. The oats, however, are not good as the straw is short and the heads correspondingly light. This part of the country has been receiving showers of scattered areas but the high winds the past five days takes the moisture back out of the ground very rapidly. The general prospects here are not at all bright.

Nebraska has been visited by the most peculiar weather I have ever seen out here. We have had very high winds, heavy storms in some sections and dark clouds which seem to contain but little rain. I went through a wind and dust storm today, the worst that I have ever seen. The wind has not stopped blowing since it started Saturday morning. This country down here needs less wind and a lot more rain, but does not seem to get the rain.—C. E. Sherman, Edgar, Neb.

FUTURE TRANSACTIONS AT CHICAGO.					
The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):					
1925—	Wheat.	Corn.	Oats.	Rye.	Total.
June 1...	60,639	22,166	9,190	1,533	93,528
June 2...	89,630	24,547	6,221	1,802	122,200
June 3...	59,161	17,492	3,380	1,263	81,296
June 4...	84,080	23,833	12,954	2,248	123,115
June 5...	73,458	19,893	16,133	2,922	112,406
June 6...	37,608	14,083	15,404	1,345	68,440
June 8...	64,289	16,029	15,702	1,221	97,241
June 9...	43,347	15,070	20,421	1,277	80,115
June 10...	33,045	22,989	20,654	2,029	128,717
June 11...	60,578	15,764	8,645	1,322	86,309

MEMPHIS.

George Williamson, Correspondent.

A. Waller, Henderson, Ky., was registered on 'change on Wednesday.

L. S. Bosworth, Dallas, Texas, was a visitor during the week at the Merchants Exchange.

C. B. Stout, of the Dixie-Portland Flour Co., was on a trip through the Missouri wheat belt during the week.

Receipts of corn for the week 116 cars and of oats 104. First time in many weeks more corn received than oats.

John M. Hawkins of the grain department of the Hunter-Robinson Milling & Grain Co., St. Louis, was here during the week en route home from a trip through Tennessee.

This territory has had some showers during the past few days, but moisture deficiency continues very large. Indications at the close of the week were regarded as favorable for general rains. Corn has suffered less than expected because of the prolonged dry spell, while cotton is generally doing well except the late planted portion.

Business continues light, for feeders are all taking only immediate needs. Demand for corn is light, except that mixed feed manufacturers are frequent buyers, not having any stock on hand. They are taking it only in small lots. Cash 3 white corn as of June 13 was quoted at \$1.19, 3 mixed at \$1.15, and 3 yellow at \$1.21. Oats are not moving out quite so freely since prices advanced, but most feeders are taking them in preference to corn. Cash 3 white are quoted at 57½ to 58c, slightly from the week's highest.

BALTIMORE.

Robert C. Neu, Correspondent.

Lewis J. Lederer, senior member of the grain and flour commission firm of Lederer Bros., this city, is spending some time at his country home in Washington county, Maryland.

It is reported that the export grain house of Barnes-Jackson Co., Inc., of this market, will retire from the business on June 30. George S. Jackson is head of the corporation.

The main hall of the Baltimore Chamber of Commerce, known as the trading floor, is being re-frescoed and painted and promises soon to present a newness that will be good to look upon.

There are rumors going the rounds to the effect that the C. A. Cambrill Manufacturing Company, Inc., millers, Ellicott City, Mo., may resume operations with the movement of the new wheat crop.

Miller G. Belding, formerly vice president and sales manager of the C. A. Cambrill Manufacturing Company, Inc., has recently become associated with the Globe Brewing & Manufacturing Company of Baltimore.

J. Ross Myers, president of the Baltimore Flour Club, has resigned as a member of the City Service Commission, due to the fact that the duties of the office so frequently interfered with his private business affairs.

William Bardroff, for many years elevator foreman at the Pennsylvania Railroad export elevator at Canton, this city, has been appointed assistant superintendent of Canton elevator, succeeding the late Michael J. Gehring.

Thomas S. Leishear, formerly in the grain business at this port, but in recent years connected with the United States Fidelity & Guaranty Co., of Maryland, died in Chicago on June 9. His remains were brought to this city and buried on June 12.

At the closing session of the convention in this city last week of the National Federated Flour Clubs, the invitation of the Philadelphia Club to have the National organization meet in the "City of Brotherly Love" next year was accepted with thanks.

The annual summer outing of the Traffic Club of Baltimore will be held aboard the steamer "Latrobe," sailing from this city on Saturday afternoon, June 20. J. A. Peterson, chairman of the entertainment committee of the organization, is working hard to make the affair a success.

At a general meeting of the members of the Baltimore Chamber of Commerce, on June 10, President Mears announced the death of Mr. Wm. J. Parran, Jr., a well-known commission merchant of this city and member of this organization, and appointed a committee to attend his funeral.

The following committees were elected at the regular monthly meeting of the Board of Directors of the Baltimore Chamber of Commerce, June 8, to serve for the ensuing year: Grain—T. Murray Maynard, Luther M. Jackson, John J. Fedelick, Blanchard Randall, Jr., Frank Otterbein, Arthur Blackburn, J. B. Wm. Hax; Hay and Straw—Richard H. Diggs, Thomas W. Campbell, and Robert D. Sinton.

NEW ORLEANS, LA.

M. L. Davis, Correspondent.

J. A. Jordan, local manager of the Strachan Shipping Co., is on a business visit to New York.

John B. Sanford, Superintendent of the Public Grain Elevator, has returned from a business visit to Chicago, Omaha, Denver, Wichita, Kansas City, and St. Louis.

The Blackstrap market is very uncertain at the moment and prices have recently been reduced. Standard Blackstrap is quoted at 11½c per gallon, tank cars New Orleans and Light Blackstrap is quoted at 12½c per gallon.

M. J. Sanders, manager of the Leyland Line left Tuesday night for New York, accompanied by Mrs. Sanders and their daughter, from which port they will sail next week on the White Star Line S. S. Celtic for a visit to their old home in England.

Export shipments from New Orleans for the month of May: Wheat, 2,513,138 bu.; Corn, 270,784 bu.; Rye, 85,714 bu.; Oats, 81,645 bu. Stocks in elevators as of to-day are: Wheat, 479,000 bu.; Corn, 52,000 bu.; Oats, 27,000 bu.; Rye, 2,000 bu. Cars on track: Corn, 10.

The Louisville & Nashville R. R. have just completed at the cost of \$3,500,000 a storm proof steel and concrete bridge over the Rigolets near New Orleans. The new bridge has ten steel and concrete piers with eight fixed spans of 334 feet long and a 420-foot draw span.

The Lake Charles Rice Milling Co. announce that they will shortly begin to rebuild their mill at Lake Charles which was destroyed by fire last year. The new mill will be built on the site of the one destroyed and present plans indicate it will be the largest rice mill in the world.

The Public Belt Railroad Commission of the city of New Orleans have just been granted a permit by the War Department for the erection of a \$15,000,000 bridge over the Mississippi River at 9-Mile Point, just above New Orleans. The bridge will be designed to accommodate railroad, automobile and pedestrian traffic. The central span will be 130 feet above sea level, giving a maximum clearance of 108 feet at high water. The Public Belt Railroad Commission at first attempted to secure a permit for a lower type bridge with draw spans but this permission was refused and the bridge will be of fixed type with a distance of 750 feet between main piers. It is felt this bridge will materially assist in the movement of freight over west side lines into New Orleans and should be of material assistance to grain shippers in getting quick dispatch over west bank lines as it will do away with numerous slow moving car ferries.

WINNIPEG.

Geo. H. Meacham, Correspondent.

Pasturage has vastly improved in the past two weeks and the wild hay crop will be the heaviest and best in many years. Timothy and rye grass also promise abundant yields.

Times are very quiet in the milling business. The only export flour business reported being the sale by one mill of some low grade flour to the Orient. There is a report in circulation that the Maple Leaf Milling Co. plans the erection of a mill at Buffalo.

The week ended with prices on the down grade but declines met with stubborn resistance and there were frequent rallies.

The spring wheat situation is a bear factor and right at hand. Any one can see for themselves that prospects in the prairie provinces are above average. The Free Press crop report confirmed the general impression.

Many veteran traders consider the break has gone far enough and that a decline of 10 to 12 cents has pretty thoroughly liquidated long wheat and that a fair sized short interest has been created. It will however take some real buying by exporters and millers to lift prices out of the rut. The cash demand for all grains but oats is decidedly disappointing.

Crops look splendid now but need warm dry weather. There is danger of excess of straw and trouble later on with lodged grain. Growth on summer fallow in particular is very rank and soft. Wheat that was stubble is getting a rare chance. Corn is backward needing warmer weather. There has been a notable increase in corn planting and also in land devoted to clover and other forage plants.

There is, of course, a tendency to be over optimistic and ignore the fact pretty plainly indicated in the report and confirmed from other sources that there is considerable acreage destroyed by flooding and by cutworms. But damage from any source is swallowed up in the generally fine growth and healthy color of the crop as a whole. There is naturally a tendency to sell the market on "The Scenery."

The North West Grain Dealers Association has issued its preliminary summary on acreage. It gives an increase of 3.3 per cent in wheat. From causes mentioned above this increase may be struck off and the wheat acreage figured as about the same as last year. There are moderate increases in oats and a 10 per cent increase in barley. This was somewhat of a surprise. A greater surprise was a 8.5% decrease in flax. This decrease is probably greater as much of the flax in the west is sown on low lands not accessible early in the season and likely to be the first to suffer from excessive rains.

DENVER, COLO.

F. R. Holton, Correspondent.

Receipts of grain at Denver the past week were one hundred twenty-three cars.

Charles A. Geiger of the Geiger Grain Company, St. Joseph, was a visitor last week.

F. H. Gillispie, sales manager of the Werthan Bag Company, is in town on business.

N. G. Ensey of the Globe Grain & Milling Co., Ogden, Utah, was recently in town calling on the dealers.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

New bins that are to be completed by August are being constructed of concrete by the Alva Roller Mills at Alva.

The Federal crop statistician of Oklahoma now estimates the wheat yield at a little over 26,000,000 bushels. The State statistician reports corn in a condition of 82 per cent.

First new wheat was bought last week by mills at Enid and Ponca City, the former paying \$1.40 and the latter \$1.35 per bu. The Enid load is said to have weighed 57 to 61 lbs. and the Ponca City load 61½ lbs.

Oklahoma shippers are advised that the Southwestern regional advisory board of the American Railway Association will hold a meeting in Ft. Worth June 24 to consider plans for moving the wheat crop in Oklahoma, Texas, New Mexico and Louisiana.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Charles I. Rinihead of the Parker Grain Commission Co. left Saturday last for Buckhill Falls, Pa., where he will sojourn for a couple weeks.

Exports of grain for the week ending June 12th were: Wheat, 307,945 bushels; corn, none; oats, 50,000 bushels.

Receipts of grain for the week ending June 13th were: Flour, 31,849 barrels; wheat, 219,137 bushels; corn, 15,512 bushels; oats, 192,269 bushels; rye, 21,988 bushels, and 420 tons of feed.

Exports of flour for May, 1925, were 10,152 bbls., compared with 26,621 bbls. in April, 1925; 26,800 bbls. in May, 1924, and 62,434 bbls. in May, 1923.

Exports of corn for May, 1925, were 42,857 bus., compared with none in April, 1925; 158,977 bus. in May, 1924, and 177,141 bus. in May, 1923.

Exports of oats for May, 1925, were 1,699,092 bus., compared with 113,397 bus. in April, 1925; 140,126 bus. in May, 1924, and 240,000 bus. in May, 1923.

Exports of rye for May, 1925 were 322,271 bus., compared with 450,436 bus. in April, 1925; 26,250 bus. in May, 1924.

Exports of barley for May, 1925, were 362,982 bus., compared with 16,731 bus. in April, 1925, and 41,935 bus. in May, 1924.

Philadelphia Flour Market.

Philadelphia, June 13—The market for flour is weak and unsettled under a limited demand and ample offerings. Receipts for the week ending June 13 were 31,849 bbls. We quote per 196 lbs. packed in 140-lb. white sacks: Soft winter straight, western, \$8.50@9; soft winter straight, nearby, \$8.50@8.75; hard winter straight, \$8.50@9; hard winter short patent, \$9@9.50; spring, first clear, \$7.75@8.25; spring, patent, \$8.75@9.25; spring, short patent, \$9.50@10; fancy spring and city mills patent family brands, \$10.10@10.75. Rye flour, \$7.00@7.25 per bbl. in sacks, as to quality.

FT. WORTH, TEXAS.

G. E. Blewett, Correspondent.

Weather.

Weather in Texas the past week has been ideal harvesting weather with scattered showers but no general relief from drought over the state as yet and some sections are beginning to suffer for moisture which is badly needed on cotton and well as on milo and other row crops. Harvesting of new crop wheat and oats has been general this week over all sections of the state excepting in the Panhandle where it has been confined to that section south of Plainview where the crop is very short. Most of the fields are in the shock in the Central and North Central as well as West part of the state and some threshing has been done but so far no new crop wheat or oats from Texas has been received in this market which is something rather unusual as heretofore the first crop of wheat has been received much earlier and oats several days sooner.

It is apparent that the new crop of wheat, especially in this section is going to be very short and the mills are showing an interest in buying all short haul wheat they can for which they exhibit an eagerness to pay attractive basis.

Some new crop wheat is being worked at the mills for deferred shipment at very attractive basis and in as much as exporters are not making any bids the mills are inclined to pay very close to the option for new crop wheat June and July shipment.

Business.

Business the past week has been very steady with mills still reporting day time run with new orders rather slow, pending new wheat prices. Mill stocks of wheat are rather low and several mills are buying their daily requirements on the market rather than to buy very far ahead. Feed dealers report fair demand for oats and mixed feed but report very slow demand for corn or corn chops.

Wheat.

Wheat receipts the past week have been rather light with very little offered from the country and this has caused a further drain on elevator stocks here resulting in one concern only having any stocks of wheat left to offer. Premiums have shown some advance on old crop wheat with a demand for spot stuff and all received here brings fancy prices. New crop wheat, being traded in daily now for June as well as July shipment with mills showing some interest although most of them feel the prices will be lower as soon as the movement gets started. Exporters remain out of the market and bids are lacking which

cause mills to lower their basis for new crop wheat.

Today, June 13, values here basis delivered Texas Common or Group 3 old crop wheat, spot or for quick shipment, 1 Dark Hard \$1.86, No. 1 Hard \$1.80, No. 1 Mixed 75% Red \$1.80. New crop wheat basis: 1 Hard with Mixed 2c less, No. 3 to apply, Prompt \$1.72, June shipment \$1.70, F. H. July \$1.68, L. H. July \$1.65.

Corn.

Receipts have been rather light with slow offering from the country but demand has also slumped off and very little is being worked. Premiums have declined sharply and general tone is very weak. Stocks are not very heavy and any demand occurring would create sharp advance in premiums especially for white and yellow which is rather low here. Corn is arriving here out of condition now and mills are refusing to buy only on Texas grades.

Today's values basis delivered Texas Group One: 2 White Corn on track \$1.23, Quick \$1.23; 2 Yellow Corn on track \$1.23, Quick \$1.23; 2 Mixed Corn on track \$1.18, Quick \$1.18.

Oats, White.

Receipts steady. Demand heavy and large volumes of business being done daily in Northern White oats for prompt and deferred shipments. Premiums are some lower as resellers here are inclined to unload at the advance and get profits which induce them to under quote northern prices. Some trading is being done in these oats for deferred positions but most of the trade seems inclined to wait for breaks before buying for later positions.

Today's, June 13, values basis delivered Texas Group One: 3 White oats bulk on track 63 12c, Prompt 63c, Aug. 62c, Sept. 60c, Oct. 58c.

Oats, Red.

Red oats have failed to move so far and only one car of new crop has arrived which came in Tuesday from Oklahoma and graded No. 2 Red 29. Old crop Red oats have about stopped moving and very little is being offered for sale. Premiums on these have declined the past few days and these are now selling at prices very close to white oats. Some trading is being done in deferred shipments but shippers are not eager for contracts at present premiums feeling that seed demand will justify their holding for higher prices in the fall.

Today, June 13, values basis delivered Texas Common or Group 3: 3 or better Red Oats bulk flat billing, enroute 65c, June shipment 65c, July 64c, Aug. 62c.

Milo and Kafir.

Receipts and offers of these have shown some increase this week with demand somewhat slower resulting in lower values with less inclination to buy altho it is apparent that country stocks are getting rather low and growing crop needs rain badly in most places.

June 13 values basis delivered Texas Common or Group 3 points: 3 or better Yellow Milo on track \$2.25, Prompt \$2.22; 3 or better White Kafir on track \$2.03, Prompt \$2.00.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

A. L. Hughes, Pacific Coast representative of the Rau & Sons Animal Feed Co., was a visitor in Los Angeles one day last week calling on the trade.

E. J. Slater and Son, of the firm of Nye Schneider Jenks Co., Omaha, Neb., was a business visitor in the city this week and while in the city they visited the Exchange.

Los Angeles is becoming an important financial and commercial center to Arizona, according to Robert Y. Gearhart, vice president of the Bank of Safford, Arizona, who is here on business with the Sixth and Main Street branch of the Hellman Commercial Trust and Savings Bank. Mr. Gearhart declared that Arizona farmers will harvest bumper hay crops and 90% of the cotton crop. He said that the operation of land banks in Arizona had been of great benefit.

The Seed Meeting.

Nearly all the lettuce seed used in America is California grown, he declared.

The California seed industry has a valuation of from \$10,000,000 to \$15,000,000 and more than 35,000 acres is devoted to flower seed growing, Morse declared.

California seed growers, he explained have an advantage over growers in other sections in that California summers are dry, enabling the successful harvest of the seed.

Mayor Cryer was busy attending a meeting of the police commission and Ernest J. Lickley, of the city prosecutor's office, officially welcomed the delegates to Los Angeles.

The World War proved a boon for California flower seed men by cutting off competition from Europe and the tariff and the high quality of seed grown in California will enable American seed men to compete with those of Europe, who once again are looking toward America for a market.

Garden seed grown in California, the garden spot of the world, is hardier and has better vitality than the same type of seed grown in other parts of the world, so declared Lester Morse, of San Francisco, who is attending the forty-third annual convention of the American Seed Trade Association, which opened at the Biltmore yesterday.

Morse has devoted most of his life to the seed growing industry, and is inventor of the new Mary Pickford Sweet Pea, which

FOR RESULTS

TRY SCHIFFLIN SPECIAL SERVICE

With Your Consignments and Offers To-Arrive Of Wheat, Corn and Oats

PHILIP H. SCHIFFLIN & Co.

49 Board of Trade

CHICAGO

made its debut at this meeting. In his address, Early History of Seed Growing in California, Morse declared that it was sweet pea seed growing that proved the most profitable to flower seed growers in California in the early days. "The mission padres, who brought grain and other seed from Spain in the eighteenth century, were really California's first seed growers," he told the convention.

Cash Markets.

The market at this terminal at the close of the week has taken on a much firmer tendency and while the prices have not advanced nor has there been any increased activity in trading as yet, there seems to be a much more settled condition and inquiries are more numerous for grain and grain products. The arrivals for the week have been little better than for the past several weeks, and the stocks are consumed as rapidly as they arrived. Corn prices remain practically the same as a week ago and sales have been made at \$2.46 for No. 2 yellow corn 5 day shipment; No. 2 yellow corn prompt shipment is selling at \$2.47 while transit is being offered at \$2.48 with a bid of \$2.46; No. 3 bulk eastern kafir for prompt shipment is being offered at \$2.40 with a bid of \$2.35; No. 3 Eastern bulk milo for prompt is being offered at \$2.62 with a bid of \$2.58; while \$1 Imperial Milo sacked is offered at \$2.75 with a bid of \$2.67.

The San Joaquin valley barley harvest is well under way.

The ground feed arrivals for the week amounted to 44 cars, the prices on mill run and bran have advanced from \$1.00 to \$2.00 over a week ago; Utah-Idaho millrun selling at \$42.00; Kansas Bran \$38.00; Alfalfa meal medium ground, \$29.00; Molasses mixed, \$27.00; Cottonseed meal, \$40.00; Beet pulp \$35.60; Rolled barley \$41.00; Copra meal \$38.00; Linseed meal \$49.00.

The hay arrivals for the week amounted to 210 car loads, the prices remain unchanged and the market sluggish, No. 1 alfalfa selling at \$20.00 to \$21.00; No. 1 barley hay \$20.00; No. 1 oat hay \$21.00.

NEW YORK.

J. M. Nugent, Correspondent.

Paul Gingold has been elected Director and Vice President of E. A. Strauss and Company, Inc.

Business in oats for export showed some improvement. There were fairly liberal quantities of Canadian oats worked. Total business amounted to about two million bushels for the week.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: J. E. Readdy of Chicago; W. H. Osborn of New Orleans; R. E. Pratt of Buffalo; F. M. Cole of Kansas City; L. M. Phoenix and E. D. Webb both of Minneapolis; Charles Blodgett of Wichita; John P. Link of Baltimore, and F. Tones of Winnipeg.

Export business in wheat during the week has been disappointing. Total sales did not exceed 2 1/2 to 3 million bushels in all positions. The trade consisted of scattered sales of Manitobas, a little Durums and some American Hard Winters. The foreign demand for wheat in general has been very slow for some time past, with buyers there influenced to hold off by the very favorable European crop outlook.

Flour Situation.

New York, June 13.—The feature in flour during the week was the somewhat better demand for both Spring and Winter wheat qualities but even the volume of this buying was comparatively light.

Northwestern milling centres also reported some improvement. Flour consumers are not greatly impressed by the unfavorable domestic wheat outlook.

The export situation is dull and the quiet trade is confirmed by the exceptionally small clearance from day to day.

Spring Patents are quoted at \$8.50 to \$9.00; Soft Winter Straights, \$8.00 to \$8.90, and Hard Winter Straights, \$8.50 to \$9.00 per 196 lbs.

CINCINNATI.

George Mosbacher, Correspondent.

A. C. Gale of the A. C. Gale Co. will cover the milling territory of the South in a two weeks' trip the latter part of this month.

Frank Maguire, of Frank Maguire Co., left this week for a month's fishing trip to Michigan. He will later visit relatives in Denver, Colo., and expects to be away until September.

The oats market was decidedly stronger and about 5c higher on continued very light receipts and more urgency of demand. Retailers especially wanted top grades of white and willingly paid the premium.

The demand for spot offerings of wheat was only moderately active, and mill buying limited as quite a number of Southern mills were reported as having shut down and making machinery repairs before the new crop deliveries. Several mills are ex-

pecting to grind new Tennessee wheat next week.

The Grain and Hay Exchange ball team in a return match again defeated the Chamber of Commerce nine by a score of 17 to 8. The sensational fielding of Edward Smith, W. A. Hopkins, and the batting of the Bender brothers, Ambrose and Clarence, who both hit home runs with the bases full, featured the game.

Stocks of grain held in Cincinnati elevators for last week and previous weeks were as follows:

	June 5, 1925	June 5, 1925
Wheat, bus.....	90,712	111,199
Corn, bus.....	114,278	133,274
Oats, bus.....	37,197	57,897
Rye, bus.....	8,974	8,474

Trade in corn was light, and mostly of a local character, but the market was firm in tone and prices 1/2c to 1c higher than a week ago. Yellow was offered more freely and prices were again reduced to the basis of white, though the latter sold somewhat slower. Mixed continued dull at about 3c discount under white. Retailers were fairly good buyers of good yellow and mixed.

Frank L. Watkins, manager of the local grain business of the Cleveland Grain & Milling Co., whose elevator at Cincinnati was recently abandoned and which will be razed by the owners, the Big Four R. R., to make room for a proposed joint freight terminal development, returned from Cleveland, Ohio, Saturday, where arrangements were completed for his transfer to the management of the Mansfield, Ohio, elevator of the company, effective in July. The local offices in the Union Central Bldg. will be continued as a branch under supervision of Walter O. Connell. Mr. Watkins, who is president of the Grain & Hay Exchange, will probably resign before taking up his duties at Mansfield.

TOLEDO.

S. M. Bender, Correspondent.

Jesse D. Hurlbut, treasurer of the Toledo Grain & Milling Co., and wife are attending the Shriners' convention at Los Angeles, Cal.

Grain inspections in this market for last week were 17 cars of wheat, 26 cars of corn, 25 cars of oats and 1 car of rye. Total, 69 cars.

R. O. Cromwell, crop expert for Lamson Bros. of Chicago, was on the floor last Friday during one of his tours through Ohio and Indiana farm lands.

Several Toledo dealers are planning to attend the Indiana Grain Dealers' meeting, to be held in Michigan City, Ind., with headquarters at the Spaulding Hotel.

Flour production of Toledo mills last week was 30,200 bbls., equal to 63 per cent of capacity. The week before it was 31,350 bbls. and a year ago last week was 28,800 bbls.

Showers over the week-end may do corn and oats lots of good, though some oats are said to be beyond repair. Garden truck is practically ruined around Toledo. Corn can still be a fair crop if the proper weather is forthcoming.

Lester Howard of the C. A. King & Co. shot a fine game of golf in the district tournament last week and was seventh in the championship flight. He was forced to withdraw on account of the pressure of business or there might have been a grain man champion for the year.

The milling demand for soft wheat has been good the past week and premiums are strong. The mills report a very good business for this time of year. Old stocks are

practically cleaned up in bakers' and jobbers' hands and the new flour should meet with an excellent buying power.

The forty-sixth annual meeting of the Ohio Grain Dealers will be held in Toledo at the new Chamber of Commerce club rooms next Tuesday and Wednesday. The program includes some prominent speakers in the grain trade and outside and the entertainment for ladies and visiting grain dealers will be the finest that can be secured. All are urged to attend.

MILWAUKEE.

J. F. Foley, Correspondent.

Fred Pabst, Jr., has been admitted to membership in the Milwaukee Chamber of Commerce, and the membership of Fred Pabst has been transferred.

Edwin S. Mack has been re-elected as a trustee of the gratuity fund by the board of directors of the Milwaukee Chamber of Commerce. He will hold the office for another five-year term.

Receipts last week were 80 cars barley, 94 corn, 224 oats, 34 wheat, 6 rye, 4 miscellaneous, and no receipts of flax; total 442 cars, against 625 the week before, 395 a year ago, and 510 in 1923.

Wisconsin's radio market report service will be extended to farmers in Iowa according to B. B. Jones of the radio service of the state department of markets. The market reports will be sent by wireless

telegraph from its radio station at Stevens Point to the Iowa Agricultural College at Ames where they will be broadcast by voice. The Iowa station could not get a connection on the leased wire used to transmit the market reports from Washington.

Wesley W. Roegge has taken over the entire interest in the firm of Roegge & Kleinstuber, brokers and jobbers in flour, with headquarters in Milwaukee. The name has been changed to the W. W. Roegge Co.

Members of the Chamber of Commerce are receiving postcards from Julius Karger, one of the members and a partner in the old commission firm of Karger Bros., who is now enjoying himself in Berlin, Germany.

A cargo of Canadian flaxseed was recently unloaded at the Rialto Elevator, consigned to the William O. Goodrich Co., linseed crushers at Milwaukee. It was shipped from Port Arthur, Ontario, in the Steamer E. W. Oglebay and consisted of 163,768 bushels.

Agriculturists are rejoicing over the heat wave which prevailed last week and claim that it was exceedingly beneficial to Wisconsin crops, as the germination had been retarded by the cold spring. The rains which followed the heat also aided in the development of the new crops.

The wheat supply received at Milwaukee for May was twice as much this year as

compared with last year. There were 107,000 bushels this year as compared with 57,000 bushels a year ago. Receipts of rye also doubled with 72,000 bushels this year against 33,000 bushels last year. The total supply of grain received for May was 2,296,000 bushels as compared with 1,753,000 bushels for last year. The net gain for the month this year over last was about 500,000 bushels.

Visitors at the Milwaukee Chamber of Commerce last week were William Delzer, Beaver Dam, Wis.; L. Kohl, Waupun, Wis.; Dave Roseheimer, Kewashum, Wis.; William Geering, Algona, Ia.; W. C. Young, Taylor, Wis.; H. E. Hughes, Minneapolis; Louis Bandow, Peshtigo, Wis.; E. Steffel, Manitowoc, Wis.; J. J. Moore, Chicago; W. L. Refrigier, Omaha, Neb.; T. Edwards, McFarland, Wis.; R. G. Morey, Waukesha, Wis.; C. F. Van Pelt, Fond du Lac, Wis.; C. Pickart, Malone, Wis.; B. Dadmun, Whitewater, Wis.; H. J. Bachel, St. Paul; and Anton Grones, Holstein, Iowa.

OMAHA.

Leigh Leslie, Correspondent.

Frank R. Manchester, secretary of the Omaha Grain Exchange, has gone to Cleveland, Ohio, to attend a convention of managers of office buildings.

"Prospects for a corn crop are not very good in my part of the state," said William Fudge of Swedeburg, Nebr., who was in Omaha last week. "Dry weather has not injured the crop so much as cut worms have. The worms have done so much damage that a great deal of replanting has had to be done."

D. O. McHugh, secretary of the Calgary Grain Exchange, Calgary, Canada, has been in Omaha for several weeks visiting at the home of his sister, Miss Kate A. McHugh, and recuperating from a recent illness. Mr. McHugh is a brother of John McHugh, secretary of the Minneapolis Chamber of Commerce.

U. G. Powell, rate expert for the Nebraska State Railway Commission, will be one of four experts from state commissions to assist the trained personnel of the Interstate Commerce Commission in the general rate readjustment which has been ordered by Congress. The other states represented by their chief rate men will be Washington, Pennsylvania and Alabama.

"Corn in our part of the state is two or three weeks farther advanced than it usually is at this time of the year," said A. H. Block of Mondamin, Iowa, who was in Omaha this week. "Weather conditions have been very favorable during the last few weeks, and all crops, and particularly small grain crops, are in excellent condition. Frost set crops back a little early in the spring, but when the weather got warmer, everything began to shoot forward. There is an uncommonly good stand of corn, and the acreage is somewhat larger than last year's."

In an argument before the State Supreme court at Lincoln, the Nebraska Wheat Growers' Association was pictured by J. H. Grosvenor, attorney representing C. C. Norquist & Sons, of Aurora, as a combination in restraint of trade operating in open and flagrant violation of the state law prohibiting any plan or device to control prices, and which, he asserted, seeks to force members to market their wheat only through it. The law, Mr. Grosvenor said, was passed twenty years ago at the behest of farmers who declared that the old-line elevators operated in that way to control prices. Mr. Grosvenor contended in his argument that the law was just as effective against organizations of producers as against an association of grain dealers. He quoted from the association's contract with farmers to show that no effort was made to conceal that it is a pool designed to control prices. In the district court at Omaha Judge Hastings held the contract to be valid and enforceable.

DULUTH.

S. J. Schulte, Correspondent.

E. S. Kellogg of the Kellogg Commission Co. was on this market from Minneapolis during the last week. He was given a hearty reception by members of the trade, having been for several years an operator here before being transferred to Minneapolis.

Business in oats has been on an extensive scale on this market lately, as with prices at a profit for growers and seedling over, farmers have been shipping their remaining holdings to the market in their desire to take advantage of the current level of quotations.

A cargo of 500,000 bushels of oats was loaded out at an elevator during the last week for Buffalo. The shipment was on a sale made some time ago. Dealers, however, had other good sales for cargo shipment in prospect and they are generally counting upon further advances developing in oats prices.

Commission house and elevator men on this market are gratified over the volume of trading being put through for the summer season. Receipts from over the country continue liberal, with growers showing their anxiety to realize upon their remaining holdings at the present level of prices. Operators are of the opinion that the volume of grain held back over the country is much greater than the trade had generally estimated.

Trading in spring futures on this market has continued good ever since it was inaugurated three weeks ago and all the trade here regret that it was not started

last year in place of allowing Minneapolis dealers to handle the enormous volume of hedging last fall and early winter during the peak marketing period on the crop. It has been noted in the spot market that while millers are desirous of picking up high protein wheat, they are unwilling to pay premiums for it.

Duluth operators are keeping close tab upon the crop situation over the Northwest. Their reports from correspondents have been to the effect that indications for bumper yields of all grains have seldom been better than at present. Traders have from past experiences learned not to bank too heavily upon the first half of June outlook, but they are at the same time feeling cheerful, as they regard their chances as good for a heavy fall's trading provided weather conditions are normal between now and the harvest.

Vessel interests have experienced a slow demand for load space for moving wheat and durum east, and they have been offering to book wheat for Buffalo delivery from Duluth at 1½ cents a bushel. Some of the vessel men have been threatening to tie up their smaller steamers as they claim that only the large carriers can ply even at the present scale of freight rates. The more optimistic are, however, hopeful that conditions will improve later and that the closing period of the season will be busy. Considerable grain is scheduled to be loaded off of the elevators for the last half of June deliveries in the East.

MINNEAPOLIS.

H. A. Paul, Correspondent.

Fred B. Wells of the Peavey Co. is now in Honolulu on a world tour.

Walter Mills of the Washburn-Crosby Co. is spending his vacation in the east.

Henry Kuehn of the King Midas Milling Co. is spending his vacation in the north woods.

E. O. Wright of the Menomoneie Milling Co. of Menomoneie, Wis., was a Minneapolis visitor on Tuesday.

C. E. Roseth of the Aberdeen Milling Co., Aberdeen, S. D., was calling on the trade here this past week.

E. O. Huseby of the Pillsbury Flour Mills Co. is absent from the trading floor this week; vacationing at his old home.

The plant of the Fleischmann Malting Co., located at Delaware and Washington avenue, southeast, suffered a fire loss during the week. The amount of the loss is unknown at the present writing.

Among the visitors on 'Change during the past week were the following: C. D. McCabe of Winnipeg; Chas. T. Peavey of Chicago; J. Lundquist and H. S. Newell of Duluth; C. L. Luedtke of Washington, D. C.; E. W. Feidler of Superior; George B. Harris of Melbourne, Australia; D. D. Hutton of Tokio, Japan, and M. S. Pilcher of Nashville, Tenn.

Cash Markets.

Wheat—The government crop report which came out during the past week was rightly considered as a very bullish document, but with outside speculative interest at a very low ebb and the Northwest prospects much better than they were last year at the same time, it's a pretty difficult matter to hoist the market any higher than present level, for the time being at least. Private statisticians, the government report and the advices received from local commission men all speak of the spring wheat crop in very optimistic tones. With the Southwest crop short, thereby probably putting the United States on a domestic basis for the coming year, the spring wheat farmer will probably find himself sitting "just as pretty" this fall as he did last. And another thing in the favor of the Northwest farmer this year is the fact that it is not a political year and if the army of congressional economists can be kept from making their annual stampede, the grower will be in a position to cash-in on the shortage in other sections.

Country offerings were generally light during the week just past, and in all probability they will remain so. The tone of the market was inclined to be rather dull all through the week. Most of the wheat on the tables is holding between 11½ and 12½ per cent protein and mills did not seem inclined to want to bid for what was offered. Wheat of high protein content was slow sale also and there was a net loss of 2 cents on the top of the range for the week for No. 1 hard spring. Today's range of sales showed No. 1 hard spring bringing 4@28c over the July; No. 1 dark northern, 2@28c over, and No. 1 northern spring, 1@26c over the July. Durum tone was firm, with light offerings and fair demand for current offerings. Today, No. 1 amber brought Duluth July at 15c over; No. 1 mixed, 5c under and 13c over; No. 1 Durum, 4c under and 13c over. Shipping sales the fore part of the week were very light but picked up toward the last. One lot of 10,000 bushels was worked for export, via the Gulf.

Local elevator stocks show the following totals: This week, 6,289,542 bushels, vs. 6,494,026 last week and 9,357,101 a year ago.

Corn—Offerings of this cereal were generally light and met with a rather indifferent demand all through the past week. There was but very little snap to the demand for any of the grades but the comparative discounts showed but little change in the main. Today, No. 3 yellow was bringing 4@6c under Chicago July; No. 4 yellow, 6@9c under. On the mixed corn, No. 3 brought 8@9c under and No. 4, 10@12c under. Local stocks show a slight increase for the week, being 373,799 bushels

estimates on the Kansas crop are more favorable than some previous guesses and it is believed that the federal forecast for June 1 of 84,000,000 bushels will be realized. Early threshing in Oklahoma and Texas are showing better yields per acre and better quality than was predicted by private observers. Soft wheat receipts for the week were so light that prices worked up in the face of weakness in other kinds. There was a good milling inquiry. The market closed 4@7c higher, with No. 1 at \$1.80@1.85, No. 2 at \$1.80@1.84, No. 3 at \$1.74@1.82 and No. 4 at \$1.67@1.78. Stocks of wheat in local elevators decreased 95,000 bushels to 1,674,000, as compared with 6,249,000 last year.

Corn—Receipts, 301 cars, against 482 a week ago and 183 a year ago. Except slight upturns on one or two days, the market displayed a declining tendency, sympathizing with weak wheat and reflecting the bright crop outlook, especially after the rains of Thursday and Friday. There was a fair shipping demand, including some orders from industries in Illinois and some southern buying. The market closed 1/2@3/4c lower, with No. 2 white at \$1.06 1/4@1.06 1/2, No. 3 at \$1.05 1/2, No. 2 mixed at \$1.05@1.06, No. 3 at \$1.04 1/2@1.05 1/2, yellow at \$1.09 1/4@1.10 and No. 3 at \$1.08@1.08 1/2. The Kansas acreage this year is unusually large, due to the heavy abandonment of wheat acreage from winter killing. Good crop reports are coming from Iowa and fair from other states tributary to the Kansas City market. Local elevator stocks of corn decreased 123,000 bushels for the week to 3,076,000, against 382,000 a year ago.

Oats—Receipts, 92 cars, against 164 a week ago and 34 a year ago. Although offerings were reduced, the demand fell chiefly upon the elevators and stocks showed a further increase of 73,000 bushels to 574,000. As a result of crop complaints the market displayed firmness on one or two days, but prices fell later and closed unchanged to 1c lower, as follows: No. 2 white, 54@54 1/2c; No. 3, 52 1/2@53 1/2c; No. 2 red, 54c; No. 3, 52c.

Kafir and Milo—Receipts, 94 cars, against 93 a week ago and 28 a year ago. Trade in the early part of the week was active, but the market became slow later, partly in sympathy with weaker corn and oats. The closing prices showed net gains of 3@7c per cwt., with milo up most. Final quotations were: No. 2 white kaffir, \$1.94@1.95; No. 3, \$1.92@1.94; No. 4, \$1.90@1.92; No. 2 milo, \$2.17@2.18; No. 3, \$2.16@2.17; No. 4, \$2.13@2.15. Stocks decreased 20,000 bushels to 178,000, as compared to 344,000 last year.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

Virtually all of the outside construction work on the addition to the Burlington Public Elevator has been completed, and this unit is expected to be ready for operation in three or four weeks.

Visitors on the St. Joseph Grain Exchange during the week ending June 13th included: F. E. Janke, Palisade, Nebr.; Wm. Durrant, Clarksdale, Mo.; G. G. Hayes, Chicago, Ill.; P. O. Townsend, Athelstan, Iowa; H. C. Stout, Athelstan, Iowa; C. O. Pearce, Pittsfield, Ill.; C. Baum, Bolckow, Mo.; H. Duever, Bremen, Kans.; J. E. Windle, Salem, Nebr.; J. F. Martin, M. T. Kling, Rosendale, Mo.; J. M. Purcell, Kansas City; John Dodson, Bigelow, Mo.; G. F. Kellogg, Kansas City.

Offerings of wheat have been rather light during the past week, although receipts have been of good volume, and the bulk going to mills on contract. Hard wheat is 6 to 8 cents lower for the week, and soft four lower. The tendency for adjustment to new crop prices has been less pronounced than for several years, and it appears the short crop this year is just about offsetting the usual pre-movement decline in prices. Corn offerings have been rather heavy for June, and the absorption has been good, with elevator firms leading the buying. Values are 2@3 1/2c lower for the week. Oats offerings very light; values steady for the week.

BUFFALO.

W. E. Asche of this city was a recent visitor at the Commercial Exchange in Philadelphia.

Plans have been filed for a \$225,000 addition to the Frontier elevator on the Blackwell canal.

Martin Luther of Minneapolis and F. G. Allen of Winona, Minn., were among last week's visitors at Buffalo.

A. E. Yardley has taken the management of the feed jobbing business of the Churchill Grain & Seed Co.

Among recent visitors to the Corn Exchange was P. D. Collier of the Clyde-Renco Milling Co., of Clyde.

H. C. Veatch, representative of the Kansas Milling Co., with headquarters in this

city, is on a business trip through the south.

Theodore Banks of this city was a visitor in Washington last week. He took his family along and they took in the sights of the city.

W. H. Thune, eastern credit manager, Pillsbury Flour Mills Co., was in Washington last week attending the annual convention of the National Credit Men's Association.

The local mill of the Ralston Purina Co. is installing three packers and scales combined of the Richardson make. One of these is rated 8 1/3 pounds to 25 pounds. The other two are rated 50 pounds to 100 pounds.

Port Colborne elevators handled 13,600,000 bushels of grain this year. In the past ten days the movement reported by the elevators slowed down to 1,587,000. The sluggishness of the movement down has made it hard for canal freighters to get cargoes, and at least twenty have gone right up to Fort William for tonnage.

May grain shipments through the Welland Canal totaled 18,476,000 bushels, according to the Department of Railways and Canals. This makes a total of 24,105,000 since the opening of navigation. The May movement was more than 1,000,000 heavier than that of May, 1924. Wheat totaled 8,602,000 bushels in May, 1925, and 11,612,000 from the opening of navigation. Oats May traffic was 6,609,000 bushels.

Buffalo shipped 5,024,000 bushels of grain through the canal in the month, not quite three-fifths thereof being wheat.

BOSTON.

W. E. Gould of Chicago was on the floor of the Boston Grain and Flour Exchange last week.

S. L. Tanneholz of the Seaboard Flour Co. was in Baltimore and other points in the southeast on business last week.

To establish and maintain a closer co-operation between the manufacturers and the transportation companies for the general benefit of New England industries, an imposing group of commercial leaders met in conference June 5 at the Copley-Plaza and virtually completed the organization of the New England Shippers' Advisory Board. William F. Garcelon was elected permanent chairman, 60 committees were

vs. 320,230 a week ago and 94,632 a year ago.

Oats—The cash article was in very slow demand during the past seven days, despite the skyrocketing action of the futures early in the week, followed by the bad break which ensued after the government crop report had been completely ignored. Shipping sales were of light character, and taken all in all, it looks as though the cash oats market did very well in that it did not show a heavier break in premiums and a larger increase in discounts than was witnessed. Today, No. 3 whites was quoted at July price at 1/4c over and No. 4 at 1/2@2c less. Local elevators' stocks show the following totals: This week, 13,405,895 bushels, vs. 13,210,871 a week ago and 572,809 a year ago.

KANSAS CITY.

T. J. Tanner, Correspondent.

D. C. Bishop of the Scoular-Bishop Grain Co. spent the week on a crop observation trip through the western portions of Kansas and Nebraska and eastern Colorado.

H. Wiener, of Berlin, head of the H. Wiener Co., one of the large grain importing firms of Europe, was a guest of the Hall-Baker Grain Co. one day this week.

Allen Logan, who went to Europe April 25, returned Monday, having visited England, France and Belgium. While in France and Belgium Mr. Logan traveled over 1,500 miles by airplane.

Fred C. Davis of the Ernst-Davis Commission Co. made a tour of 1,000 miles in Kansas this week. He returned believing that the ultra-pessimistic stories about the Kansas wheat crop had been exaggerated. He said the state should harvest 85,000,000 bushels.

W. W. Young, manager of the Kansas Co-operative Grain Co., a subsidiary of the Kansas Wheat Grower's Association, was admitted to membership in the Kansas City Board of Trade Tuesday on a transfer from E. R. Downie, manager of the latter-named organization.

Dr. Issa Tanimura, special food commissioner from Japan to the United States and Europe, arrived in Larned, Kan., June 11 and visited Kansas City two days later. Dr. Tanimura is making a study of wheat culture in this country, with the object of promoting the growth of the grain in Japan in much of the land now devoted to rice. He is a believer in the theory that the stature of the Japanese people could be increased by a larger use of wheat bread and meats.

Kansas City received its first car of 1925 wheat Saturday, June 13, the earliest since 1901, when a car arrived on June 10. Usually the first car arrives between June 18 and 21. The car received Saturday was forwarded from Wichita, Kan., where it had been received by the Wallingford Bros. Grain Co. from Yewed, Okla. It graded No. 3 dark hard. The test weight was 59 pounds and the protein content was 12.45 per cent. A moisture content of 15 per cent was shown. The Hall-Baker Grain Co. bought the car for \$1.70 a bushel.

An Old Grain Man Retires.

Joseph J. Hiddleston, who has been in the grain business for forty-three years, mainly in Kansas City, and for the last thirteen years as a wheat buyer for the Kansas Flour Mills Co. at the Board of Trade, retired from active service June 9. Mr. Hiddleston is 68 years old. He began his career as a grain man in Eudora, Kan., in 1882. Later he was associated with Moses Bros. in Great Bend, Kan., and in Kansas City he was connected for several years with the old Moore Grain & Elevator Co. For awhile he was in Minneapolis, Minn., as manager of the elevators of the Great Northern R. R. in Minneapolis and Duluth. In late years Mr. Hiddleston held the title of assistant secretary-treasurer of the Kansas Flour Mills Co. He is credited with originating the plan of the clearing house system used by the Kansas City Board of Trade. Mr. Hiddleston will have a pension from the milling company during the remainder of his life.

Harry G. Stevenson, formerly with the Equity Union Grain Co., has taken Mr. Hiddleston's place as wheat buyer in Kansas City for the Kansas Flour Mills Co.

Cash Grain Markets.

Wheat—Receipts for the week, 459 cars, against 543 a week ago and 430 a year ago. Nearly all offerings were hard and dark, with the first car arriving from Oklahoma on Saturday. In view of the disappointing action of futures there was an almost uninterrupted downward trend of prices and the close was 2@8 1/4c lower, with No. 1 at \$1.56 1/2@1.56, No. 2 at \$1.56@1.56, No. 3 at \$1.54@1.55 and No. 4 at \$1.52@1.54. Local mills were good buyers and there were good shipping sales to outside mills. Premiums increased sharply on the protein qualities, the highest reported being 32c over July for 14 per cent protein out of store. Other sales of 14 per cent or better brought 31c over July. Very little new wheat has been contracted thus far. Harvest made a good start in Oklahoma, southern Kansas and Missouri, but the work was interrupted on Thursday and Friday by one of the biggest rains of the season. During the coming week harvesting will become general in Kansas and Missouri. There was some heat damage prior to the rainfall. Latest

The Oregon Public Service Commission
has accepted an invitation to participate
in a hearing to be held at Helena, Mont.
July 16, to consider rates on wheat ship-
ments from Montana to north Pacific ports
for export trade.

At a meeting of the stockholders of the
Mikkelsen Grain Co. held recently the fol-
lowing officers for the coming year were
elected: S. E. Mikkelsen, president; M. B.
Mikkelsen, vice-president, and John Mik-
kelson, secretary-treasurer.

Secretary of Agriculture Jardine will be
a Portland visitor Saturday, June 27, and
will speak at a luncheon to be given him
by the agricultural committee of the Cham-
ber of Commerce. Plans for his stay in
Oregon are being arranged by his brother,
James T. Jardine, director of the Oregon
Experiment Station at Oregon Agricultural
College.

Barley is ripening in some southern lo-
calities of Oregon, says the weekly crop
summary of the weather bureau. Seeding
of spring barley is just being completed in
some elevated sections. Considerable rye
has been cut for hay and for green feed.
Winter wheat, which was not winter killed
is doing well, and in places is safe from
drought.

C. A. Peplow, for years manager of the
Seattle Flour Mills, has resigned and will
become manager of the Collins Flour Mills
of Pendleton, Ore., on July 1. Mr. Peplow
has long been connected in grain and mill-
ing circles in the Pacific northwest, for the
most part with the Seattle flour mills.
George Donnelly, sales manager of the Se-
attle Flour Mills, succeeds Mr. Peplow as
manager.

U. Nishimura of Osaka, Japan, an official
of the Department of Agriculture and
Commerce of the Japanese government,

mission. Mr. Nishimura is studying agri-
cultural products in Oregon to see whether
there are any which can be profitably
grown in Japan or whether there are agri-
cultural methods here which can be used
or adapted in his country.

Of eight grain charters listed at the Mer-
chants' Exchange the names of the steam-
ers Benmohr, Clearton, Benvorlich, Wear-
pool and Farnworth are given. The latter
vessel, fixed by Suzuki & Co. last week,
receives 33s 9d, which was the low mark
in new crop grain freights for north Pacific
loading for the United Kingdom until the
engagements reported yesterday. The
Wearpool, also closed for last week, was
said to have been taken at 34s.

A message from Pendleton says: "Local
estimates of the wheat crop in this county
are that more milling wheat will be pro-
duced here than ever before, due to the
fact that so much of the soft club wheat
was frozen out last winter and was reseed-
ed with federation and hard federation. It
has been estimated that hard federation
will yield close to 1,000,000 bushels and
that if present favorable conditions con-
tinue federation may yield 3,000,000 bush-
els."

Terminal receipts, in cars, were reported
by the Merchants' Exchange as follows:

CHICAGO.

F. C. Partridge, a Board of Trade oper-
ator, is dead.

Edwin H. Ivey of Galveston, Texas, has
been elected a member of the Board of
Trade.

Fred Uhlmann of the Uhlmann Grain Co.
is back from an extended trip through
Europe.

A L. Sommers, for many years an active
and recognized barley specialist, has made

a connection with the firm of J. J. Bade-
noch Co.

Nat C. Murray, crop expert of Clement,
Curtis & Co., is back from a short crop
inspection tour.

L. R. Hurd, president of the Red Star
Milling Co. of Wichita, with his wife, vis-
ited in Chicago last week.

D. E. Baldwin of the Omaha Flour Mills
Co., Omaha, and R. J. Anderson of the
Montana Flour Mills Co. were Chicago
visitors last week.

John W. Eckhardt, Fred Larsen, I. B.
Johnson and V. J. Peterson were among
the Chicago visitors at the Flour Club
meeting last week.

W. F. Murphy of Farnum, Winter & Co.,
who took a week-end crop inspection tour
through Illinois, reports the corn to be in
unusually fine condition.

W. P. Anderson, membership broker, re-
ported the sale of a Board of Trade mem-
bership at \$8.175 net to the buyer, or \$475
higher than the last previous sale.

Frank Crowell is among recent applicants
for membership in the Board of Trade. He
is known in export circles through long
association with the Kansas City trade.

John C. Leonard of the Leonard City Co.
of this city was elected first vice-president
of the American Seed Trade Association
at their forty-third annual convention in
Los Angeles, last week.

Trade Opinion.

The abundant, timely and very welcome
rains over Illinois and most of Indiana re-
mind us forcibly of remarks frequently
made after a dry period by the much
revered founder of this business (now long
deceased), which, as we remember, ran
about as follows: "The wonderful alchemy
of a summer rain brings betterments to
growing crops rarely appreciated at the
time for their full value."—Pope & Eck-
hardt Co.

The recent drastic declines have entirely
unsettled outside buying power, and al-
though the world's wheat position is ex-
tremely bullish, it will require some little
time and further strong developments to
restore confidence. We have not lost our
faith in decidedly higher prices. We look
for a decided tightening in cash corn as
buyers find it difficult to secure substitutes.

There is a short interest established in this corn at present.—Bartlett Frazier Co.

The attitude of the foreigner at the moment is one of extreme apathy, no export business being reported at the seaboard. A good trading market at the moment is indicated, with fairly wide swings from the present level, and we expect support to be evident on radical setbacks. However, until new bullish factors appear which will act as an incentive to renew outside interest, we do not anticipate a sustained advance at this time.—J. J. Badenoch Co.

The present wave of liquidation has carried prices $12\frac{1}{2}$ c lower than the high made after the government report was issued. This break should discount any improvement made by the recent rains. The fear of a heavy run of winter wheat to market always plays an important part in liquidating timid speculators, but in recent years the producer has learned to market his grain with more care. We see no reason to expect any burdensome supply of bread grains this year and believe such declines as made today are unwarranted.—Farnum, Winter & Co.

There has been enormous profit taking on the last few days and has naturally developed an unsettled pit situation, but the fundamental situation in wheat has not changed. The winter crop prospects suggests a very modest surplus on this crop and it is imperative that the spring harvest must be a bountiful one. Foreigners are slow in coming into the market, but they will probably be forced to take considerable wheat soon if nothing more than for mixing purposes on the other side. While the realizing movement is on wheat will have its sinking spells, but these reactions make wheat a fairly attractive purchase.—Logan & Bryan.

A good deal of unsettlement is to be expected during the next two weeks owing to July liquidation in all grains. Cash demand has not been sufficient to warrant speculative longs in going into the delivery period and it is quite possible that this class of selling may force the nearby deliveries to a discount. This condition would be entirely changed should the foreigner come into the market on a liberal scale for quick shipment to replenish his depleted supplies. We believe that the prospective adjustment of supplies to demand is sufficiently close so that a high price level is warranted and we are not in favor of pressing the short side of the present decline.—Cross, Roy, Eberhart & Harris.

Favorable weather developments have checked the upward trend of the wheat market and a period of declining prices is likely to continue as long as crop conditions are decreasing in strength. With the Canadian outlook being highly favorable and optimistic European prospects, the extremely short winter wheat crop in the United States is the only strengthening factor in the world's wheat price situation thus far. Export business has been very unsatisfactory and domestic milling demand continues slow. The cash situation has to be decidedly more active to take care of the movement of the new winter wheat, and unless domestic and foreign demand enlarges the movement to terminals will be quite heavy.—Charles Sincere & Co.

Persons in the trade believe in higher prices reason about as follows: Crop prospects in this country of 661,000,000 bushels just balances our domestic requirements, putting our markets on a domestic basis. Of our estimated crop of 661,000,000, nearly 55,000,000 is durum, most of which is regularly exported. There is an established flour export trade which will be maintained, especially to Cuba and Central America, even with a short wheat crop. Pacific Coast states (California, Washington, Oregon and Idaho) have a prospect for about 90,000,000 against 65,000,000 produced last year. This surplus has little influence on our eastern markets so that the actual shortage east of the Rocky Mountains is greater than the United States total indicates to this extent. The tariff on wheat imported into this country is 42 cents.—Clement, Curtis & Co.

The general run of news is more bearish than otherwise, the shortage in the winter wheat crop having been temporarily forgotten in view of favorable conditions in our own Northwest and Canada, while foreign crop news is also very optimistic and the Liverpool market, in consequence, ignores our action. The argument that the United States will be on a domestic basis next year may yet be borne out and it will not do to become too bearish based on good spring wheat prospects, as that crop is still far from maturity. However, the fact that immediate conditions are good will serve to temper bullish enthusiasm and very likely make for uncertain action in the market, as the decline of more than 10 cents from the recent high has undoubtedly improved the technical position to such an extent that advances will be more easily attained coincident with constructive developments.—Thomson & McKinnon.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Grain receipts and shipments at Peoria for week ending Saturday, June 13, as compared with same week last year, as reported by secretary Peoria Board of Trade:

Receipts—	1925.	1924.
Wheat	13,200	38,100
Corn	386,900	376,100
Oats	171,000	262,800
Rye	3,600
Barley	15,400	9,800
	586,500	690,400

Shipments—	1925.	1924.
Wheat	12,000	17,100
Corn	186,750	191,450
Oats	152,000	175,400
Barley	5,600	4,200
	356,350	488,150

Hogs at local yards closed 5@10c higher Saturday with a top price of \$12.40 paid for choice and medium weight butchers; the bulk of 180 to 225-lb. hogs sold \$12.15@12.35; packers, \$10.75@11; stags, \$9.25@9.75. Trading was active with a good demand confined to very light receipts, less than 500 head arriving during the morning. Light hogs, \$11.50@12.35; mediums, \$12.25@12.40; heavies, \$12.15@12.40; packers, \$10.75@11.

Cattle and calves were unchanged with Friday's market with receipts very light. Best veal calves sold at \$9.

Corn prices on local change were unchanged Saturday with receipts of 42 cars, mostly sample cars, bought to arrive by one of the local industries and was not for sale. Fresh offerings were in good demand and sold at unchanged prices. No. 2 yellow, 51.15; No. 3 yellow, 51.14; No. 4 yellow, 51.13; No. 6 yellow, 51.11; No. 2 mixed, 51.15; No. 5 mixed, 51.12; No. 6 mixed, 51.11. Oats receipts were 7 cars. No firm bids were reported throughout the session.

Good rains were reported throughout this section Friday and also Sunday, which is very beneficial to crops.

Oats are heading out very short and a small yield is expected. There is apparently no change in the wheat situation and the yield is expected to be small.

COTTON NOTES

U. S. Cotton Crop Reports.

The time fixed for the issuance of cotton crop reports is strictly in the hands of Congress, officials of the U. S. Department of Agriculture again asserted, in commenting upon criticisms of the frequency of the reports by the delegates to the International Cotton Congress at Vienna.

At this conference it was declared that one report a month would be a great improvement over the present system of issuing semi-monthly reports during the growing season.

It was agreed that the department took every precaution, as outlined by W. A. Schoenfeld, American Agricultural Commissioner at Berlin and former chairman of the Crop Reporting Board, to prevent information as to the reports "leaking" out in advance of the regular releases, yet the too frequent reports, it was said have a tendency to upset the market.

Dr. Henry C. Taylor, chief of the Bureau of Agricultural Economics of the department of Agriculture, also attended the sessions and is doing all he can to explain the operation of the universal cotton standards as recently agreed upon by the various cotton associations of Europe with the Department of Agriculture.

He is also putting before them the limitations placed upon his bureau by Congress in the matter of the issuance of cotton crop reports.

Cotton Forecasts.

The crop reporting board of the U. S. Department of Agriculture is continuing its activities in seeking a vast amount of supplemental information upon which to base its forecasts and is sending questionnaires to a large number of field correspondents in advance of the issuance of each of its cotton crop reports.

The next report of the board will be predicated on conditions obtaining June 10. Weevil count will be the big feature, for the questions asked are as to the number of weevils present, based on general observation or on actual counts; how many weevils were present on that date per 100 compared with the same time last year and also compared with the usual number; on what date were the first squares formed in the respective localities, or the probable date of their formation if none are yet present, and the percentage of cotton acreage in the various localities that will be covered with weevil poison this year.

The Walter Grain Co.

Price Current-Grain Reporter: Roscoe Walters now operates the Spencerville, Indiana, grain elevator formerly operated by the Steward Grain & Lumber Company. The business will go under the name of The Walter Grain Company.—Stiefel & Levy, Ft. Wayne, Ind.

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Cattle shippers held to consent to commission firm's custom to deposit proceeds in own name and made firm their broker or factor. Where cattle shippers knew of commission firm's custom of selling cattle in own name and depositing proceeds in bank to own account and to remit net proceeds to shipper by his own check, and made no objection, they impliedly consented thereto, and firm was their broker or factor. Steere et al. vs. Stockyards Nat. Bk. (Court Civ. App. Texas. S. W. Rep. 266-531.)

Failure to pay assessment levied held not to terminate fire policy not canceled before fire. Following Illett v. North Star, etc., Ins. Co., 156 Minn. 128, 194 N. W. 1, and Clark v. Rochester, etc., Co. (Minn.) 201 N. W. 930, it is held that the mere failure to pay an assessment levied against a member of a township mutual fire insurance company does not terminate the contract of insurance, and that to defeat a recovery the policy must be canceled. Kvale vs. Farmers' Mut. Fire Ins. Co. (Sup. Ct. Minn. N. W. Rep. 202-491.)

Carrier is insurer in absence of special contract or statute limiting liability. A carrier of goods by water is an insurer, and, though no actual blame is imputable to it, is absolutely liable, in the absence of a special contract or statute limiting its liability for all damages sustained by the goods, unless the damage is occasioned by the act of God, the public enemy, the public authority, the fault of the shipper, or the inherent nature of the thing shipped. Charles Pfizer & Co. vs. Convoy S. S. Co. (Circuit Court App. Third Div. Fed. Rep. 300-5.)

Carriers not liable for delays caused by unanticipated influx of business. Common carrier is not liable for delays caused by sudden unanticipated influx of business, and from other causes not within its control, but common carriers are public servants, and must equip themselves to take care of normal traffic with reasonable dispatch and efficiency.

Must advise intended shipper of conditions that might cause delay in furnishing cars. Carrier must, when application for cars is made, advise intended shipper of conditions that might cause a delay, and if agents have not so advised shipper and secured his consent, express or implied, to such delay, and damages result therefrom, carrier is liable. Fewell vs. St. Louis & S. F. Ry. (Kansas City Ct. App. S. W. Rep. 267-960.)

TRANSPORTATION MATTERS.

Hay Rate Adjustments.

The carriers, parties to tariffs published by Jones, May 10, put into effect, on five days' notice, a part of what the Commission's traffic bureau hopes will be a revision of rates on hay to southern territory that will bring about a more satisfactory relation of rates from New York and from Michigan. The central fact in the schedules that went into effect May 10 is that carriers serving Michigan points of origin have established a proportional rate of 41.5 cents per 100 pounds, from the Michigan points to Virginia cities, to be used in making rates beyond, by the use of rates prescribed by the Commission.

This proportional is the result of negotiations between Michigan hay interests, the carriers and the Commission's bureau of traffic conducted without formal complaints or hearings.

In the informal negotiations the carriers serving the New York points of origin agreed to revise their rates so

as to bring them into line with the Commission's views in the North Carolina case mentioned. They have indicated an intention to publish higher rates about June 15. The new rates from Michigan expire by limitation on July 31. They are regarded as in the nature of stop-gap rates, to meet an emergency, and remain in effect until the situation can be treated more comprehensively.

Awards Reparation.

The Interstate Commerce Commission has awarded reparation in No. 14968 Conejos Co-operative Roller Mills and Manufacturing Company vs. Director General, Denver & Rio Grande Western, et al., on a finding that the combination rates charged on wheat, shipped in the period of federal control, from various points in Colorado to Antonito, Colo., there milled into flour and reshipped via Memphis to Nashville, were not unreasonable except to the extent that the aggregate of the factors of the rates applicable on the outbound shipments of flour, from Antonito to Nashville, exceeded 72.5 cents per 100 pounds.

Recommends Dismissal.

Dismissal of the complaint in No. 18599, Wichita Terminal Elevator Company vs. Chicago, Rock Island & Pacific et al., was recommended by Examiner Witters on a proposed finding that rates on one carload of bulk corn shipped from Alvo, Neb., to Wichita, Kan., stored and reshipped to Custer City, Okla., were not unreasonable or unduly prejudicial. Complainant alleged that the combination rate of 44.5 cents charged on the shipment, in December, 1922, was unjust, unreasonable and unduly prejudicial to the extent that it exceeded a through rate of 34 cents between Alvo and Custer City. The examiner held that, under the transit tariff of the Rock Island, the proper charge had been imposed. He said that, effective April 29, 1923, the Rock Island tariff was amended so as to permit storing in transit at Wichita on the basis of the through rate on shipments moving out of Wichita over a connecting line.

Brewers' Grain to Newark.

An award of reparation has been recommended by Examiner Jewell in a tentative report in No. 16287, Penn Grains & Feed Company vs. Reading et al., on a finding that the applicable sixth class rate of 18.5 cents assessed on 36 carloads of brewers' grain, shipped between July 12 and August 6, 1923, from Philadelphia, Pa., to Newark, N. J., was unjust and unreasonable to the extent that it exceeded a rate of 15.5 cents, a subsequently established rate.

Weighing Hay.

Examiner Fuller has recommended the dismissal of No. 15891, Toberman Mackey & Company vs. Southern et al., on a finding that the defendants' rules, regulations and practices with respect to the weighing of carload shipments of hay are not unreasonable, unduly prejudicial or unjustly discriminatory. The complainant alleged that the refusal of the defendants to refund to the complainant amounts collected on shipments of hay made over defendants' lines in excess of the charges based on the weight of the shipments at destination, as established by affidavits, certificates or other evidence, while customarily assessing charges on such basis against hay dealers generally, was unreasonable, unduly prejudicial and unjustly discriminatory.

WHOLE CONTINENT IN WHEAT POOL.

The announcement has just been made that all Australia is to be covered by a co-operative wheat pool. In Victoria the Labor government has provided that the pool shall be compulsory while the other governments are offering inducements for voluntary pools. The federal government has promised to finance an all-Australian pool by funds of the Commonwealth bank.

PAUL WARDEN IN EUROPE!!!

Paul Warden, America's super-craftsman in financial and market reporting, has solved the mystery of price inflation.

Warden has driven across Europe; interviewed financiers, economists and the trade. He has closely observed conditions that will vitally affect prices.

His report on European crop and food conditions, to be issued early in July, will amaze the world. He sees the end of inflation and the restoration of the purchasing power of the dollar.

Warden's report on these very apparent changes which are surely and quickly coming, and on the stabilization of prices will be invaluable to the grain trade. It will be equally necessary in the safe conduct of any business that is affected by price changes.

This special report is simply one of the many up-to-the-minute advices furnished Tickerlog subscribers.

Subscribe for Tickerlog Service now and get Warden's analysis of conditions and the probable trend of prices for the next seven months.

TICKERLOG is the accredited international grain service (Reliable Foreign and Domestic Information). It aids no propaganda, it cannot be subsidized, it helps no interests to "bury their corpse." Its sole purpose is to give the world grain trade the real news, the real facts, long in advance.

Individuals and Corporations will be immeasurably served by subscribing for TICKERLOG'S great daily service during the critical months that are just ahead.

The cost of TICKERLOG'S daily letter and special wire service is \$25 until October 1, 1925.

Make all checks payable to Paul S. Warden, 314 Traders Building, 309 So. La Salle Street, Chicago, Ill.

There is no other TICKERLOG. It stands unrivaled and alone with an open record for accuracy that is invaluable to TICKERLOG subscribers.

Paul S. Warden

News of the Country Grain Trade

ARKANSAS.

Valley Springs, Ark.—A flour mill is being added to the grist mill of Perry & Whismont.

Marshall, Ark.—A. J. Jones is no longer connected with the Savage and Davidson feed store.

Little Rock, Ark.—The Brown-Pearson feed store was destroyed by fire. Thomas A. Darragh, owner of the building, will rebuild.

Poyen, Ark.—A voluntary petition in bankruptcy has been filed by B. H. Cunningham, whose liabilities are \$19,380.72 and assets, \$11,679.30, including unsecured claims amounting to \$16,033.38. \$8,589.06 in open accounts are listed in the assets.

CALIFORNIA.

Ventura, Cal.—Danne & Orr are now located in the new warehouse they have just completed.

Oakland, Cal.—As soon as the government completes dredging the Oakland-Alameda Harbor, grain shipments will be started, which will probably be in August.

CANADA.

Prince Rupert, B. C.—An additional \$500,000 has been voted by the House of Commons for the erection of a grain elevator. The original appropriation of \$220,000 was used for the building of the foundation. Halls & Aldinger of Winnipeg was awarded the contract at \$865,000, the entire cost to be \$100,000,000.

IDAHO.

Genesee, Ida.—The Union Warehouse, Joe Knapps, manager, is generally overhauling its elevators. The heads in the elevators of the Mark P. Mfg. Co. are also being overhauled.

ILLINOIS.

Aurora, Ill.—The Aurora City Mills was slightly damaged by fire.

Staley, Ill.—Staley Grain Co. is installing new equipment including a Richardson scale.

Arlington Heights, Ill.—On June 1st, the Arlington Elevator & Coal Co. had a small fire in the hoist house at the coal silos.

Prouty, Ill.—A Richardson scale is part of the new equipment to be installed here for the elevator of the Central Illinois Grain Co.

Toulon, Ill.—Davis Bros. & Potter is installing a ten bushel shipping scale in their local elevator bought from the Richardson Scale Co.

La Prairie, Ill.—The La Prairie Farmers Coöp. Elevator Co. have sold their plant to Messrs. Lewis and Wilson for a consideration of \$7,500.

Orleans, Ill.—The A. and O. Grain Co. has been incorporated with a capital of \$100,000. Incorporators: F. L. Evans, Henry L. LeGrand and M. C. Cooper.

Clayton, Ill.—The Clayton Milling Co. is asking the Wabash Ry. to build a track from their road to an elevator which the milling company plans on building near the mills.

Ipava, Ill.—At the annual meeting of the Ipava Farmers Elevator Co., the following officers were elected. Those whose terms expired were re-elected: Pres., Perry J. Fleming; Sec'y, James J. Fleming; Sec'y, James D. LaRue. Board of Directors: C. J. Baumgardner, Frank Brock, William Swank, Richard Lacey and Benton C. Stoops.

Mt. Pulaski, Ill.—B. A. Tyler has been engaged by the Farmers Coöp. Grain & Marketing Ass'n of the U. S. to give a series of lectures on the advantage of Coöp. Grain Marketing.

Rock Island, Ill.—The original articles of Dow, Hale & Lerigo, Inc., grain and seed dealers, incorporated with a capital of \$12,000, have been amended increasing the capitalization of the concern to \$25,000.

Gibson City, Ill.—The Farmers Elevators of Ford county and vicinity have established a temporary organization with C. V. Marks of Paxton, president; C. E. Miller of Piper City, vice-president; J. B. Blissard of Gibson City, secretary-treasurer. The next meeting will be held at Elliott, July 1st.

INDIANA.

LaFayette, Ind.—Heinmiller Grain Co. filed certificate of preliminary dissolution.

Ft. Wayne, Ind.—The McMillan Co. has just bought a dry feed bagging scale from the Richardson Scale Co., Chicago.

Griffin, Ind.—The local elevator which was destroyed by the tornado this Spring is to be rebuilt by Geo. Saathof, elevator builder of Peoria.

Ft. Wayne, Ind.—The McKay Grain Co., represented by W. D. McKay and P. A. Copenhaver, is now a member of the Chicago Board of Trade.

Sedalia, Ind.—Milner & Paul purchased the Sedalia Mill & Grain Co. recently, and are installing a new motor driven high speed Gruendler Feed Grinder.

Oaktown, Ind.—The interest of F. J. Townley in the F. J. Townley Grain Co. has been purchased by L. L. Blann who will operate under the name of the Emison Grain Co.

Indianapolis, Ind.—Walter R. Spenser was appointed receiver for the Southern Seed & Supply Co. A petition for a receiver was filed some time ago by the Adams Bag Co.

IOWA.

Webb, Ia.—Albert Nielson succeeds DeWolf Grain Co.

Malvern, Ia.—P. Kilmartin has taken over the business of the Eacrett Grain Co.

Sioux City, Ia.—Windstorm slightly damaged the Martens & Ketels Milling Co. mill.

Sheldon, Ia.—The roof of the Scott Logan Milling Co. mill was damaged by windstorm.

Thor, Ia.—The B. F. Greenfield Elevator was purchased by M. A. Nelson of Crystal Lake who will assume charge July 1st.

Onawa, Ia.—On May 26th, the Sioux Grain Co., which has been operated by a trustee since it went into the hands of a receiver last July, was sold.

Cedar Rapids, Ia.—John S. Reinheimer has purchased the T. G. White mill property and will operate a feed mill after the property is repaired.

Taintor, Ia.—The Taintor Coöp. Shipping Ass'n will replace their elevator lost through fire with a new one, and contract for the construction has been let.

Pocahontas, Ia.—Ralph Beers, operating two grain elevators at this point, has made an assignment in favor of his creditors. B. Peterson, was named assignee.

KANSAS CITY, MO.

Spencer, Ia.—The Grain Marketing Co. is represented locally by W. H. Hubbard, who for a number of years owned and operated the W. H. Hubbard Grain Co.

KANSAS.

Whiteside, Kans.—The elevator of the Consolidated Flour Mills Co. was damaged by windstorm.

Burr Oak, Kans.—The Burr Oak mill and elevator has been purchased by Milo Cook for \$5,300.

Frankfort, Kans.—J. A. Sconce of Lawrence has purchased the Farmers Union elevator and cribs.

Claudel, Kans.—The elevator of the Farmers Elevator and Shipping Ass'n was damaged by windstorm.

Climax, Kans.—H. A. Bonnell announces that the new \$12,000 elevator and mill has been opened for business.

Kinsley, Kans.—The Kinsley Milling Co. elevator has been purchased by R. L. Miller of Ensign, who will take charge.

Buffalo Park, Kans.—The Star Eng. Co. has the contract for the overhauling and remodeling of the Robinson Mfg. Co. elevator.

Kinsley, Kans.—Ira Rankin has been re-elected manager of the Farmers Elevator Ass'n. A 10 per cent stock dividend was recently issued.

Salina, Kans.—Ted Branson, formerly with the Salina Produce Co., and R. Hoffman of Enterprise, have opened a new grain firm under the name of the Branson-Hoffman Grain Co.

Dodge City, Kans.—The Star Eng. Co. has the contract of the Hall Grain Co. for a 10,000 bus. capacity elevator, to be equipped with truck dump, motors, 10-ton scale and automatic scale.

Cimarron, Kans.—At the annual meeting of the Cimarron Coöp. Equity Exchange, the following officers were elected: Ed Trainor, pres.; Sam Heron, vice-pres.; Chris Steinkuehler, sec'y.

Marietta, Kans.—The Van Ness Const. Co. has the contract for a 15,000 bu. cribbed steel clad elevator with a steel roof to replace the one destroyed by fire, owned by the Farmers Elevator Co. Equipment will include a Western Sheller and Cleaner, one leg and a Howe Hopper Scale.

Larned, Kans.—The property of the Bowen-Oglesby Milling Co., sold by H. M. Holloway, receiver, was bid in for \$19,500 by L. H. Bowen of Independence, for the Bowen-Oglesby Milling Co., which has been operating under lease from the receiver during the litigation for the past three years. T. A. Biggerstaff will remain as manager.

KENTUCKY.

Auburn, Ky.—Fire destroyed Taylor's large feed barn near here. The loss was heavy and only \$500 insurance was carried.

Winchester, Ky.—The Winchester Roller Mills Co. manufacturers of flour, wheat extract and feeds, will enlarge their mill.

Stephensport, Ky.—Fire of unknown origin totally destroyed the mill of the Lawler & Jagers Milling Co. with a loss of about \$20,000. Between 800 and 1,000 bushels of wheat and about 75 barrels of flour were in the building, also a large quantity of other grain products. Insurance of \$6,000 was carried on the building and machinery and \$2,000 on the stock.

MAINE.

Bangor, Me.—Gellerson Giane of Dover-Foxcroft has been appointed by the American Milling Co. of Peoria, Ill. to act as the company's agent in their territory.

MICHIGAN.

Lincoln, Mich.—The roof of the Lincoln Elevator Co. was damaged by fire.

Deckerville, Mich.—Fire destroyed a warehouse belonging to Chatterson & Son.

Battle Creek, Mich.—A. K. Zinn & Co. has purchased a three bus. floor portable Richardson scale.

Janesville, Mich.—The coal and seed business of A. H. Dudley will be taken over by his son DeWitt Dudley.

Bay City, Mich.—Windstorm destroyed the chimney of the Cass Bean & Grain Co. and damaged the stock.

North Branch, Mich.—In order to adjust its affairs, the North Branch Producers Ass'n will cease operation, as the finances of the corporation are insufficient to continue.

MINNESOTA.

Milan, Minn.—The two elevators owned by Walstad & Hanson, were somewhat damaged by storm.

Tracy, Minn.—A Strong Scott dump has been installed in the plant of Pryor & Rowell by the T. E. Ibberson Co.

Danvers, Minn.—T. E. Ibberson Co. has installed electrical equipment and added new legs to the plant of the Farmers Elevator Co.

Bird Island, Minn.—The T. E. Ibberson Co. will install a Strong Scott dump in the plant of the Bird Island Grain & Feed Co., and will also make repairs.

Ashcreek, Minn.—The Farmers Elevator Co. is now a cooperative organization with capital stock raised from \$25,000 to \$50,000 and value of the stock raised from \$25 to \$100.

Glencoe, Minn.—William O'Brien of Arlington has purchased the elevator and coal sheds of the Glencoe Farmers Elevator Live Stock and Produce Co. and opened for business June 15.

Wanamingo, Minn.—Fire of undetermined origin destroyed the Wanamingo Farmers Co-op. elevator and grain valued at \$33,000. The total loss was placed at \$75,000. The building was partially protected and the grain fully insured.

MISSOURI.

Monticello, Mo.—A feed mill has been opened by Clarence Penn.

Rosendale, Mo.—A deal is under way whereby A. W. Pearce will trade his farm near Edna for the Rosendale elevator.

Booneville, Mo.—The local elevator which was destroyed by fire will be rebuilt by D. J. McClean, the elevator builder of Atlanta, Mo.

Charleston, Mo.—Whitehead Davis & Co. are building a new plant. Design for the elevator was prepared for them but local builders will erect it.

Holt, Mo.—The Holt Grain & Supply Co. has purchased the feed, poultry and produce business of Leonard Hunter, which will be moved to the elevator.

Craig Mo.—The elevator of the Farmers Grain Co. is being repaired for the new crop. The capacity will be doubled and a new motor and dumping device installed.

Moselle, Mo.—Fire destroyed the Moselle Mfg. Co. plant which was used to manufacture feeds. William C. Dickerson, owner, will not rebuild, but will enter the flour and feed jobbing business.

Jasper, Mo.—U. Gray will resign as manager of the Farmers Elevator, and, with C. O. Stemons of Carthage, conduct a feed and produce business, which he will manage.

Booneville, Mo.—The J. M. McClean Const. Co. has the contract of the Farmers Elevator Co. to replace the elevator lost through fire, with a larger structure, covered with galvanized iron. An automatic scale of 15 h.p. with an overhead dump will be among the equipment.

MONTANA.

Billings, Mont.—Logan & Bryan Co. will open a wire office here soon.

Nibbe, Mont.—A 6-ton Strong Scott air and wagon dump will be installed by the Powers Elevator Co. shortly.

Wheat Basin, Mont.—The Occident Elevator Co. is reshingling its elevator and installing a Kewanee Air Truck and Wagon Dump.

Whitehall, Mont.—The elevator of G. O. Oddegard was purchased by Larson Bros., who are contemplating repairs in the near future.

Wheat Basin, Mont.—A 6-ton Strong Scott air truck and wagon dump and a 5-ton Fairbanks weighing out hopper scale have been installed by the Power Elevator Co.

Great Falls, Mont.—P. K. Dill of Lincoln, Neb., W. O. Buck of Great Falls and H. J. Strump, a local grain dealer, are incorporating a plant for the manufacture of cereal products, to be incorporated for \$50,000.

Big Timber, Mont.—The Strauss & Co. elevator, recently destroyed by fire, will be rebuilt. Five thousand bushels of wheat, 800 bushels of flax and 9,000 bushels of oats were in the bins when the fire broke out. About \$2,000 worth of grain will be salvaged.

NEBRASKA.

Belgrade, Neb.—The large grain elevator of the T. B. Hord Co. was burned to the ground.

NEW MEXICO.

Hagerman, N. M.—The Pecos Valley Alfalfa Products Co. and the Denver Alfalfa Milling & Products Co. have consolidated.

Tucumcari, N. M.—The Tucumcari flour mill and the M. B. Goldenberg company warehouse were completely destroyed by fire, also about four carloads of food stuff which, with the mill was covered with about \$10,000 insurance. The warehouse was partially insured. The C. M. Light Grain Co. elevator was damaged by water.

NORTH DAKOTA.

Bismarck, N. D.—A small loss occurred when fire broke out in the cooling tower of the power plant in the

Occident Elevator of the Russell Milling Co.

Cavalier, N. D.—A concrete foundation is being laid by the Cavalier Milling Co. for the 25,000 bushel capacity elevator, which will occupy ground space of 36x32.

Buxton, N. D.—Lightning destroyed the oil house of the Buxton Grain & Potato Co.

Pillsbury, N. D.—The Pillsbury Elevator Co. had a slight fire in their elevator recently.

Hillsboro, N. D.—A new cleaner will be installed by the Equity Elevator Co. who will build a new office.

Crosby, N. D.—The Farmers Elevator Co. will repair and paint their elevator, and install a dump lift.

Goodrich, N. D.—A contract has been let by the J. Doering Grain Co. for repairing its elevator and painting it.

Hurdsfield, N. D.—The Hickok Construction Co. is repairing the plant of the Farmers Elevator Co., building a new roof and replacing the old boot tank with a new one. A Strong Scott truck dump was installed.

OHIO.

Jackson, O.—Plans are under way to replace the \$75,000 milling company.

Arnold, O.—J. W. Cunningham and his two sons have purchased the elevator from Spurrier Bros.

Toledo, O.—The Kasco Mills and elevator has been taken over by the recently incorporated Kieser Mfg. Co.

St. Paris, O.—The West Elevator of the St. Paris Grain Co. was probably saved from destruction, when struck by lightning recently, by the plant being free from dust.

OKLAHOMA.

Amber, Okla.—The Amber Grange Elevator Co. has dissolved.

Blanchard, Okla.—Fire destroyed the elevator of the Blanchard Grain Co.

Enid, Okla.—New equipment will be installed by the Enid Milling Co., which also operates an elevator.

Britton, Okla.—The elevator of the Britton Grain & Elevator Co. was destroyed by fire of unknown origin, causing a loss of \$10,000, partially covered by insurance.

Lahoma, Okla.—The plant of the Farmers Elevator Co. is being extensively remodeled. New cement basements and floors are being built under all of the bins.

Edmund, Okla.—The new elevator with storage capacity of more than 300,000 bushels of grain, being constructed by the Eagle Milling Co. will be ready for this summer's crop.

OREGON.

Klamath Falls, Ore.—A. C. Anderson will remodel a building for his feed store and storage.

Portland, Ore.—The Washington Grain & Mfg. Co. has leased the four warehouses stationed at Creston, Davenport, Omans and Rocklyn, and one bulk elevator at Creston, from the Pacific Coast Elevator Co.

SOUTH DAKOTA.

Centerville, S. D.—The elevator of T. I. Gunderson was struck by lightning, resulting in a small loss.

Burkmere, S. D.—A large grain elevator was struck by lightning and burned to the ground recently.

Langford, S. D.—Kewanee truck dumps will be installed in the plants of Palmquist & Shoemaker and the Olsen Grain Co.

Brentford, S. D.—The Great Western Elevator has been purchased by Chas. Barker and will open July 1 with R. C. Styles as manager.

Vermillion, S. D.—An elevator belonging to S. R. Schilling, containing several thousand bushels of grain, was completely destroyed, causing a loss of \$15,000.

TENNESSEE.

Ripley, Tenn.—Fire slightly damaged the Ripley Milling Co.

Sevierville, Tenn.—The Walker Milling & Prod. Co. has surrendered its charter.

Talbott, Tenn.—The Crosby Milling Co. has increased its capital from \$30,000 to \$60,000.

Binghamton, Tenn.—The Mississippi Valley Grain Co. has incorporated with \$50,000 capital, by J. M. Trenholm, Ceylon B. Frazier, George J. Coleman, W. L. Owen and Walter Chandler.

Nashville, Tenn.—The Bell Grain Co. has applied for a charter with capital at \$20,000. Incorporators: John H. Bell, W. P. Bell, John Trebing, W. A. Trebing, and William G. Mallon.

Nashville, Tenn.—The Liberty Mills property and trade marks have been purchased by the Ford Flour Co. and the Colonial Mfg. Co. New machinery costing \$600,000 will be installed before the arrival of new crops, when the industry will resume operations.

TEXAS.

Graham, Tex.—The Graham Mill & Elevator Co. has completed the improvements to its plant here, at an expenditure of about \$60,000.

Lufkin, Tex.—Mr. Leach has bought out the Stroud-Leach Grain Co. and will continue the same business in the name of E. W. Leach Grain Co.

Longview, Tex.—The Stedman Grain Co. will enlarge its capacity by leasing a warehouse from the T. R. & P. or building a warehouse this season.

Gatesville, Tex.—Fire destroyed the plant of the J. G. Smith Grain Co., which with the equipment, was valued at \$15,500. Grain was burned worth \$12,000. Loss partly covered by insurance. The plant will be rebuilt.

We buy and sell all standard varieties of grass, clover and farm seeds. Correspondence solicited. WM. A. WARD SEED COMPANY Sacramento, Calif.

SEED GROWING SITUATION

PELLA, IOWA.—Entirely too early in the season to say anything about the crop of seed; timothy just heading out and clover starting to bloom. It is simply guess work if the first crop of clover will produce a crop of seed or the second cutting will.—Cole's Seed Store.

SEED CROP MAY BE REDUCED.

DENVER, COLO.—We are not in a position to give any reliable information in regard to seed stocks on hand, as we know very little about the other fellow's business. We, ourselves, cleaned up fine on practically all garden seeds and fairly well on field seeds. There are always some varieties in both lines which do not move as well as anticipated and it is, therefore, necessary to have some carry-over. We feel, taking the situation as a whole and considering the extremely dry season, which it has been our misfortune to have, that we have done exceedingly well this spring. If present weather conditions continue, the seed crop in Northern Colorado will be very much reduced. Just what condition the Western slope and the Arkansas Valley are in, we are unable to state. Local demand for seeds has gone to sleep and apparently cannot be aroused until we get a good soaking rain. On the whole, there have been sicker years than this past one.—The Burton Seed Co., by H. T. Hucker.

MILWAUKEE SEEDS.

TOLEDO SEED PRICES.

The following table shows the range of prices for seed on the Toledo market for cash and the futures for clover, alsike and timothy for the week ending June 13:

	Range for wk.		Close	
	High.	Low.	June 13.	June 6.
Clover—				
Cash	\$17.55	\$17.35	\$17.35	\$17.15
Oct.	16.10	15.80	15.80	15.50
Dec.	15.55	15.45	15.45	15.05
Alsike—				
Aug.	14.25	13.25	14.25	13.25
Timothy—				
Cash	3.80	3.75	3.80	3.75
Sept.	4.20	4.20	4.20	4.20

CONDITIONS IMPROVING.

GUYMON, OKLA.—Extreme dryness has been our portion all spring over a vast area. A very small part of row crops planted. Such as canes, milo, kafir, sudan and broom corn, and getting rather late for even a fair acreage, but the unexpected generally comes, and last night, June 11, scattered rains fell

Field and Grass Seeds

over most of dry territory; many places good to heavy rains fell, and naturally work will begin, first upon feed crops, closing with cane and millet, but at best our acreage will be small and probably 50 to 60 per cent of normal but do not count us out yet; do not expect too much.—Claycomb Seed Store.

ST. LOUIS SEED MARKET.

Timothy scarce, strong and in demand. Other seeds nominal. Quote timothy at \$7.25 to \$7.50—low-grade dark and trashy less; German millet at \$4 to \$4.25 and common millet at \$3 to \$3.10; hog millet at \$2.10 to \$2.40.

Sorghum Cane Seed—Quote black amber at \$1.50 to \$1.60 per 100 lbs. bulk—feeding stock less.

Stock Peas—Quote whippoorwill at \$4 to \$4.25, new era \$3.75, mixed at \$3.50 per bu.

Sunflower Seed—Quote at \$3.50 per 100 lbs. on basis of last sales.

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending June 13, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.
Week..	34	21	30	129	3	3
Prev. wk.	160	70	6	1	196	77
1924.....	40	57	45	43	42	42
1924-25.	37,037	27,147	10,653	5,471	17,010	16,218
1923-24.	31,393	21,623	10,754	8,389	24,062	15,076
1922-23.	31,517	31,149	10,873	8,812	23,686	7,281

Timothy—Unchanged. Common country run quotably \$6.60@6.65 per 100 lbs., fair country lots 6.70@6.85, good seed \$6.90@7.00, high grades \$7.25@7.35, extra choice and fancy \$7.50@8.00.

Clover Seed—Firm. Country lots \$20.25@23.00 for 100 lbs., good \$23.75@24.75, choice \$25.25@26.25, fancy \$27.00@28.00 and Mammoth \$23.00@28.00, according to quality. Red top \$18.25@19.25. Fancy Kentucky blue grass quotably \$31.25@33.75.

Alsike—Firm. Fair country lots \$18.25@19.75 per 100 lbs. Good seed at \$20.25@21.75, choice \$22.75@23.75.

Alfalfa Seed—Firm. Recleaned \$22.50@23.50 per 100 lbs.

Flax Seed—Easier. No. 1 Northwestern closed at \$2.76@2.81 per bu. of 56 lbs.

KANSAS CITY SEED MARKET.

KANSAS CITY, June 13.—Harvesting of the new blue grass crop in Missouri and Northeastern Kansas made a good start this week, but the work of stripping was interrupted on Thursday and Friday by a heavy rain. No reports of serious damage have been made. Stripping probably will go on during the coming week. It is too early to make definite estimates on the crop, but some local dealers are figuring on 50 per cent of the 1924 production in the Southwest, owing to stunting of the grass in May by unseasonably cold weather. Farmers are said to have bought more stripping machines than usual, indicating a strong effort to save seed. Prices to be paid for rough seed have not been announced.

There is little trade in forage seeds. Most of the demand for cane seed comes from handlers of kafir and milo, who want the seed for mixing in the feed trade. Only red top and orange are available for this purpose. Prices are run up 15@25c per cwt. on red top and orange, but black and red amber were unchanged to 10c higher. The wholesale quotations are: Red top and orange, \$2@2.10; black and red amber, \$1.85@1.95; mixed, \$1.95@2.05. Millet and Sudan seed were quiet, with prices unchanged from those recently prevailing. German was quoted nominally at

\$4@4.50 per cwt.; common, \$3@3.50; Siberian, \$2.25@2.75; hog, \$2.25@2.50. Sudan seed sold at \$3.50@4.50. Interest in soy beans was fair, with prices per bushel ranging from \$2.50 to \$3.50. Cow peas were quiet and considered too high, as compared with soy beans. Asking prices were \$4.50@5.

TOLEDO SEED MARKET.

TOLEDO, O., June 15.—Clover continues to rule strong especially cash on old stock are pretty well cleaned out and dealers are skeptical about the new crop. Damage reports are coming in from clover raising sections and this is causing investors to send in buying orders. October has fluctuated around sixteen dollars and there is a fine class of buying on all setbacks. If the seed crop gets a good start after hay is cut there may be some selling. Present prices are far above last year. Cash seed is about \$6 higher and October about \$3.50 higher and December the same. It is likely that prices this year will remain high as the prospects for a normal crop are very doubtful. Foreign advices are optimistic about their new crop and it is just possible they may ship large quantities of their seed to fill our shortage.

Alsike is \$3.50 higher than it was at this time last year. The new crop will probably be smaller than last year and the quality may be inferior. The old stocks of alsike are sold out and dealers say they will have practically no seed left for their fall trade.

Timothy continues to show strength and the September new crop future has been bought freely. The prospects for new seed are none too bright and there may be a scarcity the coming season. Prices are twenty-five cents higher than last year.

LINSEED WEEKLY REVIEW.

NEW YORK, June 15. — The linseed market in the United Kingdom is quiet and easier. Crushers are reserved and buying for immediate needs only. India is offering large quantities of seed at prevailing prices; the crop this year in India is expected to show a final yield of three million bushels larger than last year.

Linseed oil is dull and prices are lower. Consumers are buying for prompt delivery only. At London spot oil is quoted at 45/3 per cwt., against 46/- a week ago.

Shipments of linseed from India this week are 869,000 bushels against 248,000 a week ago. Total clearances since April 1 are now 4,692,000 against 3,356,000 last year at this time.

Cotton oil markets are quiet and easier. Hull is quoting refined spot at 45/3 and crude at the same price.

Argentina: The weather is fine and cold. Seeding is progressing favorably. The market keeps steady although exports are small this week, which is partly due to the holiday on Thursday last.

Stocks of seed in the Argentine are now 4,800,000 against 4,800,000 last week and 2,400,000 last year.

American interests are buying only sparingly but prices are sustained due to the persistent demand from the Continent which although not large, is sufficient to keep prices steady.

WARNING ON SEED INOCULATION.

Inoculation of the seeds of cotton, tobacco, wheat, corn, oats, rye and other non-legumes to stimulate nitrogen fixation is without value, according to the Department of Agriculture, following a study made of the claims of the producers of preparations designed to advance the growth of these crops.

The non-leguminous plants, such as those named above, it declared, do not

harbor such nitrogen fixing bacteria in their roots, nor in their stems and leaves, although such is the assertion of some of the commercial concerns manufacturing and selling commercial cultures for inoculating the seed.
Farmers are warned not to waste their money on such doubtful preparations. But they are also told not to confuse this warning with the possibilities attainable through the inoculation of legumes such as alfalfa, clover, etc. These and other legumes attain their best development if their roots have many well developed nodules, in which the nitrogen-fixing bacteria are present in large numbers.

MINNEAPOLIS FLAX MARKET.
MINNEAPOLIS, MINN., June 12, 1925.—We quote from Van Dusen Harrington Crop Report of June 10:
“Flax in North Dakota shows a very good condition generally, while in South Dakota and Minnesota it is only fair. This is probably due to the damage by frosts, and applies more particularly to the early seeded. Our recent reports confirm our former statement that the flax acreage will show some reduction from earlier estimates in North Dakota, which is the heaviest flax raising state. There is still some breaking being done throughout the Northwest and seeding will probably continue for ten days or more. We believe the crop conditions of the Northwest, as a whole, at this time are highly satisfactory. It is never possible to have them uniform throughout, as there are always poor spots which must be averaged with the good ones.”
During the past week most of the Northwest has had such a heavy rainfall as to interfere with further flax planting, but the ground is now in excellent condition and we will soon have the usual good June reports. It is too early to make a worthwhile guess on the acreage. The farmers' April plans have been much upset by the weather, and from figures given below it will be seen that the per acre farm value of wheat on last year's crop was slightly greater than flax. Farmers, as a rule, do not like to grow flax. Some oil consumers think they will get cheaper oil if there is less flax produced and about the only friend flax has is the flaxseed development committee.—Archer Daniels-Midland Co.

SEEDS

DULUTH FLAXSEED MARKET.
DULUTH, June 13.—Flaxseed prices continued to sag in the course of trading on this market during the last week. Selling pressure was persistent at times, while at no stage did any really good buying appear. Current receipts from the country were lighter, and crushers took care of anything offered on the tables. As a result of the

Feedstuffs

C. U. Snyder of Chicago left last week for an European trip.

The feed business generally is reported good in the Central Southern territory from Memphis down through Birmingham, Jackson and Meridian, Miss.

The Ralston Purina Co. is adding 800 tons production facilities to their Buffalo mill. When it is finished, the executives of the corporation plan to start the erection of another unit at Harrisburg, Pa. They now own the property and sometime in 1926 we may expect to see it improved with another high grade feed mill.

MILL FEED SCARCE.

GRAND RAPIDS, MICH.—We know that mill feed is very scarce. The demand is a great deal more than our supply. Stocks are light, and we are running along about the usual amount. The weather has been so dry so it is going to cut the hay, which, of course, will have a bearing. Corn is also hurt.—*Voigt Milling Co., Frank A. Voigt, Pres. and Mgr.*

FEED MARKET A WEATHER PROPOSITION.

JACKSON, MICH.—We are having no trouble whatever disposing of all the feed we make at very good prices and unless we get liberal rainfall, do not believe there is going to be much of a break in feed until along in new crop. We figure the feed market right now is largely a weather proposition and that, of course, is any one's guess.—*Heywood Milling Company, S. H. Sherwood, President.*

FEED BUSINESS DULL.

ANDERSON, IND.—Our oat crop has gone "gallagher." Not worth cutting. Wheat will not be over twenty-five per cent crop. Farmers are not able to stand this loss. Feed business is dull on account of shortage of money in the hands of feeders. Feed dealers generally are pretty well loaded. Corn looks very well. Unless rain comes soon, however, it will suffer greatly as it is just now fully recovering from the frost and must have rain.—*The Union Grain & Feed Co., G. A. Lambert, Mgr., June 13.*

COTTON SEED MEAL.

KANSAS CITY, June 13.—Realizing that the remnant of old-crop stocks is in few hands, manufacturing holders of cotton seed meal are gradually tightening on prices. Oklahoma meal was held this week at \$38.50 per ton, which automatically raised the Kansas City price to \$43.80 per ton. These quotations are \$1 to \$1.50 higher. Improvement in the feeding demand is not important, as this is the dull season. Export bids in Texas are having something to do with the firm market. New crop product will be available in Southern Texas next month, but Central Texas may not have meal to offer before August and the crushers of Oklahoma and Arkansas will not do much before September.

Inquiry for linseed meal continues limited, but offerings are light and the market is firm. Some of the large mills in Minneapolis have closed for the season. The Minneapolis price on

fine-ground meal is \$42.25 per ton and pea size is \$1 higher. Kansas City dealers are quoting at \$46.50 to \$47.50. Minneapolis reports that interior mills are doing some export business.

Tankage rules at the former prices, \$50 and \$55 a ton, the latter applying on ton lots. Meat scrap, also, is holding steady at \$55 and \$60.

DEMAND UNUSUALLY HEAVY

NEW ULM, MINN.—The demand for mill feeds has been unusually heavy the past week and prices have advanced sharply.

Unfavorable weather conditions have affected the growth of pastures and feeding grains, particularly oats. Some rains have fallen recently which have given temporary relief but a great deal more moisture will be needed to put pastures into normal condition for this season of the year.

That the trade is beginning to realize the truth of the probable shortage of feeds is evidenced by the fact that large buyers of mill feeds are anxious to contract for the summer months at prices prevailing for prompt shipment.—*Eagle Roller Mill Co., J. B. Groebner, Feed Dept.*

MINNEAPOLIS FLAX SEED MARKET.

MINNEAPOLIS, June 13.—Offerings of seed, both spot and to arrive, have been very light and crushers were compelled to pay right up in order to secure the limited country receipts which were available from day to day. Montana seed, of fancy quality and with transit, was bringing 6c over the July right along. Yesterday, spot seed was worth 2@7c over the July but today there was an inclination to go a trifle slower, especially on the ordinary kind. Range of sales on No. 1 spot today was from 1@5c over the July future; and July at 4c over for the to arrive. Minneapolis stocks in elevators show a slight increase for the week, being 310,106 bus. vs. 291,448 a week ago and 56,142 last year.

OIL MEAL MARKET.

The demand for linseed oil meal has been excellent during this week and offerings are exceedingly light. One of the local mills that has been running consistently during the entire spring is about to close down for the summer because of lack of seed. Another one is shut down and will be closed down for some little time until they secure some more seed. There most likely will be a marked shortage of flax and all the mills will feel the pinch sometime during July. Of course, as yet it is impossible to tell when any new crop flax will be running although it is thought that the movement will be earlier this year than last.—*Bertley Bulletin, Chicago, June 13.*

NEW YORK OATS MARKET.

Oats receipts 126,000 bushels bonded, 292,000 bushels domestic. Prices continued their upward swing, advancing several cents further on crop damage reports of an alarming character, while the Government estimate as of June 1st showed a marked falling off in production when compared with the final figures of last year. It is generally conceded that in many sections it is too late for moisture to materially increase the yield, though timely rains should prevent further deterioration and greatly improve the prospects elsewhere. The advance in prices caused a cessation of export buying of American oats, though fairly liberal sales of Canadians were reported. In our own market the spot demand showed a decided falling off, dealers declining to follow the advance in the higher grades, though

MENTE AND CO. INC. BAGS NEW ORLEANS AND SAVANNAH
BAGGING · TIES · SUGAR BAG CLOTH
Please mention this paper when inquiring for prices

there was a good inquiry for lower qualities.—L. W. Forbell & Co.

FEED MARKETS.

MILWAUKEE.

Milwaukee, June 13.—There was an active demand in the Milwaukee feed market and as a result prices went up in parallel to it. Wheat feeds offered for prompt shipment were readily absorbed and a few shipments were booked for July at about \$2 off immediate quotations. The receipts during the week on other feeds were fair. Current quotations per ton are: Winter bran, \$32@33; spring bran, \$31.50@32.50; standard middlings, \$35@35.50; flour middlings, \$38.50@39; red dog, \$43.50@44.50; rye feed, \$31@31.50; linseed oil meal, \$45.50@46; cottonseed meal, \$41.50@42; hominy feed, \$40@41; oat feed, \$8@9; gluten feed, nominal, \$34.80; in 110-lb. sacks, carlots, f. o. b. Milwaukee.

DULUTH.

Duluth, June 13.—A moderate improvement was reported in the demand for feeds on this market during the last week. Dairy-men were fair buyers and some feeds were shipped east by the mills. Millfeeds were strong, being advanced from \$1 to \$1.50 while ground feeds are unchanged as follows, per ton: Shorts, \$29; bran, \$32.50; Boston mixed, \$32.50; red dog, \$43; flour middlings, \$35; ground oats, \$30; No. 1 ground feed, \$39.25; No. 2 ground feed, \$37; No. 3 ground feed, \$34.50; cracked corn, \$43.75; coarse cornmeal, \$43.75.

MINNEAPOLIS.

Minneapolis, June 13.—Coincident with an increase in flour business, as reported by the mills, and a corresponding increase in shipments, the local millfeed market went off on a tangent and shows a healthy gain in asking prices for the week. The only logical solution for the whole matter is that light production over such an extended period, accompanied by a disposition on the part of the consumptive trade, the mixer and everyone else who ever buys feed, to hold off and to keep stocks at a very low point, has finally brought about an advance. There are some in the trade who still feel that this betterment is of merely temporary character and they cannot justify present levels. Nevertheless, they are here and anyone wanting the feed has no alternative but to pay for it.

Today's asking prices were as follows: Standard bran, \$28@28.50; pure bran, \$28.50@29; shorts, \$32@32.50; red dog, \$42; flour middlings, \$35@35.50; oil meal, \$44@44.50. Weekly shipments totaled 9,429 tons vs. 9,485 last week and 12,849 a year ago. Season shipments since Sept. 1 were 511,172 this year vs. 592,118 last year; since Jan. 1, 285,599 this year and 320,714 a year ago.

NEW YORK.

New York, June 13.—City mills are sold up for the current month and the prices asked on spot are unusually strong for this season of the year. Western prices were advanced sharply with the damage to other feeding grains, principally oats and hay, accounting for this movement.

City bran is quoted nominally at \$36.50; middlings, \$38.50, and red dog, \$50.50; western bran, prompt shipment, \$36.60; standard middlings, \$38.60, and red dog, \$50 per ton.

MEMPHIS.

Memphis, June 13.—The feed market is still very slow as all consumers are taking their requirements in small lots. Mixed feed manufacturers report volume of business moderate but demand is steady. Prices are firm at the recent advance and without reaction in raw materials they will go higher. Millfeed has been firm and scarce with wheat bran quoted at \$32.50 and gray shorts at \$38. Cottonseed meal is in limited demand but strongly held and is steady at \$36 for 36 per cent, \$39 for 41 per cent, and \$41 for 43 per cent. Hulls are slow and easier at \$7.50 for loose in carlots. Alfalfa meal is slow and quoted at \$27 for medium No. 1 for spot or immediate shipment.

BALTIMORE.

Baltimore, June 13.—The general feed market is firmer under a comparative scarcity of spot offerings of bran and middlings, coupled with a fair demand. Hominy feed in near positions is in fair request. Gluten feed quiet. Alfalfa meal holds its own. Season for dried beet pulp over. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$36; western middlings, per ton, 100-lb. sacks, \$37.50@38; hominy feed, per ton, \$46@47; gluten feed, per ton, \$44.50@45; alfalfa meal, per ton, \$32@33; dried beet pulp, per ton, \$38.

PHILADELPHIA.

Philadelphia, June 12.—Demand for feed-stuffs is moderate but offerings are very light and the market is strong with an advancing tendency. Quotations are for carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$38@39; winter middlings, \$44@47; spring bran, \$36@37; standard wheat middlings, \$38.50@39.50; flour middlings, \$44@47; red dog, \$49@49.50; rye middlings, \$36@38; reground oats feed, \$13@14; fine white hominy, \$44.50@45; low grade flour, \$50@56; cotton seed meal, 36 per cent protein, \$44@45; cotton seed meal, 41 per cent protein, \$46.75@47.50.

CINCINNATI.

Cincinnati, June 13.—There was little change in the mill feed situation insofar as the supply, demand or price was concerned, but the market was firm in tone with a tendency to advance, but the very light mill offerings and difficulty of securing supplies around a selling basis fully sustained the quotations. Prices represent 100-lb. sacks: Soft winter wheat bran, \$34@34.50; hard winter wheat bran, \$33.50@

\$34; standard middlings, \$36@36.50; soft wheat middlings, \$39.50@40; gray hard middlings, \$39.50@40; mixed feed, \$36.50@37; No. 1 alfalfa meal, \$29; hominy feed, \$42@42.50.

BOSTON.

Boston, June 11.—Prompt shipment, per ton: Spring bran, \$37@38; winter bran, none offering; middlings, \$39.50@45; mixed feed, \$38.50@43.50; red dog, \$49.75; hominy feed, \$45.75; stock feed, \$44.50; oat hulls, reground, \$14; cottonseed meal, \$45.25@50.50; linseed meal, \$49.50.

Oatmeal—Per 90-lb. sack, rolled, \$3.05; cut and ground, \$3.35.

Oats—All rail: fancy 40 lbs., 67@68c; fancy, 38 lbs., 66@67c; regular, 38 lbs., 65@66c; regular, 36 lbs., 64@65c; regular, 34 lbs., 63@64c; lake and rail, fancy, 40 lbs., 67@68c; fancy, 38 lbs., 66@67c; regular, 38 lbs., 64@65c; regular, 36 lbs., 63@64c.

SAN FRANCISCO.

San Francisco, June 11.—Barley, ground, \$38@40; oats, rolled feed, \$42@43; millrun, \$41@44; linseed meal, \$50@54; alfalfa meal, \$26@29; Egyptian corn, \$55@60; beet pulp, \$38@40; scratch feed, \$62@64; barley, rolled, \$38@40; bran, \$40@43; middlings, \$53@56; cocoa meal, \$35@36; milo maize, \$43@50; cottonseed meal, \$55@58; cracked corn, \$56@58; feed cornmeal, \$29@30; molasses alfalfa meal, \$29@30.

FT. WORTH, TEX.

Ft. Worth, June 13.—Active demand here for all millfeeds with prices firm and steady tone as Texas mills are not able to supply the demand for these. Basis Group 1, values June 13 are as follows (tags furnished): Bran, straight, on track, \$1.72, en route, \$1.70; prompt, \$1.69; bran, millrun, on track, \$1.76, en route, \$1.75, prompt, \$1.74; shorts, gray, on track, \$2, en route, \$2, prompt, \$1.98.

ST. LOUIS.

St. Louis, June 13.—Nominally unchanged. Offerings and demand both light. Bran quoted nominal at \$30.50@31. Mixed feed at \$32.50 and gray shorts at \$35.50@36. Oat feed quoted at \$9 and white hominy feed (sacked) at \$41.50. Alfalfa meal—No. 2 in s. h. sks. quoted at \$21. No. 1 at \$25@25.50, and choice at \$27@28; no sales.

FEED STUFF SITUATION.

Mill feed market up until the latter part of last week continued very firm account dry weather and increased demand from scattered territories. The general range, however, the last of the week, with the breaks in the grain markets, caused a break in mill feeds. The advance toward the middle of the week offset by the declines the end of the week made the average for the week at the close about the same as the preceding week. With the lowering of the markets Friday and Saturday, the volume of buying decreased—buyers holding off for still lower prices. The Southwest market is getting on a basis a little closer to the Northwest market, although limited production from the mills in the Southwest with a fairly good demand from Texas and other Southern states have tended to hold prices about on the same level.

MINNEAPOLIS.—Bran, \$28; standard middlings, \$31 to \$31.50; flour middlings, \$35; red dog, \$42.

CHICAGO.—Bran, \$30.60; standard middlings, \$33.60 to \$34.10; flour middlings, \$37.60; red dog, \$44.60.

KANSAS CITY.—Bran, \$28 to \$28.50; gray shorts, \$34.

ST. LOUIS.—Bran, \$30.40 to \$30.90; gray shorts, \$36.40.

ALFALFA MEAL.

Market quiet. New crop meal being offered but not very freely due to the shortage of the first cutting with no definite prospect on later cuttings account dry weather. Nominally quoted, new bag basis, choice, \$30.50; No. 1, \$28; No. 2, \$22. Fine ground grades, \$3 to \$4 a ton premium.

REGROUND OAT FEED.—Both offerings and demand limited. Market holding about the same, although the tendency is a little firmer account curtailed production. Reground, \$8 to \$8.50; unground, \$9 to \$9.50.

HOMINY FEED.—A little more free offering with decreased demand. Nominally quoted white, \$41 to \$42.50; yellow, \$39.50 to \$41.50. In bulk where available, \$1 to \$1.50 a ton less.

LINSEED OIL MEAL.—Market is holding firm with the mills unwilling to discount the market as they are apparently well taken care of at this time on shipping directions and shipments coming out much slower. Nominally quoted, resellers, \$44.50 to \$45, Chicago. Pea size \$1 a ton more. Minneapolis, fine ground, \$42.75. Oil meal in bulk where available \$2 per ton less.

DRIED BUTTERMILK.—Demand is very strong and practically no cars are immediately available. Quotations are as follows: In carlots, 6 to 6¼ cents, and l. c. l., 7 cents.

COTTONSEED MEAL.—The market is firm, production is light, and demand fair. Today's quotation for 43 per cent protein, Chicago basis, is \$45.55.

PACKERS' PRODUCTS.—Demand for packers' products continues very good and prices are quite firm. Today's quotations are as follows: Meat scraps in carlots f. o. b. Chicago, \$55 per ton; 60 per cent protein digester tankage, \$55, with raw bone meal unchanged at \$50.

GLUTEN FEED.—The market is oversold and there is a demand that cannot now be filled. Prices are nominally as follows: In bulk \$33 a ton, sacked \$35.80. Gluten meal of 40 per cent protein \$45.80 in sacks and \$43 in bulk.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33 to \$38 per ton, depending upon size of charcoal. Less than carlots, \$35 to \$50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

Alfaifa Department

NEED RAIN.

VINITA, OKLA. — But little alfalfa is grown here.

Usually we have a great amount of prairie hay here. Unless we have a great amount of rain soon, we will not have one-half of a ton per acre. Corn looks fair, clean and well cultivated. Oats short by the need of moisture. Wheat poor, almost a failure.—J. R. Carter, June 12.

ALFALFA MEAL MARKET.

KANSAS CITY, June 13.—Production of alfalfa meal this week was light, owing to a shutdown by the largest local commercial plant. The shutdown was ascribed to the need of overhauling machinery prior to the new-crop movement. Unfilled sales of a scattered character were declared to be sufficient for this month's operations and ample bookings for July were expected to be made in the next three weeks. New hay is not being ground extensively. Mills seem to have plenty of old hay for their needs. No. 1 meal was reduced 50¢@1 a ton for the week, despite higher hay, but other grades were unchanged. Prices per ton for carlots are: Choice, \$26.50@27.50; No. 1, \$23.50@24; No. 2, \$19@20; No. 3, \$18@19.

Trade in grain and molasses feeds slowed up this week. Sales were restricted to horse and mule feeds in the South and poultry feeds in various directions. There was but one change in the price list. This was a reduction of 50¢ to \$1.50 a ton in scratch poultry feeds. Carlot quotations, per ton, were: Dairy feeds, \$35@46; cattle, \$38.50@44; hog, \$46@52; pig, \$68; horse and mule, \$33.50@43.50; alfalfa-molasses, \$26@32; scratch poultry, \$48.50@54.50; mash poultry, \$49@77.

WORLD'S CEREAL CROPS.

The Bureau of Agricultural Economics of the U. S. Department of Agriculture has prepared the following estimates of wheat, rye and barley acreage and of wheat production for 1925, with comparisons; all figures in thousands (000 omitted):

Crop and Country.	Average, 1909-13.	1924.	1925.
WHEAT.			
United States:	Acre.	Acre.	Acre.
Winter	28,356	36,438	32,813

WHEAT ACTION A SURPRISE.

Action in wheat since the government report was issued has been a great surprise, as well as a serious disappointment to a majority of traders. Apparently there had been a large accumulation of long lines of wheat during the month of May and the first week of June, on the pessimistic crop outlook. After the report was issued a general unloading and taking of profits caused a greater decline than apparently is war-

ranted by conditions. The rain for the past two or three days, however, in the spring wheat regions and elsewhere has caused quite a change in sentiment and prices may recede still further before we get another upturn.—B. C. Christopher & Co., Kansas City, Mo.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending June 6, 1925 (000 omitted):

Articles and countries	Week ending June 6, 1925.	July 1, 1925.	July 1, 1924.
Barley	34	309	20,652
Corn	200	280	7,486
Oats	564	3	8,644
Rye	585	47,100
Wheat	*1,837	2,170	187,709
To Italy	25,289
United Kingdom	56	111	33,916
Other Europe	1,705	539	64,876
Canada	56	2	49,407
Other countries	20	1,518	9,221
Total U. S.	2,635	3,347	271,591
Canadian in transit:			
Barley	415	111	13,429

MILLS AND ELEVATORS

The U. S. Department of Agriculture recently recommended a new mixture for killing WEEVIL in grain, stating that the mixture was Non-Inflammable and Non-Explosive and could be used without injury to man—at the same time leaving NO ODOR or TASTE in the grain.

"TETRI-CIDE"

For your convenience we are placing on the market the above mixture ready for use, in 30 and 50 gallon Drums, at \$2.25 and \$1.95 per gallon respectively, F. O. B. shipping point. The drums are charged extra at \$6 each, but returnable for full credit within 90 days. Our name and trade-mark for this mixture is "TETRI-CIDE."

For a General Non-Poisonous and Non-Explosive Insecticide for killing moths and spraying for insects generally in mills and warehouses, we recommend

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley at Chicago:

June 8....\$0.86@0.93	June 11....\$0.86@0.93
June 9.... .86@.93	June 12.... .86@.92
June 10.... .86@.93	June 13.... .86@.93

Receipts of barley at Chicago for week ending June 13, 1925, were 120,000 bus., compared with 112,000 bus. same week 1924; shipments, respectively, 37,000 bus. and 69,000 bus.

BARLEY MARKET.

CHICAGO.—Market quiet and steady in tone. Car of quality barley sold at 93c, with 88c the next best sale, and screenings at 70c. Good demand exists and offerings moderate. Shippers took 1 car. Exports for the week were 1,064,000 bu., against 358,000 bu. last year. Visible decreased 46,000 bu.; last year increased 2,000 bu.; total, 1,828,000 bu.; last year, 589,000 bu. Local stocks decreased from 2,000 bu.; total, 155,000 bu.; last year, 138,000 bu. Malting quotably 86@93c. Feeding and mixing, 74@86c; screenings, 50@74c. Cars, 15.

MILWAUKEE.—Receipts were light in the Milwaukee barley market last week and buyers readily absorbed the offerings. The demand was fair but the prices remained steady and firm. Quotations closed unchanged for the week. Choice to fancy, 48 to 50 lb. test, quotable at 93@94 cents; fair to good, 44 to 47 lb. test, 85@93c; light weight, 40 to 43 lb. test, 82@90c; feed, 70@85c. Iowa quoted 80@94c as to quality; Wisconsin, 80@94c; Minnesota, 80@94c; Dakota, 80@94c; feed and rejected, 70@85c.

DULUTH.—No relaxation was shown in buying of barley on this market during the last week. Demand was reported to cover lots that had been sold for eastern shipment. Offerings were not as heavy as they had been running, amounting to 134 cars. Spot barley closed 1c up at from 72c to 87c.

MINNEAPOLIS.—Early in the week the demand for all grades of barley was of a keen character but toward the close the demand for feeding quality barley fell off. Choice stuff, however, was in excellent request right along and brought firm to strong prices right through the week. The government report was construed as being moderately bearish but like the bullish one on other grains, was largely ignored after the first few minutes of trading the day after its issue. Today, the range of sales was from 71@86c, according to quality. Local stocks total 589,028 bus. vs. 645,593 a week ago and 64,365 a year ago.

KANSAS CITY.—Sales of barley this week were all from store, as receipts were nothing. There was a fair manufacturing demand. Prices weakened with other grains and closed unchanged to 2c per bushel lower, with No. 3 at 83@85c and No. 4 at 82@84c. Due to hot and windy weather, some fear regarding the western crop developed, but this was partly allayed by rains on Thursday and Friday. Stocks in Kansas City decreased 7,000 bus. to 6,000, against 10,000 a year ago.

SPECULATION CONTINUES TO RULE RYE PRICES.

Outstanding option trades, as well as the volume of each day's trading in "futures," indicate that the rye price

is still dominated by speculation. While the quantity of rye left in first hands is almost negligible, the terminal stocks are ample to supply several times the needs of the domestic trade until new grain moves. However, these stocks appear to be held for the purpose of insuring delivery on deferred options, leaving current needs, which are light, to be filled from daily receipts, which are less. The result is sharp premiums and wide fluctuations. Buyers should cover old crop needs whenever "weak" spots develop.—Frank H. Blodgett, Inc., Janesville, Wis.

RYE MARKETS

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending June 13, were:

	Mpls.	Dul.	Chi.	Win.	Mil.
June 8\$1.15	\$1.14½	\$.....	\$1.15½	\$1.15	
June 9 1.17	1.16½	1.18½	1.17	1.17	
June 10 1.12½	1.13	1.12	1.13½	1.17½	
June 11 1.13½	1.13½	1.13½	1.14½	1.14	
June 12 1.11	1.10½	1.12½	1.14	1.11½	
June 13 1.08½	1.08½	1.08½	1.11	

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending June 13 were:

	Mpls.	Dul.	Chi.	Win.	Mil.
June 8.....	23	19	1	..	2
June 9.....	3	12	2	4	1
June 10.....	10	4	..	2	..

June 12.....	8	11	2	3	2
June 13.....	4	10	3	1	1
Total	63	58	8	10	6

CHICAGO RYE FUTURES.

Following is the range for future prices for rye for the week ending June 13:

June	July	September	December
8 1.16½@1.18½	1.18½@1.21	1.21½@1.24	
9 1.17½@1.19	1.19@1.21	1.21½@1.24½	
10 1.12½@1.21	1.15½@1.22½	1.19½@1.26½	
11 1.11½@1.15½	1.14@1.17½	1.16½@1.21½	
12 1.10@1.13½	1.12@1.16	1.16@1.19½	
13 1.09½@1.12½	1.12@1.14½	1.15@1.17½	

Receipts of rye at Chicago for the week of June 13, 1925, were 7,000 bus. vs. 26,000 bus. same week of 1924; shipments were 1,000 bus. vs. 54,000 bus. same week of 1924.

RYE MARKET.

CHICAGO.—Closed 4¼@6½c lower for futures and easier on car lots. Trade was only fair and the market not very active. Continued liquidation was in evidence, influenced by the weakness in other grains. Demand was light and largely local. Visible supply increased 53,000 bu. to 10,340,000 bu.; last year, 16,946,000 bu. Local stocks decreased 76,000 bu. to 4,018,000 bu. Exports for the past week 861,000 bu.; year ago, 771,000 bu. Car lots were in good demand at 1c over July for No. 2. Offerings light. Local inspection, 2 cars. No. 1 and No. 2 sold at \$1.09.

MILWAUKEE.—The Milwaukee rye market was easier last week and futures dropped off slightly in price. A good shipping demand prevailed. Offerings were mostly offgrade with moisture content. Receipts were six cars and quotations closed 7@8 cents lower. The market closed at \$1.10½@1.11½ for No. 2, inside for Wisconsin, ranging July price to 1 cent over depending on billing.

NEW YORK.—There was a scattered business in rye for export during the week with total transactions amounting to about one-half to three-quarters million bushels.

DULUTH.—Rye market was weak and irregular during the last reflecting the situation in the wheat market. In spite of the bullish government crop report persistent selling was noted. Receipts from the country fell off so that on some days there were scarcely sufficient cars on track to make a market. Closing prices for No. 1 rye were 8½c off at \$1.08½.

MINNEAPOLIS.—News on the new crop of this grain is of conflicting character, if one compares the government crop advice as of June 1 and those coming into local commission houses. The former made the crop close to 57,000,000

bushels, while on the other hand, many reports of a private nature can see nothing but a very short rye outturn. One local man placed his estimate at as low as fifty per cent of last year's total, which would be in the neighborhood of 30,000,000 bushels. If this latter prediction comes true, it certainly looks as though the futures market is being sadly neglected at the present.

During the past week, the mills refused to get into the market for the current offerings and demand from other sources being equally poor, the net result was a falling off in premiums for the week ending today. Today, No. 1 rye was bringing ½c over July and the No. 2, July price at ½c over.

Minneapolis stocks total 418,961 bushels vs. 411,547 a week ago and 6,456,727 a year ago.

Beans and Potatoes

STOCKS LIMITED.

CASNOVIA, MICH.—We find very few beans left in growers' hands and limited stocks in elevators.

Growing crop looking good and acreage somewhat larger than last year of both white and colored varieties.

We look for increased yields this season as planting and growing conditions so far have been ideal.—J. L. Norris & Son.

BEANS NEED RAIN.

VASSAR, MICH.—Beans as well as all other crops have suffered considerably from the long drouth, as we have only had about one-fifth the normal rain fall during May and June. Hay, wheat and oats show only small growth. Wheat is heading out on very low straw and small head which means a light yield. Farmers have been marketing beans quite freely; consequently stock in growers' hands is very low for this season of the year, and it would not take much of a crop scare to advance prices materially.—Miller Grain Co.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of June 13:

Beans—Chicago—Fair demand exists; prices steady. Per 100 lbs.—Spot navy beans, Mich., fancy, \$5.90@6; red kidney, fair, stock, \$9.75@10.00; large, dark, extra quality, \$12; brown Swedish, \$5.50@6; lima beans, fancy, \$9@10; do, new California, \$14@15; poor, dirty, broken, less.

St. Louis—Quote choice hand-picked Michigan white beans at \$6.25 and prime machine-picked at \$6. Scotch peas 7¼c, green split peas 9c and yellow 7c per lb. California lima beans at \$16.

San Francisco—Whites, small, 8c; do, large, 7¼c; pinks, 9c; limas, 15c; cranberry, 8c; kidney, 12c; Mexican garbanzas, 11½c; lentils, large, 9c; do, small, 8c; black eye, 12c; Mexican reds, 8¼c; speckled bayos, 8c; bayos, 8¼c. Peas—Split peas, yellow, 7½c; green peas, 8c.

Boston—Car lots, per 100 lbs., N. Y. and Mich.: Choice hand-picked beans, \$6.35@6.50; fair to good, \$6.10@6.25; California small white, \$8.35@8.50; yellow eye, extra, \$7@7.25; fair to good, \$6.50; red kidneys, choice, \$10.75@11; fair to good, \$9.50@10; California limas, \$15.25@15.50; native green peas, \$7@7.50; Canada, \$5.25@5.50; split, \$5.50@5.75; jobbing prices, 25 to 50 cents above car lots.

New York—Continued firm feeling in red kidneys, though trade none too active. Pea beans held about steady. White kidneys dull and weak, with bulk of the limited business at \$8. California limas held with confidence in most quarters, though values irregular. Black

eye peas steady to firm. Domestic—Marrow, \$9.25@9.50; pea, \$6.35@6.50; red kidney, \$11.25@11.50; white kidney, \$8@8.25; lima, Cal., \$15.25@15.50. Imported, 100 lbs.—Marrow, \$8.25@8.75; white kidney, \$7.25@7.50; lima, Mad., 1924-25, \$12.25@12.50; 1923-24, \$11@11.50; 1922-23, \$9@9.50; lima, Europe, large, \$11.25; lima, Argentina, baby, \$11.75@12.00. Lentils—Chile, \$6.75@7; Russia, giant, \$7.25@7.50; avg., \$6.25@6.50. Peas—Domestic, 100 lbs.—Black eye, \$11@11.25; yel. split, \$6.25@6.50; gr. split, \$7.50@7.75. Imported, 100 lbs.—Green-Japan, \$6.75; Belgium, \$5.25@5.50; yel. split, \$5.50@6; gr. split, \$7.75@8; chick, Mex., imperial, \$11.75; monster, \$11.50; large, \$9.50.

Potatoes—Chicago—Old potatoes—Market steady. The trade was of a fair volume and considered good for a week-end. Buyers were mainly interested in the better grades and offerings had to be hard and sound to satisfy. Receipts were 29 cars and 101 cars on track. Sales reported today were: Per 100 lbs., Wisconsin, sacks, 2 cars at \$1.25, 1 car at \$1.35, 1 car at \$1.40, 1 car at \$1.50; Michigan, bulk, 1 car at \$1.35, 1 car Red Rivers at \$1.30. Bulk, per 100 lbs., Wisconsin, \$1.25@1.40; round white, sacks, Wisconsin, \$1.25@1.40; ordinary and poor, \$1.10@1.20. New potatoes—Market unchanged. There was a fair trade for a week-end, although the buying was mainly local. Buyers are steadily becoming more interested in the offerings and a large trade is looked forward to when the quality improves. Demand today was largely to fill some urgent orders and buyers were limiting their purchasing to absolute needs. Receipts were 41 cars and 136 cars unsold on track. Sales reported today were: Barrels, Carolina, 1 car at \$5.50, 1 car at \$5.75; Virginia, 1 car at \$6.00; sacks, per 100 lbs., Oklahoma, 1 car heated at \$2, 1 car at \$2.50, 1 car at \$2.65, 4 cars at \$2.80, 3 cars at \$2.90; Texas, 1 car at \$2.10, 2 cars at \$2.25; Ohio, Illinois, 3 cars at \$2.65. Barrels, stave, Carolina, \$5.25@5.75; showing heat and poor, \$4.50@4.75; slat barrels, \$4.75@5.25; Virginia, \$6; sacks, Arkansas and Oklahoma, triumphs, 100 lbs., \$2.50@3; heated and poor, \$2.00@2.10; Louisiana, No. 2, \$1.60; Illinois, Ohio, \$2.40@2.65. Sweets potatoes—Arrivals light; fair demand noted. Hampers, Tenn., Nancy Halls, \$3.25; Illinois, white yams, \$1.50.

New York—New potatoes easier and about 25c lower. Bermudas sold fairly; old sack potatoes slightly higher under a better demand. Jersey sweet potatoes more quiet. Delaware yams sold well. Fancy onions held firmly, much of the stock showing heat effects and market was irregular, with prices taking a wide range; Bermudas very slow; fancy Egyptian firm. Artichokes mostly poor and not wanted. Asparagus met a better demand at the higher prices ruling. Beans slow and weak, with much of the stock poor. Virginia beets quiet; Jerseys did not clear. Cabbage steady under a fair demand. North Carolina carrots easier; Virginia dull and easy. Celery was largely nominal. Corn active and higher. Cucumbers in heavy supply and lower. Egyptians quiet at the lower prices ruling. Jersey fava beans slow sale. Nearby lettuce mostly poor; California iceberg poor and slow sale. Lima beans mostly inferior. Jersey peas slow; Long Islands steady. Peppers steady to firm. Italian squash mostly large and poor. Tomatoes mostly poor and stocks did not clear. New potatoes—N. C. bbl., No. 1, \$1.50@6; No. 2, \$1.25@2.25; S. C. bbl., No. 1, \$2.50@4.50; No. 2, \$1@2.50; Virginia, bbl., No. 1, \$4.50@6.25; No. 2, \$2@3; Bermuda, bbl., No. 1, \$6.50@7. Old potatoes—Me., bulk, 180 lbs., \$2.25@2.50; car lots, cwt., \$1.15@1.20; 150-lb. sk., \$1.85@2.25; state, bulk, 180 lbs., \$2@2.25; 150-lb. s., \$1.60@1.80; L. I., bulk, 180 lbs., \$3.85@4; 150-lb. sk., \$3.25@3.40. Sweet potatoes—Jy., bst., \$1@3.50. Yams—Del., bskt., \$2.75@3.

BUCKWHEAT MARKETS.

MILWAUKEE.—Buckwheat prices in the Milwaukee market continued last week at \$2.10@2.15 per 100 lbs. for silver hull and \$2.20@2.25 for Japanese.

St. Louis.—Sale 1 car mixed to arrive at \$2.30 per 100 lbs.—straight Japanese worth more.

CHICAGO.—Steady. Fancy mixed and silver hulled buckwheat, \$2.35. Jap., \$2.65. Dirty seed less.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

Hay Department

Sec'y J. Vining Taylor of the National Hay Ass'n, has just completed the program for their 32nd annual convention at the Breakers Hotel, Cedar Point, Ohio, July 28, 29, 30. A splendid program, pertinent trade discussions on important matters and a particularly good list of convention addresses will be on tap.

ONE THIRD LESS HAY.

MATTOON, ILLINOIS.—We have had a very severe drouth here for the last two months. We have never seen the meadows in as poor condition since we have been located at Mattoon as they are at this time. We do not think there will be one-third as much hay made this year as there was last.

There is quite a little hay carried over from last year but the people that have it do not feel free to sell at this time for quite a good many of them think they will have to keep the old hay for themselves to feed as well as they will be able to get more money for it.—*Phillips & Johnson, per S. W. Phillips.*

FROM CINCINNATI.

CINCINNATI.—Thinking some of your readers who do not have the opportunity to closely observe the Cincinnati hay market quotations may be interested in conditions here at present, we would like to advise that there is an extreme scarcity of hay arriving, due in a great measure to the fear among so many farmers in the territory supplying this market, that the drought they are experiencing may be general, and that the coming hay crop will be seriously curtailed in consequence. Some sections are reporting rains, which will do considerable good, as grass crops seemingly can stand considerable punishment, before being completely destroyed, and it in our opinion is not proper wisdom to get set to the one view too strongly, for a goodly volume of the old crop is reported to be still on farms, which should more than

make up for what shortage may appear in the coming crop.

Too heavy a crop makes no money for any one, in these days of mechanical transportation, and an excess of fear now, when higher prices available are not accepted, may mean more losses later when the crop proves to be greater than anticipated.

We hope some farmers and holders will accept the opportunity to make good sales while it is available.—*Dan B. Granger & Co., by Jno. E. Collins, Jr.*

SAN FRANCISCO HAY MARKET

The San Francisco hay market is still a victim of freakish weather and a most unusual season. After the heavy rains of last week and with the first clear weather, farmers commenced actively cutting hay and grain. Now, for the last two or three days, quite a sharp rain has been wetting the crop again, and although the storm has not been heavy still sufficient water has fallen to make a loss and a very serious delay in all crops of the field. Trading is practically at a standstill, as ideas are divided as to whether the great amount of damaged hay is going to drag down the price of the better grades by competition or whether better prices will be paid for good hay which will be more scarce. The majority incline to the opinion, however, that there is an immense crop of hay, good, bad and indifferent, and that it will all be worked into consumption some way and at very cheap prices. Very little grain is moving as yet, one or two small sales are reported on a basis of about \$12 to \$14, f.o.b. country points, for good grades. Volunteer has been selling from \$7 to \$10.

General demand is very light. Pastures were never better and will undoubtedly continue very late in the season, in addition to which great quantities of stock are being turned upon the damaged fields.—*A. W. Scott Co., June 6.*

KANSAS CITY HAY NOTES.

By T. J. Tanner, Correspondent.

A fine rain, ranging from one to four inches, fell over Kansas June 11 and 12, abundantly moistening all territory except the southeastern counties and the western third of the state. This is expected to be of great benefit to both tame and wild hay, which, like corn and other crops, had begun to suffer from heat and drouth. Oklahoma, Nebraska, Iowa and Missouri, were recipients of moisture to a fair extent.

Bryant Arnold of the Kansas City Hay Co., who spent last week in Kansas, said on his return that dry weather was an adverse factor in the growth of

North & Company
 Receivers—Shippers
Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

the second alfalfa crop around Winfield, which is in the southern part of the state. At Independence, Iola and Emporia the crop had a good appearance. He found a good prospect for prairie hay at Yates Center. The clover and timothy crops in Kansas seemed to have been injured by the cold weather of May.

R. E. Gillett, hay salesman for William Musterman, is spending his vacation at Hope, Kan.

"The first cutting of alfalfa hay in Kansas is practically off hands," said J. C. Glover Wednesday, "but the initial crops of Nebraska and Colorado are coming forward. Kansas City draws hay from so wide a territory that there is no interim between the movements of the first and second cuttings. Hay from the different states simply blends after the harvest starts. I hear there will be a short crop of alfalfa hay this year. However, if prices rule high, as predicted, plenty will come to market. Any reduction in the crop of prairie hay will be offset by the large carry-over in the country."

Owing to the fact that there are more dry spots throughout the consuming territory than usual this year, some Kansas City dealers are looking for a broader demand for alfalfa hay during the coming season than on the old crop. The first cutting in Kansas and the western states was not over 50 per cent of the amount saved on a similar cutting last year, while the second cutting made poor growth on account of dry weather until the big rain fell Thursday night and Friday. Hay authorities are looking for a year of high prices. The optimists go further and say the alfalfa market will be the leader for other kinds of hay. Wild hay sold so cheap on the last crop that there will be less effort to cut a big acreage this summer. Many hay fields are being pastured and more would be turned to stock if they were fenced.

Under the title "Things for the Hay Man to Think About," G. D. Carlisle of the Carlisle Commission Co. says in a circular issued this week: "A statement emanating from the National Chamber of Commerce says there are 4,500,000 automobiles on 6,200,000 farms in this country. This estimate does not take into consideration the tractors and motor trucks. There is a car for every six and one-half persons in America. Naturally, these cars lessen the demand for prairie and timothy hay and account for the dullness of those horse feeds. As to alfalfa, more strictly a dairy feed, the situation is not so bad."

According to a preliminary survey by J. C. Mohler, secretary of the Kansas State Board of Agriculture, there are 1,641,000 acres of tame hay in Kansas this year, as compared with 1,593,000 in 1924. Increases are 2 per cent each in alfalfa and timothy and 9 per cent in mixed timothy and clover. The June 1 condition of alfalfa is 70 per cent this year or against 82 last year; clover, 81 per cent this year and 77 last; timothy, 82 per cent this year and 76 last; mixed timothy and clover, 86 per cent this year and 79 in 1924. Production of tame hay this year is estimated at 2,914,000 tons, as compared with 3,262,000 a year ago. Wild hay promises well, the condition being rated at 85 per cent, as compared with 80 per cent last June. This year's outlook is for 941,000 tons of wild hay as compared with a crop of 1,034,000 tons in 1924.

HAY MARKETS.

MILWAUKEE.

June 13.—Prices remained unchanged in the Milwaukee hay market last week as a result of the dull condition which prevailed. Current quotations per ton f. o. b. Milwaukee are: No. 1 timothy, \$14@15; No. 2 timothy, \$12@13; No. 1 mixed, \$13@15.50;

No. 2 clover mixed, \$11@12; sample hay, \$6@8; marsh feeding, \$10; packing, \$9; rye straw, \$9@10; oat straw, \$9@10.

NEW YORK.

June 11.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

	Hay Straw
Receipts for week, tons.....	1,085 55
Receipts last week.....	305 20
Receipts from Sept. 1, tons.....	47,305 1,077

Receipts at all rail terminals have continued extremely light and barely sufficient for requirements. Values have held firm to a shade higher but due to a limited demand any attempt to force prices beyond the slight advance seems difficult at this writing.

As a result of continued light receipts stocks on hand show a further reduction. Practically all classes of hay are in extremely light supply, the call being active on the better quality timothy.

On the better quality hay values at Manhattan and Brooklyn are about on a par, but on common stock prices at Manhattan range slightly higher.

Rye straw is in very light supply and active demand.

New invoices are reported light.

Federal grade quotations for large bales are as follows: Timothy—No. 1, \$25@26; No. 2, \$23@24; No. 3, \$18@21. Light clover mixed—No. 1, \$23@24; No. 2, \$18@21; No. 3, \$15@17. Medium clover mixed—No. 1, \$18@21; No. 2, \$16@17. Light grass mixed—No. 1, \$23@24; No. 2, \$18@21; No. 3, \$15@17. Heavy grass mixed—No. 1, \$21@23; No. 2, \$17@19; No. 3, \$14@16. Straw—Rye, No. 1, \$18@20.

DULUTH.

June 13.—Dealers complained that trading in hay was the lightest in a considerable period with wood and other operations in which large numbers of horses had been used closed down. The movement from the country was curtailed to prevent stocks accumulating. Closing prices in hay are unchanged as follows: Timothy—No. 1, \$16; No. 2, \$15. Mixed timothy—No. 1, \$15; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$13; No. 3, \$11. Midland—No. 1, \$10; No. 2, \$8. Straw—Rye, \$9; oat, \$8.

MEMPHIS.

June 13.—Receipts for the week were 52 cars of hay but stocks increased slightly as demand has been poor. The tone of the market is steady due to the firmness prevailing at shipping points. The dry spell in this territory has apparently had small influence on demand for hay. Quote: Alfalfa—No. 1, \$22.50; standard, \$21; No. 2, \$20. Timothy—No. 1, \$23.50; standard, \$22.50; No. 2, \$21.50.

BALTIMORE.

June 13.—There is considerable apprehension regarding the effect of continued dry weather on the nearby hay crop this year which is expected to be short. The local hay market is amply supplied with medium and low grade stuff for which the inquiry is indifferent. Of top grades of timothy and choice light clover mixed hay there is no pressure of offerings. Prices steady on good hay.

Straw of all descriptions holds its own in price under light spot offerings and a fair jobbing demand. Quotations follow, hay, per ton: Timothy—No. 2, \$17.50@18; No. 3, \$14.50@16. Light clover mixed—No. 1, \$17@17.50. Clover mixed—No. 1, \$16.50@17; No. 2, \$14@15. Straw—No. 1 straight rye, \$18.50@19; No. 1 wheat, \$15@15.50; No. 1 oat, \$15.50@16.

TOLEDO.

June 15.—Hay does not show much pep though there may be some activity if the new crop is small. There is so much hay to be carried over that dealers look for low prices this season again though feeding may be heavier if the oats crop is short. Farmers are likely to feed their old hay and when stocks are exhausted prices could easily work higher. At present the demand is very dull and receipts and shipments are both light.

Prices last week were as follows: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13.50; No. 1 heavy clover mixed, \$12.50; No. 1 clear clover, \$11; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$20; sound dry wheat straw, \$8.50; sound dry oat straw, \$8; per ton, f. o. b. Toledo.

KANSAS CITY.

June 13.—Beginning of the wheat harvest in Kansas and Missouri helped to account for smaller hay receipts this week. A light movement is expected until this work is over. Total arrivals were 293 cars, as compared with 403 a week ago and 276 a year ago.

Alfalfa offerings fell off 50 cars, to 184, as against 107 for the corresponding week of 1924. As far as Kansas is concerned, the first cutting is over and it was a light one but of good quality. New hay from Nebraska and Colorado is beginning to appear. Demand for dairy qualities for both local and shipping accounts was active with inquiries as far southeast as South Carolina. Prices advanced \$1@1.50 a ton on the upper grades and even No. 3 was \$1 higher at the close. Damaged and off-grade hay was slow.

Prairie receipts were 89 cars, as against 141 a week ago. There was no change in prices. Dry hay, sound and of good color, met a good request, but other kinds were slow and weak.

An aggregate of 20 cars of timothy, clover-mixed and clover reached the market. This was 8 cars less than a week ago. A car of new clover arrived Tuesday and sold for \$10. It graded No. 1. There was a moderate demand for all varieties and

Price ranges were unchanged. New cuttings of timothy and clover-mixed are expected during the coming week. The straw receipts were 2 cars. One was oats, selling for \$8.50, the other wheat, at \$8.

Carlots of hay and straw are quoted as follows, per ton, f. o. b. Kansas City: Alfalfa—Choice, \$19@20; No. 1, \$17.50@18.50; standard, \$15@17; No. 2, \$12.50@14.50; No. 3, \$9@12. Prairie—No. 1, \$10@12; No. 2, \$8@9.50; No. 3, \$5.50@7.50; packing, \$4@5. Timothy—No. 1, \$14.50@15; standard, \$13@14; No. 2, \$11.50@12.50; No. 3, \$9@11. Clover mixed—Light, \$14@15; No. 1, \$12.50@13.50; No. 2, \$9@12. Heavy clover mixed—No. 1, \$14@15. Light grass mixed—No. 1, \$17@17.50. Straw—Straight rye, \$15@15.50; wheat, \$15@15.50; oat, \$14@14.50.

PHILADELPHIA.

June 13.—Hay is dull and although receipts were small they were fully equal to requirements. Prices are same as quoted a week ago. Straw is quiet but steady under light receipts. We quote hay (federal grades): Timothy—No. 1, nominal; No. 2, \$18@19; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$17@18; No. 2, \$15@16; No. 3, \$12@14. Medium clover mixed—No. 1, \$15@16; No. 2, \$13@14. Heavy clover mixed—No. 1, \$14@15. Light grass mixed—No. 1, \$17@17.50. Straw—Straight rye, \$15@15.50; wheat, \$15@15.50; oat, \$14@14.50.

OMAHA.

June 12.—Prairie hay receipts fair. Demand good on better grades. Prices steady. Poor hay slow sale at any price and not wanted. Alfalfa hay receipts light. Demand good for all grades if sound. Some out of condition hay coming in and hard to move at any price. Prices strong. Prices below are for carload lots: Upland prairie—No. 1, \$11.50@13; No. 2, \$9@10.50; No. 3, \$7@8. Midland prairie—No. 1, \$11@12.50; No. 2, \$9@10; No. 3, 6@7. Lowland prairie—No. 1, \$6.50@7.50; No. 2, \$5@6. Alfalfa—Choice, \$18; No. 1, \$16@17; standard, \$13@15; No. 2, \$10.50@12.50; No. 3, \$8@9. Straw—Oat, \$7@8; wheat, \$6@7.

CINCINNATI.

June 15.—Members of the local hay trade have seldom seen such a period of intense stringency as was felt in the market the past week, or seen the channels of distribution from the producing to the consuming end shrunk to greater insignificance. Less than 50 cars were received in the yards and with the eagerness of buyers to secure stocks the market naturally took on an upward tendency and recorded advances of \$2 per ton for timothy and light mixed, and \$1@1.50 for heavy mixed and clover. The demand from the South and interior was urgent for immediate shipment, and inquiries increased from buyers who were desirous of taking on a few cars under the belief that prices will not show much of a reduction during the life of the present crop, but the advanced quotations had higher prices bid to the country failed to bring the needed supplies. Top grades of all kinds are wanted immediately, but medium and even common will sell readily under the existing acute scarcity. Timothy—No. 1, \$20.75@21.25; No. 2, \$19@20; No. 3, \$16.50@17.50; threshed, \$8.50@10; no grade, \$8@10. Heavy clover-mixed—No. 1, \$16@17. Light clover mixed—No. 1, \$18@19. Clover-mixed—No. 1, \$17@18; No. 2, \$14.50@16.50; no grade, \$10@11. Clover—No. 1, \$16@17; No. 2, \$12@15; no grade, \$8@9. Alfalfa—No. 1 second cutting, \$18@19; No. 2 second cutting, \$15@16.50; No. 1 first cutting, \$16@17; No. 2 first cutting, \$12@14. Sound sample grassy hay, \$9@10. Straw—Wheat, \$10@11; oat, \$10@11; rye, \$14@15.

PORTLAND, ORE.

June 11.—Buying prices f. o. b. Portland: Alfalfa, \$19@20 ton; valley timothy, \$20@21; eastern Oregon timothy, \$23@24; clover, \$16.50@17; oats, \$19@20; oats and vetch hay, \$19.50@20.50; straw, \$8@8.50.

BOSTON.

June 13.—No. 1 timothy, \$25.50@26; No. 2 timothy, \$22@24; No. 3 timothy, \$17@19; eastern, \$16@23; clover mixed, \$21@24. Straw—Rye straw, \$21@22; oat straw, \$13@15.

CHICAGO.

June 15.—Receipts very light, only 27 cars total. As the advices of country loadings are very light, there is nothing in sight but a continued firm market. Excellent call for good clean soft packing hay. Straw of all description scarce and wanted.

Timothy—No. 1, \$23@25; No. 2, \$20@22; No. 3, \$16@18. Timothy and clover, light mixed—No. 1, \$21@22; No. 2, \$18@20; No. 3, \$14@16. Timothy and clover, heavy mixed—No. 1, \$17@19; No. 2, \$15@17; No. 3, \$12@14. Timothy and clover, medium mixed—No. 1, \$18@20; No. 2, \$17@18; No. 3, \$14@15. Timothy and grass, light mixed—No. 1, \$20@21; No. 2, \$18@19; No. 3, \$14@16. Timothy and grass, heavy mixed—No. 1, \$16@17; No. 2, \$15@16; No. 3, \$12@13. Timothy grass and clover mixed—No. 1, \$17@18; No. 2, \$15@16; No. 3, \$13@14. Clover—No. 1, \$15@16; No. 2, \$13@14; No. 3, \$10@12. Sample grade—No. 1, \$9@12. Alfalfa—No. 1, \$14@22. Prairie—Ill. and Wis. feeding, \$13@15; packing, \$12@14; No. 2 to choice Kans., Okla. and Mo., \$15@17; No. 3 weedy and off color, \$11@13; No. 2 to choice Nebraska, \$13@15. Straw—Rye, \$12@14; oat, \$10@11; wheat, \$9@10.

ST. LOUIS, MO.

June 15.—The arrivals of hay on both sides of the river were extremely light for Monday. A stronger tone and higher market can be expected for the remainder of the week. Quick shipments of high grades, as well as medium grades, will meet quick sale at full value.

Clover—None arriving. Demand better. Low grades improving. Alfalfa—Choice qualities wanted. Medium and low grades in fair demand only. Prairie—Choice qualities and No. 1 selling fairly well. No. 2 and lower grades still hard to place. Straw—Strong. No. 1 timothy, \$23@24; standard timothy, \$21@22; No. 2 timothy, \$17@19; No. 3 and sample, \$12@15; No. 1 clover mixed, \$19@21; No. 2 clover mixed, \$15@18; heavy mixed, \$16@18; No. 1 clover, \$17@19; No. 2 clover, \$14@16; threshed hay, \$11@13; choice alfalfa, \$24@26; No. 1 alfalfa, \$22@24; standard alfalfa, \$16@18; No. 2 alfalfa, \$13@15; No. 1 prairie, \$15@16; No. 2 prairie, \$12@14; rye straw, \$10@11; wheat straw, \$9@10.

HAY MARKET REVIEW.

The hay market assumed a firmer position with continued light receipts and more active demand during the week ending June 13, according to the weekly hay market review of the U. S. Department of Agriculture. Central Western markets were especially firm with sharply higher prices, but prices in Eastern markets advanced only slightly. Prospects of reduced crop in many sections led farmers to market their surplus more sparingly while some consumers became concerned about their future supplies.

Higher prices for hay are suggested by the department's June forecast of a 96,000,000 ton hay crop, compared with 112,000,000 tons harvested last year and 107,000,000 tons in 1923. Favorable weather till harvest may cause a heavier crop but if this forecast is borne out the production will be the smallest since the 1918 crop of 91,000,000 tons. Although an unusually large amount of hay remained on farms this spring the total supply, including crop and carryover, would be about 112,000,000 tons against 125,000,000 tons in 1924-25 and 120,000,000 in 1923-24.

The probable reduction is largely the result of the lower condition of the crop since the acreage remains 99.4 per cent as large as last year, although the timothy acreage decreased about 5 per cent. After an early start the growth of the hay crop was checked by cold weather and drought in some sections, while later the lack of moisture over a wide area was intensified by unseasonably hot weather. A reduction of about 200,000 tons was forecast for New England and about 15,000,000 tons for the North Central states, while a slightly smaller crop seemed probable in the Southern states, although the Mountain and Pacific coast states showed an increase over last year's production.

Timothy prices worked higher during the week on light receipts, especially of the better grades. Prices advanced at Chicago, Pittsburgh and at Cincinnati where hay was in urgent demand. Offerings were light at Southern markets and prices had an upward trend.

Alfalfa was firm with moderate receipts and a more active shipping trade to the South and Southeast, while dairies took more hay. California markets were practically unchanged with dairymen taking the bulk of the offerings at Los Angeles. Prairie was firm on light receipts while demand was more active on account of the scarcity of other hay.

CHICAGO HAY NOTES.

Lower grades such as number three and sample which were passed up by the trade not over ten days ago have been freely bought here the past few days and prices have shown quite a decided advance. All hay suitable for seed is wanted.

It is our belief that present conditions on this market are typical of what we can expect the rest of the season.

If you have hay to market you can let it come along with full assurance of its selling at satisfactory prices.

Rye straw is needed badly on this market, also good oat straw for packing purposes.—Albert Miller & Co.

All sales tame hay top or better quotations. Excited market. Quality fairly good. Country loadings light. Weather conditions ideal except in southern Michigan, parts of Ohio and Indiana. More showers predicted for these localities today.

Prairie and Marsh.—Good demand for both.

Straw.—All kinds urgently wanted.—Bridge & Leonard.

With buyers competing for the offerings, the demand at this time is urgent for all grades of tame hay. It looks like higher prices, and we are advising prompt shipments. Prairie hay market quiet, excepting for good packing, which is in demand. Straw market quiet.—E. W. Bailey & Co.

The first car of new hay of the season was received June 15 at Cincinnati by Dan B. Granger & Co. It was a very nice quality of clover, good green color, but short and showed some stubble. It was good and dry and showed no indications of heating. Competitive bidding was keen and the car sold at \$16.75 Cincinnati.

STATE NEWS.

[Concluded from page 23]

Anson, Tex.—J. T. Mayfield and his son, Y. B. have purchased the Richardson feed business and have taken charge.

Amarillo, Tex.—The Amarillo Feed & Seed Co. has installed new machinery for the manufacture of mixed feeds for cattle, horses, mules, sheep and poultry, costing \$25,000.

Houston, Tex.—Bids for the erection of a 1,000,000 bus. grain elevator to cost \$1,000,000 are being requested for the third time, by the Houston Port Commission, closing date June 18.

WASHINGTON.

Wentachee, Wash.—The warehouse being erected by Forest Davis will be completed soon.

Colville, Wash.—The Colville Flour Mills has installed special new machinery to manufacture a new process flour.

Bremerton, Wash.—Oscar Hendricks is conducting a seed and grain business under the name of Hendricks & Co.

Walla Walla, Wash.—John Hoffman is constructing a 100,000 bushel grain elevator on his ranch to handle this year's crop.

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

American Steel & Wire
Chicago New York Company

Montesano, Wash.—The seed, feed and implement department of Veysey Bros. has been bought by Earl C. Woodland of Aberdeen and Roscoe W. Holloway of Montesano, and they are operating it under the name of the Montesano Feed & Seed Co. Holloway is the local manager, Woodland remaining with the Woodland Bros. of Aberdeen.

WISCONSIN.

Columbus, Wis.—The Artificial Ice plant and feed mill of Leo Weisensels has been taken over by his brothers, Andrew, Otto, Herman, Carl, Frank and Will Weisensels.

CANADIAN VISIBLE.

Canadian visible supply of wheat decreased 2,252,000 bus. and oats 1,105,000 bus. last week. These statistics represent terminal stocks only:

	June 13, 1925.	June 6, 1925.	June 14, 1924.
Wheat	28,301,000	30,553,000	18,505,000
Oats	7,112,000	8,217,000	7,726,000
Barley	2,509,000	2,233,000	1,350,000
Rye	2,205,000	2,774,000	1,713,000

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 509,000 bu. last week; corn, 321,000 bu.; rye, 15,000 bu., and barley, 4,000 bu., while oats increased 37,000 bu. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	*Total.	Last yr.
Wheat	1,554	1,743	3,297,000	9,984,000
Corn	3,390	5,383	8,950,000	788,000

1922..	5,228,000	15,595,000	5,716,000	26,539,000

CHICAGO PROVISION REVIEW.

CHICAGO, June 15.—Scattered investment buying of lard and meats for future delivery was on a liberal scale, with prices covering a good range and closing well toward the best of the week. Lard futures 12½c higher, short ribs unchanged to 10c lower, and bellies 60 to 80c higher than a week ago.

Cold storage stocks at leading points in the country, as given by the Government report on June 1 were 138,324,000 lbs., against 151,499,000 lbs. May 1 and 127,948,000 lbs. June 1 last year, while the five year average for June was 134,115,000 lbs.

All the bulges brought out profit-taking sales by speculators and packers while on the breaks there was a liberal absorption of the offerings. Action of the grain markets had a great deal to do with influencing values. Hog prices were irregular and foreign markets largely higher. A provision specialist claims that lard is selling relatively

lower than other hog products, which has induced fair buying on the weak spots. The make of lard is not heavy and stocks while large are decreasing at a moderate rate. A fair quantity is being exported every week. Shipments from Chicago last week were 10,272,000 lbs. compared with 10,863,000 lbs. the previous week and 7,633,000 lbs. last year. Shipments of meats of 17,896,000 lbs. exceeded the previous week's and were less than last year's. Prices for the week follow:

	High.	Low.	June 13, 1925.	June 6, 1925.	June 14, 1924.

AMERICAN GRAIN EXPORTS.

The Department of Commerce re-
ported the following exports of grain
from the principal ports of the United
States to foreign countries during the
week ending June 13, 1925 (000
omitted):

Articles and countries.	Week ending June 13, 1925.	June 14, 1925.	July 1, 1924, to June 13, 1925.
Barley	531	79	21,650
Corn	228	121	7,714
Oats	476	2	9,217
Rye	273	51	47,381
Wheat	*2,126	615	190,217
To Italy		237	25,313
United Kingdom ..	525	87	39,789

-----------	-----------	-----------	---------	------------

A duty of 3.50 marks (1 mark equals
about \$0.238) per 220 pounds of wheat
and 8.50 marks per 220 pounds of flour
is proposed by the German government
effective Aug. 1, 1925. By Aug. 1, 1926,
these duties will automatically increase
to 5.50 marks and 18.00 marks, respect-
ively. This is intended as a protective
tariff for the milling industry.

Security from Lightning Losses

The Mutual Fire Prevention Bureau names lightning as
one of the two chief causes of elevator fires during 1924.

Take heed and protect yourself now. Insist on Under-
writers' Laboratories Master Label installation. Small in cost in proportion to fixed
investment, it assures your insurance reduction.

Fire protection is not available to most grain elevators. Stop this greatest of fire
menaces. Saving on insurance pays for a Security System in a few years.

We are manufacturers and installers of Underwriters' Laboratories approved lightning
conductor systems for grain elevators, warehouses, factories,
smoke stacks and other large structures. Write for specifica-
tions and information on how to prevent lightning losses.

BUSINESS AND TRADE CONDITIONS

IT is the purpose of this page in the weekly PRICE CURRENT-GRAIN REPORTER to interpret somewhat the news as it appears in other columns and to balance the favorable and disadvantageous bearing of such news on the business interests of our people.

An exceedingly interesting grain market has ruled for several days with substantial price reductions during the week and a good recovery at its close. In view of the heavy winter wheat shortage in the United States, it seems disappointing to many that foreigners are not more strongly in the market for our wheat. This opinion would seem to be supported by the unwillingness of farmers to dispose of new crop wheat except at their own price. A sectional movement is under way in the Southwest to retain for her own flour mills an unusually large percentage of local wheat.

An improved tone in the live stock market is gratifying with light cattle receipts and an advancing hog market.

The cotton futures market operating on the Chicago Board of Trade is creating more and more interest. The growing cotton crop has been largely dominated in price by weather conditions. On the whole, the situation is normal and it is to be expected that price advances should follow a drouth period and declines accompanying rains.

The mercantile exchanges in eggs, butter and poultry are unusually active, although certain cash commodities thereon are dull.

The several leading coal centers are beginning to talk of fall business. Spot sales for steam purposes are light and, of course, hard coal demand for heating is nil.

In several Metropolitan centers, notably Chicago, real estate transactions for the week were enormous. The outlook for the building trades is most favorable with a heavier tonnage of rough materials than a year ago. Fortunately for capital, which is undertaking this development work in such volume, the prices for building materials are relatively low.

The money market continues unusually easy, making bond prices higher and a rather dull trade in stocks. The discussion of impending mergers in many industries holds the floor. United States governmental bonds continue to hold firm at their present high levels. Small foreign bond offerings for the week and considerable irregularity in foreign bond prices has benefited domestic issues.

Exploiting the Farmer.

The best brains on matters pertaining to the great farming areas of the country are no doubt found within the ranks of the American Farm Bureau Federation. From this array of unquestioned ability has emanated some exceedingly interesting ideas. The latest is a questionnaire which is being broadcasted among farmers for a "farmers' mobilization" of their views. This survey covers questions of tariff, taxation, banking and immigration. In passing to a brief consideration of the motive back of the questionnaire rather than the slant it will bring on the farmer's viewpoint, we might first call the attention of Labor leaders to the recognition which is thus given the long efforts Labor has made to seek support from agriculture on immigration matters.

It has become common knowledge that farm leaders have in many instances proven to be the worst enemies of the farmer, seeking his support and offering assistance to him in the guise of friendship, but

through overzealous and sometimes crude methods reversing the results intended.

Now, it would seem on the surface of things that the present questionnaire is the opening gun in a carefully planned campaign, aiming to secure political ammunition. The character of the questions asked is suggestive of the replies to be received, and everyone knows how easily statements along certain lines may be secured through the right sort of questioning. The Farm Bureau has no doubt very definite arrangements in process which will include the entire list of actual or assumed farm needs. It has

REPORTS of black rust which are coming from a few sections of the spring wheat belt, while they may frighten a few of the timid ones, are not yet of sufficient volume to indicate any serious damage from that source and while these rust reports are somewhat earlier than is usual, it should be remembered that the wheat is from ten days to two weeks farther advanced than it normally is at this date.

The ultimate damage from rust will depend very largely upon the weather and while that is always the dominating factor, conditions at the present time are unusually favorable, good rains having fallen over practically all of the spring wheat area within the past ten days, the result being that some of the crop experts are revising substantially upwards their June first figures of the Spring wheat crop, one estimate putting it at 275,000,000 as against the government estimate of 254,000,000 bushels.

As from twenty to twenty-five per cent of that is Durum wheat of which only about one-third finds a market in this country, present indications point to perhaps 40,000,000 bushels of that variety as eventually available for export.

been the Farm Bureaus' practice to plead for action at the bar of justice through enactment of Congressional law, and during the summer we may expect more of a definite character from the questionnaire now in circulation which will lead to the old-time procedure that does not meet with the entire approval of either agriculturalists or others.

Our Banking System.

The banking and financial business throughout the United States is still relatively young like the rest of our country. It has been conducted along staid, conservative lines, differing therein from the enterprise and reputation for "pep" which is credited our commercial business fabric.

The bank of England, on the other hand, with centuries of prestige is hardly to be compared with the youngster on our shores who is fast growing out of his short pants.

These matters come up when such an important issue as the present re-chartering of the Federal Reserve Banks is before the nation. There should be no hesitancy granting such charters and in doing so the avoidance of all political influences is essential.

Excepting among certain petty critics, the Federal Reserve system stands solidly on a proper footing of service. The public is not expected to understand the inner workings of the banking system and the part

played therein by the Federal Reserve. Such people should be guarded in any unfavorable criticism of something about which they are not informed and leave the comments and action to those who do understand the changes, if any, which may be advisable in the future operations of the reserve system.

Foreign Trade.

Preliminary figures for eleven months of the fiscal year of the United States, which ends June 30, suggest a favorable merchandise trade balance approximating \$1,000,000,000. This is an increase of \$300,000,000 as compared with last year, which, bear in mind, is strictly foreign business and not at all associated with domestic trade. The publishers of the PRICE CURRENT-GRAIN REPORTER are accustomed to submit their readers' statistical data, knowing that the trade is able to grasp them. Therefore, although these items are so enormous that they can hardly be comprehended it is estimated that the total commerce of the country for the twelve months ending June 30 exceeds by \$900,000,000 the total volume of the year before. It serves to bolster up our courage in coping with foreign competition, financing our domestic and overseas trade and gives us some idea of our place in world affairs.

The Law—Not a Remedial Agency.

It is always open season for commodity exchanges and their members in the trial without jury plan of our legislative bodies, and the great multiplicity of laws already on the statutes and being ground out is everywhere admitted. In these days of conventions, the outside observer finds in this consideration a uniform attitude, however, that is inconsistent, apparently quite willing to sidetrack laws that are inimical to the particular class concerned, but in the same breath requesting legal protection for their own trade interests which should be conserved.

This merry round of law making with its consequences of both beneficial and harmful character will never make individuals or corporations more honest, more efficient and of greater value to the economic welfare of the nation. It is a bad and dangerous habit to expect paternalistic control by law of all human footsteps and business procedure. The grain trade is again facing a crisis which has arisen in the past and been successfully met, as the grain exchanges of the country are now considering further policing of the speculative side of their business. It will only be through cooperation of its members (in the right sense) that the many benefits of the futures markets shall be retained. More laws on the subject are certainly unnecessary.

The truth of the foregoing has been recognized for all time. In Biblical history, Paul said to the Galatians, "Wherefore then serveth the law? It was added because of transgressions." It was understood then and should be appreciated now that the law is a prescribing and corrective measure, not a remedial agency designed for assistance to mankind, because he must realize in his own conscience the necessity of changing his ways.

FLAG DAY

 **S**UNDAY, June 14, 1925, was flag day. The flag—the greatest tribute of song, story and patriotic eloquence have been paid it, and in the majestic meanings of that beautiful symbol are involved all our past achievements, our present possessions and hopes for the future.

The Constitution made the flag possible, just as it made this Republic real. In their co-ordinate power

and beauty they represent the spirit which has made America the admiration of the world.

The Constitution and the flag!

May they equally inspire our undying love and loyalty!—*Better American Federation.*

THE "COST PLUS" PLAN

IN AN EDITORIAL in our June tenth number we commented somewhat at length on the subject of "cost plus" in farming, in the course of which we asked a number of questions as to how such figures were to be secured, the editorial having been written not because we do not want to see the farmer prosperous and therefore happy, but because as we then saw it and as we still see it, the "cost plus" plan is preposterous.

The editor of one of the farm papers has taken us rather seriously to task for what we said, intimating that our thoughts were not constructive and giving us some cost of corn production figures to prove that supposedly typical farmers were producing that crop at a loss.

As we have already intimated, we want the farmers to prosper, but if the figures submitted prove anything, they certainly prove the utter fallacy of any cost plus plan.

For example, the range in value per acre of the 8 farms included in one study sent us, is from \$80 to \$300 per acre, and the interest charge, from \$4.40 to \$16.50.

As the \$80 per acre farm produced 15 bushels per acre, the interest charge per bushel is 28 cents, and as the \$300 per acre farm produced 35 bushels per acre, the interest charge is 47 cents.

Other interesting facts disclosed by the eight sets of figures included in this study are: Taxes range from \$1 to \$4 per acre; breaking stalks ranges from 18 to 80 cents; plowing from \$1.50 to \$2.35; double disking from 40 cents to \$1.50; harrowing from 22 cents to \$1.30; seed from 13 cents to \$4.00; planting from 32 cents to 50 cents; harrowing after planting, from 25 cents to \$1.30; harrowing second time, from 20 cents to \$1.30; hail insurance, from 30 cents to \$1.77; cultivating first time, from 32 cents to \$1, (3 more times same range); husking, from \$2.15 to \$3.50; board of man and team work for husking, from 75 cents to \$2; shelling, from 63 cents to \$2.10; hauling 5 miles, from 70 cents to \$3; four loads manure, from \$1 to \$4; spreading, from \$1 to \$3, and overhead, from 25 cents to \$4.

Some one may say however, that if the figures are averaged, the results would be satisfactory, but the actual results do not warrant such a conclusion, for the average cost of production per bushel upon these 8 farms was \$1.28, while the actual cost per bushel upon 4 of them was in excess of that amount.

Striking an average, when there are such wide ranges in costs for such comparatively simple operations as those indicated above, and fixing prices to the consumers on such bases, certainly lacks much of being fair, and what for example would prevent the farmer whose plowing cost was turned in at \$1.50, from saying his plowing cost the following year would be equal to that of his neighbor or \$2.35, and then of having all of the low cost farmers do the same thing upon all of their operations, thus bringing, under the cost plus plan, a regularly ascending scale of prices?

Furthermore, why should the consumer be required to pay a high price for corn because a lot of farmers were not operating efficiently, a thing which is plainly evident from the figures submitted to us?

FREIGHT RATES

AMONG the commodities for which lower freight rates are being asked, under the Hoch-Smith resolution, are grain, hay, live poultry, live stock, coal, lime, cement, sand, ores, pig iron, candy, vitrified paving brick, canned fruits and vegetables, waste materials, fruits and vegetables, hollow building tile, deciduous fruits, hides, skins and leather, and forest products.

Some of these requests for reductions are confined

to specified territories, while some of them cover the entire movement, and while the list is by no means complete, it gives some idea of the problem confronting the Interstate Commerce Commission, and it also gives some idea of the problem that would confront the most of the railways if many of these requests should be granted in any substantial way.

Some of the requests for reduced rates are undoubtedly just, and will be granted, but if for example, the suggestion of the Michigan State Farm Bureau should be followed, it is hard to see how very many of the so-called "granger" roads could be kept out of the bankruptcy courts.

That organization, in a statement construing the Hoch-Smith resolution said it was entirely practicable and lawful for Congress to direct that agricultural rates be segregated and established at the lowest possible level—that is the level "which clears and no more than clears confiscation."

As a matter of fact, aside from the additional risk because of increased value, it costs no more for a carrier to transport a given weight of gold ore assaying a thousand dollars a ton than it does to transport the same weight of iron ore valued at only a few dollars.

Likewise it costs the carrier no more to transport a car load of wheat valued at today's price at about \$2,100 than it does to transport a car load of corn valued at around \$1,600 or a car load of barley valued at about \$1,300, and rates upon these different commodities have been fixed, during a period of a good many years, very largely upon the much derided principle of "what the traffic will bear."

The point to the whole question however is simply this: The railroads of the country as a whole, have in no year, since the enactment of the so-called "guarantee clause" earned, what the Interstate Commerce Commission decided, was a reasonable return upon their investment, and because of that very fact they are finding it increasingly difficult to finance, through additions to capital account, urgently needed improvements, and if they are to continue to properly function, and that, every one agrees, is an absolute necessity, not only to the farmers, but also to every one else, they must have other rates largely increased if those on their chief revenue producing commodities are substantially reduced.

The whole proposition therefore amounts to a good deal more than simply temporary relief to agriculture. It means that such careful consideration of the welfare of the whole country, with its multiplicity of interests, must be given as will serve the majority in the best possible way, and the minority with the least possible damage.

LIMESTONE

ASIDELINE that can be handled with profit is crushed limestone. It pays the farmer to lime his soil and much of the agricultural farm land is away from the source of supply; hence, it is logical for the country elevator to carry this commodity to supply the demand. Recently, several country elevators have erected bins for storing limestone. Such bins should be built with a minimum capacity of at least one car. This is another service that the country trade can render their farmer patrons.

THE WAY THEY CO-OPERATE

IN its agricultural outlook for 1925 put out by the Bureau of Agricultural Economics of the U. S. Department of Agriculture, under date of February 6, it says: "The present price of potatoes is likely to result in too small an acreage this year," and then, after telling about changed methods of growing, certification of seed, the 1924 crop, etc., it says: "If the higher of these yields (110 bu. per acre) is secured this season, an acreage of even 5 per cent larger than the reduced acreage of 1924 would produce the usual quantity of bushels per capita."

And here, according to C. W. Peterson, manager of the Farmers' Produce Association of North Branch, Minn., is what happened. "They have

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	June 20, 1925.	June 13, 1925.	June 21, 1924.

planted so many around here that we have about a 10 per cent increase over last year, and that means we won't get anything for our potatoes."

In talking recently with a real up-to-date farmer, who, however, believes thoroughly in farmer co-operation, he said: "The time must eventually come when control of production must be exercised through the various farmers organizations, and when any farmer plants more than he is authorized to put in, his barn will be burned or his fields set on fire or his machinery wrecked just as a gentle warning."

SHORT SELLING

SENATOR CAPPER, of Kansas, says short selling of grain must be prohibited and all trading in futures confined to bona fide country grain dealers, millers, grain handlers and exporters.

Without attempting to defend some of the things that were done during recent months, because we know that there are dishonest men who deal in grain, just as there are dishonest men who deal in coal and cotton and clothing and cattle, we are confident no class would suffer more from the action suggested by Senator Capper than would the farmers, and we are also confident the various Boards of Trade and Grain Exchanges can and will take more efficient steps to prevent run-away markets than could possibly result from any legislation enacted by Congress.

More regulation would mean more jobs for the faithful, but more expense for both producer and consumer, and we believe the limit has already been reached in that direction.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, JUNE 24, 1925.

GRAIN TRADE REVIEW

Further reduction in the estimated yield of winter wheat is being made by grain traders, while the outlook for the spring wheat crop remains favorable, and the prospective yield is now larger than it was on June 1. A private report suggested a winter wheat crop of 403,000,000 bu. and spring 272,000,000 bu., a total of 675,000,000 bu. compared with the Government June figures of 661,000,000 bu., the spring wheat gaining 18,000,000 bu. in two weeks. Disappointing threshing returns continue to come from Kansas and it would not be surprising if the final yield in that state were below 80,000,000 bu. Harvesting is now under way in Missouri, Indiana and Illinois and will make rapid progress with favorable weather as the crop ripened prematurely due to hot and dry weather. New wheat is now moving rather freely in Oklahoma and a little is being shipped from Kansas points. First tests of the wheat show a relatively high protein test, making the grain desirable, from a milling standpoint.

Red rust has been found in spring wheat in the Dakotas and Minnesota somewhat ahead of normal, and while the black or damaging stage will not be reached for a week or so from now on the effect of the excellent crop outlook in the Northwest on the market is likely to be less pronounced. Liquidation in wheat futures about ran its course the past week with a break of 19½¢@20½¢ from the high point made on June 10, with many leading longs going out of their lines on the way down. After a break of this extent the rally which followed was not surprising, but some new influence of a bullish character is needed to sustain bulges, as a majority of traders see it. So far Europe has failed to come into the market as a liberal buyer, even though taking somewhat larger quantities than of late. There has been pressure of fresh arrivals of Australian grain abroad, but with the relatively small exports from that country and Argentine, there is a steady reduction in the quantity on ocean passage, and world's exports are running somewhat below expectations.

U. S. Visible Supply.
The United States visible supply will have to decrease materially during the next two weeks if it is to fall below 15,000,000 bu. by June 30, the end of

the old crop year, but the new grain will not start to arrive at terminals in any volume until the first week in July, if then, as farmers in the Southwest show no disposition to sell freely, and at that, the crop in Texas, Oklahoma and Kansas in the aggregate is only about 120,000,000 bu., or considerably below the yield of Kansas alone last year. Even on the basis of the latest crop estimate for both winter and spring wheat, there is only a limited amount available for export from the new crop this season, and practically all of it will have to be durum, from a theoretical standpoint. Some very high estimates are being made on the prospective Canadian crop, and a late report from Europe indicated a yield of 288,000,000 bu. more than last year. Returns to the Department of Commerce, however, suggested only 35,000,000 to 70,000,000 bu. more than in 1924, exclusive of Russia. Conditions in the latter country are still a mystery. Practically all of Europe would be benefited by a soaking rain, and a little damage has already developed in Germany and Hungary. Harvesting will start the first of July in southern France. Financial conditions rather than the crop outlook are regarded as the main reason why foreigners have not commenced to buy cash wheat freely from North America, although liberal quantities will probably have to be secured to bridge over the gap before the new Canadian grain will be available for importers.

Coarse Grains.
A private report suggests a corn crop of 3,027,000,000 bu. compared with 2,437,000,000 bu. harvested last year, the acreage showing an increase of 5.5 per cent with a total of 110,816,000 acres. The condition is around 82 or about an average. Highly beneficial rains have fallen in the Central West and dry weather has been eliminated as a market influence for a week or so, but it remains dry and hot in Texas and Oklahoma where the crop is far enough advanced to be damaged, and already there have been numerous claims made of crop deterioration. It is the yield in the big Central West states, however, that determines the price at terminal markets, and on account of this, bulges in futures have failed to hold.
Rains come too late to be of material benefit to the early sown oats, but in many sections the late sown will make a fairly good crop, but under no condition will the yield be as large as last year and private reports suggest a crop of 1,161,000,000 bu., or 134,000,000 bu. less than on June 1 and nearly 400,000,000 bu. less than last year's harvest. The rye crop will also be small. Indications are for a much larger rye crop in Europe than last year and we will probably go into the new crop with a fair carryover, but at that, it will be considerably less than last year.

GRAIN MARKET SUMMARY.
Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	June 20, 1925.	June 13, 1925.	June 21, 1924.
Wheat	4,655,000	4,939,000	4,308,000
Corn	3,212,000	4,082,000	3,894,000
Oats	4,400,000	3,875,000	3,893,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week	12,267,000	12,095,000
Preceding week	12,896,000	12,398,000
Since July 1	1,014,340,000	969,979,000

Wheat values were on the downgrade early in the week with a continuation of liquidation, and at the inside figures there was a decline of 19½¢@20½¢ from the high, following the issuance of the Government report. Rust talk from the American Northwest, coming considerably ahead of schedule, caused a short covering movement and also brought in sufficient commission house buying to bring about a sharp upturn, but the close was at net losses at 1½¢@4½¢ as compared with the previous week. The

market is regarded as a weather affair and is subject to rapid price changes. No improvement was shown in the foreign demand at the end of the week.
Weather conditions the past week were generally very favorable for the new corn crop in the big states, and while it was hot and dry in Texas and parts of Oklahoma, the outlook was regarded by the trade as favorable, and prices declined, and closed with net losses of 4½¢@6½¢, with September leading. Outside interest is light at the present time, and many of the local element are bearish. Eastern cash demand remains slow.
Crop reports on oats were generally unfavorable, although the rain has probably checked deterioration. Prices were on the downgrade, and the finish was at net losses of 2½¢@3¢. Cash demand was spasmodic, and became slow toward the closing days of the week. Rye finished with net losses of 2½¢@3½¢, with December leading. Trade was not large, but the market was helped to some extent by a fair export demand. Range of prices the past week follow:

		Close

St. Joseph	111	94	11,910	8,367
Total	4,614	4,034	503,568	339,376
Shipments	4,203	2,873	381,679	195,932

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	June 20, 1925.	June 13, 1925.	June 21, 1924.
American	4,427,000	4,978,000	6,776,000
Argentine	2,241,000	534,000	4,500,000
Australian	2,432,000	976,000	1,328,000
Indian	856,000	304,000	848,000
Russian			440,000
Others			192,000
Total	9,956,000	6,792,000	14,084,000

Of the above total wheat from America there cleared in the form of flour 813,000.
The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	392,093,000	409,230,000	411,786,000
Argentine	115,453,000	155,152,000	126,449,000
Australian	112,848,000	72,898,000	43,944,000
Indian	31,664,000	9,096,000	18,172,000
Russian	323,000	28,840,000	
Others	2,736,000	16,324,000	6,459,000
Total	655,128,000	691,540,000	606,913,000
Season		753,195,000	662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	June 20, 1925.	June 13, 1925.	June 21, 1924.
American	36,000	26,000	20,000
Argentine	4,640,000	3,360,000	6,580,000
African			
Russian		60,000	247,000
Others	2,253,000	1,794,000	1,105,000
Total	6,929,000	5,240,000	7,952,000

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	863,000	11,560,000	47,210,000
Argentine	67,312,000	68,404,000	81,048,000
African	1,343,000	5,445,000	230,000
Russian	2,892,000	5,282,000	
Others	27,787,000	29,974,000	2,784,000
Total	100,197,000	120,665,000	131,427,000
Season		229,932,000	205,235,000

WORLD'S OATS EXPORTS.

Exports of oats last week, compared with the previous week a year ago, as reported to the Broomhall service and forwarded to this paper:

	June 20, 1925.	June 13, 1925.	June 21, 1924.
American	2,047,000	1,678,000	799,000
Argentine	469,000	518,000	595,000
Others			
Total	2,516,000	2,196,000	1,394,000

Exports of oats since Aug. 1, 1924, and comparisons for three years:

	1924-25.	1923-24.	1922-23.
American	41,526,000	24,238,000	33,014,000
Argentine	42,833,000	33,630,000	21,825,000
Russian			240,000
Others	1,714,000	1,300,000	4,480,000
Total	86,073,000	59,408,000	60,009,000
Season		67,500,000	65,765,000

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	June 20, 1925.	June 13, 1925.	June 21, 1924.
Wheat	5,131,000	5,660,000	6,038,000
Oats	547,000	778,000	778,000
Rye	54,000	46,000	
Barley	683,000	1,102,000	166,000

PACIFIC N. W. GRAIN DEALERS MEET

WHEN President R. J. Stephens of the Pacific Northwest Grain Dealers' Association called the fifth annual convention to order at Walla Walla, Wash., on June 5 approximately 250 members from Oregon, Washington, Idaho and Montana were present and keen interest and enthusiasm was manifested during every minute of the two-days' sessions.

Ben F. Hill, mayor of the city, and R. E. Allen of the Chamber of Commerce welcomed the delegates, extending the hospitalities of the city. W. A. Ryer, president of the Spokane Grain Merchants' association responded in behalf of the association, citing the pleasure which all felt in holding the convention at Walla Walla and expressing the hope that the meeting would be productive of much good.

Continuing, Mr. Ryder said, in part:

"The members of this association feel the responsibility that rests upon us to perform our part and serve to the best of our ability. No body of men are more interested in the welfare and prosperity of the farmers than we are, and we stand ready at all times to lend our aid to any practical plan that will better his condition and help to solve his problems.

"On the other hand we are unalterably opposed to the efforts of the political demagogues and job seeking individuals who are forever proposing impractical and visionary schemes contrary to economic laws—none of which would be or have been of any benefit to the farmer. Patrick Henry in his memorable speech said: 'I have but one lamp by which my feet are guided and that is the lamp of experience. I know no way of judging of the future but by the past.' I think this thought might well apply to the grain business and agriculture in general. I have been in the grain business for over twenty-five years, during which time I can recall all kinds of schemes and proposals, which, (according to the sponsors) were to revolutionize the industry of farming and solve all of the farmers' problems, but not one of them have resulted in any material benefit to the farmer; but, in the aggregate, have cost him millions of dollars. If we are to judge the future by the past, we may look for the same negligible results from these proposals.

"I like to feel towards the farmer as our United States secretary of agriculture, William Jardine, who, in an interview published in the Nation's Business of April says: 'The American farmer is a business man. He has a greater capital investment than the average retail merchant. His business is vastly more complex than that of the average retail merchant.'

C. L. Dutcher, in charge of the Pacific Coast District Administration, U. S. Warehouse Act, emphasized the necessity of safeguarding warehouse receipts. Warehouses should be held responsible as trustees to owners of goods placed in storage. Warehouses should be licensed under government authority for the purpose of promoting uniformity and equality to all concerned, thereby assuring as far as possible every banker or purchaser of warehouse receipts that the goods represented therein were actually in existence and of the grades specified in the receipts.

At the afternoon session, Charles Quinn, secretary Grain Dealers' National Association, spoke of the unrest of agriculturists and of the grain trade in general caused by freak legislation, giving the members some of the startling facts about the grain trade, previously given to members in other recent conventions and adding a number of new ones, the result of recent developments.

Dr. S. B. L. Penrose, president of Whitman College, through the medium of a Chinaman, "Wang Ah Sin," showed the futility of attempting to legislate the farmers into prosperity.

R. M. Semmes, president of the East Waterway Docks & Warehouse Company and Merchants' Exchange of Seattle, spoke of the necessity of establishing a Grain Futures Market on the Pacific Coast, the objects of such an organization being to stabilize grain prices and enable farmers and country dealers to protect themselves by legitimate hedging.

Agreement on Grades.

As a result of agreements made with millers, changes in discounts on some wheats were adopted by the association at its closing session, the changes being in favor of the farmers. Discounts on soft white, western white, hard winter yellow, hard winter northern, spring and western red remain the same as last year. On dark northern spring wheat, 58 pounds being No. 1; dark hard winter, 60 pounds being No. 1, and hard white, bluestem or early bart, 60 pounds being No. 1. Dockage for wheat containing more than 5 and up to 10 per cent mixture is 3 cents less than last year with the following exceptions: Dark hard winter, hard white, bluestem and early bart, on 60-pound wheat, 1 cent instead of 2. These discounts apply on wheat down to 50-pound weight. Wheat under 50-pound test or of more than 10 per cent mixture is not applicable on contract except by mutual agreements.

The differential on bulk grain was raised to 4 cents from 3, cost of resacking raised to 10 cents from 8, due, it was stated, to the higher cost of sacks this year than last. Sacks are quoted at 14 cents at coast points. Bad condition sacks are docked 3 cents, the same as last year.

Resolutions condemned the practice of unnecessary and useless legislation to regulate economic questions; urging members to use all efforts to bring about uniform practices among warehouse men and to insure integrity of warehouse receipts and delivery of actual property covered by these receipts; favored application of proportional export rates on all agricultural products; favored standing as a unit for protection of all agricultural products, and favored thorough investigation of proposal for establishment of grain futures market in northwest.

Election of Officers.

Richard J. Stephens of Spokane, president for three years, was unanimously re-elected without going through the formality of election by the directors. Stephens urged that a new president be elected, but the convention would not listen to him. Directors were named as follows: One-year term, A. J. Urquhart of Lind, W. A. Ryer of Spokane, and H. A. Martin of Portland; two-year term, R. J. Stephens of Spokane, O. T. Cornwell of Walla Walla, I. C. Bonham of Tacoma and J. J. Lavin of Portland. The board will choose the next place of meeting, but it will be in Spokane unless some other locality extends an invitation. Mr. Stephens said, adding that this was a bid for invitations.

CHICAGO BOARD OF TRADE PLANS NEW CLEARING HOUSE.

A new clearing house plan is being considered by the Chicago Board of Trade officials in response to the suggestions of Secretary of Agriculture Jardine at his recent conference here.

Efforts are being put forth to devise the best, simplest and most economical methods of handling speculative business.

The work of formulating plans is to be considered by a committee, of which Joseph P. Griffin, former president of the Board of Trade, is chairman. Former Vice President Joseph Simons also is a member. Other members are E. S. Westbrook of Bartlett, Frazier Company, Lester Perrin of Washburn, Crosby & Co., and Royal W. Bell of the J. J. Bradenoch Company.

It is expected that the adoption of a new clearing house plan greatly would simplify handling of business, change the method of calling margins so that they would be paid into the clearing house instead of scattered among the trade. The commission houses instead of the banks would have charge of their customers' money. It might provide a method of preventing market manipulation, and possibly undue price swings, and in practically every way be a benefit.

Traders would know exactly how they stand every night. Spreading operations between Chicago and other markets would be increased, and other benefits secured.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

BRITISH SITUATION

Liverpool Prices Show a Decline—London Flour Imports Small Barley Cheaper.

By JACK BROOKS.

LONDON, June 13.—Although the wheat market here the past week has weathered the heat wave pretty well, all upward movement has been arrested, while the flour market has beat an undignified retreat from the high level reached several days ago. Liverpool cargo wheat prices show a decline of six cents per 100 pounds for spot No. 2 red winter since the beginning of June, the current rate being \$3.20. Prices for futures remain the same, viz.: \$3, which is 14 cents below the May rate. Imported wheat has been making this week up to \$4 per hundred-weight for Canadian; \$3.72 to \$3.76 for new Indian; \$3.60 to \$3.65 for Australian, and \$3.50 to \$3.60 for American hard and red winter. London's imports of wheat last month totaled 2,304,000 hundredweights. If all contracts to ship wheat in May have been fulfilled shipping countries have sent on some 29,230,000 hundredweights against a decennial average of some 26,500,000 hundredweights.

The London imports of flour last month were on the small side—284,000 hundredweights. Shipping countries sent off 2,620,000 hundredweights, a good average for the month. Flour prices here took a big upward swoop the first week in June, good Canadian making \$7 per bag of 140 pounds. The hurried drop from this price level recorded during the current week is due mainly to the vagaries of a credit and delivery market. Good Canadian flour is now worth 12 cents less, while other types have decreased in value correspondingly. A general price of \$6.50 for town household now obtains throughout the country here, this quality making a good household loaf of 72 to 75 per cent extraction. Cash buyers are having no trouble in getting this flour in the London area. The mills' by-products are six cents per hundredweight cheaper, making a loss to millers since Easter of 18 cents per hundredweight.

Maize prices continue about the same. The new Argentine crop, it is expected, will be in evidence here by the middle of next month. Rumania and India offer to supply Indian corn in small bulk and, according to the Times, although the London Corn Trade Association has struck a standard of Australian maize, this incentive to ship seems to have little effect at Sydney or Brisbane. Last month's shipments of maize from exporting countries totaled 4,610,000 hundredweights compared to the decennial average of 8,550,000 hundredweights. British imports of maize have been on the short supply side and nearly all ports here show a decline in stocks.

Barley is cheaper at \$2.66 per hundredweight, but supply is getting small. Oats in London are stable at \$2.60. In the provinces, however, they have realized as much as \$3.08. No. 4 Canadian barley is worth here around \$2.65. Argentine oats are fetching \$2.48. Shipping countries sent off 1,983,000 hundredweights of barley and 4,030,000 hundredweights of oats last month, the latter quantity being well above average. London took 442,000 hundredweights of oats from abroad last month, but rather a small amount of barley.

ANOTHER AGRICULTURAL PROGRAM.

President J. S. Wannamaker of the American Cotton Association, St. Matthews, S. C., has transmitted a letter to Secretary Jardine urging that he issue a call for a general agricultural conference, to be attended by representative farmers from all sections of the nation, to be held at Washington on convenient dates in the near future, the leading subjects suggested for consideration and discussion at such conference to be as follows:

1. Definite relief measures for American agriculture that will find definite

and practical expression in an expansion of markets for leading staple farm products.

2. The creation of effective legislation that will enable the legitimate laws of supply and demand to control the market prices of staple farm products, instead of artificial manipulation.

3. Speedy reduction of the excessive burdens of taxation which are unduly levied on the farmers of the nation.

4. Reduction of inflated and excessive freight rates as applied to the transportation of all classes of farm products and farm supplies.

5. The sound policy of self-help through the adoption of better methods of self-sustaining farming and arousing a widespread spirit of great dependence upon the farm to maintain its operations by wise management, economy and thrift, instead of continued dependence upon credit agencies and banking institutions.

6. The establishment of a specific bureau at Washington to ascertain the average cost of producing staple farm products and make this information available to the producers during periods of harvesting and before such products pass into the markets for sale.

It is pointed out in the communication to Secretary Jardine that the present plight of American farmers was caused primarily by drastic deflation in values enforced upon the country in 1920 and the widespread contraction of markets for surplus farm products at remunerative prices during the past four years.

It is held that debts contracted during a period of artificial inflation cannot be liquidated under sudden and violent deflation which contracts market demand and depresses price values below the cost of production. There must be a better system devised for the control of production of surplus staple farm products and the intelligent distribution of such products into the markets, regulating supply to meet legitimate demand through wisely managed and economically administered co-operative marketing associations.

It is felt that the present administration at Washington and the Congress are in full sympathy with any sound and stable program of Federal relief measures that will revitalize and improve existing adverse conditions in American Agriculture. To this end the co-operation of the government is sought and the assemblage of a large conference of representative farmers from all sections of the nation at this time will do more toward outlining a definite program for Congressional and departmental aid than can emanate from any other source.

AMERICA'S COTTON.

The trend of the time is to speak pessimistically of America's ability to retain her present world position as a producer of raw cotton. England is one of the most outspoken of the doubters. In 1923 the English Cotton Industry Bill became law. Under its provisions an import tax of 12c a bale must be paid to the British Empire Cotton Growing Corporation, whose purpose is to encourage and promote cotton production in the British Dominions. In addition to the income from this source, the corporation received from the Government a contribution of nearly £1,000,000 or about \$5,000,000.

"The quantity of the cotton produced in the United States has diminished nearly 20 per cent from the 1913 figure, while the cotton mills in the States are consuming the raw material in an ever increasing degree," says the report of Sir James Currie, the director of the corporation, to the Imperial Economic Conference. "So fast has been the ratio of increase that many authorities declare that in a very brief period the whole production of the United States will be consumed on that Continent, and that in addition the American mills will have to reckon as importers, on an ever increasing scale, of fine Egyptian varieties."

HOT FEEDS.

Considerable misapprehension on the subject of hot feeds—how to prevent them and why this condition occurs—prevails in the trade.

Quick action on the part of those interested covered an interesting case in Chicago this week. A car of molasses feeds, CB&Q 130544, was received by Kirby Bros., June 22, with one end of the car extremely hot and the balance of the car normal. At the outset, this seemed to disprove the probability of heating as a result of any of the feed ingredients used. On the other hand, the car seemed new in appearance. However, it was tested through the liberal application of water on the top and a leak developed around a loose bolt in the walking board. A stream of water as large as a pencil was admitted, and, of course, a bad order car claim was made and will be allowed.

Beyond the clean bill of health which this gives molasses and other feed ingredients is a detail often brought home to the readers of the PRICE CURRENT-GRAIN REPORTER, concerning loss and damage claims. Water-tight cars are necessary in bagged feed shipments just as for bulk grain, and when hot feed arrives at destination, the very first investigation should concern the character of the car.

MARKETING SPECIALIST RESIGNS.

With the resignation last week of Charles J. Brand, marketing specialist of the department of agriculture, another intimate advisor of the late Secretary Wallace disappears from the department as reconstituted by Secretary Jardine.

The resignation was telegraphed to the secretary, who is out on an inspection tour of the west. Brand is understood to have known in advance that his resignation would be accepted if tendered.

The first of the ranking officials of the department whose resignation was accepted by Secretary Jardine was Dr. E. D. Ball, director of scientific research.

In addition to Brand and Dr. Ball, several bureau chiefs and lesser officials are expected gradually to be replaced.

Secretary Jardine and Brand differed radically on the defeated McNary-Haugen bill, which would have placed limitations on farm crop prices.

CANADIAN CROP PROSPECTS.

For the second crop report for this season the Winnipeg, Manitoba, Free Press queried 347 correspondents and has received by wire within the past 24 hours (to June 13) 325 replies and these indicate the following: Conditions generally good to excellent and ideal in large areas. There is abundance of moisture, only four points, and those in Alberta want any more rain, and a few places in Manitoba and Saskatchewan have had too much and some percentage of the crop has been lost from floods. These areas, however, are not extensive. It will mean some slight lessening of acreages in all grains.

There has been very little permanent damage from the rather severe frosts late in May following the last report, and only in isolated cases was any re-seeding from this cause necessary.

The only drawback on the crop is the presence of cutworms at a number of points, to be exact 214 in the three provinces. The damage from these pests is generally described as "slight" but some districts report "considerable" and a few damage from 10 to 15 per cent. The reports generally carry the information that the heavy rains have checked the advance and the damage seems to have been greater on coarse grains than on wheat, though all have suffered to some extent. A few points, more especially in Alberta, report the presence of wireworm. Coarse grains are practically all seeded except where they are wanted for green feed.

The greatest surprise of the reports is the very clear intimation that so far from being an increase in flax acreage there is probably a very considerable decrease. This is, no doubt, due to the high cost of seed.

A very pleasing feature of the reports is the very marked increase in the planting of sweet clover and corn. No attempt was made to get at exact acreages but the replies to the query "any corn or sweet clover planted in your district this year?" show that 73 points in Manitoba, 98 in Saskatchewan and 43 in Alberta have seeded more or less sweet clover this season and some of the acreages are large. As to corn 67 points in Manitoba; 72 in Saskatchewan and 33 in Alberta report the seeding of corn and some of the acreages are also very large.

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending June 20 (000 omitted):

In store at	Wheat.	Corn.	Oats.	Rye.	Barley.

The Letter Box

Price Current-Grain Reporter: We will be very glad indeed to co-operate with you in this matter of changing our present system over to the metric system. We are not in favor of this change, and will do everything possible to assist in defeating it.

We are also very much interested in seeing the county agents over the various states discontinue their efforts toward assisting the commercial activities of the state farm bureau federations, so whatever help you can turn in that line will be appreciated.—C. S. Latchaw, Sec'y., Ohio.

Hot Winds Detrimental.

Price Current-Grain Reporter: Weather hot and grain crops not doing much good. Few fields of wheat cut showed fair yields but hot weather and hot winds ruined many that will never be cut.—F. G. Olson, Southwestern Cotton Oil Co., Oklahoma City, Okla.

Wheat Coming Out Better.

Price Current-Grain Reporter: Our wheat harvest is upon us here, a little ahead of the regular harvest moon.

The counties south of us have much of their wheat in shock. The wheat plant has withstood attacks of most all kinds this year and is coming through with a harvest fully equal to recent expectations in bushels. The quality in many fields will be light and chaffy, but we are inclined to add a bushel or two per acre to our guess of a ten-bushel yield made two weeks ago.

General rains of June 12 and 13 were beneficial to growing oats; even when they arrived too late to increase the quantity, the quality of late oats was improved. These rains also caused the late oats to grow taller so that they could be more easily harvested, thus increasing yield somewhat. Some fields of early oats will never see the self binder.—L. I. Baldwin & Co., Decatur, Ill., June 20.

Oklahoma Wheat Better Than Predicted.

Price Current-Grain Reporter: Relative to the wheat crop in Oklahoma, will say that I believe the outturn is going to be better than the last government forecast and much better than a lot of people have been predicting. I have been contending for some time that we would raise thirty to thirty-five million bushels, and reports of yields that I am getting now have not caused me to lower my ideas.

Cutting is pretty well over but very little threshing has been done so far and only a few cars of new wheat have been shipped.

We have a rather freaky situation this year, in that harvest in the northern part of the state was ahead of the southern part. As a rule harvest in southern Oklahoma is ten days to two weeks earlier than northern Oklahoma, whereas the reverse was the case this year.—J. S. Sinnett, Sinnett Grain Co., Oklahoma City, Okla.

NEEDED RAINS BENEFICIAL.

ROCKPORT, IND.—In regard to the growing hay crop and stocks of last year's hay on hand it is a little hard to make a close estimate of stock on hand, possibly around 10 per cent, do not think it would run much if any above that amount.

Alfalfa acreage about 85 per cent normal; first crop was good in quality and yield; was cared for and put up in good condition.

First rains following the long drouth came June 8; since then there has been showers that has put the ground in good condition for all growing crops.

The clover and timothy crops are about ruined, some plowed up, some turned to pasture, some mixed crops being harvested, and is yielding around one-half to one-third ton to the acre.

Aside from alfalfa, other hay crops will not average more than one-half ton to the acre, including what growth may be added to timothy since the rains came.—Jeff Ray & Son, Jeff Ray.

Need Rain.

Price Current-Grain Reporter: The crop situation is very bad in Colorado. We are very short of irrigation water besides no rain to speak of throughout this section of the country for several months.

The writer has lived in Colorado about forty years and never seen northern Colorado, which is our best producing territory so completely a failure so far as the small grain crops are concerned and beets. The streams have no water in them and the lakes have been drained out to try to bring these spring crops up.

So far we have had no rain, only a scattered shower here and there, and they have only been light.

Our first alfalfa crop is a practical failure, excepting in a very few instances.

About the only rain we had was about a week ago, when we had one-half inch, rain but this was only in spotted districts.

Our small grain crop is a failure.

Alfalfa might possibly make 25 per cent of a crop this year.

Continued rains would change the complexion very materially because it would bring the beans and corn forward nicely and perhaps help the later cuttings of alfalfa, but otherwise we are in a bad way.

Now, to give you an outline of the extent of this extreme dry territory, you might draw a line about 60 or 75 miles east from the mountains and directly north and south, reaching from southern Wyoming and to old Mexico, and this I think would cover the extreme dry territory. Beyond this and further east is fair. Now, this is a very peculiar dry strip in through here, something we have never seen before.

There is no snow in the mountains, nor was there any last winter, so there is no water for irrigation this summer.

Also I can make the following statement: Out of some 80,000 acres planted to sugar beets, 30,000 acres are abandoned and are partly planted to pinto beans and to corn with what success to be determined later. The other 50,000 acres they feel that they might raise about 30 per cent of a crop, so you see this explains rather freely just what a bad situation it is along this range of mountains in Colorado.—The F. C. Ayres Mercantile Co., J. L. Barr, Mgr., Denver, Colo.

CORN IN PRIMARY MARKETS.

Receipts of corn last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Nov. 1 to June 20 (final 000 omitted):

	June 20, 1925.	June 21, 1924.	June 20, 1924-25.	June 21, 1923-24.

Crop Reports

Compiled by GEO. A. WELLS

It frequently occurs that the early forecasts of grain crop production are materially changed at harvest time. Crop damage reports are usually exaggerated. The damage by drouth is nearly always corrected to a greater or less extent by rains. The growth condition of winter wheat and oats is very spotted throughout the entire winter wheat belt.

Early oats are particularly short, and in fact will be very light in yield, particularly in the states of Indiana, North-western Iowa and portions of South Dakota and Nebraska. The corn crop is uniformly excellent everywhere, good stand and growth condition for the season.

The wheat harvest is on in Oklahoma and Kansas and will begin in the remaining wheat states July 1st to 10th. The harvest season is normal.

SOIL CONDITION: The soil condition is reported almost entirely "favorable" in the States of Illinois, Missouri, Iowa, Minnesota, North Dakota, Montana, South Dakota, Nebraska, Kansas and Oklahoma. Considerable portions of Ohio and Indiana reported "too dry" at the time these observations were taken. However, subsequent rains have no doubt improved the condition in these states. In fact, rains have been general throughout the entire grain belt during the last week and the soil condition is excellent, with no weeds to handicap the growth of corn and interfere with cultivation. This may be a bumper crop year for corn.

TEMPERATURE: The temperature during the past two weeks has been almost entirely "favorable" through Iowa, Minnesota, North Dakota, Montana and South Dakota. "Too hot" in some sections of Ohio, Indiana, Illinois, Missouri, Nebraska, Kansas and Oklahoma.

SEASON: The seasons are reported "early" to "normal" in all of the surplus states. Very few reports of "late season."

GROWTH CONDITION: Basing the government term normal at 100, the percentage comparison of the growth condition of the winter wheat crop on acreage that was not abandoned is as follows: Ohio, 63; Indiana, 61; Illinois, 70; Missouri, 86; Iowa, 72; Montana, 100; South Dakota, 65; Nebraska, 69; Kansas, 58; and Oklahoma, 56.

OF SPRING WHEAT: Minnesota, 87; North Dakota, 96; Montana, 97; South Dakota, 82.

OF OATS: Ohio, 77; Indiana, 53; Illinois, 61; Missouri, 79; Iowa, 72; Minnesota, 83; North Dakota, 94; Montana, 97; South Dakota, 69; Nebraska, 59; Kansas, 68; and Oklahoma, 65.

OF CORN: Ohio, 91; Indiana, 88; Illinois, 92; Missouri, 93; Iowa, 98; Minnesota, 89; North Dakota, 71; Montana, 92; South Dakota, 94; Nebraska, 93; Kansas, 83; and Oklahoma, 84.

General Reports.

The general reports given below are self-explanatory as to when harvest will begin and as to the general growth condition of wheat, corn and oats.

OHIO.

Lima, O. (1): Harvest of wheat, oats, corn and hay will be short on account of unfavorable weather.

Sidney, O. (2): Will begin harvesting wheat about the last of June. All growing crops now, except hay, are satisfactory.

Greenville, O. (2): Wheat harvest first of July. Corn condition good. Oats fair.

Bucyrus, O. (4): Winter wheat harvest will begin July 10. Oats will be short. Corn doing fairly well.

Blanchester, O. (3): Wheat in head but looks like harvest three weeks later.

Springfield, O. (2): Will cut wheat last week of June. Corn good; oats hurt by frosts.

Circleville, O. (6): Wheat looks much better, large, well filled heads.

Ansonia, O. (2): We had a good rain here this evening. Has been pretty dry.

INDIANA.

Wabash, Ind. (4): Winter wheat harvest begins about June 27. Rains improved wheat slightly. Oats very much improved. Corn in fine condition.

Tipton, Ind. (5): Winter wheat harvest will begin 1st to 10th. General growth now favorable to all grain. Had recent rains.

Rensselaer, Ind. (1): About the 15th of July wheat harvest will begin. Stand of wheat, oats and rye very thin. Wheat is about one-half of average growth and may not thresh out even that as hot weather and drought caused very serious injury. Oats very short and probably only one-fourth crop can be harvested. Corn normal although needing moisture.

Winchester, Ind. (8): Will be cutting wheat by the 30th. Oats very short but of fair color.

Monticello, Ind. (1): Has been too dry for wheat and oats. One inch of rainfall June 13th puts corn in fine shape.

Marion, Ind. (5): Wheat harvest will begin about July 4th.

Delphi, Ind. (1): Drought has ruined oats, hurt wheat and retarded corn. Clover practically killed. No pasture.

Lawrenceburg, Ind. (9): Winter wheat harvest started the 20th. Wheat growth fairly good. Oats very short. Corn backward.

Winamac, Ind. (1): Wheat and oats light. Corn good.

Rushville, Ind. (8): Threshing of wheat should begin about the first week in July.

Markle, Ind. (7): The oats are about as long as a man's finger. No rain here since the oats were sown until June 13th.

Jasper, Ind. (3): Winter wheat harvest has begun. Corn is having the best prospect we have had in years. Oats have suffered by drought.

Angola, Ind. (7): Drought has been severe. Rainfall over foot short of normal. Only one inch in May and 1.01 so far in June. Corn doing well now but must have more rain very soon.

Decatur, Ind. (7): Very dry weather. Good rains in the last few days.

ILLINOIS.

Freeport, Ill. (4): Wheat and rye harvest will begin early in July. Condition of wheat good. Corn very good. Oats very short but good color.

Ashton, Ill. (4): Wheat harvest should begin July 10. Corn stand excellent. Fields clean. Growth normal. Oats injured by drought and heat.

Odell, Ill. (7): Some very windy and cold days and some very hot. Bad for corn.

Nashville, Ill. (3): Harvest of wheat will be completed this week. Quality fine. Corn doing well. Oats short and very poor.

Vermont, Ill. (2): Winter wheat light. Wheat filled well but is thin on ground.

Lexington, Ill. (5): Oats and wheat very poor. Corn looking well. Haven't had enough rain.

Eureka, Ill. (1): Wheat harvest will begin July 4th.

Earlvile, Ill. (4): Have just had splendid rains and they will help immensely. Very fine show for corn. Oats stand a little short.

Mt. Pulaski, Ill. (5): Wheat harvest in about ten days. Excellent rains recently. Wheat will be poor crop.

Decatur, Ill. (5): Wheat harvest will begin about July 1. Wheat fair, oats poor and corn good.

Highland, Ill. (6): Wheat harvest is on now. Some fields promise 20 bus. to the acre and maybe right across the road it will not make more than 5 or 6. Corn is doing well.

Mt. Carroll, Ill. (4): Fine rain recently. Wheat heading. Corn doing well. Oats heading out short on account of dry weather. Hay short crop.

MISSOURI.

Corning, Mo. (1): Winter wheat harvest will begin July 1 or sooner. Wheat came out well in last two weeks, also oats. Corn is fine.

Higginsville, Mo. (2): Wheat cutting started yesterday. Rain last night will delay harvest two or three days. Most of wheat looking fine.

Columbia, Mo. (5): Wheat harvest is in full blast. Wheat poor. Corn good. Oats very poor.

Paris, Mo. (5): Growth of all grain crops retarded by early dry and cool weather but now doing fine.

Bethany, Mo. (1): Too much rain. Must have good weather or weeds will take the corn.

Salisbury, Mo. (5): Cutting wheat will begin in three days.

Marionville, Mo. (3): Wheat all in shock.

Lamar, Mo. (3): Winter wheat harvest over June 20th. Oats ready for harvest. Corn making good growth.

Springfield, Mo. (3): Weather favorable for wheat and corn and oats.

Richmond, Mo. Wheat will be cut June 29.

Sedalia, Mo. (5): Farmers cutting wheat. Oats will be ready in about two or three weeks. Corn looks good.

IOWA.

Jefferson, Ia. (5): Oats look like a complete failure.

Indianola, Ia. (6): Winter wheat will probably not begin to be harvested before the first week in July.

Clemons, Ia. (5): No wheat. Oats are doing better but will never make a full crop and will do well to make one-half a crop.

Randolph, Ia. (3): Wheat harvest will begin July 5th to 10th. Oats and wheat are short on account dry April and May. Corn growth is ten days ahead of normal.

CARELESSNESS

Accumulations of dust and dirt in pit, workfloor and cupola of elevator, neglect to lubricate motors and bearings, untidiness and bad housekeeping inside and about the premises, are the causes of most of the fires recorded as "Unknown," and the result of CARELESSNESS. It is obvious that the burden of reducing the cost of insurance rests upon the policyholders and the habit of CARELESSNESS should be corrected.

Whitten, Ia. (4): Early oats very poor crop. Late oats better. May turn out fair. Corn very good and doing fine.

Marcus, Ia. (1): The freezing and strong winds have cut the corn crop badly and set it back for two or three weeks. The oats look bad, heading out 10 inches high and 10 to 14 grains to the straw where there should be 40 to 50 kernels per straw. Hay crop very short.

North Liberty, Ia. (8): No wheat. Oats short. Corn looking good. Ten days ahead of average.

Belmond, Ia. (4): Oats very short. Will not make more than one-half crop. Corn looks fine.

Gilbert, Ia. (5): Good rains the last week. Corn looking good but rains came too late to help early oats and hay.

Tama, Ia. (5): Present moisture sufficient. Subsoil moisture very deficient. A season of dry weather and hot winds would soon cause alarm.

Lowden, Ia. (8): Too early to say when wheat will be harvested. Fine rain yesterday. Wheat looks good generally, some fields very poor stand, others excellent, so it is with oats fields, some good, some fair and some fields very thin stand. Corn appears best of all and we look for a big crop.

Hamlin, Ia. (2): Wheat harvest will begin soon. Oats very short and heading out. Corn doing fine. Cultivating it for the second time. It is of good stand.

Henderson, Ia. (3): Winter wheat harvest will start July 10th. Corn never looked better. Oats will be very short.

Moulton, Ia. (6): No wheat to amount to anything. Corn is a fine stand. Good rains came in time. Oats and grass a little hurt by drought.

Corydon, Ia. (6): No wheat here.

New Hampton, Ia. (7): We have no wheat here of any kind. Corn and oats doing well now.

New Sharon, Ia. (5): Wheat harvest begins July 10th. Oats heading short. Corn first class.

Guthrie Center, Ia. (2): Winter wheat should be ready to harvest July 1st. Wheat now hurt by dry weather and frost. Everybody is admiring our corn crop but there was some replanting. Oats are improving but at best can only be a short crop. The straw is short.

Glidden, Ia. (2): Corn and oats doing very well now. Oats lengthening out. Corn growing fast.

Clarinda, Iowa (3): Winter wheat harvest will begin July 1 to 4.

MINNESOTA.

Eden Prairie, Minn. (6): Oats and wheat look good. Corn is late.

Minneota, Minn. (3): Wheat and oats heading out short. Need favorable weather to properly mature.

Prior Lake, Minn. (6): No winter wheat harvest for a month. All grains are looking good. Recent rains have helped a lot.

Hutchinson, Minn. (6): Winter wheat just headed. Rye thin. Corn small. Oats have been damaged by the weather. There will not be the rye we looked for at one time.

Warren, Minn. (1): No winter wheat. Pretty wet in valley.

Wells, Minn. (6): Winter wheat harvesting starts first part of July. Short straw and heads. Same applies to rye and oats. Corn good stand but too wet to work.

NORTH DAKOTA.

Lakota, N. D. (7): Plenty of moisture. Cavalier, N. D. (7): Conditions of grain very favorable.

Sheyenne, N. D. (5): Wheat fine. Oats fine but a little wet for corn.

Carrington, N. D. (5): No winter wheat. All grains doing fine.

Fargo, N. D. (7): Spring wheat making fine growth and is starting to head.

MONTANA.

Great Falls, Mont. Wheat harvest about July 15th. Growth excellent for all crops.

Missoula, Mont.: Wheat harvest will begin last half of July.

Valier, Mont.: There has been nearly 3.5 inches of moisture since June 6 and crop prospects are very good.

SOUTH DAKOTA.

Brookings, S. D. (8): Oats heading short and short heads.

Elk Point, S. D. (9): Winter wheat harvest in three weeks. Spring wheat headed. Oats headed about 6 inches long. Corn growing fine.

Flandreau, S. D. (8): Early oats improved with top growth sufficient for harvesting. Possibly fair yield, while late oats good for average crop prospect. Corn best prospect at this time. Clean fields, generally good stand, healthy color and normal growth.

Canton, S. D. (9): But little winter wheat here.

Bridgewater, S. D. (8): Very little winter wheat. Our grains were hurt badly in this immediate territory. All grain heading out short.

KANSAS.

Logan, Kans. (4): We will not get enough wheat to reseed.

Uniontown, Kans. (9): No wheat to harvest here. Oats about July 1st. Corn growing fine but is small and late.

Waldo, Kans. (5): Harvest on where there is grain which ripened too early under abnormal heat.

Pittsburg, Kans. (9): Harvest of soft winter wheat in full blast and will be nearly completed by the last of current week. Estimates vary as to probable range of yield, from 5 to 18 bushels per acre. Wheat has ripened up in excellent shape and the quality should be fine.

Wichita, Kans. (6): Wheat harvest in full swing. Corn growth good. Oats fair.

Neodesha, Kans. (9): Wheat spotted. Corn prospect fine. Oats fine.

Oberlin, Kans. (1): Harvest this week. Corn prospect is good.

Wellington, Kans. (6): Wheat harvest nearly done. Threshing will start last of this week or first of next.

Madison, Kans. (9): Now harvesting wheat.

Ashland, Kans. (3): Harvest begun June 8th and is general now. Oats are almost failure.

Wakenney, Kans. (2): Harvest will start this week. Grain was ripened early on account of high winds. Corn fair. Oats total failure.

Junction City, Kans. (7): Harvest general. Corn damaged some by maize bill bug.

Hillsboro, Kans. (5): Harvest commenced in this vicinity June 12th. Corn has a good stand and is making good progress. Oats crop good.

Greensburg, Kans. (6): Harvest under way June 16th. Oats a failure. Barley poor. There is a chance for corn yet.

Mahaska, Kans. (4): Oats are short. The corn is growing fast.

Plainville, Kans. (4): Harvest started June 15th. Rains last week showed much improvement.

HENRY RANG & CO.

Established 1862

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

NEBRASKA.

Nebraska City, Neb. (9): Harvest will probably begin July 1. Recent rains should help corn and late oats.

Roseland, Neb. (9): Weather all right now for maturing wheat. Cutting in 10 days.

Orleans, Neb. (6): About two weeks since harvest commenced. Much depends on the weather the next two weeks on wheat. Looks poorly.

Superior, Neb. (9): No winter wheat to harvest. Fifty per cent decrease in oats yield. Corn doing fine. It is about normal.

Belden, Neb. (7): Oats are heading a little short and look like a short crop. Corn is coming fine and ground is fine.

Neligh, Neb. (7): High winds cause damage on light lands necessitating replanting. Corn not damaged, doing fine. Drought made oats short.

Ashland, Neb. (9): Winter wheat harvest will begin in ten days.

Beatrice, Neb. (9): Wheat on low land is doing fine. Upland looks good but short. Oats short but well headed.

Superior, Neb. (9): No wheat here. Oats prematurely ripened. Some cutting now. Had fine outlook for oats but has gone back on account of heat and drought.

McCook, Neb. (6): Winter wheat harvest will begin July 1.

Central City, Neb. (9): We have been getting frequent showers over here which have done lots of good and we are getting reports now that wheat and oats have improved very materially in the last two weeks. Corn is looking fine and it is in good condition. A little bit ahead of normal at this time.

OKLAHOMA.

Enid, Okla. (4): Wheat harvest about completed and movement under headway.

Marshall, Okla. (5): Winter wheat harvest commenced about June 3. Wheat now three-fifths cut and in shock. Growth of corn 100%, and oats 90%.

Geary, Okla. (2): Harvest now on. Average yield will not be over 7 bu.

Altus, Okla. (3): Our harvest will be practically over by last of week.

Kingfisher, Okla. (4): Harvest of winter wheat about complete.

THE PROPOSED U. K. FOOD COUNCIL

Not All of Those in Authority in England in Favor of the Plan.

The proposed plan for an English Food Council, through which all imported food would be purchased is apparently meeting with some very strenuous opposition.

One of the chief objectors is T. H. Ryland, M. P., who recently spoke in part as follows, against the plan:

"I regret that I am unable to accept the proposals of my colleagues for the establishment of a Food Council, and that, as those proposals constitute the main feature of their recommendations, I cannot join in signing their report.

"My first fundamental objection to their proposals is that, while my colleagues concede that the competitive system has worked and has ensured the nation a regular and uninterrupted supply of bread and meat, nevertheless, in proposing the setting up of a Food Council they propose a definite advance in the direction of State Socialism. Apart from objections to the amount of irritating interference with business by bureaucrats and amateurs, which their proposals would involve, the gravest aspect of their scheme is that, while it is certain to impose a heavy burden on the taxpayer, it would entail a serious risk of actually increasing the cost of the people's food. I believe that this country will best be served by the preservation of the competitive system. I believe also that if we once start on the slippery slope of socialism it will be impossible to call a halt, and we shall be drawn further and further toward disaster.

"My second fundamental objection to their proposals is that underlying them is the assumption that while people engaged in other walks of life, whether employers or workers, are justified in getting the best price they can for that which they sell, whether goods or services, those engaged in the food trades should adopt for commercial purposes principles of philanthropy and self-denial which are not expected of other businesses, trades and professions.

"My third fundamental objection to their proposals is that there is an element of conceit about them. Those engaged in the food trades have been enabled by long experience to master the complexities and difficulties of industries and development of which has not been so haphazard as my colleagues would suggest. Into that complicated system my colleagues would thrust their amateur Food Council, armed with powers to issue directions. The amateur character of this body is to be preserved by requiring the members to retire in rotation. The Council is to be made up of our officials or quasi-officials; two persons, one of whom shall be a woman, to represent all the local authorities of England, Scotland and Wales; two representatives of the Trades Union Congress, one of whom is to be a woman, and four persons of business experience to be nominated by the president of the Board of Trade. It is questionable whether any sane person would feel happy or justified in entrusting the conduct of their own or their friends' business interests to the supervision of such a body.

TERMINAL MARKETS.

[Continued from page 17.]

harvest and reports from the Sacramento district are even less favorable. Already California exporters are paying a stiff premium over feed prices for bright brewing barley to cover foreign sales that have been made. There will be a fine barley crop in the Northwest this year, both in size and quality, and grain men are looking forward to a good share of the export trade being turned this way. Barley tonnage engagements made by exporters give the shippers the option of loading here or on the sound, as well as at San Francisco, which will be fortunate for them if they cannot get enough good grade barley in California to meet their requirements.

Terminal receipts, in cars, were reported by the Merchants' Exchange as follows:

Portland—	Wht.	Bly.	Flr.	Crn.	Ots.	Hy.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Fred Olsen of James E. Bennett & Co., Chicago, was a visitor on Peoria Change Friday.

Oats receipts were 6 cars. The market was inactive and values were 1c lower. No. 3 white sold at 47½c local.

Cash corn was decidedly weak Saturday with 55 cars. Prices were quoted 2c lower, caused mostly by the weakness in the future market. There was a good demand at the decline. No. 2 yellow, \$1.09½; No. 3 yellow, \$1.08½; No. 4 yellow, \$1.07½; No. 3 mixed, \$1.08½.

The recent rains have made wonderful improvement in crops in this section. Wheat is maturing very fast and cutting will commence in some fields within the next ten days. The yield is expected to be very light, as close examination of many fields show the heads only partly filled. Oats headed out very short and about half a crop is expected.

Grain receipts and shipments at Peoria for week ending June 20, compared with same week last year, as reported by secretary Peoria Board of Trade, as follows:

Receipts—	1925.	1924.
Wheat	24,200	32,150
Corn	381,900	238,450
Oats	146,200	218,600
Rye	1,200
Barley	20,800	2,800
	573,100	493,200
Shipments—	1925.	1924.
Wheat	19,200	36,250
Corn	197,250	209,550
Oats	140,400	184,450
Rye	1,200
Barley	9,800	1,200
	366,650	431,450

TRADE NOTES

"Cleeco" for Cleaning.

"Cleeco" cleansing compound, of which H. J. Klinger & Co., of Butler, Pa., are the distributors, is an ideal cleaner for dairies, creameries, cheese factories, milk plants, ice cream factories, packing houses, etc. It contains no soap, caustic potash, acid or abrasion, and yet it is antiseptic, odorless, tasteless, sanitary and effective.

BOOKS RECEIVED.

We acknowledge the 1925 directory of the members of the Oklahoma Grain Dealers' Ass'n, including list of officers, constitution of by-laws, trade rules, etc., as comprised by C. F. Prouty, secretary of the association.

New Complaints.

The Summit Grain Co., of Denver, Colo., has filed a complaint with the Interstate Commerce Commission alleging that the C. M. & St. P. et al., charged unjust and unreasonable rates on bulk corn from Jefferson, S. Dak., to Fowler, Colo.

The Hodgson-Davis Grain Co., Kansas City, Mo., has filed a complaint alleging that the C. B. & Q. et al., charged an unlawful rate on wheat from St. Francis, Kan., to Wausau, Wis., via Kansas City.

Toberman, Mackey & Co., of St. Louis, have filed a complaint against the C. C. & O., et al., alleging excessive charges were assessed on hay, reconsigned at St. Paul, Va.

AMERICAN STEEL & WIRE CO.'S CROP REPORT.

The past week has brought very few changes agriculturally. With the exception that warm weather was beneficial to corn and cotton in their respective producing areas. It was rather cool in the northwest.

Temperature changes were quite rapid. While there was considerable relief from dry conditions prevailing a week ago in the form of good showers, there are still many sections of the country that are too dry, particularly in the South Atlantic states and the southwest. If central and south Texas does not get rain soon it will result in a total crop failure.

The great corn belt of the central states received from moderate to heavy rains and although slight local damage resulted in some cases, in most instances these were most beneficial.

Winter wheat has improved some. Spring wheat is looking from fair to excellent. The latter condition is found in the Dakotas, particularly in North Dakota.

Oats are headed out very short and harvesting has begun in the more southerly portions of the belt.

Rye is not at all satisfactory.

Corn is much improved and as a whole is in very good condition. Much of the more southerly corn area requires rain.—F. Baackes, Vice President and General Sales Agent, June 20.

WHEAT AT VANCOUVER.

At the present time there are about 2,000,000 bushels of old crop wheat in the terminals at Vancouver, all or most of it controlled by the Canadian wheat pool, which recently took a charter at 32s for July shipment to the United Kingdom. At this time the indicated carryover is taken in the trade to be about 2,000,000 bushels or the equivalent to say \$4,000,000. The arrival of California barley on the market, with the comparative activity of Portland and other American Pacific chartering, seasonally lifts up rates, and it is well understood the holders of wheat at Vancouver are taking chances right now.

Thus far there has been no chartering for new crop. Its movement is months off. Vessel rates are low, and the condition of the crop is promising, and if the precedent is followed when marketing becomes active rates will be higher than they are now.

MUST HAVE HIGHER RATES.

At the annual meeting of the National Association of Savings Bank officials, which was held in Poland Springs, Maine, last week, when the question of the finances of the Chicago, Milwaukee & St. Paul Railroad was under discussion, all of the speakers agreed that there was urgent need for higher freight rates to take care of the operating costs of today.

George Roosevelt, New York investment banker, blamed the plight of the St. Paul on political expediency which, he said, had resulted in sacrificing the road rather than invite the protests of Western farmers against even slight rate advances. Mr. Roosevelt said that if some fairy godmother should present the road to any group of operators it must become bankrupt within ten years unless adequate rates were provided.

WANT BIG ELEVATOR AT ALBANY.

The state of New York will be asked to build a 1,000,000 bushel grain elevator for the new Deeper Hudson port at a cost in excess of \$1,000,000.

The Albany Port District Commission has voted to present its case for a state owned grain elevator before Governor Smith's commission on the use of the barge canal, which is to organize in Albany.

Don't let your subscription lapse you may lose valuable numbers.

SPECIAL "FOUR-IN-ONE"
SCALE NO. 14

This scale, designed and manufactured by us, satisfies a long-felt want in the grain trade, for a small, complete office scale for weighing samples for moisture test and for determining test weights for bushel, dockages, weights for mailing, samples, etc.

Write for prices on moisture testers and complete catalog of SEEDBURO Quality grain and seed testing equipment, which includes grain grade specifications.

We are the largest handlers of Grain and Seed Testing Equipment in the world.

Adequate stock always—prompt shipment is assured. We will appreciate your business.

SEED TRADE REPORTING BUREAU

1018 S. Wabash Ave., Chicago, Ill.

Terminal Markets

NEW ORLEANS.

M. L. Davis, Correspondent.

Stocks in elevator as of today: Wheat, 540,000 bushels; corn, 105,000 bushels; oats, 29,000 bushels; rye, 2,000 bushels.

T. J. Conroy, assistant manager of the Mississippi Shipping Company, is spending his vacation in Bay, St. Louis, Miss.

Standard Blackstrap Molasses is steady at 11½¢ per gallon f. o. b. tank cars New Orleans and light blackstrap is quoted at 12½¢ per gallon.

L. C. Frantz, Jr., treasurer of A. K. Miller Co., Inc., general southern agents of the North German Lloyd S. S. Co., has returned from a business visit to Tennessee, which State was recently placed under the jurisdiction of the local company.

The United States Government have this week received title to the company or Barrow Canal, which is 8½ miles long and connects Lockport in Lafourche Parish to Bourg in Terrebonne Parish. This is the last toll link in Louisiana on the route of the intracoastal canal which will ultimately connect New Orleans with Brownsville, Texas. It is understood the sale price was \$84,000.00.

May 31st marked the completion of the first year of operation under the direction of the Inland Waterways Corporation. Tonnage handled during the twelve months totalled 925,472 tons on the Mississippi River alone. Down-stream tonnage during the year was 460,905 tons, while 464,567 tons were moved up-stream. The bulk of the down-stream movement consisted of grain, and the bulk of shipments north bound were ore and sugar.

Tonnage handled on the Mississippi River by the Mississippi Warrior Barge Line during the six months ending May 30, totalled 518,080 tons, or at the rate of nearly 1,000,000 tons per year. Approximate figures for May show the line handled approximately 40,000 tons downstream and 56,500 tons upstream. The upstream movement was the greatest of any month in the history of the line, but the falling off in the grain movement south bound kept the month's total below that of April when 98,545 tons were handled both ways.

FORT WORTH, TEX.

G. E. Blewett, Correspondent.

Weather.

Weather in Texas the past week has been exceedingly hot and dry with a few scattered showers insufficient to relieve the extended drought or to bring needed moisture to cotton and row crops. Temperatures have been rather high with hot nights and hot bright days.

Harvesting of wheat and oats is in full blast and good progress is being made over the entire state, but so far very little threshing has been done and the movement of new crop wheat and oats are the lightest ever known at this season of the year.

Business.

Business the past week has been very disappointing, as there seems no inclination on the part of country shippers to sell short even at what they think is very high prices, and on the other hand millers are not overly anxious to obtain supplies except for their immediate requirements.

Wheat.

Receipts of wheat this past week have been very light and elevator stocks have been drained heavily and all but one concern have cleaned out their entire stocks of wheat. Country shippers have been rather reluctant to sell any new wheat for future delivery, although they seem to think that values will be sharply lower later when the movement gets under way. Exporters who have been out of the market the past two months came in Tuesday with bids for prompt shipments, but their basis was too low to prove attractive, as what wheat was offered was disposed of to mills and speculators at premiums of 5 to 6¢ over export basis.

Old wheat is rather hard to obtain except from elevators here and mills are eager buyers of all offered at good premiums. New crop wheat is moving extremely slowly and so far there has been

only one car, whereas formerly there would have been several cars here by this time. Mills are showing some inclination to buy new crop wheat in small lots but not to stock up at this level, as they all think they will be able to fill their bins with much cheaper wheat later on.

June 20 values of wheat here are as follows, basis delivered Texas common points or Texas group three points. Old crop wheat en route or quick shipment—No. 1 dark hard wheat, \$1.82; No. 1 hard wheat, \$1.77; No. 1 mixed, 75% soft, \$1.75. New crop wheat, basis No. 1 hard—No. 1 mixed, 2c less, No. 3 grades to apply; en route, \$1.72; June shipment, \$1.70; F. H., July, \$1.67; L. H., July, \$1.65.

Corn.

Receipts of corn the past week have been rather light with slow offers from the country, while demand has been good and further depletion of elevator stocks here is noted. Premiums are somewhat higher with some improvement in demand for all classes of corn. New crop corn in very bad shape with a very small chance of any production in this state, as dry, hot winds have played havoc with what little there was in north Texas that was cultivated into roasting ear stage. June 20 values, basis group 1—No. 2 yellow corn en route or spot \$1.20, prompt \$1.19; No. 2 white corn en route or spot \$1.19, prompt \$1.18; No. 2 mixed corn en route or spot \$1.13, prompt \$1.12.

Oats.

Receipts have been steady this week with somewhat slower demand and premiums have been lowered as resellers in Texas sought to unload their surplus and obtain paper profits. White oats have been unchanged with fair demand and some trading in deferred shipments, although most of the trade seems inclined to play for a break before loading up at these levels. Red oats have been very slow in moving on this crop and trading very limited although demand is steady and premiums are holding firm. Today, June 20, values basis Texas group 1—No. 3 white oats, bulk, spot 61c, prompt 60c, August 58c, September 57c, October 56c; No. 3 red oats, bulk, spot 62c, prompt 62c, August 62c.

Milo and Kafir.

Receipts and offers of the sorghums have been liberal with a slow demand and values are somewhat lower although the country dealers are not inclined to sell freely nor to offer much, as the growing crop needs rain badly and unless this is received soon great damage will result. June 20 values here, basis Texas common or group 3 points—No. 3 or better yellow milo, spot \$2.22, en route \$2.21, prompt \$2.20; No. 3 or better white kafir, spot \$2, en route \$2, prompt \$1.98.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

R. A. Judd, aged 67, a pioneer grain dealer of Afton, died recently.

Frank Foltz, secretary of the Oklahoma Millers' League, made a business trip to Hutchinson, Kans., last week.

The Ardmore Flour & Feed Co., Ardmore, has contracted for the erection of a warehouse 28x60 feet adjoining its plant in Ardmore.

J. Lloyd Ford, general manager of the Shawnee Milling Co. and president of the Oklahoma Millers' League, was a recent Oklahoma City visitor.

George C. Grogan, general manager of the Great Plains Milling & Grain Co., has been re-elected a member of the board of directors of the Oklahoma City Traffic Association.

While E. R. Humphrey, Enid grain dealer, and his wife were on a Shrine excursion to the Pacific coast recently, burglars entered their home at Enid and took valuables worth over \$200.

Officials of the leading railroads operating in the Oklahoma grain belt say that plenty of cars will be available this year for moving the grain. The Rock Island reports a larger number of cars available than ever before.

F. C. Prouty, secretary of the Oklahoma Grain Dealers' Association, has completed the first week of group meetings of members in the western part of the state. A report of the meetings has not yet been prepared.

Frank Gresham, general manager of the defunct Gresham Flour Mills Corporation of Guthrie, recently was acquitted in the Federal Court at Guthrie of the charge of violating the federal warehouse act. He was accused of issuing receipts for grain that had not been placed in the bins.

Oklahoma wheat was about three-fourths harvested soon after the middle of June.

Labor was provided everywhere needed and fair weather prevailed. Reports of yields from combination machines show an average of about 8 bushels per acre. It is believed that this will be the average for the state, making a total yield of about 25,000,000 bushels.

Myron E. Humphrey, general manager of the Chickasha Milling Co., reports completion of concrete grain storage bins at Chickasha and a new elevator at Junction, making a storage capacity for the company of 270,000 bushels at Chickasha and 200,000 bushels in country elevators. The company also has installed a new feed mill and erected a brick warehouse and made minor improvements in the flour mill. S. C. Masters, who formerly was a grain dealer at Watonga, has been employed as grain buyer and F. H. Wallace has been installed as assistant sales manager. Mr. Humphrey says that new wheat thus far purchased is of good quality and he believes that the quality for the state will be as good as the average.

DENVER, COLORADO.

F. R. Houlton, Correspondent.

The receipts of grain at Denver the past week were one hundred three cars.

J. H. Wood, wholesale flour broker of Brookhaven, Miss., was a visitor in town.

C. C. Coleman, flour dealer of Idaho Springs, Colo., was in Denver recently on a business trip.

Chauncey Abbott, Jr., vice-president of the Omaha Flour Mills, stopped in Denver on his way to Salt Lake.

Herb Hawkins, flour jobber of Paducah, Ky., was recently in Denver enjoying a vacation along with business.

M. A. Beyer, of the Lexington Flour Mills, at Lexington, Nebr., called upon some of his friends in the flour trade recently.

BALTIMORE.

Robert C. Neu, Correspondent.

Lewis G. Lederer, of Lederer Bros., grain and flour commission merchants of this market, left last week on a motoring trip South.

J. Murdoch Dennis, of Dennis & Co., Inc., grain commission merchants and forwarders of this market, will spend the summer abroad.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were C. R. Troutner, flour merchant of Philadelphia, Pa.

At the regular monthly meeting on June 17 of the Baltimore Flour Club, held at the rooms of the Chamber of Commerce, applications from two new members were received.

J. B. Wm. Hax, of G. A. Hax & Co., grain, hay and feed merchants of this city, has resigned as a member of the grain committee of the Baltimore Chamber of Commerce.

E. Steen & Bro., grain receivers and shippers of this market, have removed their offices from the Chamber of Commerce building to their main plant at 1411 Warner Street.

Harvesting of the new wheat and rye crops was expected to begin in southern Maryland and on the Eastern Shore of the state on June 20. Corn has all been planted and the crop is showing up well.

The members of the Baltimore Chamber of Commerce have been invited by Secretary J. W. McCord, of the Ohio Grain Dealers' Ass'n, to attend the 42nd annual meeting of that association, at Toledo, Ohio, June 23 and 24.

Thos. C. Craft, Jr., formerly of the Baltimore Grain Company, receivers and exporters of this market, is now representing on the floor of the Baltimore Chamber of Commerce, Westheimer & Co., stocks, bonds and provisions, 213 East Redwood Street, this city.

Although the hay crop of the United States as a whole has deteriorated, the condition of hay in Maryland on June 1 was considerably above that for the entire country and a production of 621,000 tons for this State is forecast, compared with a five-year average of 595,000 tons.

The first new wheat of the season to reach the Baltimore market came to hand on June 17, a small lot consigned to Messrs. Cephas M. Lewis & Sons from the Rappahannock section of Virginia. The wheat, while in damp condition, showed clean, well developed berry, but contained an admix-

Branch Offices: Nantes Bordeaux Marseilles

ture of smut and a trace of garlic. The parcel was bought by C. J. Landers & Co., at \$1.75 per bushel. Last year the first new wheat, also from Virginia, arrived on July 3 and brought \$1.15 per bushel.

BUFFALO.

O. W. Randolph of the Randolph Grain Co., Toledo, was a recent Buffalo visitor.

The Maple Leaf Milling Co.'s officials are considering plans for a 10,000-bbl. flour mill in this city.

H. C. Veatch, representative of the Kansas Milling Co., is back from a business trip to New York, Baltimore and points in the South.

The Holmes-Browning Co. marine adjusters, last week sold the wheat and barley that were on the barges which were recently sunk in the New York state barge canal.

L. D. Kamm, representative in this territory for the Nebraska Consolidated Mills Co. of Omaha, attended a sales conference in New York called by Joseph Weaver, the company's sales manager.

MEMPHIS.

George Williamson, Correspondent.

J. M. Cook, of the E. G. L. Feed Manufacturing Co., Helena, Ark., was an exchange visitor on Monday.

David T. P. Nelson, of the buying department of the Purina Mills, St. Louis, mingled with the trade early in the week.

Among those registering at the Merchants exchange during the week were J. K. Dunn, McComb City, Miss.; P. H. Jones, Paris, Tenn., and F. W. Lee, New York City.

This territory continued without much rain for the past week, only showers having been received at some points. The situation as it affects corn and forage crops is beginning to be serious, although in the low land sections the former is reported in fine condition. Cotton is holding up remarkably well, except in a few limited localities, and present prospects are unusually favorable for this early in the season. This station is behind average rainfall since January 1, about 17.5 inches.

Business continues quiet, as buyers are taking everything in small quantities. Stocks in all hands are small and actual feeding is believed to be up to average. The trade generally feels uncertain as to prices and is not disposed to get away from the policy of buying cautiously. Receipts are light, with cash prices off a little compared with last week end. Three white-corn is quotable June 20, at \$1.16, 3 mixes at \$1.08, and 3 yellow at \$1.17. The chief demand comes from the feed manufacturers. Oats are still in fair demand and cash white are quotable at 54½ to 55.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending June 19, were, wheat, 582,425 bus.; oats, 299,084 bus.; barley, 14,937 bus.

William P. Brazer, member of the Commercial Exchange, who recently retired from the grain business, left here on Tuesday last to make an extended visit to relatives in Pasadena, Calif.

Receipts of flour and grain for the week ending June 20th were, flour, 40,876 bbls.; wheat, 148,600 bus.; corn 1,523 bus.; oats, 21,161 bus.; rye, 1921, bus.; barley, 30,173 bus.; and 400 tons feed.

Levi G. West, manager of the Quaker City Flour Mills, Philadelphia, arrived home on Saturday from Tampa, and other points of interest in Florida, where he has been for the past three weeks.

The following out of town visits were registered at the Commercial Exchange during the past week, H. W. Lyle, Tom's River, N. J.; S. Weigel, Salem, N. J.; Stanley Shelmire, Wilmington, Del.; E. F. Emmons, Kansas City, Mo.; W. T. Pierce, New York City; L. W. Steelman, State College; Samuel A. Beck, Townsend's Inlet

Harvey C. Miller, head of the grain firm of L. F. Miller & Sons, and President of the Merchant's Warehouse Company, Southern Steamship lines, Tide water terminal and other organizations is occupying his cottage with his family at Ocean City, N. J. Morris F. Miller and mother, also his brother Roy are occupying their's.

A. E. Brecht, No. 511 Hanserry street, who for nearly sixty years had been actively engaged as a flour commission merchant with mills at 15th and Carpenter streets, died early on Friday morning last, at his home, of cancer in the stomach. He was 74 years of age and was a member of the Commercial Exchange and other business organizations.

Philadelphia Flour Market.

Philadelphia, June 20.—Receipts of flour were 40,816 bbls. The market continues dull and without important change.

We quote per 196 lbs. packed in 140-lb. jute sacks:

Soft winter straight, western \$8.50@8.75; soft winter straight, nearby, \$8.25@8.50; hard winter straight, \$8.25@8.75; hard winter short patent, \$8.75@9.25; spring first, clear, \$7.75@8.25; spring patent, \$8.50@8.90; spring short patent, \$9.00@9.50; fancy spring and city mills patent family brands, \$9.60@10.25.

Rye flour, \$7.00@7.25 per bbl. in sacks, as to quality.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

The hay arrivals for the week amounted to 315 carloads, market steady, No. 1 alfalfa hay selling at \$19.00 to \$21.00; No. 1 barley hay, \$20.00 to \$21.00; No. 1 oat hay, \$21.00 to \$22.00.

The market at this terminal during the week ending June 16th has been very firm on barley and mill feeds, but shows a decline in corn. The demand is very good for nearly all grain and grain products and the arrivals have been about normal with nothing left on track at the close of the week.

The ground feed arrivals for the week amounted to 42 cars, the demand very good with the prices firm. Utah-Idaho mill run selling at \$42.00; Kansas Bran, \$39.00; alfalfa meal, \$29.00; molasses alfalfa, \$27.00; cottonseed meal, \$40.00; copra meal, \$38.00; linseed meal, \$49.00; beet pulp, \$35.60; rolled barley, \$40.00.

No. 2 yellow corn for prompt or 10 days' shipment is selling at \$2.36; No. 2 yellow corn, Board terms, is being offered at \$2.35 with a bid of \$2.33; \$3 or better eastern white bulk kafir, Board terms, not spot, is being offered at \$2.37½ with a bid of \$2.25; No. 2 feed barley, prompt, is being offered at \$1.82½ with a bid of \$1.70; No. 2 white bulk kafir spot is being offered at \$2.40 with a bid of \$2.37; December barley in 100-ton lots is being offered at \$1.67½ with a bid of \$1.62½.

BOSTON.

The Winchester Flour Co. of Worcester has been incorporated with a capital of \$50,000.

William Mackie, sales representative of H. S. Leviston, has returned from a trip to Minneapolis.

R. C. Sowden, president, New Era Milling Co., Arkansas City, Kans., was a recent business visitor in the city.

Among recent visitors on the floor of the Grain and Flour Exchange were J. J. Fahey of New York, E. J. Thomas of Syracuse and W. E. Gould of Chicago.

A. K. Topper, chairman of the transportation committee of the Flour and Grain Exchange, has been appointed New England representative on the demurrage and storage committee of the National Industrial Traffic League.

A meeting of the retail grain trade of New England was held in Boston June 15. The associations represented were the Retail Grain Dealers of Greater Boston, Massachusetts Retail Grain Dealers Ass'n, Vermont Retail Grain Dealers Ass'n, Rhode Island Retail Grain Dealers Ass'n and the New Bedford Retail Grain Dealers Ass'n.

TOLEDO.

S. M. Bender, Correspondent.

Jesse D. Hurlbut and wife have returned from California where they attended the Shriners Convention.

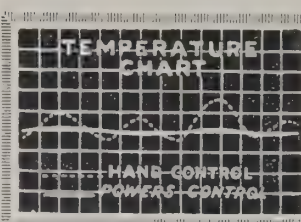

P. G. Plank, formerly of Jeromesville, Ohio, has accepted a position with the Wooster Milling Co., Wooster, Ohio.

John Luscombe of Southworth & Co., will attend the Wholesale Grass Seed Dealers Convention in Chicago, Monday and Tuesday, June 22-23.

H. P. Evans, son of C. H. Evans, miller at Galion, Ohio, has leased the Brick mill at Kenton, Ohio, and will operate the same during the coming season.

Ernest Kuehn of the Crumbaugh-Kuehn Co. has returned from a trip of several weeks duration, during which time he visited in Florida and other southern states. Fred Jaeger of J. F. Zahm & Co. says he looks more than ever like Bill Bryan since he returned from there.

Ohio millers report everything dry and lots of rain needed to make a fair corn and oats crop. Pastures are dried up in many localities though first cutting alfalfa

has been very heavy in the southern part of the state. It is too dry and hot for wheat and it looks like a short crop most everywhere.

Local mills are finding it hard to get enough grain to supply their local requirements and cars on spot are bringing good prices. Old wheat is scarcer than it has been all season and is bringing excellent premiums. Milling trade outside are good buyers and the flour demand has shown greater activity. Millfeeds are strong with stocks low in first and second hands and bran and mixed feed have been ruling higher than for some time. It is likely that with a short hay crop there will be a good demand for feed during the summer months. Corn and oats have been bringing very fair prices and the demand exceeds the supply most of the time.

NEW YORK.

J. M. Nugent, Correspondent.

There was a scattered business in barley and oats for export. In fact there has been a fair trade in oats from day to day.

During the past week, the following gentlemen visited the floor of the New York Produce Exchange: H. F. Marsh, J. W. Daniels and C. MacMillan and E. J. Grimes, all of Minneapolis, also G. F. Benson of Montreal; A. R. Campbell of Galveston, J. W. Cain of Kansas City, L. A. Draper of Duluth, W. McCarthy of Duluth, and D. A. Campbell of Toronto.

The foreign demand for wheat has been disappointing recently. Export purchases during the week were rather limited with buyers influenced to hold off owing to the excellent outlook for European crops and the continued pressure of nearby parcels and cargoes of wheat off European ports. There was a small scattered trade in Manitobas and some durums, also a few parcels of American Winters and Spring wheats but the total in the aggregate did not exceed 2½ million bushels.

Flour Situation.

New York, June 20.—All advices indicated a better demand for flour over the week, especially in the Northwest. Much of this buying was in the way of replacing unusually low stocks.

Southwestern milling centers reported a fine milling inquiry, and mills were understood to have paid \$1.50 per bushel for new wheat in Kansas. This is the first sign of a business revival in flour for two or three months.

The export demand continues rather slack and the clearances are the smallest in some time.

Spring Patents were quoted at \$8.50 to \$9.00, Soft Winter Straights \$8.25 to \$8.75, and Hard Winter Straights \$8.25 to \$8.75 per 196 lbs.

MILWAUKEE.

J. F. Foley, Correspondent.

Frank Hotchkiss and W. P. Carroll of Chicago were in Milwaukee last week.

The annual mid-summer meeting of the Wisconsin Millers' Association will be held July 9 and 10 at Menomonie, Wis.

The steamer George H. Ingalls cleared Milwaukee last week for Buffalo with 391,500 bushels of oats. They were loaded from C. & N. W. Kinnickinnic elevator.

Receipts last week were 75 cars of barley, 53 corn, 216 oats, 23 wheat, 7 rye, 4 miscellaneous; total 378 cars, against 442 the week before, 500 a year ago, and 465 in 1923.

Shipments for the week were 576,269 bus. oats, 112,675 corn, 12,540 barley, 46,900 wheat, 4,530 rye; total 752,914 bus., against 431,604 the preceding week and 489,104 a year ago.

Small grains are showing rapid growth in western Wisconsin. Barley is heading short and rye is spotted. Corn is about ten inches high in some southern counties. Meadows and pastures have improved considerably. The yield of hay is light in those places where haying has begun.

Charles R. Decker, President of the Milwaukee Bag Co., which recently consolidated with the Chase Bag Co., to form one of the largest organizations of its kind in the country, has become President of the Milwaukee Association of Commerce succeeding ex-governor E. L. Philipp who died last week.

Milwaukee milling output last week was 6,004 bbls. of wheat flour, as compared with 6,100 the week previous, and 2,500 bbls. last year. Flour receipts at Milwaukee last week were 42,000 bbls., as compared with 51,100 last year; shipments were 11,640 bbls., as compared with 1,050 in the same week of 1924.

Announcement has been made of the resignation of Gail D. Campbell as Milwaukee sales manager of the Milwaukee office of Washburn Crosby Co. He has been with that firm 12 years and has been sales manager at Milwaukee for the past three years. T. F. Scoggin, sales manager for the state territory, will succeed him.

The Milwaukee road has already started to move cars west in anticipation of the heavy movement of grain within the next 60 days, according to E. A. Lalk, local

CINCINNATI.

George Mosbacher, Correspondent.

Geo. Wirth, of the De Molet Grain Co., is enjoying a two week's vacation motoring in the East.

Walter O'Connell will succeed Frank L. Watkins as Cincinnati representative of the Cleveland Grain and Milling Co.

Dan B. Granger Co. had the first car of new hay of the season, a car of clover, of good green color, but somewhat short and showing some stubble, which they disposed of at \$16.75 per ton.

The lower basis of storage offerings of corn was depressing to the market this week, but the demand was fair. Factors both from mills for white grades and from feeders for mixed or nearly yellow.

D. J. Schuh, Executive Secretary of the Grain and Hay Exchange, left for Toledo on last Monday where he will attend the Ohio Grain Dealers' Convention on June 23 and 24. He will also attend the Indiana Grain Dealers Mid-summer meetings to be held at Michigan City, Ind., June 25 and 26.

The demand for cash wheat from mills, owing to scarcity of old, was active, and inquiries from Southern mills for one and two car lots for mixing with new Tennessee wheat and to time them over until the movement of new becomes larger were considerably increased. The market however was governed by option fluctuation and was about 8c lower for the week. Poor stuff was almost unsalable.

Stocks of grain held in Cincinnati elevators for last week and previous weeks were as follows:

	June 19, 1925	June 12, 1925
Wheat, bus.	56,946	90,712
Corn, bus.	81,622	114,278
Oats, bus.	33,160	37,197
Rye, bus.	9,019	8,974

The Cincinnati grain handling facilities of the Early & Daniel Co. are to be supplemented by a new elevator of one million bushels capacity, nearing completion. It is comprised of 16 concrete tanks, 30 feet in diameter and 112 feet high. In addition to the private business of the company, its

traffic representative of the road. He said that it takes from 15 to 30 days to load cars and move them into the western sections unless train after train of empties is sent out. The plan is to load grain cars wherever possible for the western territory. By doing this the cars are on the spot when the demand arises and the road gets a two-way haul. He reports that the distribution of cars this year is much better than it was last year.

The following were visitors at the Milwaukee Chamber of Commerce last week: J. Ode, Manning, Ia.; E. E. Kobe, Scottville, Mich.; Byron Kabot and E. O. Wright of Menominee, Wis.; H. B. and Myron Hanowitz, Mosinee, Wis.; F. E. McNally, F. B. Jaffray, and Austin Cargill, Minneapolis; A. E. Anderson, Algona, Ia.; W. Beyer, Chilton, Wis.; Adam Port, Horicon, Wis.; L. W. OMAHA.

Leigh Leslie, Correspondent.

George A. Roberts, of the George A. Roberts Grain Co., is in Florida.

Frank P. Manchester, Secretary of the Omaha Grain Exchange, has returned home

from Cleveland, Ohio, where he went to attend a convention of managers of business offices.

O. E. Harris, of the Trans-Mississippi Grain Co., has returned to Omaha after a business trip through the south.

Walter Hart, formerly of the Flanley Grain Co., and later president of the Hart Grain Company, has taken charge of the consignment department of the Crowell Elevator Co.

S. S. Carlisle, for many years a member of the Omaha Grain Exchange, for one year its president, and for a number of years president of the Carlisle-Burns Grain Co., has made a connection with the W. J. Edwards Grain Co. of St. Louis and will henceforth make his home in that city. Mr. Carlisle recently retired from the Carlisle-Burns Grain Co. and returned to his old home in St. Louis.

J. W. Shorthill, of Omaha, Secretary of the Nebraska Grain and Livestock State Association, has filed two complaints with the Blue Sky Department at Lincoln—one against the Grain Marketing Co. of Chicago and the other against E. C. Holmes and L. D. Cusick, stock salesmen for the company. Mr. Shorthill alleges that the salesmen have misrepresented the company to prospective stock purchasers and has asked that their licenses be revoked. Against the company itself, Mr. Shorthill alleges that it is not truly co-operative and

that under the Nebraska law a co-operative association must be so-called. Governor McMullen has fixed July 15 for hearing the complaints of Mr. Shorthill.

The Lucke-Gibbs Grain Co., with offices at 233-235 Grain Exchange Building, began doing business as members of the Omaha Grain Exchange June 15. The members of this company are E. L. Lucke and O. H. Gibbs, both of whom have been actively connected with the grain business in this market for many years. Mr. Lucke has had charge of the consignment department of the Crowell Elevator Co. for several years, while Mr. Gibbs has been with the Albers Commission Co. The Lucke-Gibbs Grain Co. will do a general receiving and shipping business in all kinds of grain.

DULUTH.

S. J. Schulte, Correspondent.

Flour market was easier on this market during the last week and better buying on the part of jobbers was reported in some time back. They were claimed to be running short of supplies and the moderate full concessions appeared to be an object to them. Family patents sold 50 cents off at \$9.75 a barrel and bakers patents at \$9.25.

While trading in durum has been comparatively slow for some time back, specialists are holding considerable quantities of it in the elevators, much of it for nearby shipment. Dealers here are sanguine that productions of durum over the Northwest will be on a good scale during this coming harvest, affording a larger proportion of trade for this market in taking care of buying by millers for making macaroni flour and for export to Italian buyers.

Operators were busy in oats on this market during the last week. Two cargoes aggregating 975,000 bushels were loaded out for eastern delivery and stocks were decreased 996,000 bushels to 5,275,000 bushels. The movement of oats is continuing in good volume on this market for the season, with growers anxious to dispose of their remaining holdings at around the present level of prices. In line with weakness in other grains, the quotation in spot No. 3 white oats receded 2½ cents to 47½ cents at the end of the week.

Ralph McCarthy of McCarthy Bros. & Co., was given a hearty reception by members of the Board of Trade on his return from an extended honeymoon trip taken through France, Italy, and Great Britain and Ireland. He made the heart of "Jim" Graves glad by bringing home a souvenir for him in the shape of real Irish Shillelagh. It was cut from a hawthorne bush and makes a formidable weapon of defense or offense. The recipient has announced that he is now prepared to defend himself against any holdup artists.

Houses here are receiving glowing reports from over the West regarding the crop outlook. The elevators are being thoroughly renovated in preparation for any record season's handling next fall. The trade in Duluth is figuring upon a larger percentage of the next season's crop being marketed here as a result of the active buying on account of Buffalo millers that has been underway during the last few weeks. Hedging in the new crop spring wheat futures has been on a substantial scale here during the last month.

Dealers on the Duluth market have not experienced any dull period so far. Daily receipts of all grains have been running at more than 200 cars and from reports being received by elevator men and commission houses from their correspondents they are sanguine that the movement will be continued at around its present basis for some time yet. During the present crop year from August 1 last to June 20, receipts of all grain at the elevators aggregated 195,165,180 bushels, including 107,286,679 bushels of spring wheat; against only 34,561,382 bushels last year; corn, 1,436,776 bushels against 8,158,276 bushels last year; oats 21,148,990 bushels against 4,315,357 bushels last year; barley, 3,121,484 bushels against 3,435,117 bushels last year; rye, 36,395,709 bushels against 14,542,662 bushels last year and flax, 15,775,542 bushels against 6,559,560 bushels last year.

MINNEAPOLIS.

H. A. Paul, Correspondent.

Frank McNally of the Banner Grain Co. called on the Chicago trade during the week.

Art Haglund of the Itasca Elevator Co. is spending a three week vacation around Kalispel, Montana.

Ray Ebmer of the Spencer Kellogg Co. left for Chicago on Friday. He will be gone several days.

E. J. Grimes of the Cargill Company is spending his vacation at his summer home at Green Bay, Wisconsin.

Phil Duff of Hallet & Carey is back on the floor after having spent a few days in Omaha and other southwest markets.

Charles Hamp of the Eagle Roller Mills is attending a conference of department heads at the main office at New Ulm, Minn.

John Barrett of Chicago was a caller on exchange during the week. Mr. Barrett is just completing an extensive crop investigating trip.

Among the visitors on exchange during the week were the following: D. P. Moore, H. J. Smith, L. Calvert and W. H. Miller of Kansas City; A. L. Coxwain and C. W. Lawson of Detroit, Mich.; Robert Reasoner of Omaha, A. Murray of Aurora, Canada, W. L. Evans of Beaumont, Texas, J. J. Lavin of Portland, Ore., John F. Brown

and John Thomson of Boston, Mass., C. A. Parsons of Duluth, W. H. Murphy and H. W. Beyers of Chicago.

Cash Markets.

Wheat: Early in the week, the tone of the local market was of a rather erratic nature. Right after the opening, mills would seem inclined to take the current offerings at firm premiums, but with the later train offerings coming in, they would back away, cutting down their bids. Monday, they were willing to pay from 4@28c over the July for choice hard spring wheat but by today, the top of the range had been reduced at least two cents.

About mid-week, a better demand from outside territory began to make itself felt, otherwise there might have been a further slump in premiums. The east was inquiring for certain kinds of wheat and one or two houses had wires from Montreal, asking for offers. Shipping sales improved materially.

Mills generally were reporting fair to good flour business. The flour trade may surprise us yet and pick up before the summer is very far advanced. If the prospect of the United States being on a domestic basis this year, as far as wheat supplies are concerned, ever becomes an actuality instead of just a possibility, there undoubtedly will develop a wild rush to buy flour and present levels, under those conditions, would look dirt cheap.

Local elevator stocks show a decrease of about 300,000 bushels for the week, the total being 5,935,936 vs. 6,289,542 a week ago and 8,679,764 a year ago.

Today's range of sales shows No. 1 hard spring selling at 4@26c over the July, No. 1 dark northern, 3@25c over the No. 1 northern, 2@24c over. No. 1 amber brought 5@22c over Duluth July; No. 1 mixed, 3@21c over and No. 1 durum, 4@21c over.

Corn—There is not a great deal to be said regarding the local corn market during the week ending today. Road offerings are down to a minimum and neither does there seem to be much of any demand for even the reduced receipts. There were only one or two buyers interested in what was on the tables, at any one time and it probably was a good thing that receipts were at their present low ebb. Local stocks show but very little change for the week ending today, being 356,935 bushels vs. 373,799 a week ago and 54,145 a year ago.

Basis today's range of sales, No. 2 yellow will bring July (Chgo.) price @1½c under; No. 3, 2@4c under; No. 4, 5@8c under. In the mixed corn, No. 2, 5@6c under; No. 3, 6@8c under and No. 4, 9@12c under.

Oats—There appeared to be a good consistent demand for cash oats during the past week. Offerings were inclined to be rather light and with shippers in the market for fair amounts, premiums held up fairly well for the past six days. No. 3 whites were bringing about ¼c over the July and No. 4, ½@2c less. Yesterday there was some No. 3 white worked on a basis of 1c over the July future but this price did not hold up today.

For the first time in months, the local stocks showed an increase over the previous week. Not a very substantial one, of course, but it was not a decrease, at least. Totals for the week ending today were: 13,517,496 bushels vs. 13,405,895 a week ago and 545,314 a year ago.

ST. LOUIS.

W. C. Dickerman of this city was in Boston on business recently.

V. H. Glosemeyer, president of the Glosemeyer Flour Co., has returned from Milwaukee.

J. M. Chilton of the Hall-Baker Grain Co., has returned from a motor trip to Kansas City.

C. H. Williamson of the Overland Grain Co. has been spending his vacation at Phillips, Wis.

H. Wiener of H. Wiener & Co., grain importers, Amsterdam, Holland, was in St. Louis last week.

John M. Hawkins of the Hunter-Robinson Milling & Grain Co. has been on a trip through Tennessee.

Frederick W. Clemens, one of the oldest members of the Merchants' Exchange, St. Louis, died June 9, aged 69.

The sympathy of the trade is extended to Alexander Pound, export manager of the George P. Plant Milling Co., in the death of his mother.

The Overland Grain Co. will move their offices on July 1 from the Federal Reserve Bank building to rooms 505-506 Merchants Exchange building.

Ivan F. Wieland of the Turner Grain Co. and H. F. Wright of the Marshall Hall Milling Co. have been elected to membership in the Merchants' Exchange.

The Meyer Milling Co. announces the appointment of J. C. Evans as sales manager for the company. Mr. Evans was formerly connected with the Meyer Milling Co.

E. T. De Reamer is the new southeast Missouri representative of the Pillsbury Flour Mills Co., succeeding Marvin McMullin who resigned. His headquarters are in this city.

Flour output of the following mills was 60,700 bbls. last week, against 53,400 the week before, as follows: G. P. Plant Milling Co. (city), 7,000; Standard-Tilton Milling Co. (Alton, Ill., and Dallas, Tex.), 8,500; Marshall Hall Milling Co. (East St. Louis), 6,000; Sparks Milling Co. (Alton, Ill., and Terre Haute, Ind.), 12,000; Saxony Milling

Co. (city), 3,600; Meyer Milling Co. (Nashville, Ill., and Springfield, Mo.), 1,400; Hezel Milling Co. (East St. Louis, Ill.), 1,500; J. F. Imbs Milling Co. (Belle-ville, Ill.), 3,000; Bernert, Craft & Kaufmann Milling Co. (Mt. Carmel, Ill.), 6,700; Valier & Spies Milling Co. (4 mills), 10,000; Annan, Burg & Co. (city), 1,000.

The Marshall Hall Milling Co., which recently was formed to take over the mills formerly run by the Kehlor Flour Mills Co., commenced operations on June 15. It is expected that the well-known Kehlor brands will be continued, the company, however, making such changes as it thinks will be beneficial. As has already been announced, J. F. Hall has been appointed general manager, while Herman F. Wright, formerly wheat department manager, American Hominy Co., has the position of assistant general manager. Marshall Hall, as president of the milling company, and Wm. T. Brooking, vice-president, with Ludwig Hesse, secretary and treasurer, have been long prominent in the affairs of the St. Louis Merchants Exchange.

KANSAS CITY.

T. J. Tanner, Correspondent.

George Cravens, pioneer grain man of Summerfield, Kan., died Thursday morning.

Harry J. Smith of the Mid-Continent Grain Co. has gone to Pequot, Minn., for a vacation of a few weeks.

Charles E. Fisher of the Equity Union Grain Co. was elected to membership in the Kansas City board of trade Tuesday.

The four story frame feed mill of the C. O. D. Coal Co. burned Friday night, with a loss of \$3,000. It contained very little grain or feed stocks.

Among the week's visitors at the Board of Trade were D. C. Harrower and M. H. Levearch, New York; W. H. Weller, Quincy, Ill., and J. F. Kroutill, Yukon, Okla.

Neosho, Mo., reports that wheat threshing returns, average 7 to 8 bus. per acre, with the quality only fair. The berry is shriveled and small. Mills will take the supply.

F. C. Hoose, Vice-President of the Norris Grain Co., made a tour of the northwestern spring wheat region this week. He made an optimistic report on wheat, but said corn had a poor outlook.

L. A. Fuller is chairman of the general committee appointed by the Kansas City Board of Trade to provide entertainment for the Grain Dealers' National Association at the convention to be held here in October.

Allen Logan of the Logan Bros. Grain Co. says his wheat threshing reports from Kansas show good color, but poor yields. Other reports show protein tests as follows: Mullinville 14.40 per cent, Attica 13.40, Conway 13.20 to 14.92, Montezuma 13.80 to 14, Copeland 15.

The first car of new crop Kansas wheat to reach Kansas City, which arrived Friday, sold at \$1.63½ a bushel. The Mensendieck Grain Co. received the car from Eula, Kan. It graded No. 1 hard, 12.44 per cent protein, 13.04 moisture and weighed 60.6 pounds to the bushel.

Otto Lehrack was awarded contracts for the erection of a 1,000,000 bu. grain elevator for the Chicago & Alton R. R., to be finished by Oct. 10. Eleven firms bid for the business, the range in estimates being around \$100,000. Machinery contracts will be awarded this week.

Oscar T. Cooke, manager of the Wyandotte elevator reports excellent progress on the addition to the plant which consists of 24 reinforced concrete bins and 18 interspaced units. When completed the total capacity of the elevator will be increased from 1,750,000 bushels to 2,500,000.

G. M. Bush, former manager of the Kansas City office of the United States shipping board, has organized the firm of G. M. Bush & Co., which will do business as

freight brokers, forwarders and steamship agents. The main office will be in Room 135, Board of Trade building. Branches will be maintained in Houston and New Orleans.

While on his recent crop-reporting trip, W. J. Mensendieck met with a serious accident near Akron, Colo. His motor car collided with an abandoned farm truck at night. The impact resulted in a dislocated arm for Mr. Mensendieck, as well as body bruises and lacerations. Mr. Mensendieck went to a hospital in Fort Morgan, Colo., and remained several days and he had not entirely recovered when he returned home.

Byrd Rogers of Guymon, Okla., was a visitor at the Board of Trade Saturday. Mr. Rogers spoke very pessimistically of crop conditions in northwestern Oklahoma. "Due to drouth last fall, our wheat was a failure this year and we will have to import seed," he said. "We usually raise lots of kafir, milo and broom corn in our locality, but moisture has been very scarce this spring and farmers have been reluctant to sow these crops in dry ground."

E. C. Meserkey, Jr., of the Hall-Baker Grain Co., who returned Saturday from a motor trip in Kansas, said the state might harvest 90,000,000 bus. of wheat. "The best wheat in the state," he said, "is in the north and parts of the west on the Rock Island and on the Oberlin and St. Francis branch of the Burlington. Threshing returns in Southwest Kansas range from six to sixteen bushels an acre. At Bucklin the average on several fields was around six and one-half bushels an acre. All wheat there is averaging about 13 per cent protein."

An accident on one of the elevators of the new Board of Trade building Saturday night caused the sudden death of George Dettler, Jr., seven-year-old nephew of Fred C. Hoose, Vice-President of the Norris Grain Co., and manager of the Kansas City office. The boy's home is at Caledonia, N. D. He was in Kansas City on a visit. Riding in a passenger elevator was a new thing to George. Standing beside his uncle, he became dizzy and lost his balance as the car sped upward. Between the third and fourth floors he fell forward. His head was caught by a floor projection and crushed before he could be rescued.

Cash Grain Markets.

Wheat—Receipts for the week, 481 cars, against 459 a week ago and 451 a year ago. Imminence of the new crop movement and weak action of futures had a depressing effect on prices. Though the market had strong periods, the tendency was lower and closing quotation on hard and dark wheat showed net losses at 10¢ cents per bushels, with No. 1 at \$1.54@1.80, No. 2 at \$1.54@1.80, No. 3 at \$1.53@1.80 and No. 4 at \$1.49@1.78. Premiums on protein samples over the July option were very stiff, running as high as 33 cents for the best, though flour trade here was not as active as in Minneapolis. Shipping sales were not large. A few cars of new wheat arrived from Oklahoma and Kansas, some grading No. 1 and other No. 4 hard, with good protein content. Weight was heavy, due in part to moisture, which was attributed to premature threshing by combined harvesters and threshers. On Saturday it was reported that Wichita, Kan., had received 100 cars of new wheat, and it was expected that Kansas City's arrivals next week would begin to swell. As farmers are securing 30 cents to 40 cents more for their grain than at this time last year, it is believed they will sell freely. Realizing that the Southwestern crop is fully one-third less than in 1924, the mills undoubtedly will endeavor to accumulate supplies of wheat early in the season. Exporters are not counting on much business during the coming year, but there will be some trade of this character in the lower grades. Fresh offerings of soft wheat this week were very light, with no new grain. The market had a weak tone, closing nominally 7@10 cents down, with No. 1 at \$1.71@1.75, No. 2 at \$1.70@1.75, No. 3 at \$1.67@1.73 and No. 4 at \$1.60@1.71. Stocks of wheat in Kansas City elevators decreased 141,000 bus. to 1,533,000, as compared to 5,989,000 last year.

Corn—Receipts, 219 cars, against 301 a week ago and 231 a year ago. Hot weather and rains, favoring the growing crop, and weaker wheat perpetuated the bearish tone of the previous week in corn. The best buying was for industrial account, with orders from eastern territory, and for local feeding purposes. The South was a disappointing buyer, despite drouth news from Texas. Carlots closed generally 2@3½¢ lower, as follows: No. 2 white, \$1.03@1.04; No. 3, \$1.02@1.03; No. 2 mixed, \$1.02½@1.03; No. 3, \$1.02; No. 2 yellow, \$1.07@1.08; No. 3, \$1.06@1.07. Stocks here are considered large for the period. During the week they decreased 293,000 bus., to 2,777,000, against 273,000 a year ago.

Oats—Receipts, 95 cars, against 92 a week ago and 31 a year ago. Without the help of storage interests, the demand would have been very slack. New oats are expected to be offered within the next few days. They are already being used in the southern states, cutting off the demand from that source. Local prices declined 3@5¢, with red showing the greatest drop. Final prices were: No. 2 white, 51¢; No. 3, 49¢@50¢; No. 2 red, 50¢; No. 3, 47¢. Stocks increased 115,000 bus., to 689,000, against 58,000 last year.

WINNIPEG.

Geo. H. Measham, Correspondent.

The weather map promises more settled conditions and moderate temperatures for the next few days.

Weather over the west is warmer and the only rain over night was at Winnipeg and down the Red River valley where there has been too much rain of late.

Hay, both wild and cultivated promises to be early and abundant. Much wild hay land is at present under water but this condition will probably remedy itself during the next six weeks. All fodder crops are a good catch, but need warmth and sunshine.

Saturday's market was a somewhat tame affair. Prices were a little low at the opening, but held steady during most of the session on a light trade. July sold off during the last half hour and other grains slipped a little. It was a case of week end evening up with longs taking profit.

Reports were in circulation of Russia having prospects of surplus wheat for sale, and of having already made contracts for future delivery to France, but locals are inclined to put little credence in these reports, which are thought to be merely the repetition of Bolshevik propaganda, which had similar stuff floating around at this time last year.

Oats continue to be in good demand for export and No. 2 c. w. oats are scarce and command a big premium, selling during the week as high as 3 cents over the May, but a cent of this was lost at the week end. The oat crop is apparently not making as good a showing as wheat and this is true of the other coarse grains. Oats and barley would greatly benefit by a spell of warm dry weather.

Observers who are constantly on the road and see both sides are neither depressed nor elated at crop prospects. Crops look good, especially on summer fallow where growth is rank, too rank sometimes. Wheat stubbled in does not promise well. On heavy clays the plant does not look healthy and in places looks sick. On sandy loams wheat looks beautiful. On the whole conditions are for an average crop for the whole west.

The menace of rust is making every one anxious. Rust has made its appear-

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

A small fire, approximately \$5,000, was suffered by the Aunt Jimma Mills in the drier house of the No. 1 plant on June 13.

Harry C. Gregory has been elected to membership in the St. Joseph Grain Exchange on transfer from M. U. Norton, and will represent the Norton Grain Co. on the trading floor. Mr. Norton has not announced his plans.

On June 13th a fire thought to have been caused by defective wiring caused damage amounting to about \$500.00 at Aunt Jimma Mills Co.'s corn mill at 11th and Atchison Streets. The blaze originated in an air shaft on the third floor. The fire was checked by a sprinkler system. There was a slight damage from water on the second floor of the plant. The loss was covered by insurance.

Wheat offerings have been very small during the past week, and demand fair to good from mills for protein wheat. Hard wheat prices are three cents lower for the week, and soft about six lower. Corn prices 2 to 3 lower for the week, with a tendency for a weak cash market in view of the apparently good crop prospects. Oats prices 3½@4 cents down for the week; offerings have been very scant.

SIOUX CITY.

H. C. Wilson, traffic commissioner of the Chamber of Commerce, has been confined to his home with a case of grip.

L. G. Wertz of Sioux City was re-elected president of the Iowa Seed Dealers Ass'n at the 26th annual convention of the organization held at Des Moines, H. H. Johns of Sioux City was re-elected chairman of the legislative committee.

Frank W. Mondell, Washington, D. C., director of the War Finance Corporation and majority floor leader of Congress during the 66th and 67th sessions, was the principal speaker at a special meeting of the membership of the Chamber of Commerce held at the Chamber of Commerce at noon June 16.

C. C. Flanley, president of the Flanley Grain Co., was elected chairman of the executive board of the traffic bureau of the Sioux City Chamber of Commerce at the annual meeting of the board. D. P. Mahoney was named vice-chairman. H. C. Wilson was renamed traffic commissioner

E. W. Fierke of the Washburn-Crosby Co., Minneapolis, was a recent visitor at the company's office in Chicago.

Press notices Monday referred to the death of Senator Ladd of North Dakota, a man who had given much attention to grain and farm trade affairs and was the father of several bills on the subject.

Fred J. Case, for many years with E. Lowitz & Co., is now in the customers' room of J. S. Bache & Co. Mr. Case has a long standing trade and is optimistic of extremely good business on the present crop movement.

The Chicago Mercantile Exchange, providing a trading floor mainly for eggs, poultry and butter, reports an ever-increasing volume of business. Its clearing house members are actively engaged in future trading and hedging, offering a genuine public service at all seasons of the year. The exchange is located at LaSalle and Lake streets.

Trade Opinion.

Cables lower, on the large exports from Argentina and Australia. Domestic crop news is one sided, apparently a great reluctance to make extended favorable comment. Samples of newly threshed lots from the Southwest vary in quality, ranging from poor to very good. In the big spring wheat districts the crop is making excellent progress; the Southern areas show effects of early unfavorable weather.—Pope & Eckhardt Co.

The wheat market is being influenced mostly by crop prospects and crop prospects during the past week, in general, have improved; the improvement being in the spring wheat section of both the United States and Canada. During May, winter wheat prospect was the dominant influence, and as these prospects steadily declined prices advanced. Mid-June reports from our correspondents indicate a further shrinkage of winter wheat prospects to 403 million bushels. Our end of May forecast was 424 million and the government June 1 forecast 407 million. Last year's crop was 590 million. Our mid-June spring wheat forecast is 271 million bushels. Our end of May forecast and the government June 1 forecast was 254 million. Last year's crop

was 283 million bushels.—Clement Curtis & Co.

Reports of poor threshing returns were received from southwest Kansas, the yield being far below expectations. It is becoming apparent that we are breaking away from the influence of foreign markets and that the domestic situation is developing more strength each day. Flour buyers have been holding off making new contracts and mills have not been in a position to offer large quantities of flour due to the fact that they are unable to figure out on what basis the new crop will start moving. Reports from the Northwest indicated that the spring wheat crop is not at present suffering from black rust, but both in our Northwest and in Canada there has been a large excess of moisture. The Red River Valley reports a great many fields under water. If a hot wave should develop serious damage might develop.—Bartlett Frazier Co.

The market shows ability to recover from sharp declines and in all it maintains a very strong appearance. New wheat is now moving to the southwest markets and prices at Wichita yesterday were \$1.62 for No. 1 hard wheat of good weight and containing around 13 per cent protein. Buyers have become accustomed to the present prices for flour and bread and little, if any complaint is being heard from the consumers in this country. We think that the demand for cash wheat will be equal to the supply and we believe every farmer in the southwest remembers well that those who sold their wheat from the threshing machine last year received the lowest price of the season. With these thoughts in mind, the producer will probably bin every bushel of wheat that he has room for on the farm. Weather and moisture conditions are absolutely perfect for the new crop of corn and we see no reason to expect any upturn in prices.—Farnum, Winter & Co., W. F. Murphy.

No definite reports of Rust were received from the Northwest today, although in certain sections too much moisture is present. Foreign crop reports continue favorable and it is reported from some quarters that Russia is expected to have an exportable surplus of about 75,000,000 bu. On the other hand, we understand from reliable people that the crops in Italy, Spain and Germany are apparently not as good as they were a few weeks ago and that there is possibly a 5 per cent deterioration of the European crops in general. No business was reported at the seaboard, but indications come to us that Great Britain

ance south of the boundary and this is decidedly disquieting so early in the season. First reports brought out the customary denials and statements of no damage, etc. Damage there will be, but whether important or insignificant will depend on weather conditions during the next month or six weeks. One thing is certain, rust is now a market factor of first importance.

At this season the weather and the crops are uppermost in all minds in the business world. To try and guess the future is human nature and optimist and pessimist have even more widely divergent views than usual as to how things are shaping in western Canada. The office man sits in his armchair and congratulates himself on the abundance of the June rains and says it is impossible to get too much. Some farmer down the Red River valley farming land that was a hay swamp a few years ago has most of his wheat sitting in water

is paying a premium for wheat afloat, which shows that they need nearby grain. The market will reflect readily any change in the weather conditions and rather wide swings are to be expected, as generally occur in weather markets. We look for good support to be present to the wheat market on extreme reactions.—J. J. Badenoch Co.

Export cables were flat in tone, seaboard finding only a few scattered lots sold, but the amount on passage is decreasing steadily and according to one English authority the total is as low as 44 millions, from which it is argued that importers will soon be buyers. A London cable expresses the belief that Russia will have two million tons of wheat as an exportable surplus, other cables announce a small lot of Russian wheat sold for October shipment at some 10 cents under other sorts. Threshing returns from the Southwest were more mixed in character, there being some reports of considerably better yield than expected. It is conceded that there is possibility more or less remote of rust damage to spring wheat, but this fear has been pretty well anticipated and the market is now about to be called upon to accept the first movement of new winter wheat. Weather conditions in the Northwest will be the controlling force, therefore, it is impossible to have fixed ideas.—Thomson & McKinnon.

Wheat prices averaged lower due to scattered pressure from local and outside sources, part of which appeared to be a reflection of the new wheat movement in the southwest. A good deal of comment was heard to the effect that the movement was under way, with reports of fairly liberal receipts at Wichita and other interior points in Kansas and the weakness in the Kansas City market attracted considerable attention, the September delivery selling at more than 7c under Chicago compared with a recent 5c discount. This confirmed the opinion that hedging pressure was making itself felt and led some traders to believe that a similar condition would exist in our market in the near future, when Illinois wheat commenced to move. There were scattered reports of rust from the Northwest, but this has lost its influence as news at the moment and the trade are now inclined to wait and see whether the

weather is of such a character as to develop this menace to a dangerous stage.—Cross, Roy, Eberhart & Harris.

We are still of the opinion that the heavy winter wheat shortage in this country will create a strong domestic price situation in the coming crop season, as the world's carry-over of old wheat promises to be abnormally low and it is only a question of time when importing countries have to become heavy buyers of both old and new wheat. The excellent condition of our spring wheat crop and the exceedingly optimistic European and Canadian prospects, together with the movement of our new wheat now starting, continue to be the depressing factors in the present situation. The market, however, is a weather affair and any change from the present favorable conditions, as the development of black rust damage in the spring wheat territories, may easily result in a sharp upswing of values. The trading market is likely to continue for some time, but we believe that the speculative possibilities are on the long side of the market and suggest purchases on all minor declines from the present price level.—Charles Sincere & Co.

PORTLAND, ORE.

R. H. Campbell, president of J. A. Campbell Co., was in Denver on business.

M. Senders of Senders & Co. of Albany, Ore., was a visitor on the Portland exchange last week.

C. B. Hillsbury, who represents the Russell-Miller Milling Co., stopped in Minneapolis last week en route to his old home in Memphis.

H. R. Otis, formerly assistant manager of the Farmers Union Milling & Elevator Co. at Denver, Colo., is to enter the grain and flour business at Portland.

A. F. Steele of the Hood River Traffic Ass'n has been named chairman of the Northwest Regional Advisory Board which is to have its headquarters in this city.

The British steamer Innerton, as well as the Clearton, will load new wheat crop, developments showing that while the latter had been reported taken recently the Innerton was engaged as well. Another fixture, said to be the British steamer Passay, became known. The rate is understood to have been 32s 6d.

Balfour, Guthrie & Co.'s plans to construct an 8,000-ton grain elevator on Irving dock, which will be ready to handle some of the new season's export wheat, were approved by the commission of public docks subject to the installation of a sprinkler system and general conformity with regulations affecting structures in that zone. The elevator will be of laminated wood construction.

Grain Dealers

A bumper wheat crop for Oregon and Washington is the forecast given out by Waldo G. Payne, vice-president of the P. & E. railroad. Mr. Payne has traveled extensively through the wheat belt of the two states within the last three weeks and he declares he has found prospects for a crop to exceed any in the last 36 years. He also predicts that farmers will realize \$2 a bushel for their wheat crop.

The grain trade of the Northwest is much interested in the California barley situa-

tion, particularly the effect that developments in that state will have on prices here. The California barley crop will be about double that of last year, which is likely to have a bearish influence on the feed market of the entire coast. On the other hand, the crop as a whole is off in quality and this means a very small percentage of good export grade. The latest reports from the San Joaquin valley are that 75 per cent of the barley was stained by rains prior to

[Continued on page 11]

News of the Country Grain Trade

ARKANSAS.

Ingram, Ark.—J. L. Condict has put up a grain mill and installed a gas engine.

Harrison, Ark.—The Middleton Feed Company and the Ellis Feed Co. have consolidated.

Blytheville, Ark.—The C. L. Bennett Feed & Coal Co., among other improvements, has installed two modern scales.

CALIFORNIA.

Stockton, Calif. — Otto T. Dietrich, superintendent of the Guernsey-Ames Co., prominent grain merchants, died recently, following an illness which developed last January.

COLORADO.

Arriba, Colo. — The elevator of the Mosher Grain Co. was damaged by fire.

Fowler, Colo.—G. I. Boyd purchased the interest of M. L. Stubbs in the Boyd Grain Co.

Haxtun, Colo.—J. B. Ghent succeeds R. R. Archer as manager of the Haxtun Mill & Elevator Co.

Peetz, Colo.—The Nebraska-Colorado Grain Co. has started the construction of a 10,000 bushel capacity grain elevator, to be equipped with modern machinery. It will be completed to handle the new crop. Peetz grain elevators will have a combined capacity of 30,000 bushels this year.

GEORGIA.

Cairo, Ga.—The Cairo Mill & Elevator Co. was destroyed by fire, causing a loss of approximately \$5,000. Building had not been in use recently and part of the machinery had been removed. It was insured.

IDAHO.

Lewiston, Ida. — Fire destroyed the Thomas F. Wren grain elevator located at Fenn station, the loss estimated at \$85,000. Grain was fully covered by insurance, and the elevator, valued at \$25,000, was insured for \$12,500. Two cars of wheat on the siding were burned.

American Falls, Ida. — The town of American Falls will be submerged by the waters of the lake, a tall concrete elevator shaft to be the only thing left standing. A new elevator is being constructed on the new townsite, a mile or more from the present location of the old elevator.

Bonnors Ferry, Ida. — Ralph Clapp, manager of the Bonners Ferry Grain & Milling Co., has leased a strip of right of way from the Great Northern Ry. and the company will construct a brick and frame three-story warehouse and grain elevator, 32x100. They will operate a feed mill, adding units to their present equipment.

ILLINOIS.

Forreston, Ill.—Ernest Ranz bought the Erdmeier Feed Mill.

Danville, Ill.—Fire badly damaged the plant of the Frank Holland Feed Co.

Yates City, Ill.—Lightning rods have been installed at the feed mill of Robert M. Hall.

Bloomington, Ill.—Eugene D. Funk was elected President of the American Seed Trades Ass'n at the annual convention held in Los Angeles.

Bushnell, Ill. — Charlie Oharins of Fairbanks Morse & Co. has installed a

new truck dump and scales at the elevator of the Curtis Grain Co.

Coles Station (Coles P. O.), Ill.—The interest of J. B. Stone in the firm of Morris & Stone, who operate an elevator, was purchased by Ed. Morris, his partner. Mr. Morris intends to conduct the business under his own name.

Bowen, Ill.—Wilson, Lewis & Co. of Springfield has purchased the Bowen elevator from the local corporation and will remodel the elevator building at once, the office and feed buildings to be improved later. Mr. Harrison was retained as manager.

Hillsboro, Ill.—At the annual meeting of the Farmers Elevator Co., the following directors were elected: F. W. Krummel, Jr., H. E. Paisley, T. A. Alderson, W. A. Ellington and Allie Edwards. Mr. Drummel was named president, Allie Edwards, vice-president, and W. A. Ellington, secretary.

INDIANA.

Muncie, Ind. — E. E. Elliott of the Woodbury-Elliott Grain Co. was recently chosen as a member of the wheat committee of the Indiana Millers Ass'n.

Corydon, Ind.—The extensive mill of the Zabel Milling Co. is now being operated on a twenty-four hour working basis, indicating a general resumption of business on a greater scale than for past several months.

Hortonville, Ind. — The Hortonville Co-op. Elevator Co., when declared insolvent, had a total investment and indebtedness of \$27,000, according to a report of Receiver A. M. Stephenson. Grant Caca & Sons bought the building for \$5,000 and the merchandise for \$2,000. About \$1,400 more must be raised by the stockholders, besides all of them losing their original investment.

IOWA.

Rolfe, Ia.—Geo. Arnold has taken up his duties as manager of the old line elevator.

Dysart, Ia.—Clarence Rawson is now operating an elevator which he purchased recently.

Wilton, Ia.—Fire damaged the Wilton Feed Mill owned by A. W. Chamberlain, with a loss of \$1,000.

Duncombe, Ia.—The Farmers Elevator Co. recently completed its iron clad 40,000 bus. capacity elevator, which is now in operation.

Council Bluffs, Ia.—The Trans-Mississippi Grain Co. will operate a huge grain elevator, now being erected, which will hold 1,250,000 bushels of grain.

Titonka, Ia.—Statement for the Farmers Elevator for the 12 months ending May 31 shows total amount of business transacted was \$415,595.89. A net profit of more than \$2,000 was earned.

Sioux City, Ia.—L. G. Wertz, president of the Wertz Seed Co., was re-elected president of the Iowa Seed Dealers' Ass'n at the annual convention of the association in Des Moines. H. A. Johns, president of the Sioux City Seed Co., was re-elected chairman of the legislative committee.

Audubon, Ia.—The Trans-Mississippi Grain Co. purchased the elevator of the Audubon Co-op. Exch., together with permanent fixtures, at public auction from Receiver F. J. Anderson, for \$3,100. The Grain Co. had been operating the elevator on lease for the past year. The sale does not include the ground, the exchange having occupied it on a leasehold. They paid \$16,000 for the property several years ago.

KANSAS.

Norwich, Kans.—The Farmers Elevator has installed a new grain dump.

Garden City, Kans.—L. L. Beachler of Fairbury, Neb., has taken over the

management of the Finnup-Nolan Grain and feed elevator.

Seguin, Kans.—A Trapp Truck Dump will be installed by the Robinson Mfg. Co.

Hannum, Kans.—Windstorm slightly damaged the elevator owned by Bossemeyer Bros.

Harper, Kans.—The Bowersock Mills & Power Co. will install new Howe Truck Scales in its elevator.

Cunningham, Kans.—Arthur Kinder of Sterling, has taken charge of the Bowerstock Mill & Power Co. elevator.

Belpre, Kans. — A new Fairbanks Registering Beam Scale has been installed at the elevator of the Belpre Mill & Elevator Co.

Spearville, Kans. — The Hall grain elevator has been purchased by the Bowerstock Milling Co. from Joe Hall of Dodge City. It will be managed by F. H. Moberly of Beloit.

Willard, Kans.—L. B. Bethel, cashier of the Willard State Bank, reports that the Willard elevator will open for business for the coming grain season. The Grubbs Grain Co. of Topeka are the lessees.

Wichita, Kans.—The Wichita Union Terminal Elevator Co. is adding a unit to its elevator which will be completed to receive a part of the 1925 wheat crop. The unit will increase the capacity of the elevator by more than 800,000 bushels and give it a total capacity of 2,000,000 bushels.

Arkansas City, Kans.—The Arkansas City Milling Co. is separating its grain department, including country elevators, from the flour mill activities of the company. C. E. Jones, formerly manager of the Hutchinson branch of the Salina Produce Co., will manage the grain department.

Hutchinson, Kans.—C. C. Kelly of the William Kelly Milling Co. has been elected president of the Hutchinson board of trade. Other officers elected were: E. J. Whalen, vice-president, and E. E. Shircliff, R. W. Vance, A. G. McReynolds, C. D. Jennings, G. D. Estes, Ralph Russell and R. C. Davidson, directors.

Formosa, Kans.—A group of fifteen influential farmers of this community have purchased the Formosa elevator property and other real estate, in the re-organization of the Farmers Union business. The purchase price was \$8,000. The official board is comprised of the following: R. R. Higbee, president; Jacob Joerg, vice-president; J. D. Shedden, secretary; John Baird, treasurer, and Henry Dunstan, director.

KENTUCKY.

Poole, Ky.—The new flour mill is expected to be completed by the end of the month.

Germantown, Ky.—A complete fire loss of \$15,000 destroyed the Germantown Milling Co. on June 16.

Morganfield, Ky.—The two additions now under construction at the Morganfield Roller Mills plant will greatly enlarge production and storage.

LOUISIANA.

Shreveport, La. — An addition has been planned by the Fowler Commission Co., formerly Shreveport Mill & Elevator Co., which will double the capacity of the plant. Work will be started within 90 days.

Shreveport, La. — The concrete and steel mill and elevator being erected by the Shreveport Grain & Elevator Co. will have a capacity of one-half million bushels and a complete cleaning and sacking equipment, with facilities to handle 50 cars per day. L. B. Finley will manage the new plant which will soon be completed.

MARYLAND.

Frostburg, Md.—The W. C. Jones Co., manufacturer and jobber, will enter the flour and feed business, dealing in car lots of these commodities.

MICHIGAN.

Mason, Mich.—The roof of the Mason Elevator Co. was slightly damaged by windstorm.

Adrian, Mich.—On May 25 the local plant of the Detroit Mfg. Co. was sold at sheriff sale, including real estate, buildings, together with equipment and machinery.

Grand Rapids, Mich. — The Voight Milling Co. is contemplating installing new machinery and operating the mill which was partially destroyed by fire some time ago.

Berrien Centre, Mich.—The biggest wheat deal reported in Cass county in years was recently transacted by the Wager Grain Co. when they purchased 8,000 bushels in one day at Pokagon, paying growers \$1.75 per bushel for the wheat, which was shipped out at once to Pennsylvania.

MINNESOTA.

Green Isle, Minn.—The Equity Elevator Co. is now managed by Frank Murphy of Eden Valley, following the death of Dan Egan.

Sanborn, Minn.—Fire severely damaged the elevator of the Farmers Co-operative Elevator Co.

Tyler, Minn.—Effective June 15, Lars B. Seljevoid was named manager of the Farmers Elevator Co.

Traverse (P. O. St. Peter), Minn.—Selmer Johnson succeeds Tom Miller as manager of the Farmers Elevator.

Waltham, Minn.—The old Waltham flour mill, said to have been owned by a Mr. Flack of Sargeant and Mr. Keefe of Stewartville, was completely razed by fire.

Duluth, Minn.—W. G. Kellogg and W. J. McCabe are new members admitted on the Board of Trade. Harry C. Olson and R. M. Knox are applicants for transfer.

Hancock, Minn.—The W. L. Johnson iron clad elevator is nearing completion. It has 14 bins and 2 legs. A 5-bin coal shed is also being erected. T. E. Ibberson has the contract.

Porter, Minn.—The Eagle Roller Mills has installed a Strong Scott Dump in its elevator here, at their station in Redwood Falls and also at the Tracy station. T. E. Ibberson Co. did the work.

Wheaton, Minn.—T. E. Ibberson Co. has the National Elevator Co. contract for the erection of a 6-bin coal plant here and a 10-bin coal plant at Dumont, in which modern equipment for handling coal will be installed.

Reading, Minn.—O. D. Smith of Worthington has leased the equipment and building of the Farmers Elevator Co. and will operate it as a private venture, having resigned from the Worthington Farmers Co-op. Co.

MISSOURI.

Bethany, Mo.—On July 1st the Excelsior Feed Milling Co. of St. Joseph will open a retail store in the Frisby building.

MONTANA.

Harlowton, Mont.—The Montana Flour Mills have resumed operations after a shut down of several weeks. About 200,000 bushels of wheat are in the elevators and market conditions are indicative of a demand for the full supply of the mill product.

Great Falls, Mont.—The name of the Marvel Milling Co. of Montana has been changed to the Federated Cereal Mills of America, of which R. H. Vinson is president and W. J. Pahl, secretary. The company was recently formed to do a general milling business.

NEBRASKA.

David City, Neb.—Windstorm slightly damaged the mill of Alex E. Etting.

Bancroft, Neb.—The Farmers Grain Co. has voted to discontinue business.

Sterling, Neb.—The Farmers Union Co-op. Ass'n elevator was slightly damaged by windstorm.

Snyder, Neb.—The Farmers Union Milling & Grain Co. mill suffered a small loss from windstorm.

Orchard, Neb.—Philo M. Grove has purchased the feed store and cream station owned by William Alexander.

Guide Rock, Neb.—On June 14th the elevator of the Farmers Union Co-op. Co. was slightly damaged by lightning.

Gordon, Neb.—On July 1st W. S. Glover and B. V. Stouffer will take possession of the Nye Schneider Jenks elevator which they recently purchased.

NEW YORK.

Elmont, N. Y.—The Sunrise Wet Grain Supply Co. has been incorporated for \$5,000 by L. K. and C. C. Handle.

Albany, N. Y.—Waterloo Island, just south of here, is being considered as a site for a grain elevator and cold storage plant according to Frank C. Herick, chairman of the Albany Port Commission.

NORTH DAKOTA.

Lost Wood, N. D.—A 30,000 bu. elevator will be erected by the Younglove Construction Co. of Sioux City, Ia., for the Farmers Elev. Co.

Gardner, N. D.—New Fairbanks Scales and Kewanee Dumps are being installed by both the Farmers' Elev. Co. and the Gardner Elev. Co.

Hunter, N. Dak.—The Equity Elevator has been purchased by a group of Hunter farmers and the name changed to Hunter Co-op. Elevator Co.

Springbrook, N. D.—The Farmers Co-operative Elevator Co., who will erect a 35,000 bushel capacity steel-clad modern elevator, replacing the one burned, is arranging to increase its capital stock from \$10,000 to \$20,000.

Fargo, N. D.—The Blabon Elevator Co., formerly the Blabon Farmers Elev. Co., is being sued by the Healy, Owen, Hartzell & Co. of Minneapolis, a commission firm, who alleges that the sum of \$11,408.58 is due them on account of money advanced the elevator company in financing operations for which the commission house took over accounts and notes as collateral. They are seeking permission to sell the collateral.

Calico, N. D.—A new roof is being put on by the Minnekota Elevator Co., who is also installing a new Kewanee Truck Lift. A Kewanee Dump is being installed at the station in Umbria and other repairs made. Kewanee Truck Lifts are being installed at Glenfield and Fullerton. Among improvements at Courtenay, a Strong Scott dump is included. A Strong Scott dump, a new driveway, a new Fairbanks scale, new

legs and other repairs are being made at the Dodgen station. A Kewanee Truck Lift is being installed at the Tasco station, in addition to a new drive, new legs and other equipment. Kewanee Truck Lifts are being added at Fonda, Sutton, Seiz, Logan, and Revere, and at the Max station, repairs are being made. T. E. Ibberson Co. has the contract for all the improvements.

OHIO.

Cincinnati, O.—The elevator now occupied by the Cleveland Grain & Mfg. Co. will be dismantled and site will be used by the Big Four. The company will not withdraw from the grain trade.

Pulaski, O.—The Farmers Co-op. elevator was destroyed by fire with \$12,000 loss for the building and \$2,000 worth of grain, partially covered by insurance. Frank Conkey of Bryan was manager.

Lima, O.—Following the retirement of Mr. Hyman from the firm of Hyman & Ackerman, the seed firm has changed its name to the Ackerman Co. B. Ackerman is president; J. F. Ackerman, secretary and treasurer.

Toledo, O.—The Royce-Coon Grain & Seed Co. has been incorporated for \$100,000 by Edward H. Rhoades, Jr., John D. Rhoades, William H. Rhoades, M. A. McNutt and F. C. Rook. The company has taken over 10 grain elevators in Wood and other nearby counties.

Cleveland, O.—Oatman & Montfort has incorporated under the name of the O. & M. Seed Co. with a capital of \$100,000. An Ellis Drier of 180 bushels capacity per hour is to be installed in their new warehouse and elevator being built at the company's plant at Green Springs.

New Bavaria, O.—The Farmers Elevator Co. has added improvements costing \$10,000. A 15-ton auto truck scale, a new boiler and engine, each 80 h.p., and a fireproof power house are among the additions. The dumps were remodeled and capacity of all elevator legs rebuilt and increased.

OKLAHOMA.

Alva, Okla.—The Alva Roller Mills are erecting concrete bins and making minor improvements.

Henryetta, Okla.—A large mill and grain elevator will be erected by J. P. Davidson and O. P. Randall.

Pond Creek, Okla.—The E. W. Johnson Grain Co. is retinning its 8,000 bu. elevator and adding a 2-car iron clad warehouse.

Hollis, Okla.—The S. J. Mill & Grain Co. has chartered with \$20,000 capital by J. E. Shields, Marlow; P. M. Shields, Hollis, and J. M. Shields, Wellington, Texas.

OREGON.

North Powder, Ore.—The North Powder Milling & Elevator Co. is building a new warehouse.

SOUTH DAKOTA.

Montrose, S. D.—The old flour mill is being razed.

Cresbard, S. D.—A small loss resulted when lightning struck the cupola of the Cresbard Co-op. Elevator.

Cresbard, S. D.—During the past year elevators here bought 581,000 bushels

of corn, wheat, oats, barley and flax. Approximately 135 carloads of hogs and cattle were shipped to market centers.

TEXAS.

Albany, Tex.—Fire totally destroyed the elevator of G. C. Butler Mill Co.

Houston, Tex.—The Oliver Cranston Grain Co. is decreasing capital stock from \$75,000 to \$50,500.

Follett, Tex.—A new office 14x28 has been erected by the Farmers Grain & Supply Co., also a feed warehouse 24x40.

Waxahachie, Tex.—A new brick warehouse is being erected which will be occupied by the Carroll Grain Co. about Sept. 1st.

Claude, Tex.—M. L. Hughlett is erecting a new elevator here and the large steel storage bins for small grain will soon be in place.

Palestine, Tex.—The Grand Order of Gleaners has been incorporated with no capital stock, benefit association, by A. Gordan, W. G. Pinson, and J. H. London.

Greenville, Tex.—The following officers were elected at the annual meeting of the Greenville Mill & Elev. Co.: J. B. Clayton, pres.; A. F. Richter, vice-pres. and gen. mgr.; J. W. Barlow, sec'y & treas.

Ennis, Tex.—Fire of unknown origin originating in the plant of the Sparks Fuel & Feed Co., destroyed practically all of the feed stuff handled by the firm, wood, a wagon, Ford truck, etc. J. W. Sparks, owner, estimated his loss between \$800 and \$1,000, partially covered by insurance.

Hereford, Tex.—The West Texas Seed & Feed Co. has been organized by Joe Hastings of the Poe Hastings Seed Co., Dimmitt, D. R. Dixon, formerly with the S. E. Cone Seed Co., Lubbock, and Homer T. Wilson, Hereford. They will do a wholesale and retail seed business and handle coal, salt, hay, poultry feeds and cottonseed meal and cake.

UTAH.

Gunnison, Utah.—Fire totally destroyed the mill of the Gunnison Roller Mills.

Vernal, Utah.—The erection of an alfalfa seed cleaning plant is being planned for this place by J. G. Peppard Seed Co. of Kansas City, to be ready for the 1925 crop.

WASHINGTON.

La Crosse, Wash.—Extensive improvements are being made by the elevator company for the new crop.

MILWAUKEE SEEDS.

Movement of timothy seed and clover seed at Milwaukee as reported for THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce, for week ending June 20, 1925:

	Receipts, lbs.		Shipments, lbs.	
	Tim.	Clov.	Tim.	Clov.
1925.....	60,000	1,155	161,435	209,710
1924.....				

ST. LOUIS SEED MARKET.

Grass Seeds (per 100 lbs.)—No spot seed offered. Quote nominally: Timothy at \$7.25 to \$7.50; German millet at \$4 to \$4.52; common millet at \$3 to \$3.10; hog millet at \$1.10 to \$2.40.

Sorghum Cane Seed—Quote black amber at \$1.50 to \$1.60 per 100 lbs. bulk—feeding stock less.

Stock Peas—Quote whippoorwill at \$4, new era at \$3.70 and mixed at \$3.50 per bu.

Sunflower Seed—Last car lot sales at \$3.50 per 100 lbs.

KANSAS CITY SEED MARKET.

Kansas City, June 20.—Though two heavy rains have fallen since the beginning of the blue grass seed harvest, it is reported that the work progressed rapidly this week and is near completion. Some of the seed may have been discolored by the moisture. Dealers are looking for more than half of last year's production. The yield would have been heavier except for the cold weather and frosts of May. Thus far there is no definite price on rough seed. Dealers say they are waiting to see how the Kentucky market starts. Timothy and meadow fescue will be harvested next.

Trade in forage seeds is quiet. The corn crop still looks good and the need of forage is not apparent except in Texas, where drouth has been effective. Some demand for cane, millet and Sudan seed to plant in harvested wheat fields is expected. Most of the cane seed arriving in the market is going to elevators for mixing with milo or taken by feed manufacturers.

Soy beans and cow peas are slow, as the corn crop is well advanced and demand for planting in corn fields is about over.

It is too early to speculate on the new crops of clover and alfalfa seed. However, it will not be long until Arizona seed will be available.

Australian wheat exports for the week, 1,816,000, against 2,568,000 the previous week and 1,580,000 last year; since January 1 the total is 92,476,000 bushels, against 49,184,000 last year and 35,068,000 in 1923.

We buy and sell all standard varieties of grass, clover and farm seeds. Correspondence solicited.
W. M. A. WARD SEED COMPANY
Sacramento, Calif.

TOLEDO SEED MARKET.

TOLEDO, O., June 22.—Clover seed shows strength again after some profit-taking on the recent advance. The market was weak during the early part of last week but recovered quickly when buying power increased. The offerings were quite heavy on the decline but were absorbed easily. The reports are mixed on the new crop though not much can be told until after the hay crop is out of the way. Good weather will be needed then to give the seed crop a start and the market will be sensitive to changes. A trading market is likely until the crop is under way. Buyers may take hold at any time and send prices soaring. Seedsmen say that in any event the supply will be small as old stocks were cleaned up during the spring demand. Foreigners report it is still too early to tell much about their crop. If good weather is experienced during the summer they expect a very large crop. They are already doing some selling against their crop but may buy in at any time they can take profits.

Alsike has been strong lately and the same conditions that prevail in clover are affecting the alsike market. Old stocks are down to the lowest in years and it is likely the new seed will meet with an excellent trade when it is ready for market.

Timothy is easier on better crop news and the likelihood that we will have some seed, though lack of rain has been a very unfavorable factor. The trade appears to believe that timothy will sell much higher during the present season than it did last year. Excellent buying is uncovered on declines showing that dealers are ready to back their belief with orders.

TOLEDO SEED PRICES.

The following table shows the range of prices for seed on the Toledo market for cash and the futures for clover, alsike and timothy for the week ending June 20:

	High.	Low.	June 20.	June 13.
Clover—				
Cash	\$17.35	\$16.50	\$17.00	\$17.35
Oct.	15.85	15.15	15.75	15.80
Dec.	15.40	14.80	15.20	15.45
Alsike—				
Aug.	14.50	14.25	14.50	14.25
Timothy—				
Cash	3.80	3.70	3.70	3.80
Sept.	4.20	4.10	4.10	4.20

DULUTH FLAXSEED MARKET.

DULUTH, June 20.—Market in flaxseed continued on the draggy order during the last week. The spot market showed distinct weakness, while the new crop futures were accorded better support. On the net result of the six days' trading, spot and July seed were 8½ to 9½ cents off, and the September and October futures were 2 cents off to 1½c up.

Field and Grass Seeds

The movement of flaxseed from the country continued in better volume than had been figured upon and reports received by dealers were to the effect that marketings by growers are likely to be maintained in fair amounts during the next few weeks. That was quite opposite to the reports current two months ago that growers' holdings were negligible above their seed requirements. With seeding now completed over the northwest and a large acreage seeded to the crop, farmers are finding that they are carrying over some seed in their bins, and they have been running it into their country elevators lately. As it stands the current movement of flaxseed from the country for some time back has been in about sufficient volume to keep crushers' plants over the northwest supplied. In addition the great bulk of the 317,000 bushels held in elevators at Duluth and Superior is owned by the holders of the hedges held against it, and is available whenever wanted. A lot of 40,000 bushels was brought over here from Fort William during the week on account of a crusher, and it is understood that boat space has been chartered to move a cargo of flaxseed to a Lake Erie port within a few days. Seed from Fort William is being steadily absorbed down that way but with over 2,000,000 bushels there to draw upon as on June 15, it is felt that the linseed oil interests have no reason to worry on the score of there not being enough supplies to keep their plants going up to the time of the marketing of the new crop.

Receipts during the week aggregated 84,927 bushels, and stocks in the elevators were reported at 317,000 bushels. There were only 3,106 bu. shipped by either lake or rail during the week.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the same period last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track...\$2.63-67	\$2.71½-75½	\$2.41½-47½	
To arrive.. 2.63	2.71½	2.41½	
July	2.64	2.73½	2.41½
Sept.	2.47	2.49½	2.16½
Oct.	2.42	2.40½	2.11½

MINNEAPOLIS FLAXSEED MARKET.

MINNEAPOLIS, MINN., June 20.—The Van Dusen Harrington Company's report of June 17 reads:

"A rather uneven condition exists in the northwest flax crop. The seed on old ground is not doing particularly well, as the fields are weedy and thin, but there are a number of other places where the tax is very good. Our reports indicate that there has been some deterioration since the start of the crop."

The Cargill Commission Company's report of June 15 quotes on flax crop conditions from 30 stations—11 good, 8 fair and 11 poor.

We think most grain men would estimate today little or no increase in flax acreage. We have but one estimate from Canada—no increase. A cable from Argentina says: "Cold, dry weather, unfavorable for flax planting."

The receipts of flax the past two weeks have been much larger than expected and grain men say this is seed intended some weeks ago for planting. These receipts have caused a decline in spot seed of 6c to 8c per bushel. The September option shows less decline. Flax, like almost all other grains for new crop, is quoted about 30c a bushel higher than a year ago this date.—*Arch-er-Daniels-Midland Company.*

Colorado Crop Conditions Good.

Crop conditions are good as last year on spring wheat, good to poor on winter wheat in this immediate territory, but better east of us.—*Fort Collins Flour Mills, Fort Collins, Colo., June 3.*

CLOVER ABOUT NORMAL.

CRAWFORDSVILLE, IND.—It is too early yet to give any definite information as to clover seed situation inasmuch as the crop is still in the making.

It seems to be the opinion of most people who have made any survey of the situation that the alsike and mammoth clover have been damaged to considerable extent by the hot dry weather which we have had this season. In the case of the little red clover the seed crop is from the second cutting and will of course depend entirely upon the weather which we have after the hay is removed. The acreage of clover is reported as about normal.

Our information on the timothy crop would indicate that same will be considerably short of last season and this fact has been reflected to a more or less degree in the prices the past week or ten days.

The recent rains which we have had have been very beneficial, but of course did not come in time to make the oats crop what we should have. The meadows, pastures and corn have shown a great improvement.—*Crabbs, Reynolds, Taylor Co., per F. N. Howard.*

SEEDS WELL CLEANED UP.

GALT, Mo.—The demand for timothy in this locality has been good and the stocks of seed has been well cleaned up. The demand for cane has been a little above the average year. The demand for millet has been disappointing up to the present time, although there will not be any surplus seed to amount to anything to carry into the next season as the crop was practically a failure here last year.

The crop conditions in general are unusually favorable here for this time of year.

We have the largest oat acreage here that we have had in many years, and condition in fairly 100 per cent for this time of year.

The corn acreage is fully normal and cultivation has been a little more than normal for the time of year, however recent rains have interfered some recently but the general outlook is the best that it has been for several seasons past. Timothy meadows are in good condition and promise is for a full normal crop.—*D. H. Clark & Son.*

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending June 20, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.
Week ..	271	159	23	4	8	8
Prev. wk.	34	...	21	30	129	3
1924	40	131	40	43	41	230
1924-25.	37,308	27,306	10,653	5,494	17,014	16,226
1923-24.	31,433	21,754	10,794	8,432	24,103	15,306
1922-23.	31,923	31,156	10,926	8,819	23,764	7,306

Timothy—Easy. Common country run, \$6.85@6.90 per 100 lbs.; fair country lots, \$6.95@7.10; good seed, \$7.15@7.25; high grades, \$7.50@7.60; extra choice and fancy, \$7.75@8.00.

Clover Seed—Steady. Country lots, \$21.25@24.00 for 100 lbs.; good, \$24.75@25.75; choice \$26.25@27.25; fancy, \$28.00@29.00; and Mammoth, \$24.00@29.00, according to quality. Red top, \$20.00. Fancy Kentucky blue grass quotably \$30.00@32.00.

Alfalfa Seed—Dull. Recleaned, \$22.50@23.50 per 100 lbs.

Alsike—Steady. Fair country lots, \$18.25@19.75 per 100 lbs. Good seed at \$20.25@21.75; choice, \$22.75@23.75.

Flax Seed—Easier. No. 1 Northwest-ern closed at \$2.65½x2.68½ per bu. of 56 lbs.

NEW YORK OATS MARKET.
Oats.—The advance made in this cereal the previous week was followed by a decline of almost equal extent, ample moisture having been received over the entire belt. While the deterioration in several large producing states has undoubtedly materially shortened the yield, other sections probably have been greatly benefited, so that a fair crop may be expected. At the lower level of values, the cash demand was somewhat improved with the inquiry as usual for Northwestern oats on account of their relative cheapness, while all rail shipments from the Middle West were neglected.—L. W. Forbell & Co.

COMING CONVENTIONS.
June 25-26.—Midsummer meeting of the Indiana Grain Dealers' Ass'n, Michigan City.
July 20-22.—Southern Seedsmen's Ass'n, Memphis, Tenn.
July 27.—Michigan Hay & Grain Association, Hotel Tuller, Detroit, Mich.
July 28, 29, 30.—National Hay Association, Cedar Point, Ohio.
August 20-21.—New York State Hay and Grain Dealers' Association, Syracuse, N. Y. Hotel Onondago.
Oct. 12-14, 1925.—Grain Dealers' National Ass'n, Hotel Muehlebach, Kansas City, Mo.
Oct. 12-14, 1925.—U. S. Feed Distributors' Ass'n, Kansas City, Mo.

MINNEAPOLIS CASH FLAX MARKET.
Offerings of seed were of a liberal character all through the week and taken all in all, it can be said that the market held up very nicely under the pressure of good receipts for this time of the year. Local crushers were willing to pay July price at 5c over up to mid-week, but when the spread between the Minneapolis and the Duluth futures began to change, our cash market began to sag a trifle. Demand at the head of the lakes fell off too, and there was some track seed there offered to local crushers. Minneapolis elevator stocks totaled 295,696 bushels vs. 310,106 last week and 36,300 a year ago. Basis of today's range of sales No. 1 seed on spot is worth July price at 3c over and the arrive, same as the track.

CASH PRICES FOR GRAIN.

Alfalfa Seed Demand Better.
SHERMAN, TEX.—This section does not produce any alfalfa seed to speak of. However, during the past season we have had an unusually heavy demand for alfalfa, and our alfalfa seed trade this season has been very encouraging.
Farmers are coming to realize the advisability of diversifying their crops and getting away from the old idea of raising nothing but cotton. The land is fast becoming depleted in fertility, due to the above practice, and the better class of farmers are aware that they must rotate their crops more than they have in the past, to keep the land up to its present state of fertility.
Most of the alfalfa seed handled by us this season was grown in West Texas and Eastern New Mexico. We are expecting a good trade this fall on alfalfa and sweet clover seed.—Ferguson Seed Farms, Inc., E. F. Zeller.
When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

Feedstuffs

The Bemis Bag Co. recently took over the business and plants of the Riegel Sack Co. This makes within the year, two of the largest consolidations in the bag trade that could be imagined. For several years much uncertainty has surrounded the importation of jute and the business as a whole in burlap and cotton bags. At present, the manufacturing trade may be considered materially strengthened through the present roster of large bag concerns.

meal and other feeds. The Kansas City price is \$47.80 to \$48.80.

After a long period of steadiness, tankage advanced \$5 a ton this week. Carlots were quoted at \$55 a ton and ton lots at \$60. Manufacturers alleged small stocks and a good demand. Meat scrap was unchanged, at \$55 and \$60, with the top on small lots.

LINSEED REVIEW.

NEW YORK, June 22. — *United Kingdom:* The linseed market in the United Kingdom during the past week has been very quiet. Prices have declined considerably due to lack of buying support.

Offers from India and the Argentine are in excess of the actual demand, and quantities on passage to Europe this week are 6,188,000 bushels from all countries. Cotton oil is inactive.

Linseed Oil: The oil market has declined in sympathy with seed as the demand is quiet, although a little better than heretofore.

Consumers are bidding for nearby oil but there is still no interest whatsoever in the distant positions. London spot oil is now 43/6 per 112 lbs., down 1/6 on the week.

India: Shipments from India this week totalled 332,000 against 896,000 a week ago.

The new crop is moving more freely and the estimate of a crop of 21,000,000 is maintained. Total exports last season amounted to 14,000,000 and as far this season some 5,024,000 have cleared, leaving a balance of 9,000,000 required for the ensuing nine months.

The latest cables from our Indian correspondent say that the Monsoon has revived.

Argentine: Linseed planting is progressing, but has been hindered by too dry weather. However, our agent forecasts rains for this week-end.

Shipments this week exceed the million bushels. Stocks decreased 200,000 bushels.

Remaining supplies are larger than normal, as clearances since January have been ten million bushels less than this time a year ago.

BUTTERMILK FOR EXPORT.

In our judgment, the domestic buttermilk trade and feeders, mixers, and others consuming buttermilk, are unduly exercised over the large export business which has been reported.

There is this, however, to be said about the situation as it suggests the possibility of materially reducing the tonnage available for domestic consumption. It is not at all impossible for Germany and other foreign countries, appreciating the feeding value of buttermilk, to come into the American market so strongly that our supplies ultimately might be seriously reduced.

It so happens that recent exports have been at a time when the butter made has not been heavy and consequently the buttermilk supply has been less. In fact, buttermilk, particularly the dried, is fairly well cleaned up today. It is selling as low as 6 cents per pound in carlots and up to 7 cents per pound in less than carlots. This product contains about 7 per cent moisture. Semi-solid buttermilk is selling at 3½ cents per pound and contains about 70 per cent moisture.

These prices are f. o. b. the creamery, hundreds of which have installed in the last several years complete equipment to dry buttermilk. This was a very logical trend of affairs, based on the time only two years back when dried buttermilk brought as high as 12 cents per pound. Subsequently, the production greatly increased and the price became so low that it was impossible for

many creameries to operate drying plants which, therefore, stood idle. Now the swing of the pendulum is the other way because feed mixers and feeders have learned much about the splendid feeding properties of buttermilk. From the latter viewpoint, it will be most unfortunate if the export business should be accepted at prices below the American market, for the feeding of American hogs and poultry creates a steady demand which should be taken care of first.

Importers in Rotterdam, Antwerp and elsewhere, are now lining up supplies in this country of which a considerable tonnage has already been shipped in semi-solid form. At present, much of the foreign demand is to supplement pig feed, as they call it over there, but poultry feed on the Continent indicates they say an outlet of 500 to 1,000 tons annually. Although dried buttermilk for export is subject to caking, this is not a disadvantage because it loses no feeding value and may be held for a considerable period in warehouses there. It is a class of business that is, of course, desirable for a surplus product, but as yet the exportation of buttermilk is of such volume that it exerts a greater potential than immediate bearing on domestic prices.

FEED MARKETS.

Boston, June 20.—Prompt shipment, per ton: Spring bran, \$37@38; winter bran, none offering; middlings, \$39.50@45; mixed feed, \$38.50@43.50; red dog, \$49.75; hominy feed, \$45.75; stock feed, \$44.50; oat hulls, reground, \$14; cottonseed meal, \$44.50@51; linseed meal, \$51.

Oatmeal—Per 90-lb. sack, rolled, \$3.35; cut and ground, \$3.68.

Oats—All rail: fancy 40 lbs., 66@67c; fancy, 38 lbs., 65@66c; regular, 38 lbs., 64@65c; regular, 36 lbs., 63@64c; regular, 34 lbs., 62@63c; lake and rail, fancy, 40 lbs., 66@67c; fancy, 38 lbs., 65@66c; regular, 38 lbs., 63@64c; regular, 36 lbs., 62@63c.

ST. LOUIS.

St. Louis, June 20.—Wheat-feed weakening and more freely offered. Sales: 1 trk car hard bran (yesterday) at \$31; 3 cars do (to arrive, immediate shipment) at \$29.25, 1 split car (do) hard bran at \$29 and gray shorts at \$35, 1 split car (direct sale by mill) bran at \$31 and middlings at \$35, 1 car bran (do) at \$31.40. Oat-feed nominal at \$9 and white hominy feed (sacked) at \$41.00.

Alfalfa Meal—Quoted to arrive in s. h. sks.: No. 2 at \$21.00, No. 1 at \$25.00, choice at \$27.00.

MINNEAPOLIS.

Minneapolis, June 20.—The local feed market did another quick right-about-face this week with the result that prices are off very sharply and no apparent demand for current offerings. The one saving grace of the whole market is the light amount of feed which is coming out. Mills apparently have sold considerable flour during the past ten days or two weeks but whether or not they sold corresponding amounts of millfeed, no one seems to be able to ascertain. If they have, all well and good; and if they haven't there undoubtedly will be a wild scurrying around to find enough holes to take up the extra output.

Today, mills and jobbers are asking \$25.50 for standard bran, a half dollar more for pure; \$29.00 for shorts; \$33.00 for flour midds and \$40.00@41.00 for red dog, according to quality. Understand that there was a few cars of shorts, coming from a country mill, offered Chicago basis which figured considerably under the local asking price.

Weekly shipments of feed totaled 10,509 tons vs. 9,429 tons last week and 13,404 tons a year ago. Season shipments, since September 1st, this year and last, were: 521,981 tons and 555,782 tons; since January 1st, this year and last, 268,408 and 404,178 tons.

MILWAUKEE.

Milwaukee, Wis., June 20.—The Milwaukee feed market quotations were lower last week in sympathy with the low wheat prices. Erratic conditions prevailed and the demand was not as heavy. The offerings were readily absorbed. A few shipments were booked for July at about \$2 off immediate quotations. Current quotations per ton are: Winter bran, \$31@31.50; spring bran, \$28@28.50; standard middlings, \$31@32; flour middlings, \$36@37; red dog, \$43@44; rye feed, \$31.50@32.50; linseed oil meal, \$45@45.50; cottonseed meal, \$41.50@46; hominy feed, \$40@41; oat feed, \$38@39; gluten feed, nominal, \$34.80; in 110-lb. sacks, carlots, f. o. b. Milwaukee.

NEW YORK.

New York, June 20.—Some sellers of Western feed reduced their schedule about fifty cents per ton, while others advanced their basis a like amount. There were better offerings for thirty days' shipment. City feed was very firm and unchanged with mills sold up for the time being. City bran is quoted at \$36.50; middlings, \$38.50; and red dog, \$50.50, while Western bran rules at \$36.00 to \$37.10; middlings,

\$38.00 to \$39.10, and red dog, \$49.00 to \$50.00 per ton.

BALTIMORE.

Baltimore, June 20.—Wheat feed prices continue firm on spot, under a more or less constant jobbing demand for sacked bran and middlings, coupled with moderate first hand offerings. Hominy feed in fair request in near positions. Gluten feed is sparingly inquired for. Dried beet pulp season over. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$36.00@36.50; western middlings, per ton, 100-lb. sacks, \$37.50@38.00; winter wheat bran, per ton, \$39.50@40.00; gluten feed, per ton, \$44.50@45.00; alfalfa meal, per ton, \$32.00; hominy feed, per ton, \$45.00@46.00; dried beet pulp, per ton, \$38.00.

DULUTH.

Duluth, June 20.—Market in millfeeds gained from \$1 to \$1.50, while mill ground feeds are unchanged. Millers reported the putting through of better sales of feeds to jobbers who had been holding off and were compelled to come into the market to cover their needs. Closing prices per ton follow: Bran, \$29; shorts, \$32.50; Boston mixed, \$32.50; red dog, \$43; flour middlings, \$35; ground oats, \$30; No. 1 ground feed, \$39.25; No. 2 ground feed, \$37; No. 3 ground feed, \$34.50; cracked corn, \$43.75; coarse cornmeal, \$43.75.

MEMPHIS.

Memphis, June 20.—Holders of cottonseed meal are very independent and are offering but little, believing that home demand will take all they have before the new crush starts. Quotations are firm, but no higher to sell, though some are asking a shade higher. For 36 per cent the price is slightly up, at \$36.50, but 41 and 43 per cent are to be had at \$39 and \$41. Wheat bran on track is quoted at \$32 to \$32.50, but to come in prices are down to \$31.50, while gray shorts are quotable at \$37.35 to \$38. Demand is very limited, as it is expected the start of the grinding season will increase offerings. Medium one alfalfa meal is quotable at \$26.50 to \$27 for cash or 30-day shipment.

PHILADELPHIA.

Philadelphia, Pa., June 20.—Demand for feedstuffs is fair and with small supplies prices are well supported. Quotations represent car lots in 100-lb. sacks at cost per ton. Soft winter bran, \$37@38; winter middlings, \$44@47; spring bran, \$36@37; standard wheat middlings, \$38.50@39.50; flour middlings, \$43@45; red dog, \$48@49; rye middlings, \$36@38; reground oats feed, \$13@14; fine yellow hominy, \$45@46; fine white hominy, \$45@46; low grade flour, \$50@56; cottonseed meal, 36 per cent protein, \$44@45; cottonseed meal, 41 per cent protein, \$47@47.50.

CINCINNATI.

Cincinnati, June 20.—The mill feed market felt the effect of easier grain prices during the week, and bran and middlings, except standards, declined about 50c per ton. The demand was less active, and buyers confined their purchases only to their immediate needs, feeling that the near approach of new wheat deliveries would further weaken the market. Offerings were only fair. Quotations represent 100-lb. sacks:

Soft winter wheat bran, \$33.50@34.00; hard winter wheat bran, \$33.00@33.50; standard middlings, \$36.50@37.00; soft wheat middlings, \$39.00@39.50; gray hard middlings, \$39.00@39.50; mixed feed, \$36.50@37.00; No. 1 alfalfa meal, \$28.50; hominy feed, \$42.00@42.50.

FEED STUFF SITUATION.

Demand for mill feed has rapidly fallen off during the last few weeks. Prices have declined; sellers' interest increased. All of this condition prevails mostly for immediate quick to prompt shipment. Buyers' interest is pertinent now only to July-August shipment and forward. The rains over the Middle West have improved the crops and encouraging predictions have been made for larger yields than had formerly been thought of some two weeks ago.

MINNEAPOLIS.—Bran, \$25.50; standard middlings, \$28; flour middlings, \$34 to \$34.50; red dog, \$40.

CHICAGO.—Bran, \$28.10; standard middlings, \$30.60; flour middlings, \$36.60 to \$37.10; red dog, \$42.60.

KANSAS CITY.—Bran, \$27; gray shorts, \$33.

ST. LOUIS.—Bran, \$29.40; gray shorts, \$35.40.

ALFALFA MEAL.—Markets have declined slightly. Buyers have withdrawn from the market with the exception of here and there. Some interest displayed for old crop meal for immediate to prompt shipment. First cut ting meal is offered at substantial discounts under old crop, but buyers are reluctant to purchase this until they feel perfectly safe in using new crop meal. Nominally quoted, new bag basis, choice, \$29.50 to \$30.50; No. 1, \$27.50 to \$28.50; No. 2, \$22 to \$22.50. Fine ground grades, \$3 to \$4 a ton premium.

WRITE, PHONE OR WIRE
S. T. EDWARDS & CO.
110 South Dearborn Street CHICAGO, ILL.

REGROUND OAT FEED.—The production has been curtailed. Prices remain fairly firm. Demand limited. Nominally quoted reground, \$7 to \$8. Unground, \$8 to \$9, for prompt June-July shipment. Some resellers are in need of directions and are willing to discount the market slightly in order to move a few cars.

HOMINY FEED.—Offers ample to take care of any demand. Slightly lower prices in sympathy with lower corn values and the general feed slump developed during the past week. Nominally quoted seven fat basis, white, \$41 to \$41.50; yellow, \$39.50 to \$40.50. In bulk where available, \$1.50 a ton less. Hominy feeds with lower fat content are discounted considerably.

LINSEED OIL MEAL.—Conditions unchanged. Marking time on present prices and demand. Demand seems to be equal to the supply, though with any increased production, prices might ease off slightly. Resellers are offering slight discounts. Mills are holding firm in their ideas. Nominally quoted, \$44.50 to \$45 Chicago. Pea size, \$1 a ton more. Minneapolis, fine ground, \$42.50. Oil meal in bulk where available, \$2 per ton less.

GLUTEN FEED.—Where obtainable, premiums are being paid anywhere from \$2 to \$3 a ton over mill prices. There is some contracted stuff being delivered at the old price of \$33 bulk, and where this is on track for immediate delivery, re-sales have been made at prices ranging from \$36 to \$40.

MOLASSES.—The situation is much improved with stocks in good hands and uniform prices at 11½c per gallon. The New York market until recently has been somewhat lower, but Eastern refiners have been making good export sales, some of them being sold up for 90 days. The alcohol industry is strong with a large consumption both spot and future tonnage. The mixed feed business is improving with a consequent increased demand for molasses greater than the additional Cuban tonnage now available.

DRIED BUTTERMILK.—Demand is very strong and practically no cars are immediately available. Quotations are as follows: In carlots, 6 to 6¼ cents, and l. c. l., 7 cents.

PACKERS' PRODUCTS.—Demand for packers' products continues very good and prices are quite firm. Today's quotations are as follows: Meat scraps in carlots f. o. b. Chicago, \$55 per ton; 60 per cent protein digester tankage, \$60, with raw bone meal unchanged at \$55.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33 to \$38 per ton, depending upon size of charcoal. Less than carlots, \$35 to \$50 per ton, standard units

of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

COTTONSEED MEAL.—The market is firmer and demand heavier. Today's quotation for 43 per cent protein, Chicago basis, is \$46.50.

TO FINANCE GERMAN FARMERS.

A cablegram from Berlin says: Americans will finance the German farmers if a deal negotiated between Harris, Forbes & Co., New York bond house, and the German Raiffeisen Banking System is signed as expected. The immediate loan is to be \$10,000,000 with further loans to follow as needed.

The American Linseed Co., Minneapolis, has decided to discontinue the manufacture of mixed feeds, and will close this department immediately.

A new issue of \$6,000,000 6 per cent coupon notes of American Linseed Company is being offered. The notes are dated June 15, 1925, and mature serially as follows: \$500,000 June 15, 1930; \$750,000 June 15, 1931; \$1,000,000 June 15, 1932; \$1,250,000 each June 15, 1933-34-35, all maturities being priced at 100 and interest.

GOOD DEALERS PROPOSITION.

BROOM CORN MARKETS.

Exceptionally hot weather has prevailed throughout the southwest the past week with an average temperature of about 102 degrees. Rainfall has been deficient with the exception of a few light showers to local rains, the only places reporting any amount of rainfall being Elkhart, Kansas 1.20 inches; Alva, Oklahoma, 1.82 inches; and Beaver, Oklahoma, with 2.17 inches. Moisture still continues to be the main factor in the western districts as not enough rain of a general nature has been received to relieve the condition. The Lindsay district reports weather conditions as being dry at this time however, the crop has not been damaged much thus far and benefit would be derived from moisture received now. The growing conditions of the crop in dwarf district of southern and central Oklahoma are fair at this time.

Pulling has started in the Beeville, Tex., district, and the early corn is reported as running strong to hurl.

The buying element in the dwarf districts, where the most of the available supply is held, is not active. The growers are still not willing to sell at present market prices and buyers are not willing to go above. The holdings of the growers however are scattered and light which also makes buying difficult and expensive. The price range in the dwarf districts is from \$70 to \$100.

More activity is noted in the Lindsay standard district as regards sales of broom corn; considerable corn moving from the warehouses. The market is firm and the price range running from \$90 to around \$140.—*Broom Corn Review.*

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

Alfaifa Department

ALFALFA INSPECTION TRIP.

Announcement is being made for an inspection trip to the alfalfa seed producing section of the Northwest for the purpose of inspecting the conditions under which seed is grown and to form acquaintance with agencies, both co-operative and private, handling seed in producing areas. The party will leave Chicago July 30, visiting alfalfa seed sections of Kansas, Utah, Idaho, Montana and South Dakota.

ALFALFA CROP IS LARGE.

The largest alfalfa crop in the history of Wisconsin is forecast by farmers near Eau Claire. In spite of some winter killing it is expected fully 350,000 acres will be cut for hay, filling nearly one-third more mow space than last year, when 267,000 acres was harvested. Fond du Lac county leads with an acreage of 21,300.

PROTEIN IN ALFALFA.

A acre of good alfalfa will return over 800 pounds of protein an acre, of red clover about 300 pounds, and an acre of timothy 90 pounds, according to F. G. Churchill, crop and soil specialist, from Iowa state college.

ALFALFA MEAL MARKET.

KANSAS CITY, June 20.—Though mills are operating moderately on old orders, new business in alfalfa meal is light and discouraging. Manufacturers say tight money in the South is a serious obstacle to trade improvement. Colorado mills are offering new-crop meal as follows for June and July shipment in carlots, per ton: Choice, \$25; No. 1, \$22.50; No. 2, \$18.50; No. 3, \$17.50. Mills in Kansas City quote carlots unchanged from prices given a week ago, which are: Choice, \$26.50@27.50; No. 1, \$23.50@24; No. 2, \$19@20; No. 3, \$18@19. New hay here is scarce and the supply will remain so until the second cutting becomes available.

Dullness and slight price changes were noted in grain and molasses feeds this week. Orders were practically limited to poultry and horse and mule feeds. Improvement of pastures, due to rains, helps to account for slow trade. Prices on carlots, per ton, are: Dairy feeds, \$35@46; cattle, \$38.50@44; hog, \$46@52; pig meal, \$68; horse and mule, \$34.50@43; alfalfa-molasses, \$26@31.50; scratch feed, \$47.50@54; mash poultry, \$42@77.

THE BAG SITUATION.

The publishers of the PRICE CURRENT-GRAIN REPORTER have frequently expressed apologies to the trade for failure to furnish weekly bag markets in conjunction with our weekly markets on a long list of commodities, grain and feed ingredients. We are confident that our readers have been sympathetic, however, because they must understand the great difficulty which surrounds any attempt to furnish dependable bag markets from week to week. The same conflicting data prevails today that has ordinarily governed the situation, and a comparison of the New York burlap and bag market in which importations are an important factor with the actual bag prices prevailing in markets west of New York is quite typical. Spot and future bag prices are not in line, many handlers preferring to sacrifice present stocks with the hope that they can make up losses on futures. This interests our trade because many have been able to buy at lower prices than the actual market, for there has been a widespread lack of demand for bags in many consuming channels. Shipments from Calcutta have been very heavy and competition among bag manufacturers in the United States has been especially se-

vere. The approaching heavy buying season in agricultural circles with the probability of a much increased demand apparently makes the present as good a time as any other to buy bags.

VAN DUSEN HARRINGTON CROP REPORT NO. 11.

The grain crops of the northwest have just passed through another week of favorable weather conditions. Since our last report there have been some more heavy rains covering the four states of Minnesota, North Dakota, South Dakota and Montana. The sub soil now has sufficient moisture to carry all crops for some time. In the Red River Valley and a few other districts there has been too much moisture and water has been standing in low places in the fields.

The condition of the wheat crop is still the best of the small grains. In some places it is thin and will probably head rather short, but generally it gives promise of a very satisfactory crop. Some fields are very weedy and probably this year's crop will show a heavier dockage than that of last season. Since June 1 the wheat crop has shown a marked improvement throughout this territory.

There is quite a variation in the fields of barley and oats. Some of the earlier sown were affected by drought or cold weather, and are thin and heading short. This condition is most prevalent in eastern South Dakota and western Minnesota. In the northern districts both barley and oats show a better condition.

There is but a little to report on the rye crop, except to repeat that it is very poor.

Corn generally has made good progress. Owing to the heavy rains farmers have been unable to cultivate and some fields are very weedy. Only a small amount of corn has been damaged by cut worms or cold weather.

We believe the satisfactory crop conditions, reported a week ago, have been fully maintained.—*The Van Dusen Harrington Co., by W. G. Hudson, June 17.*

BUSINESS NEWS.

The Richardson Scale Co. will have a new manager for its Chicago office if Father Webster doesn't watch out. Bruce Webster was born to Mr. and Mrs. N. C. Webster on June 17, and according to reports, the lively, healthy chap will no doubt try to sell more scales than his illustrious father. Many friends of Mr. Webster extend him hearty congratulations.

C. I. Rehnquist, advertising manager of the Webster Manufacturing Company of Chicago, Ill., was elected treasurer of the Engineering Advertisers' Association of Chicago, at the annual meeting and dinner of that organization.

GRAIN REGIONAL RAINFALL.

The following table gives the total average rainfall in inches, in each state in the grain regions, beginning April 16 to June 21, inclusive, and the average fall in inches for each station in the state, as reported by the Weather Bureau for the week ending June 21:

	Sta-	Total	Total	Total
	tions.	season.	week.	for previous
Kentucky	17	6.22	.32	.97
Ohio	15	5.38	.73	.30
W. Virginia	1	11.84	1.16	.68
Michigan	7	15.35	.22	.40
Indiana	16	6.27	2.68	.74
Illinois	19	6.20	.65	1.62
Wisconsin	5	7.46	1.05	2.33

BARLEY MARKET.

MILWAUKEE, WIS.—Offerings were light in the Milwaukee barley market last week and they were readily absorbed by the buyers. The demand continued fair with prices slightly higher. Quotations closed for the week 1@2 cents higher. Choice to fancy, 48 to 50 lb. test, quotable at 94@95 cents; fair to good, 44 to 47 lb. test, 85@94 cents; light weight, 40 to 43 lb. test, 83@90 cents; feed, 70@87 cents. Iowa quoted 80@94 cents, as to quality; Wisconsin, 80@95 cents; Minnesota, 80@94 cents; Dakota, 80@94 cents; feed and rejected, 70@87 cents.

FT. WORTH, TEX.—Receipts and offers have been steady with slow demand and values are sharply lower with weak tone until prices get down to mixing basis with oats.

June 20 values basis Group No. 1 en route or quick shipment: No. 3 barley, 98c; No. 4 barley, 94c; 40-lb. barley, 93c; 38-lb. barley, 91c.

DULUTH.—Trade in barley was in fair volume during the last week with operators in the market for supplies to cover eastern shipments. The movement of barley from the country was in fair volume, aggregating 138 cars during the week and stocks in the elevators decreased 64,000 bu. to 500,000 bu. Closing prices per bu. closed 1c off at from 71 to 87c.

MINNEAPOLIS.—There was but very little barley of desirable quality available during the week just past and as a result anyone having anything of malting or pearling quality was in a position to get a rather fancy price for it. There was a fair amount of feed barley available but no particular demand for it. Some elevator barley worked out of this market to the east.

Local stocks were lower at 409,877 bushels vs. 589,028 last week and 60,

126 a year ago. Today's range of sales was from 70@85c.

KANSAS CITY.—Barley receipts this week increased to 7 cars. The offerings were well taken, as there was a good feed manufacturing demand for local and shipping account. Prices advanced 2@4c per bushel. No. 3 sold at 85@89c, and No. 4 at 85@86c. Reports continue to indicate a fair crop in western territory, with harvest nearly at hand. Local stocks increased 2,000 bus. for the week. They are 8,000 bus. against 3,000 a year ago.

CHICAGO.—Market slow and from 1c to 2c lower than the sales of Saturday. Most of arrivals applied on sales, but demand for old grain indifferent. More interest being shown in new barley to arrive. Withdrawals for shipment, 2 cars. Exports, 271,000 bu. and for the week 772,000 bu., against 176,000 bu. last year. Visible decreased 50,000 bu.; last year decreased 84,000 bu.; total, 1,778,000 bu.; last year, 505,000 bu. Local stocks decreased 17,000 bu.; total, 138,000 bu.; last year, 117,000 bu. Old malting quotably 86c to 90c, according to sample; feeding and mixing, 80c to 87c; screenings, 45c to 78c. Cars, 12. New closed 77c bid for No. 3, August shipment.

PORTLAND, ORE.—The Oregon barley crop is estimated at 5,270,000 bushels, with the condition of the crop on June 1 100 per cent. Last year the crop was only 2,425,000 bushels and two years ago 3,080,000 bushels. This year the acreage has been increased 60 per cent, as much wheat land, where the fall-sown crop was winter killed, was reseeded to barley.

The barley acreage of Washington was increased 20 per cent, largely for the same reason. The latest official estimate of condition was 97 per cent of normal. The indicated crop for Washington this year is 4,930,000 bushels, which compares with 2,640,000 bushels last year and a five-year average of 2,828,000 bushels.

A hopeful development of recent months in the demand for barley appears in the increase of imports by Germany. Before the war Germany was the greatest importer of barley, taking on the average during 1910-1914, 148,000,000 bushels. Since the war imports have been insignificant until recently. In the year ending June 30, 1924, Germany imported 23,000,000 bushels of barley and is importing a considerable quantity this year.

RYE MARKETS

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending June 20, were:

	Mpls.	Dul.	Chi.	Win.	Mil.
June 15	1.01 1/2	1.08	1.03	1.03	1.09
June 16	.97 3/4	.98 1/2	1.04	1.00	1.06

June 20.....	3	2	..	1	..
Total	51	73	11	18	7

CHICAGO RYE FUTURES.

Following is the range for future prices for rye for the week ending June 20:

	June	July	September	December
15 1.06	@1.08 1/2	1.06	@1.09 1/2	1.08 1/2 @1.12 3/4
16 1.03	@1.06 1/2	1.03 1/4 @1.06 1/2	1.06 1/2 @1.09	
17 1.03 1/2	@1.06 1/2	1.04 1/4 @1.07 1/2	1.06 1/2 @1.09 1/2	
18 1.06 1/4	@1.08	1.06 3/4 @1.09	1.09	@1.10 3/4
19 1.06 1/4	@1.07 1/2	1.07	@1.09 1/2	1.09 @1.11 1/2
20 1.07 1/4	@1.08 1/2	1.08 1/2 @1.10	1.11	@1.12 1/2

Receipts of rye at Chicago for the week of June 20, 1925, were 13,000 bus. vs. 27,000 bus. same week of 1924; shipments were 75,000 bus. vs. 7,000 bus. same week of 1924.

RYE MARKET.

MILWAUKEE, WIS.—Quotations in futures were slightly off in the Milwaukee rye market and there was little activity displayed. The shipping demand continued to be good. Offerings were mostly offgrade with moisture content. Receipts were 7 cars and quotations closed 2@3 cents lower. The market closed at \$1.08 1/4 for No. 2 inside for Wisconsin, ranging July price to 1 cent over, depending on billing.

NEW YORK.—Business in rye for export was moderate and total sales amounted to about one-half million bushels in all positions.

DULUTH.—Operators in the rye market experienced some thrills during the last week. A wave of selling set in early in the week and the quotations in spot and both futures were carried down below the \$1 mark for the first time in several months. The break in rye was brought about through a drying up in export inquiry and the continuance of the leveling down movement that has been underway for some time. Spot No. 1 rye closed 3c off at \$1.05 1/4 per bu.

MINNEAPOLIS.—Competition from Duluth brought out comparatively higher premiums for No. 1 rye at the opening of the week and there was a fairly good demand for this cereal, either from elevator or milling sources during the entire six days. The mills were inclined to be rather indifferent early in the week, but as soon as the elevators dropped out of the market, they stepped in. At the close today, No. 1 rye was bringing 1 1/4 @1 1/2c over the July, and No. 2 1/2 @1c over. Local stocks showed a slight increase for the week, being 451,412 bushels vs. 418,961 a week ago and 5,961,917 a year ago.

CHICAGO.—Closed 1 1/2c to 1 3/4c lower for futures and no sales of carlots reported. Trade of moderate volume, but market fairly active. Considerable liquidation developed late in the session owing to weakness in other grain and prices declined. There was some buying by houses with export connections early in the session and seaboard reported 300,000 bu. worked. Visible decreased 440,000 bu. to 9,900,000 bu.; last year, 16,868,000 bu. Local stocks decreased 19,000 bu. to 3,999,000. Exports for past week were 275,000 bu.; last year, 1,088,000 bu. Carlots were in good demand at 1c over July for No. 2. Offerings light. Local inspection, 5 cars. Seaboard clearances, 25,000 bu.

The early part of this week, exporters were inquiring for rye. It is believed by many that the demand for rye will exceed, relatively speaking, the demand for wheat from foreign importers.

Condition of Rye.

Average condition of winter rye on Dec. 1 previous to year named and at first of the months indicated and yield per acre in bushels:

	Dec.	Apr.	May	June	July	Aug.	Yield.
96.2	1937	92.0	88.0	88.1	89.7	88.9	16.4

87.3	1925	84.0	86.8	78.6

A FORECAST OF COMING YEAR'S RYE SUPPLY AND PRICE.

A preliminary survey indicates an available supply of rye for the coming crop year at least one-fourth less than this last year, due to a lighter carryover and a smaller crop. However, unless there is still further serious damage to the growing grain, there will be ample for domestic bread and seed and also a surplus equal to one-half the surplus of last year. If foreign demand takes this surplus as fast as it offered, then new rye will command breadstuff val-

ues; if not, then prices may be forced to a feedstuff basis (as they were on the 1923 crop) whenever offerings exceed domestic needs.—Frank H. Blodgett, Inc., Janesville, Wis.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of June 20:

Beans—

Chicago—Good demand exists; prices firm. Spot navy beans, Mich., fancy, \$6.10; red kidney, fair stock, \$10.50; large, dark, extra quality, \$11.75; brown Swedish, \$6; lima beans, fancy, \$9@10; do. new California, \$14@15; poor, dirty, broken, less.

St. Louis—Quote choice hand-picked Michigan white beans at \$6.25 and prime machine-picked at \$6 per 100 lbs. Scotch peas 7 1/4c, green split peas 9c and yellow 7c per lb. California lima beans at \$16 per 100 lbs.

San Francisco—Whites, small, 8c; do. large, 7c; pinks, 9c; limas, 15c; cranberry, 8c; kidney, 11 1/2c; Mexican garbanzas, 11 1/2c; lentils, large, 9c; do. small, 8c; black eye, 11 1/2c; Mexican reds, 8 3/4c; speckled bayos, 7 3/4c; bayos, 8 1/4c. Peas—Split peas, yellow, 7 1/4c; green peas, 8c.

Boston—Car lots, per 100 lbs., N. Y. and Mich.: Choice hand-picked beans, \$6.35 @6.50; fair to good, \$6.10@6.25; California small white, \$8.35@8.50; yellow eye, extra, \$7.25@7.50; fair to good, \$6.75; red kidneys, choice, \$11@11.50; fair to good, \$10@10.25; California limas, \$15.25@15.50; native green peas, \$7.00@7.50; Canada, \$5.25@5.50; split, \$5.50@5.75; jobbing prices, 25 to 50 cents above car lots.

New York—Movement slow again Friday, though values continued generally firm. Pea beans held at late prices. Red kidneys a bit firmer and at generally \$11.50. White kidneys still slow sale and easy. California limas sold generally \$15.50, with that price possibly shaded in instances. Black eyes occasionally reached \$11.50, though most business at \$11.25. Domestic—Marrow, \$9.25@9.50; pea, \$6.35@6.50; red kidney, \$11.75; white kidney, \$8@8.25; lima, Cal., \$15.50. Imported—Marrow, \$8.25@8.75; white kidney, \$7.25@7.50; lima, Mad., 1924-25, \$12.25@12.50; 1923-24, \$11@11.50; 1922-23, \$9@9.50; lima, Europe, large, \$11.25; medium, \$11; small, \$10; lima, Argentina, baby, \$11.75@12. Lentils—Chile, \$6.75@7; Russia, giant, \$7.25@7.50; avg., \$6.25@6.50. Peas—Domestic—Black eye, \$11.25@11.50; yellow split, \$6.25@6.50; gr. split, \$7.50@7.75. Imported—Green, Japan, \$6.75; Belgium, \$5.25@5.50; yel. split, \$5.50@6; gr. split, \$7.75@8; chick, Mex., imperial, \$11.75; monster, \$11.50; large, \$9.50; small, \$7@7.50.

Potatoes—

Chicago — Old potatoes — Arrivals this week, 125 cars. Market unchanged. A rather slow trade was reported and the volume of trade light. Buyers were inclined to hold off until next week and the few sales made were to fill urgent orders. Sound and hard quality were mostly wanted. Receipts were 17 cars and cars on track 64. Sales reported today were: Per 100 lbs., Wisconsin, bulk, 1 car at \$1.30; sacks, 1 car at \$1.05, 1 car at \$1.10, 1 car at \$1.15, 1 car at \$1.25; Minnesota, 1 car at 75c. Bulk, per 100 lbs., Wisconsin, \$1.25; round white, sacks, Wisconsin, \$1.15@1.25; ordinary and poor, 90c@1.05. New potatoes—Market steady for barrels and 10@15c higher on sacks. Light arrivals of 23 cars and a fair demand helped to stimulate prices. Buyers were after some supplies and the better quality was particularly wanted. Sacked offerings were favored. There are quite a few cars arriving showing more or less heated condition and are sold at value. Cars on track were 193. Sale reported today were: Barrels, Carolina, 1 car at \$4, 3 cars at \$4.35; Virginia, 1 car showing heat at \$4.25, 2 cars at \$4.50; sacks, per 100 lbs., triumphs, Oklahoma, 1 car heated at \$2.00, 1 car at \$2.15, 1 car at \$2.20, 3 cars at \$2.25, 2 cars at \$2.40, 1 car badly heated at \$2.15, 4 cars sound at \$2.40, 2 cars at \$2.50. Barrels, stave, Carolinas, \$4.25@4.50; Virginia, \$4.25@4.50; showing heat and decay less; sacks, Arkansas and Oklahoma, triumphs, 100 lbs., \$2.25@2.50; heated and poor, \$2; cobblers, Oklahoma, \$2.25@2.50; Illinois, Ohio, \$2.25@2.40. Sweet potatoes—Arrivals light; fair demand noted. Hampers, Tenn., Nancy Halls, \$3.50.

BUCKWHEAT MARKETS.

MILWAUKEE, WIS.—Buckwheat prices in the Milwaukee market continued to hold last week at \$2.10@2.15 per 100 lbs. for silver hull and \$2.20@2.25 for Japanese.

St. Louis.—Held at \$2.50 per 100 lbs. not over 4 per cent foreign material.

CHICAGO.—Fancy Jap buckwheat ir store \$2.75 bid, choice nominally \$2.25 Dirty seed less.

Hay Department

CUTTING HAY AT NIGHT.

Fred Keppel, superintendent of the Cotati Land Company, is cutting hay by the moonlight out at the holdings of the company at Cotati, north of Petaluma, Cal. Crews are working late into the night in an endeavor to harvest the 35,000-acre hay crop. Three hundred acres a day are harvested.

HAY CONDITION IMPROVED.

FT. JENNINGS, OHIO.—The condition of the timothy crop has improved the last 10 days owing to the splendid rains in many sections. Clover is exceedingly short, and not worth cutting in some sections. Timothy will make a possible half crop.

First cutting alfalfa put up in good shape, and second crop looking good. Some old hay left in the country, but a great deal is of inferior quality.—*Raabe Bros.*

Optimistic.

Price Current-Grain Reporter: We have heard the following statement made. The hay business is on the decline. Actual facts however, would tend to indicate that the hay business in the United States has been on the increase for several years.

I have had the privilege of looking through the year book of the PRICE CURRENT-GRAIN REPORTER and the facts contained therein, which show a condition that should cheer the hay dealer. Go back to the year 1912 when the report showed an acreage of 49,530,000, a yield of 1.47 per acre, a tonnage of 72,691,000. The preceding year, 1911, showed a falling off, with conditions very similar to those prevailing at the present time, and compares quite favorably with the yield per acre in 1925. The acreage in 1911 was 43,017,000, a yield of 1.10 tons per acre, or a total yield of 47,440,000. The acreage from 1910 gradually increased until in 1924, it amounted to 76,385,000, for which year the yield was 1.47 tons to the acre or a total yield of 112,450,000 tons. During the period from 1911 to 1924, the acreage almost doubled, and the yield more than doubled. This increased yield each year has been consumed and as the only consumers of hay are horses, mules, cattle and sheep, the consumption of hay must also have doubled during this time.

Another interesting fact brought out in the PRICE CURRENT-GRAIN REPORTER year book is that the farmer is getting

more per ton for his hay now than he did about fifteen years ago. In 1912, when the yield per acre was 1.47, the average price on the farm was \$11.79, whereas in 1924 with the same yield per acre, the average price on the farm was \$13.05. There has been general complaint about the high freights on hay and that this item absorbs much of the total value, making it unprofitable for the farmer to raise hay. The above facts would not so indicate. If any one has been affected by the high freight rate, it is the consumer, apparently indicating that the old saying "the consumer pays the freight" is correct. I am afraid the truth is that those who deal in hay are still thinking in terms of 1918, when hay netted the farmer \$20.13 per ton and of 1919 at \$19.45 per ton, instead of the pre-war prices ranging from \$6 to \$14 per ton, and they should realize that today's price is practically the top of all years back to 1871, when the yield was low and farmers averaged \$14.30.

It is true that the hay business is changing. It is true that in the large cities the consumption of hay, due to the fact that horses have not kept pace with the growth of production, the city is not taking their proportion of this increase. However, thousands and thousands of small towns throughout the United States which have hay shipped in now, did not buy hay in 1910.

Really, I cannot see why there should be so much gloom cast over the hay trade. To me, it is a live and growing business and I think I have cited facts to bear me out.—*John H. Devlin, Albert Miller & Co., Chicago, Ill.*

HAY MARKET REVIEW.

The hay market ruled firm during the week ending June 20, according to the weekly hay market review of the U. S. Department of Agriculture, with interior markets sharply higher on prospects of a short crop, although Eastern markets were barely steady and California prices were lower. Haying worked northward and alfalfa was harvested in South Dakota, while new clover was received at Cincinnati. Rains over a wide area were beneficial to pastures and some improvement was noted in Northern meadows.

Although prices have turned higher they are still much lower than at this time last year or in 1923. No. 1 timothy, as was No. 1 alfalfa and prairie, averages about \$4 per ton cheaper than a year ago.

Timothy averaged firm. The Boston market was dull with the light offerings, chiefly of medium and lower grades, fully equal to trade needs, and liberal arrivals lowered prices at New

North & Company

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

York with top grades showing the least decline but quotations were advanced at Philadelphia, Richmond, and Pittsburgh. Hay was urgently wanted at Cincinnati, where receipts fell short of trade needs and prices were forced upward at Chicago and St. Louis by light receipts.

Alfalfa was steady to firm. Quotations were higher at Omaha with the market on a new crop basis. The shipping demand improved at Kansas City and mills took fair quantities while there was a good demand for dairy hay. Prices were lower in Los Angeles with increased receipts.

Prairie was firm with the scarcity of timothy hay. There was a good demand at Chicago and the Minneapolis-St. Paul market was higher on light offerings. Quotations were unchanged at St. Louis. The demand was slightly less active at Omaha, but the stockyards at Kansas City were taking hay for immediate needs while Iowa, Illinois and Indiana were buying prairie on account of the short timothy crop in those states.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

C. D. Carlisle, president of the Carlisle Commission Co., spent the week-end out of town making an inspection of the hay fields in Kansas and attending to some business matters.

The new hay crop of Colorado is officially estimated at 2,416,000 tons, of which 2,117,000 are tame varieties. Last year the total crop was 2,924,000 tons. The alfalfa production in 1924 was 2,584,000 tons. Alfalfa constitutes more than 60 per cent of the tame hay. On June 1 it showed a condition of 75 per cent, as against 94 for the 10-year June average.

Nebraska reports a tame hay prospect this year for 2,755,000 tons, as compared with last year's crop of 3,717,000. It is officially admitted that considerable acreages of alfalfa and clover in eastern Nebraska were winter killed. There are 1,562,000 acres in the state, or 42,000 less than last year. Wild hay promises 1,872,000 tons, against 2,173,000 in 1924.

J. A. Brubaker reports offers of new timothy hay from Slater, Mo., but farmers there are said to be asking \$12.50 per ton for hay at the baler.

Victor Faris is on an automobile tour through Illinois, Indiana, Ohio and Pennsylvania. He will be gone a month.

Two cars of second-cutting alfalfa hay from Kansas were on the market early this week. Both were out of condition, owing to rains at harvest time. The rains of June 12 and June 15 were of great benefit to hay and other growing crops, but in northeastern Kansas the precipitation amounted to a flood, which caused heavy losses to crops and property.

Dealers in Kansas City are anxious to see the beginning of the new-crop timothy movement, as there is a better Southern demand than for some time. It is believed, in view of the official report for June, showing deficient yields of tame hay in all of the central and eastern states, that competition from those regions in the South for the sale of hay during the coming year will be much reduced and that Missouri and the Southwest will not only have a larger call for timothy and clover but also for alfalfa.

W. L. Gordon, who made a trip to western Nebraska, reported on his return that he found much of the first cutting of alfalfa in stack and the second cutting coming on.

New Mexico alfalfa hay is said to be so scarce and high on account of the drouth in that state that Texas is

buying in Colorado and Kansas, which is unusual so early in the season.

After June 25 the railroads entering Kansas City will allow two days' free time on hay received in the local yards and offered for sale. This is a restoration of a condition that existed prior to the declaration of war on Germany, when the free time was cut to 24 hours. Under the new ruling establishing free switching of grain and molasses feed products, there will be a similar benefit to hay on the roads that have made the concession.

HAY MARKETS.

MILWAUKEE, WIS.

June 20.—Prevailing dull conditions kept quotations the same in the Milwaukee hay market last week. Current quotations per ton, f. o. b. Milwaukee, are:

Hay—No. 1 timothy, \$14.00@15.00; No. 2 timothy, \$12.00@13.00; No. 1 mixed, \$13.00@15.50; No. 2 clover mixed, \$11.00@12.00; sample hay, \$6.00@8.00; marsh feeding, \$10.00; packing, \$9.00; rye straw, \$9.00@10.00; oat straw, \$9.00@10.00.

BALTIMORE.

June 20.—In comparison with the limited demand at present existing for hay, present receipts and offerings are ample for all trade wants, and the general market is quiet, with the medium and poorer qualities of hay especially hard to move.

Straw.—In the line of straw, wheat blocks are easier, while No. 1 oat straw is in fair demand, and big baled rye seldom inquired for. Quotations follow:

Hay (per ton)—No. 1 timothy, —@—; No. 2 timothy, \$17.50@18.00; No. 3 timothy, \$14.50@16.00; No. 1 light clover mixed, \$16.50@17.00; No. 2 light clover mixed, —@—; No. 1 clover mixed, \$15.50@16.00; No. 2 clover mixed, \$13.50@14.50.

Straw (per ton)—No. 1 straight rye, \$18.50@19.00; No. 1 tangled rye, —@—; No. 1 wheat, \$14.00@14.50; No. 1 oat, \$15.50@16.00.

MEMPHIS.

June 20.—Receipts of hay have been light and the market firm and slightly higher, but demand continues limited. The effect of the prolonged drought has been disappointing as a stimulant of hay demand. Buying is of small lots and for immediate shipment. Quote: Timothy, one, \$24 to \$24.50; standard, \$23.50 to \$24; two, \$23. Alfalfa, one, \$24; standard, \$23, and two at \$19.50 to \$21.50.

KANSAS CITY.

June 20.—Wheat harvesting and rain were responsible for another big cut in hay receipts this week. The total arrivals were 190 cars. This compares with 293 cars handled a week ago and 346 a year ago.

The alfalfa offerings were 104 cars, or 80 less than for the previous week. Aside from a few cars of dairy quality, mostly Colorado hay, the market had only grades of standard or below. Ordinary and poor hay was hard to move, but there was a good demand for the upper grades. Prices averaged unchanged.

Receipts of prairie decreased 23 cars and amounted to 66. Quality varied from day to day, ranging from poor to good. There was a fair demand for medium to choice hay. Other kinds were slow. The market advanced 50c a ton on most sales.

Twenty cars of timothy, clover-mixed and clover arrived. The majority was timothy, all old crop, but Missouri shippers seemed about ready to start the new crop movement. There was a keen demand for good hay among shippers for eastern and southern accounts. Prices were marked up \$1.50@2 a ton. Clover mixed advanced 50c@\$.1, but pure clover was unchanged and none was offered.

Straw was nominally steady, but no offerings were reported. As wheat threshing has begun, the market should be well supplied soon and prices may weaken.

Carlots of hay and straw are quoted as follows, per ton, f. o. b. Kansas City:

Alfalfa—Choice, \$19@20; No. 1, \$17.50@18.50; standard, \$15@17; No. 2, \$12.50@14.50; No. 3, \$9@12.

Prairie—No. 1, \$10.50@12; No. 2, \$8.50@10; No. 3, \$6@8; packing, \$4@5.

Timothy—No. 1, \$16.50@17; standard, \$15@16; No. 2, \$13.50@14.50; No. 3, \$10.50@13.

Clover mixed—Light, \$15@16; No. 1, \$13.50@14.50; No. 2, \$9.50@13.

Clover—No. 1, \$9.50@12; No. 2, \$7@9.

Straw—Wheat and oat, \$8@8.50.

DULUTH.

June 20.—Demand for hay continues light on this market with jobbers buying in small lots to cover their immediate needs. Dealers are curtailing receipts from the country. Closing prices per ton are unchanged as follows: Timothy—No. 1, \$16; No. 2, \$15. Mixed timothy—No. 1, \$15; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$13; No. 3, \$11. Midland—No. 1, \$10; No. 2, \$8. Straw—Rye, \$9; oat, \$8.

TOLEDO.

June 22.—Hay prices were advanced for timothy and mixed clover because of the poor outlook. The demand shows a slight improvement over recent weeks. More outside interest is noted. Timothy and mixed clover were both marked up a dollar a ton. Fields look very poor in most of the surrounding territory with only an occasional good one. It may be that old stocks will be greatly reduced before another good

crop is raised. Nothing would please dealers and farmers better.

Prices for the past week were as follows: No. 1 timothy, \$15; No. 2 timothy, \$13; No. 1 light clover mixed, \$14.50; No. 1 heavy clover mixed, \$13.50; No. 1 clear clover, \$12; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$20; sound dry wheat straw, \$8.50; sound dry oat straw, \$8; per ton f. o. b. Toledo.

CINCINNATI.

June 22.—Very little change was noted in the hay market, and in spite of the fact that interest has quickened the resulting volume of business showed little increase over a week ago. The fact that little was accomplished was entirely due to the abnormally light receipts which, compared with other years at this time averaged considerably smaller. There was a slight promise of enlarged shipments and that hoarded hay would likely come on the market at the higher quotations, but they failed to materialize and the trade failed on all days to secure what their requirements demanded. This made a very unsatisfactory market and the hardest to gauge in years as shipping interests were in a continuous state of nervousness because of the difficulty of quoting prices to the South and interior and securing the hay when acceptances were made. Fortunately retailers have a limited supply which they are distributing where most needed. A feature of the market this week was the arrival of the first new hay of the season, several cars of new clover of good quality bringing \$16.75 a ton.

Timothy—No. 1, \$21@21.50; No. 2, \$19.50@20.50; No. 3, \$17@18; threshed, \$10@11; no grade, \$10@12. Heavy clover mixed—No. 1, \$17.50@18.50. Light clover mixed—No. 1, \$19.50@20.25. Clover mixed—No. 1, \$18.50@19.50; No. 2, \$15@17; no grade, \$11@13. Clover—No. 1, \$17@18; No. 2, \$14@16; no grade, \$10@12. Alfalfa—No. 1 second cutting, \$19@20; No. 2 second cutting, \$16@17.50; No. 1 first cutting, \$17@18; No. 2 first cutting, \$13@15. Sound sample grassy hay, \$10@12. Straw—Wheat, \$10@11; oat, \$10@11; rye, \$15@16.

PHILADELPHIA.

June 20.—Baled hay and straw—Trade in hay is quiet and offerings ample for requirements. Prices are unchanged. Straight rye straw is exceptionally scarce and firm with some choice stock commanding a premium. Wheat and oat straw were in small supply and firm but quiet. Hay (federal grades): Timothy—No. 1, nominal; No. 2, \$17.50@18.50; No. 3, \$15.50@16.50; sample, \$10@15. Light clover mixed—No. 1, \$16.50@17.50; No. 2, \$14.50@15.50; No. 3, \$12@14. Medium clover mixed—No. 1, \$14.50@15.50; No. 2, \$13@14. Heavy clover mixed—No. 1, \$14@15. Light grass mixed—No. 1, \$16.50@17.50. Straw—Straight rye, \$17.50@18; wheat, \$15@15.50; oat, \$14@14.50.

BOSTON.

June 20.—No. 1 timothy, \$25.50@26; No. 2 timothy, \$22@24; No. 3 timothy, \$17@19; eastern, \$16@23; clover mixed, \$21@24. Straw—Rye, \$21@22; oat, \$13@15.

PORTLAND, ORE.

June 18.—Buying prices f. o. b. Portland: Alfalfa, \$19@20 ton; valley timothy, \$20@21; eastern Oregon timothy, \$23@24; clover, \$16.50@17; oats, \$19@20; oats and vetch hay, \$19@20; straw, \$8@8.50.

NEW YORK.

June 18.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

Hay Straw
Receipts for week, tons..... 2,001 20
Receipts last week 1,085 55
Receipts from Sept. 1st, tons. 49,306 1,097

With heavy receipts of rail and boat hay and a corresponding increase in offerings, values show some loss over the week. Demand has been limited and with prices barely steady buyers have been inclined to confine purchases to immediate needs. A very large percentage of stocks arriving and on hand is nearby State hay grading No. 3 down, ranging in value from \$18 to \$21 and prices on these classes especially have tended to weakness. Better quality hay, and particularly No. 1 hay, both large and small bales, has ruled scarce at all times, in active demand at all markets and values on this quality have held comparatively steady. Generally speaking prices at Brooklyn and Manhattan are about on a par with the possible exception of track delivery stations at which points concessions have been made to minimize demurrage charges.

Rye straw in much heavier supply and light demand. Prices weak and easier. Invoices reported light to moderate.

Federal grade quotations for large bales are as follows: Timothy—No. 1, \$25; No. 2, \$22@23; No. 3, \$18@20. Light clover mixed—No. 1, \$22@23; No. 2, \$18@20; No. 15@17. Medium clover mixed—No. 1, \$18@20; No. 2, \$16@17. Light grass mixed, \$22@23; No. 2, \$18@20; No. 3, \$15@16. Heavy grass mixed, \$15@16. Rye straw, \$16@17.

OMAHA.

June 19.—Prairie hay receipts fair. Demand steady on better grades. Prices strong. Poor hay slow sale at any price. Hot and heating prairie only moves at sacrifice. Alfalfa—Receipts light. Demand good for all grades if sound. Some out of condition; new alfalfa coming in and can only move at heavy discount. Prices strong.

Prices below are for carload lots:
Upland Prairie—No. 1, \$12 to \$12.50; No. 2, \$10.00 to \$11.00; No. 3, \$7.00 to \$8.00. Midland Prairie—No. 1, \$11.00 to \$12.00; No. 2, \$9.00 to \$10.00; No. 3, \$7.00 to \$8.00. Lowland Prairie—No. 1, \$7.00 to \$8.00; No. 2, \$6.00 to \$7.00. Choice alfalfa, \$18.50; No. 1,

\$16.00 to \$17.50; standard, \$13.50 to \$16.00; No. 2, \$11.00 to \$13.00; No. 3, \$9.00 to \$10.00. Straw—Oat, \$7.00 to \$8.00; wheat, \$6.00 to \$7.00.

CHICAGO.

June 22.—Receipts today light for Monday, there being only 26 cars placed. The market ruled strong with the better grades \$1.00 per ton higher. Prices now are no doubt better than they will be later on. Prairie hay wanted. Straw firm.

Timothy—No. 1, \$24@26; No. 2, \$20@22; No. 3, \$16@19. Timothy and clover, light mixed, No. 1, \$22@24; No. 2, \$19@21; No. 3, \$15@17. Timothy and clover, heavy mixed—No. 1, \$17@19; No. 2, \$15@17; No. 3, \$14@15. Timothy and clover, medium mixed—No. 1, \$18@20; No. 2, \$17@18; No. 3, \$14@16. Timothy and grass, light mixed—No. 1, \$20@22; No. 2, \$18@19; No. 3, \$14@16. Timothy and grass, heavy mixed—No. 1, \$17@19; No. 2, \$15@16; No. 3, \$14@15. Timothy grass and clover mixed—No. 1, \$17@18; No. 2, \$15@16; No. 3, \$13@14. Clover—No. 1, \$15@16; No. 2, \$13@14; No. 3, \$10@12. Sample grade hay—No. 1, \$9@14. Alfalfa—No. 1, \$14@25. Prairie—Ill., Ind., Wis. feeding—No. 1, \$13@15. Packing—No. 1, \$12@14. No. 2 to Ch. Kansas, Okla., Mo., \$15@17; No. 3 weedy and off color, \$11@13; No. 2 to Ch. Nebraska, \$13@16. Straw—Rye, \$12@14; oat, \$10@11; wheat, \$9@10.

ST. LOUIS, MO.

June 22.—The arrivals of hay continue to be light. The market has a strong tendency for high grades and under good demand. In our opinion quick shipments will bring good money, and we advise hurrying hay to the market.

Clover—None arriving. Stronger market and low grades will sell to better advantage.

Alfalfa—Choice qualities in demand. Medium and lower grades in fair demand only.

Prairie—Best grades selling to advantage. No. 2 and lower grades steady.

Straw—Strong.
No. 1 timothy, \$24@25; standard timothy, \$21@23; No. 2 timothy, \$18@20; No. 3 and sample, \$12@15; No. 1 clover mixed, \$19@21; No. 2 clover mixed, \$16@18; heavy mixed, \$16@18; No. 1 clover, \$17@19; No. 2 clover, \$14@16; threshed hay, \$11@13; choice alfalfa, \$24@26; No. 1 alfalfa, \$22@24; standard alfalfa, \$16@18; No. 2 alfalfa, \$13@15; No. 1 prairie, \$15@16; No. 2 prairie, \$12@14; rye straw, \$10@11; wheat straw, \$9@10.

CHICAGO HAY NOTES.

Extremely light arrivals, not sufficient to supply demand, and prices irregularly higher. It looks at this time as if farmers are too busy in the corn field to pay any attention to the advancing prices on hay. We regard this as an opportune time for those in a position to do so to send their hay in. This applies to all grades, also straw shipments.—E. W. Bailey & Co.

Not enough hay shown to establish a market. Prices irregular; in the main above top of quotations. Country loadings very light. Crop reports much more satisfactory, although yield will be considerably below normal. Prairie and marsh—active demand. Straw—All kinds wanted.—Bridge & Leonard.

Rain throughout most of the surrounding states is helping the pasture and should have a tendency to relieve the anxiety of farmers. It is quite possible, therefore, that inside of a week or ten days more hay will be offered. Should this occur prices may now be at the top. If you have hay to market and can load out now our advice is to do so. Don't believe you can afford to pass up present good prices.—Albert Miller & Co.

Installing Alfalfa Mill.

Hereford, Texas, is to have an alfalfa mill which will be erected this summer by Dr. G. W. Heard, who has farming for his hobby. The plans are being drawn now for the mill, and it is expected to be ready for operation by late summer. It will be located on Heard's irrigation farm two and a half miles from Hereford.

Dr. Heard now has ten acres of fine alfalfa with forty acres that was sowed this spring. His new mill will be large enough to take care of his own crop and handle a part of his neighbors' yield.

Big S. D. Alfalfa Field.

John Hemmer and K. S. Miller, Chicago men, who have undertaken the cultivation of a large tract of land in Fall River County, South Dakota, which they own, have put into certified Grimm alfalfa 1,230 acres. Some of this was sowed last year. This is probably the largest acreage of certified Grimm in the state.

MICHIGAN HAY EXTREMELY SHORT

Further Advices to Albert Miller & Co. Reveal the Critical Situation on the General Line of Farm Crops in Michigan.

IN season of extreme crop damage, private reports always anticipate confirming data from the Government. Hay crop reports and reduced acreage surveyed in the PRICE CURRENT-GRAIN REPORTER of May 27, indicated a rather definite line on the new hay crop.

John H. Devlin, president of the Chicago Hay Exchange, and directing the hay department of Albert Miller & Co., has secured further data on the Michigan situation in the southern half of the state below Bay City as follows:

Owosso, Mich.—50 per cent crop in south half and 15 per cent in north half of state.

Mt. Pleasant, Mich.—50 per cent of last year's crop in farmers' hands. This year many are pasturing their meadows.

Snover, Mich.—Hay and wheat 25 per cent of normal crop.

Dorr, Mich.—New crop very short. Old crop well cleaned up.

Flint, Mich.—Will not have half crop. About 15 to 20 per cent old crop yet on hand.

West Branch, Mich.—New seeding looks good but old meadows are looking bad. Farmers still have one-third of last year's crop on hand.

Chesaning, Mich.—Hay crop will be very short.

Bangor, Mich.—Hay crop is a failure. Estimate same at not more than 50 per cent. Considerable of last year's hay still unsold.

Perry, Mich.—Old crop cleaned up. About half a crop for the new.

Portland, Mich.—First cutting about two-thirds of normal. New seedings nearly wiped out.

Fremont, Mich.—Clover and timothy is almost failure, alfalfa looking fairly good. Carrying over a lot of old hay.

Casnovia, Mich.—Hay crop will be lightest ever had. Considerable old hay in barns.

Lansing, Mich.—Hay will not average more than 300 lbs. per acre. First cutting alfalfa light.

Constantine, Mich.—Hay crop very short. Clover and timothy hurt more than alfalfa.

Emmett, Mich.—Very little, if any, new hay crop.

Adrian, Mich.—Old crop about cleaned up. Probably a great number of meadows will not be cut.

Melvin, Mich.—Old meadows hardly good enough for pasture. Section nearest a drought than it has ever been.

Allegan, Mich.—25 per cent old crop carried over. New crop not over 25 per cent normal.

Jackson, Mich.—Hay will be a very short crop. Timothy, mixed hay and clover near total failure. First cutting alfalfa about 50 per cent normal.

Sunfield, Mich.—New crop hay will be very light. 40 per cent of old crop left in barns.

Chelsea, Mich.—First cutting of alfalfa very light. Clover so short farmers unable to gather it after cut. Timothy not worth cutting.

Britton, Mich.—Hay crop 50 per cent normal. Alfalfa making about half ton per acre. Old crop all fed or shipped.

Addison, Mich.—There will be very little, if any, of 1925 hay crop marketed. Farmers buying baled hay back from ship-pers.

Jonah, Mich.—Smallest hay crop in years. Ypsilanti, Mich.—No timothy. Clover heading out close to ground.

Scottville, Mich.—One-third old crop left. New hay one-third per cent normal.

Big Rapids, Mich.—Indications point to the poorest hay crop in years with perhaps a little more than normal holdover.

Eaton Rapids, Mich.—Hay will not average one-half ton per acre.

Mendon, Mich.—Timothy and clover hay almost complete failure. Expect one quarter to one-third crop. First cutting alfalfa 50 per cent of last year.

Charlotte, Mich.—Hay crop will not be over 50 per cent normal.

Bay City, Mich.—Hay crop short of other years.

RESOLUTIONS OF RESPECT.

The Memorial Committee of the National Hay Association, through appropriate resolutions, take note of the death of two of that organization's members, R. Hughes Worke, of Nashville, Tenn., and Albert W. Bundy, of Pittsburgh, Pa.

Time to Seed Alfalfa.

If fall seeding of alfalfa is deferred till the first week in September, there is some danger of not getting a sufficiently strong stand to go through the winter unharmed, but if the seed can be gotten into the ground by the tenth or fifteenth

American
Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

American Steel & Wire
Company

Provisions, Etc.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at the seven leading western markets and thirteen other points for the week with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past wk.	187,000	637,000	219,000	1,043,000
Prev. wk.	228,000	656,000	215,000	1,099,000
1924	255,000	830,000	249,000	1,334,000
1923	223,000	723,000	242,000	1,188,000
1922	248,000	706,000	219,000	1,173,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	All kinds.
1925..	5,677,000	17,957,000	6,296,000	29,930,000
1924..	5,843,000	21,680,000	5,930,000	33,453,000
1923..	5,818,000	20,938,000	6,277,000	33,033,000
1922..	5,476,000	16,361,000	5,935,000	27,712,000

CHICAGO PROVISION REVIEW.

CHICAGO, June 22.—A larger speculative and cash trade, both domestic and export, was on in hog products last week, with an irregular range of prices and a more confident feeling among traders. Hogs advanced sharply under lighter receipts and the close on provision futures was at about the highest of the week with net gains of 5 to 7½c on lard, 10 to 15c on short ribs and 40c on bellies. On Saturday trading was unusually heavy, one house selling 4,000,000 lbs. of lard after being a buyer most of the week. It was taken in round lots, one buyer taking 1,750,000 lbs. and another 1,000,000 lbs.

Packers were active on both sides of the market, doing considerable buying on weak spots and speculators, who were the most prominent sellers early in the week were the best buyers to cover shorts later. Hogs advanced to \$13.25, the highest in several weeks, which frightened the shorts.

Consumptive demand for hog products has reduced stocks of packers considerably of late and one of the smaller

concerns reports that he has cut down his supplies 20 per cent within a few weeks. Hams and shoulders met with more demand and side meats generally have come into more favor with the trade, yet the week's shipments of both lard and meats were less than the previous weeks. Foreign news was mixed, deferred futures of lard values stronger at the last. Prices in leading markets follow:

	High.	Low.	1925.	1924.	1923.

CANADIAN VISIBLE.

Canadian visible supply of wheat decreased 1,010,000 bus. and oats 808,000 bus. last week. These statistics represent terminal stocks only:

	June 20, 1925.	June 13, 1925.	June 21, 1924.
Wheat	27,291,000	28,301,000	21,800,000
Oats	6,304,000	7,112,000	8,965,000
Barley	2,134,000	2,509,000	1,505,000
Rye	2,184,000	2,205,000	1,086,000

BEAN ACREAGE LARGE.

NAPLES, N. Y.—There has been a good demand for seed beans this season. Our stock of old beans is very nearly cleaned up. The bean acreage in this section is very large, the canning factory contracting about half the acreage planted.—*Naples Produce Co., Inc.*

HOG SLAUGHTERINGS.

The reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed in the West in the summer season beginning Mar. 2, 1925, compared with the same period of previous year:

	Through June 20, 1925.	Through June 14, 1924.
Chicago	1,496,200	2,219,100
Kansas City	482,400	722,100
Omaha	817,800	1,076,000
St. Louis	847,500	1,019,800
South St. Joseph	289,500	417,300
Indianapolis	353,300	437,800

Wheat	75,384	504,433
Oats	179,600	651,165
Rye	44,505	311,510
Corn	100,259	12,550

Grain Door Chopping Ended!

It's no longer necessary to chop your way into a car of grain! This tool *pushes* the doors in quickly and easily—entire sections at a time, without breakage. The

PETERSON *Pneumatic* Grain Door Remover

does in two minutes what it formerly took two men to do in 15 minutes to half-an-hour. With 100 lbs. air pressure it exerts 6000 lbs. pressure on the door. Surplus air available for cleaning, signalling, etc. *Many large elevators have found that the Peterson soon pays for itself in saving time and reducing unloading costs.*

Peterson Grain Door Remover
Manufactured under License

PANK Grain Door Remover

This simple, powerful tool costs less than any similar machine on the market. Turning the fly wheel develops all the pressure needed to open any door or entire section. Installed in either new or old elevators.

Write for our special catalog on grain door removers.

Heavy Auto Truck Weighing is *not* a "Wagon Scale" Job

EACH year brings more auto trucks, heavier auto trucks. And the problem of weighing them keeps pace. Auto truck loads are not only greater, but heavily concentrated on the rear wheels of the truck, making the shock on the scale doubly severe. It is a new problem—a problem that cannot be solved by a "wagon scale."

But the coming of the auto truck did not present a new problem to Fairbanks. For years Fairbanks Scales had been built for weighing railway cars and enormous hoppers of grain in elevators—harder service than is ever encountered in weighing auto trucks.

It was simply necessary to incorporate the railway track scale principle in the Fairbanks Auto Truck Scale—and the resulting rugged-

ness, a new degree of ruggedness for scales of this type is clearly demonstrated in the better service these scales are giving.

Within a very short time—if not now—you must face the problem of installing a heavy scale. And it is simply good business to install a scale that will meet the hardest possible service for a lifetime.

Auto trucks are being used in ever-increasing numbers for hauling grain. Hundreds of dealers are prepared to handle their trade economically and safely on Type "S" Scales.

One of our representatives will show you why the heavy weighing of today demands this super scale. The coupon will bring your copy of the informative booklet, "A Talk on Scales."
